Competency Based Training (CBT) and assessment – An introduction for trainers

Competency

Competency refers to the ability to perform particular tasks and duties to the standard of performance expected in the workplace.

Competency requires the application of specified knowledge, skills and attitudes relevant to effective participation, consistently over time and in the workplace environment.

The essential skills and knowledge are either identified separately or combined.

Knowledge identifies what a person needs to know to perform the work in an informed and effective manner.

Skills describe the application of knowledge to situations where understanding is converted into a workplace outcome.

Attitude describes the founding reasons behind the need for certain knowledge or why skills are performed in a specified manner.

Competency covers all aspects of workplace performance and involves:

- Performing individual tasks
- Managing a range of different tasks
- Responding to contingencies or breakdowns
- Dealing with the responsibilities of the workplace
- Working with others.

Unit of Competency

Like with any training qualification or program, a range of subject topics are identified that focus on the ability in a certain work area, responsibility or function.

Each manual focuses on a specific unit of competency that applies in the hospitality workplace.

In this manual a unit of competency is identified as a 'unit'.

Each unit of competency identifies a discrete workplace requirement and includes:

- Knowledge and skills that underpin competency
- Language, literacy and numeracy
- Occupational health and safety requirements.

Each unit of competency must be adhered to in training and assessment to ensure consistency of outcomes.

Element of Competency

An element of competency describes the essential outcomes within a unit of competency.

The elements of competency are the basic building blocks of the unit of competency. They describe in terms of outcomes the significant functions and tasks that make up the competency.

In this manual elements of competency are identified as an 'element'.

Performance criteria

Performance criteria indicate the standard of performance that is required to demonstrate achievement within an element of competency. The standards reflect identified industry skill needs.

Performance criteria will be made up of certain specified skills, knowledge and attitudes.

Learning

For the purpose of this manual learning incorporates two key activities:

- Training
- Assessment.

Both of these activities will be discussed in detail in this introduction.

Today training and assessment can be delivered in a variety of ways. It may be provided to participants:

- On-the-job – in the workplace
- Off-the-job – at an educational institution or dedicated training environment
- As a combination of these two options.

No longer is it necessary for learners to be absent from the workplace for long periods of time in order to obtain recognised and accredited qualifications.

Learning Approaches

This manual will identify two avenues to facilitate learning:

Competency Based Training (CBT)

This is the strategy of developing a participant's competency.

Educational institutions utilise a range of training strategies to ensure that participants are able to gain the knowledge and skills required for successful:

- Completion of the training program or qualification
- Implementation in the workplace.

The strategies selected should be chosen based on suitability and the learning styles of participants.

Competency Based Assessment (CBA)

This is the strategy of assessing competency of a participant.

Educational institutions utilise a range of assessment strategies to ensure that participants are assessed in a manner that demonstrates validity, fairness, reliability, flexibility and fairness of assessment processes.

Flexibility in Learning

It is important to note that flexibility in training and assessment strategies is required to meet the needs of participants who may have learning difficulties. The strategies used will vary, taking into account the needs of individual participants with learning difficulties. However they will be applied in a manner which does not discriminate against the participant or the participant body as a whole.

Catering for Participant Diversity

Participants have diverse backgrounds, needs and interests. When planning training and assessment activities to cater for individual differences, trainers and assessors should:

- Consider individuals' experiences, learning styles and interests
- Develop questions and activities that are aimed at different levels of ability
- Modify the expectations for some participants
- Provide opportunities for a variety of forms of participation, such as individual, pair and small group activities
- Assess participants based on individual progress and outcomes.

The diversity among participants also provides a good reason for building up a learning community in which participants support each other's learning.

Participant Centred Learning

This involves taking into account structuring training and assessment that:

- *Builds on strengths* – Training environments need to demonstrate the many positive features of local participants (such as the attribution of academic success to effort, and the social nature of achievement motivation) and of their trainers (such as a strong emphasis on subject disciplines and moral responsibility). These strengths and uniqueness of local participants and trainers should be acknowledged and treasured
- *Acknowledges prior knowledge and experience* – The learning activities should be planned with participants' prior knowledge and experience in mind
- *Understands learning objectives* – Each learning activity should have clear learning objectives and participants should be informed of them at the outset. Trainers should also be clear about the purpose of assignments and explain their significance to participants
- *Teaches for understanding* – The pedagogies chosen should aim at enabling participants to act and think flexibly with what they know
- *Teaches for independent learning* – Generic skills and reflection should be nurtured through learning activities in appropriate contexts of the curriculum. Participants should be encouraged to take responsibility for their own learning
- *Enhances motivation* – Learning is most effective when participants are motivated. Various strategies should be used to arouse the interest of participants

- *Makes effective use of resources* – A variety of teaching resources can be employed as tools for learning
- *Maximises engagement* – In conducting learning activities, it is important for the minds of participants to be actively engaged
- *Aligns assessment with learning and teaching* – Feedback and assessment should be an integral part of learning and teaching
- *Caters for learner diversity* – Trainers should be aware that participants have different characteristics and strengths and try to nurture these rather than impose a standard set of expectations.

Active Learning

The goal of nurturing independent learning in participants does not imply that they always have to work in isolation or solely in a classroom. On the contrary, the construction of knowledge in tourism and hospitality studies can often best be carried out in collaboration with others in the field. Sharing experiences, insights and views on issues of common concern, and working together to collect information through conducting investigative studies in the field (active learning) can contribute a lot to their eventual success.

Active learning has an important part to play in fostering a sense of community in the class. First, to operate successfully, a learning community requires an ethos of acceptance and a sense of trust among participants, and between them and their trainers. Trainers can help to foster acceptance and trust through encouragement and personal example, and by allowing participants to take risks as they explore and articulate their views, however immature these may appear to be. Participants also come to realise that their classmates (and their trainers) are partners in learning and solving.

Trainers can also encourage cooperative learning by designing appropriate group learning tasks, which include, for example, collecting background information, conducting small-scale surveys, or producing media presentations on certain issues and themes. Participants need to be reminded that, while they should work towards successful completion of the field tasks, developing positive peer relationships in the process is an important objective of all group work.

Competency Based Training (CBT)

Principle of Competency Based Training

Competency based training is aimed at developing the knowledge, skills and attitudes of participants, through a variety of training tools.

Training Strategies

The aims of this curriculum are to enable participants to:

- Undertake a variety of subject courses that are relevant to industry in the current environment
- Learn current industry skills, information and trends relevant to industry
- Learn through a range of practical and theoretical approaches
- Be able to identify, explore and solve issues in a productive manner

- Be able to become confident, equipped and flexible managers of the future
- Be 'job ready' and a valuable employee in the industry upon graduation of any qualification level.

To ensure participants are able to gain the knowledge and skills required to meet competency in each unit of competency in the qualification, a range of training delivery modes are used.

Types of Training

In choosing learning and teaching strategies, trainers should take into account the practical, complex and multi-disciplinary nature of the subject area, as well as their participant's prior knowledge, learning styles and abilities.

Training outcomes can be attained by utilising one or more delivery methods:

Lecture/Tutorial

This is a common method of training involving transfer of information from the trainer to the participants. It is an effective approach to introduce new concepts or information to the learners and also to build upon the existing knowledge. The listener is expected to reflect on the subject and seek clarifications on the doubts.

Demonstration

Demonstration is a very effective training method that involves a trainer showing a participant how to perform a task or activity. Through a visual demonstration, trainers may also explain reasoning behind certain actions or provide supplementary information to help facilitate understanding.

Group Discussions

Brainstorming in which all the members in a group express their ideas, views and opinions on a given topic. It is a free flow and exchange of knowledge among the participants and the trainer. The discussion is carried out by the group on the basis of their own experience, perceptions and values. This will facilitate acquiring new knowledge. When everybody is expected to participate in the group discussion, even the introverted persons will also get stimulated and try to articulate their feelings.

The ideas that emerge in the discussions should be noted down and presentations are to be made by the groups. Sometimes consensus needs to be arrived at on a given topic. Group discussions are to be held under the moderation of a leader guided by the trainer. Group discussion technique triggers thinking process, encourages interactions and enhances communication skills.

Role Play

This is a common and very effective method of bringing into the classroom real life situations, which may not otherwise be possible. Participants are made to enact a particular role so as to give a real feel of the roles they may be called upon to play. This enables participants to understand the behaviour of others as well as their own emotions and feelings. The instructor must brief the role players on what is expected of them. The role player may either be given a ready-made script, which they can memorise and enact, or they may be required to develop their own scripts around a given situation. This technique is extremely useful in understanding creative selling techniques and human relations. It can be entertaining and energising and it helps the reserved and less literate to express their feelings.

Simulation Games

When trainees need to become aware of something that they have not been conscious of, simulations can be a useful mechanism. Simulation games are a method based on "here and now" experience shared by all the participants. The games focus on the participation of the trainees and their willingness to share their ideas with others. A "near real life" situation is created providing an opportunity to which they apply themselves by adopting certain behaviour. They then experience the impact of their behaviour on the situation. It is carried out to generate responses and reactions based on the real feelings of the participants, which are subsequently analysed by the trainer.

While use of simulation games can result in very effective learning, it needs considerable trainer competence to analyse the situations.

Individual /Group Exercises

Exercises are often introduced to find out how much the participant has assimilated. This method involves imparting instructions to participants on a particular subject through use of written exercises. In the group exercises, the entire class is divided into small groups, and members are asked to collaborate to arrive at a consensus or solution to a problem.

Case Study

This is a training method that enables the trainer and the participant to experience a real life situation. It may be on account of events in the past or situations in the present, in which there may be one or more problems to be solved and decisions to be taken. The basic objective of a case study is to help participants diagnose, analyse and/or solve a particular problem and to make them internalise the critical inputs delivered in the training. Questions are generally given at the end of the case study to direct the participants and to stimulate their thinking towards possible solutions. Studies may be presented in written or verbal form.

Field Visit

This involves a carefully planned visit or tour to a place of learning or interest. The idea is to give first-hand knowledge by personal observation of field situations, and to relate theory with practice. The emphasis is on observing, exploring, asking questions and understanding. The trainer should remember to brief the participants about what they should observe and about the customs and norms that need to be respected.

Group Presentation

The participants are asked to work in groups and produce the results and findings of their group work to the members of another sub-group. By this method participants get a good picture of each other's views and perceptions on the topic and they are able to compare them with their own point of view. The pooling and sharing of findings enriches the discussion and learning process.

Practice Sessions

This method is of paramount importance for skills training. Participants are provided with an opportunity to practice in a controlled situation what they have learnt. It could be real life or through a make-believe situation.

Games

This is a group process and includes those methods that involve usually fun-based activity, aimed at conveying feelings and experiences, which are everyday in nature, and applying them within the game being played. A game has set rules and regulations, and may or may not include a competitive element. After the game is played, it is essential that the participants be debriefed and their lessons and experiences consolidated by the trainer.

Research

Trainers may require learners to undertake research activities, including online research, to gather information or further understanding about a specific subject area.

Competency Based Assessment (CBA)

Principle of Competency Based Assessment

Competency based assessment is aimed at compiling a list of evidence that shows that a person is competent in a particular unit of competency.

Competencies are gained through a multitude of ways including:

- Training and development programs
- Formal education
- Life experience
- Apprenticeships
- On-the-job experience
- Self-help programs.

All of these together contribute to job competence in a person. Ultimately, assessors and participants work together, through the 'collection of evidence' in determining overall competence.

This evidence can be collected:

- Using different formats
- Using different people
- Collected over a period of time.

The assessor, who is ideally someone with considerable experience in the area being assessed, reviews the evidence and verifies the person as being competent or not.

Flexibility in Assessment

Whilst allocated assessment tools have been identified for this subject, all attempts are made to determine competency and suitable alternate assessment tools may be used, according to the requirements of the participant.

The assessment needs to be equitable for all participants, taking into account their cultural and linguistic needs.

Competency must be proven regardless of:

- Language
- Delivery Method
- Assessment Method.

Assessment Objectives

The assessment tools used for subjects are designed to determine competency against the 'elements of competency' and their associated 'performance criteria'.

The assessment tools are used to identify sufficient:

- a) Knowledge, including underpinning knowledge
- b) Skills
- c) Attitudes

Assessment tools are activities that trainees are required to undertake to prove participant competency in this subject.

All assessments must be completed satisfactorily for participants to obtain competence in this subject. There are no exceptions to this requirement, however, it is possible that in some cases several assessment items may be combined and assessed together.

Types of Assessment

Allocated Assessment Tools

There are a number of assessment tools that are used to determine competency in this subject:

- Work projects
- Written questions
- Oral questions
- Third Party Report
- Observation Checklist.

Instructions on how assessors should conduct these assessment methods are explained in the Assessment Manuals.

Alternative Assessment Tools

Whilst this subject has identified assessment tools, as indicated above, this does not restrict the assessor from using different assessment methods to measure the competency of a participant.

Evidence is simply proof that the assessor gathers to show participants can actually do what they are required to do.

Whilst there is a distinct requirement for participants to demonstrate competency, there are many and diverse sources of evidence available to the assessor.

Ongoing performance at work, as verified by a supervisor or physical evidence, can count towards assessment. Additionally, the assessor can talk to customers or work colleagues to gather evidence about performance.

A range of assessment methods to assess competency include:

- Practical demonstrations
- Practical demonstrations in simulated work conditions
- Problem solving
- Portfolios of evidence
- Critical incident reports
- Journals
- Oral presentations
- Interviews
- Videos
- Visuals: slides, audio tapes
- Case studies
- Log books
- Projects
- Role plays
- Group projects
- Group discussions
- Examinations.

Recognition of Prior Learning

Recognition of Prior Learning is the process that gives current industry professionals who do not have a formal qualification, the opportunity to benchmark their extensive skills and experience against the standards set out in each unit of competency/subject.

Also known as a Skills Recognition Audit (SRA), this process is a learning and assessment pathway which encompasses:

- Recognition of Current Competencies (RCC)
- Skills auditing
- Gap analysis and training
- Credit transfer.

Assessing competency

As mentioned, assessment is the process of identifying a participant's current knowledge, skills and attitudes sets against all elements of competency within a unit of competency. Traditionally in education, grades or marks were given to participants, dependent on how many questions the participant successfully answered in an assessment tool.

Competency based assessment does not award grades, but simply identifies if the participant has the knowledge, skills and attitudes to undertake the required task to the specified standard.

Therefore, when assessing competency, an assessor has two possible results that can be awarded:

- Pass Competent (PC)
- Not Yet Competent (NYC).

Pass Competent (PC)

If the participant is able to successfully answer or demonstrate what is required, to the expected standards of the performance criteria, they will be deemed as 'Pass Competent' (PC).

The assessor will award a 'Pass Competent' (PC) if they feel the participant has the necessary knowledge, skills and attitudes in all assessment tasks for a unit.

Not Yet Competent' (NYC)

If the participant is unable to answer or demonstrate competency to the desired standard, they will be deemed to be 'Not Yet Competent' (NYC).

This does not mean the participant will need to complete all the assessment tasks again. The focus will be on the specific assessment tasks that were not performed to the expected standards.

The participant may be required to:

- a) Undertake further training or instruction
- b) Undertake the assessment task again until they are deemed to be 'Pass Competent'.

Competency standard

UNIT TITLE: PREPARE AND COOK SEAFOOD		NOMINAL HOURS: 35
UNIT NUMBER: D1.HCC.CL2.10		
UNIT DESCRIPTOR: This unit deals with skills and knowledge required by cooks and chefs to identify, prepare, cook, present and store a variety of fish and shellfish in commercial food production environments		
ELEMENTS AND PERFORMANCE CRITERIA		UNIT VARIABLE AND ASSESSMENT GUIDE
Element 1: Identify and select fish varieties 1.1 Identify a selection of <i>fish varieties</i> 1.2 Identify <i>commercial cuts of fish</i> for menus 1.3 Identify and <i>select suppliers</i> for purchasing of products 1.4 <i>Minimise wastage</i> through correct purchasing 1.5 Identify costs through <i>yield testing</i> Element 2: Identify and select shellfish varieties 2.1 Identify <i>shellfish varieties</i> 2.2 Identify <i>commercial cuts of shellfish</i> for menus 2.3 Identify and select suppliers for purchasing of products 2.4 Minimise wastage through correct purchasing 2.5 Identify costs through yield testing		Unit Variables The Unit Variables provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. It relates to the unit as a whole and facilitates holistic assessment This unit applies to all industry sectors that prepare and cook seafood within the labour divisions of the hotel and travel industries and may include: - Food Production. <i>Fish varieties</i> may be related to: - Shape, such as flat or round - Flesh, such as oily or white - Habitat, such as fresh or salt water - Seasonality, such as spawning, breeding seasons, supply and demand, weather conditions and cultural and religious events. <i>Commercial cuts of fish</i> should include classical and contemporary cuts of fish and relate to: - Menu needs - Cooking methods

Element 3: Prepare fish and shellfish 3.1 <i>Prepare and portion</i> fish and shellfish products to enterprise requirements 3.2 Minimise wastage/trimmings through appropriate <i>preparation and storage</i> 3.3 Identify and use correct <i>equipment</i> 3.4 <i>Hold and kill</i> live seafood humanely and to regulations Element 4: Cook and present seafood 4.1 Select appropriate <i>cooking method</i> to fish variety and cuts 4.2 <i>Prepare</i> and cook following standard recipes within a commercial environment 4.3 <i>Hold</i> prepared products as required prior to presenting 4.4 <i>Present</i> fish and shellfish, including slice/carve and portion size 4.5 Prepare <i>garnishes, sauces and accompaniments</i> for fish and shellfish dishes Element 5: Store fish and shellfish to enterprise requirements 5.1 Fresh and/or Cryovac items are <i>stored</i> correctly 5.2 Prepare and maintain correct <i>thawing</i> of fish and shellfish 5.3 Fish and shellfish are appropriately <i>stored in correct containers</i>	• Fish varieties • Portion size. <i>Select suppliers</i> may be related to: • Local, regional and international supply • Delivery requirements • Cost, trading terms • Relationship • Product range/variety. <i>Minimise wastage</i> should include: • Storage space available • Volume requirements, such as a la carte, functions and specials • First In, First Out (FIFO) • Receiving times, as needed • Quality points, such as appearance, colour, gills, eyes, odour and scales. <i>Yield testing</i> may include: • Filleting and skinning • Portion weights • Off-cut usage • <i>Staff skills</i> <i>Shellfish varieties</i> may relate to: • Crustaceans, such as jointed limb and hard exterior shell • Molluscs, such as soft bodied, protective shells, external or internal and single or bivalve.
---	---

5.4 Fish and shellfish are correctly *labelled*

5.5 Ensure *correct conditions* are maintained for freshness and quality

Commercial cuts of shellfish should relate to:

- Menu needs
- Cooking methods
- Raw or green, cooked and shell on/off
- Whole, meat only, tubes and rings
- Portion size.

Prepare and portion may relate to:

- Scale, gut, scrape, fillet and skin
- Clean shells and shuck
- Slice, dice, skewer, smoke, marinate, pickle, sousing and truss
- Cuts, such as whole, fillet, cutlet, supreme, darne (portion) and paupiette (rolled stuffed fish)

Preparation and storage may relate to:

- Cut and trim
- Portion control
- Stocks, soups, sauces, terrines and mousseline (sauce)
- Stock rotation e.g. First in, first out
- Temperature control
- Ice packed.

Equipment may include:

- Electric, gas or induction stoves
- Steamers, such as pressure, atmospheric, bamboo and fish kettle
- Salamanders

	• Smokers • Grills, such as flat top, char and barbeque (BBQ) • Ovens, conveyer ovens and combination ovens • Deep fry, such as pressure fryer • Microwave • Food processors, mixers, mincers and bowl choppers • Drum sieve and strainers • Utensils. <i>Hold and kill</i> may be relate to: • Storage equipment • Holding conditions • Holding equipment • Enterprise and government legislation. <i>Cooking method</i> may relate to: • Poaching e.g. For paupiette (rolled stuffed fish) • Steaming e.g. For delice • Boiling e.g. For fillet • Grilling e.g. For supreme • Baking e.g. For whole • Braising e.g. For darne (portion) • Deep and shallow frying, e.g. For goujon • Other methods appropriate to cultural style.
--	---

	<i>Prepare</i> should relate to: • Cleaning, skinning and trimming • Cutting of ingredients/flavourings • Portioning, minimising wastage and applying correct timing • Using standard recipes • Applying recipe conversions. <i>Hold</i> may relate to: • Resting, portioning and cutting • Holding equipment • Cooling procedures • Hygiene practice. <i>Present</i> should include: • Colour • Height • Texture • Service and storage temperature • Equipment • Classical and cultural • Neatly and attractively. Garnishes, sauces and accompaniments may include: • Glazing • Coating
--	---

	• Sauces and dressings • Colour and flavour blends • Cultural flavours • Herbs • Fruits • Vegetables • Pastry. <i>Stored</i> may include: • Cool room temperature • Cool room placement • Length of time in cool storage • Freezer temperature • Length of time in freezer storage • Appropriate process followed, such as Cryovac and ice packed. <i>Thawing</i> may relate to: • Enterprise and local authority requirements • Handling and cool room placement • Changing containers. Stored in correct containers must include: • Storage containers before assembly • Storage containers after assembly • Labelled
--	--

	• Consideration of freshness, quality and presentation • Temperature and humidity. <i>Labelled</i> must include: • Date • Item name • Handler name • Time, temperature and storage. Correct conditions should include: • Temperature and humidity • Stock rotation • Reporting faults • Changing containers. Assessment Guide The following skills and knowledge must be assessed as part of this unit: • Knowledge of correct preparation and cooking methods are demonstrated for fish and shellfish • Ability to identify food products by sight • Ability to match ingredient quality to intended final product/use • Knowledge of the relevant legislation in relation to food handling, food storage, chemical storage and general premises food safety • Ability to demonstrate safe knife handling skills • Ability to demonstrate safe equipment/utensil practical skills • Ability to interpret and adhere to enterprise recipes.
--	--

	Linkages To Other Units • Comply with workplace hygiene procedures • Implement occupational health and safety procedures • Prepare and store food • Work effectively with colleagues and customers • Maintain strategies for safe food • Present and display food products • Apply basic techniques of commercial cookery. Critical Aspects of Assessment Evidence of the following is essential: • Knowledge of the classifications and characteristics of fish and shellfish and the terminology used • Demonstrate safe and hygienic handling of products • Demonstrate appropriate portion control and wastage • Demonstrate complimentary presentation and garnishing techniques • Ability to prepare a variety of fish and shellfish dishes from different recipes and cultural backgrounds • Demonstrate safe knife skills and use of other associated equipment • Demonstrated ability to prepare and produce a range of seafood dishes using the cooking methods in industry realistic timeframes and constraints. Context of Assessment This unit may be assessed on or off the job: • Assessment should include practical demonstration either in the workplace or through a simulation activity, supported by a range of methods to assess underpinning knowledge • Assessment must relate to the individuals work area or area of responsibility • Demonstration of skills on more than one occasion.
--	--

	Resource Implications Training and assessment must include access and use of a fully equipped commercial kitchen; and use of real ingredients and service equipment and access to workplace standards, procedures, policies, guidelines, tools and equipment.		
	Assessment Methods The following methods may be used to assess competency for this unit: • Observation of practical candidate performance • Oral and written questions • Third party reports completed by a supervisor • Project and assignment work • Sampling of dishes prepared by the student.		
	Key Competencies in this Unit <i>Level 1 = competence to undertake tasks effectively</i> <i>Level 2 = competence to manage tasks</i> <i>Level 3 = competence to use concepts for evaluating</i>		
	Key Competencies	Level	Examples
	Collecting, organising and analysing information	2	Determine requirements of standard recipes and/or menu requirements; collect equipment, commodities and ingredients; select and obtain commodities, organise ingredients and task sheets
Communicating ideas and information	1	Share information with other kitchen and floor service staff; read recipes, menus, instructions and orders	

	Planning and organising activities	2	Complete preparation <i>mise-en-place</i> and organise for the production of seafood dishes; work within time constraints in a logical sequence
	Working with others and in teams	1	Work cooperatively with other team members
	Using mathematical ideas and techniques	1	Calculate quantities and portions against standard recipes and/or menu requirements
	Solving problems	1	Identify and correct problems in the preparation and production of seafood dishes such as ingredient quality and equipment
	Using technology	1	Use mechanical kitchen equipment including weighing equipment

Notes and PowerPoint slides

Slide

PREPARE AND COOK SEAFOOD

D1.HCC.CL2.10

Slide 1

Slide No	Trainer Notes
----------	---------------

1.	Trainer welcomes trainees to class and explained the topic for today is "Prepare and cook seafood".
----	---

Slide

Prepare and cook seafood

Assessment for this Unit may include:

- Oral questions
- Written questions
- Work projects
- Workplace observation of practical skills
- Practical exercises
- Formal report from employer/supervisor

Slide 2

Slide No	Trainer Notes
2.	Trainer advises students that assessment for this Unit may take several forms all of which are aimed at verifying they have achieved competency for the Unit as required. Trainer indicates to students the methods of assessment that will be applied to them for this Unit.

Slide

Prepare and cook seafood

This Unit comprises five elements:

1. Identify and select fish varieties
2. Identify and select shellfish varieties
3. Prepare fish and shellfish
4. Cook and present seafood
5. Store fish and shellfish to enterprise requirements

Slide 3

Slide No	Trainer Notes
3.	Trainer advises students this Unit comprises five elements, as listed on the slide explaining: • Each Element comprises a number of Performance Criteria which will be identified throughout the class and explained in detail • Students can obtain more detail from their Trainee Manual • The course presents advice and information but where their workplace requirements differ to what is presented, the workplace practices and standards must be observed.

Slide

Prepare and cook seafood

Element 1: Identify and select fish varieties

- Identify a selection of fish varieties ✓
- Identify commercial cuts of fish for menus ✓
- Identify and select suppliers for purchasing of products ✓
- Minimise wastage through correct purchasing ✓
- Identify costs through yield testing ✓

Slide 4

Slide No	Trainer Notes
----------	---------------

4.	Trainer to relate the performance criteria to element 1.
----	--

Slide

Identify and select fish varieties

Identify a selection of fish varieties

Salt water:

- Bream
- Mackerel
- Dory
- Flathead
- Snapper
- Shark

Slide 5

Slide No	Trainer Notes
5.	Trainer to advise: Students need to become familiar with the name of both freshwater and saltwater fish in the market place.

Slide

Identify and select fish varieties

Identify a selection of fish varieties

Freshwater:

- Trout
- Cod
- Barramundi
- Perch
- Redfin

Slide 6

Slide No

Trainer Notes

6.

Trainer to advise:

Even when you are in the same country like Australia fish can be the same but called by another name.

Slide

Identify and select fish varieties

Identify a selection of fish varieties

- Many species abound
- Different country : Different name : Same fish
- Develop research skills
- Identify commodity

Types:

- Flat fish – 4 fillets
- Round fish – 2 fillets

Slide 7

Slide No	Trainer Notes
7.	Trainer to advise: • Develop skills in purchasing • Develop relationship with suppliers for their guidance. Types Fish can be round or flat: • Round are the most prolific; get more flesh from larger round fish; 2 fillets • Flat fish have 4 fillets; they tend to be smaller in size.

Slide

Identify and select fish varieties

Identify a selection of fish varieties

Types:

- Flesh Colour – Dark or White
- Dark (oily) – Salmon; Mackerel; Tuna; Trout
- White – Bream; Snapper; Cod; Perch

Slide 8

Slide No	Trainer Notes
8.	Trainer to advise: • Develop skills in purchasing • Develop relationship with suppliers for their guidance. Flesh colour: • Dark flesh fish have more oil; stronger more pronounced flavours; cooked to rare in centre • White flesh have more delicate subtle flavours; need to be cooked totally.

Slide

Identify and select fish varieties

Identify a selection of fish varieties

Concerns

Problems arising from catching under-grown/under-developed seafood that are too small for use in cooking such as:

- Baby crabs
- Young fish or catching fish before their spawning seasons

Slide 9

Slide No	Trainer Notes
9.	Trainer to advise: • How can you identify and address these concerns?

Slide

Identify and select fish varieties

Identify commercial cuts of fish menus

- ⦿ French cookery: French names: meaning??
- ⦿ Darne - Fish steak or cutlet; on the bone
 - A whole round fish cut through the spine
 - ✓ Grilled or pan fried
 - ✓ Served with sauce

Slide 10

Slide No

Trainer Notes

10.

Trainer to advise:

- Darne is a cheaper cut due to amount of bone
- Not as popular in Australia as customers prefer flesh to be bone free.

Slide

Identify and select fish varieties

Identify commercial cuts of fish menus

Supreme – Cut from the best part:

- Most popular cut in restaurants
- Ease of production

Fillet – whole side of a fish:

- Sold in restaurants from smaller fish

Slide 12

Slide No	Trainer Notes
11.	Trainer to advise: • Paupiette: Thin piece of flesh with stuffing • Delice: delight; small delicate piece of flesh ▪ Not seen as much due to production costs • Goujon: pin, wooden dowel; thin strip of flesh ▪ Seen more as ease of production.

Slide

Identify and select fish varieties

Identify commercial cuts of fish menus

Supreme – Cut from the best part:

- Most popular cut in restaurants
- Ease of production

Fillet – whole side of a fish:

- Sold in restaurants from smaller fish

Slide 12

Slide No	Trainer Notes
12.	Trainer to advise: • Supremes are easiest to prepare as long as sizes are consistent ▪ Grilled; pan fried; oven baked; steamed • Fillets from smaller fish, bream, snapper, trout ▪ Grilled; pan fried; oven baked; steamed; battered or crumbed then deep fried.

Slide

Identify and select fish varieties

Identify and select suppliers for purchasing of products

- Terms of trade
- Ability to supply
- Ease of delivery
- Quality and price

Slide 13

Slide No	Trainer Notes
13.	Trainer to advise: • Terms of trade ▪ How do they expect the produce to be paid for? Immediately; 7days; monthly? • Ability to supply ▪ Can supplier supply what is required? • Ease of delivery ▪ Is the supplier local; is product local or imported; can supply be rapid; today? • Quality and price ▪ Is the quality up too standard and is the price they ask acceptable?

Slide

Identify and select fish varieties

Identify and select suppliers for purchasing of products

Environmental issues:

- It is important to consider that problems may arise due to pollution and environmental safety concerns
- For example water pollution or water which may be inhabited by sea animals that could have an adverse effect on the safety of consumers
- Where and how suppliers obtain their fish is just as important as the types and quantities of fish available

Slide 14

Slide No	Trainer Notes
----------	---------------

14.	Trainer to advise: • Discuss the importance of these points.
-----	---

Slide

Identify and select fish varieties

Minimise wastage through correct purchasing

- Purchase only what is required
- Storage of product when purchased
- Purchase product correctly

Slide 15

Slide No	Trainer Notes
15.	Trainer to advise: • Only purchase enough product that can be used within a purchasing cycle • Can the product that has been purchased be stored safely when delivered? • Has the product been purchased correctly • Size, quantity, shape, number, flavour.

Slide

Identify and select fish varieties

Identify costs through yield testing

- Whole fish
- Size of fillet
- Number of supreme portions
- Cost per serve

Slide 16

Slide No

Trainer Notes

16.

Trainer to advise:

- Yield testing is about how much product from given amount of produce
- If a whole fish is purchased or just whole fillets

Question:

- How many serves of the same size can be obtained from each fillet?
- What is the cost 'per serve' against the cost of the fillet per kilo?
- What can be done with off cuts?

Slide

Prepare and cook seafood

Element 2: Identify and select shellfish varieties

- Identify shellfish varieties ✓
- Identify commercial cuts of shellfish for menus ✓
- Identify and select suppliers for purchasing of products ✓
- Minimise wastage through correct purchasing ✓
- Identify costs through yield testing ✓

Slide 17

Slide No	Trainer Notes
17.	Trainer to relate the performance criteria to element 2.

Slide

Identify and select shellfish

Identify shellfish varieties

Crustaceans:

- Lobster – saltwater; have no claws
- Crayfish – freshwater; have claws
 - Marron – Freshwater; Western Australia
 - Redclaw – Freshwater; Northern Queensland
 - Yabby – Freshwater; South East Australia

Slide 18

Slide No

Trainer Notes

18.

Trainer to advise:

- Student need to attach names to what is available in market place
- These are names of Australian Saltwater and freshwater crustacean. Many types are available in Asian markets.

Slide

Identify and select shellfish

Identify shellfish varieties

Crustaceans:

- Moreton Bay Bug - Saltwater
- Balmain Bug - Saltwater
- Prawns - Saltwater; many varieties
- Crabs - Saltwater; many varieties
- Mud crabs – Saltwater; BIG CLAWS

Slide 19

Slide No	Trainer Notes
19.	Trainer to advise: • Moreton Bay and Balmain bug is the same species; both called Slipper Lobster; but they do look slightly different • Research this difference. • Many types of prawn in marketplace; large and small • Mud crabs: BIG claws; count your fingers before and after handling!

Slide

Identify and select shellfish

Identify commercial cuts of shellfish for menus

- Shellfish tend to be sourced whole; in the shells
- Lobsters (Southern Rock) can be purchased as:
 - Fresh live
 - Fresh cooked
 - Whole
 - Just the tail in shell; no head
 - Just meat - no head; no shell
 - Tail meat is generally frozen

Slide 20

Slide No	Trainer Notes
20.	Trainer to advise: • Lobster: some say the star of the seafood world • Expensive and enjoyed across the world • Comes in all forms; live; fresh; frozen; whole; tail in shell; tail meat only.

Slide

Identify and select shellfish

Identify commercial cuts of shellfish for menus

- Shellfish tend to be sourced whole; in the shells
- Crayfish:
 - Fresh water
 - Fresh live
 - Fresh cooked
 - Tail meat only; frozen

Slide 21

Slide No	Trainer Notes
21.	Trainer to advise: • Smaller than lobsters; crayfish are freshwater crustacean • Need more per serve; various variety. Students should research availability.

Slide

Identify and select shellfish

Identify commercial cuts of shellfish for menus

- Shellfish tend to be sourced whole; in the shells
- Crab:
 - Live; not live
 - Whole – fresh; frozen
- Mud crab:
 - Fresh
 - Live
 - Frozen meat

Slide 22

Slide No

Trainer Notes

22.

Trainer to advise:

- Crabs are available fresh frozen or canned
- Availability varies
- Check local suppliers.

Slide

Identify and select shellfish

Identify commercial cuts of shellfish for menus

- Shellfish tend to be sourced whole; in the shells
- Mussels:
 - Live; in shell
 - Meat; no shell
 - Frozen
- Pippies (Clams):
 - Fresh; in shell
 - Frozen Meat; no shell

Slide 23

Slide No	Trainer Notes
23.	Trainer to advise: • Mussels are mostly purchased live • New Zealand Green Lip Mussels are processed and frozen; frozen mussel meat is available • Need to check before cooking for dead • After cleaning plunge into cold water • If it floats; discard.

Slide

Identify and select shellfish

Identify commercial cuts of shellfish for menus

- Shellfish tend to be sourced whole; in the shells
- Scallops:
 - Fresh
 - Frozen
 - In shell
 - Roe attached
 - Frozen Scallop meat

Slide 24

Slide No

Trainer Notes

24.

Trainer to advise:

- Can be purchased fresh but these are seasonal; check with suppliers
- Scallop meat is available all years round frozen
- With roe attached
- No roe attached
- Check with suppliers.

Slide

Identify and select shellfish

Identify and select suppliers for purchasing of products

- Ease of supply
- Product quality
- Purchasing requirements

Slide 25

Slide No	Trainer Notes
25.	Trainer to advise: • Supplier must be suitable to your needs • Can you get what you need every day? • Is it fresh or frozen?

Slide

Identify and select shellfish

- Minimise wastage through correct purchasing
- Skill of staff
- Purchase only what is required
- Utilise excess product

Slide 26

Slide No	Trainer Notes
26.	Trainer to advise: • Purchase only what is required • Ensure what you receive is what you ordered.

Slide

Identify and select shellfish

Identify costs through yield testing

- What is cost per kilo?
- How many serves per kilo?
- Note wastage with shell fish

Slide 27

Slide No	Trainer Notes
27.	Trainer to advise: • When purchasing seafood portion, yield still needs to be performed • How much is going to be put into each serve? • Shell fish have a lot of waste; shells.

Slide

Prepare and cook seafood

Element 3: Prepare fish and shellfish

- Prepare and portion fish and shellfish products to enterprise requirements ✓
- Minimise wastage/trimmings through appropriate preparation and storage ✓
- Identify and use correct equipment ✓
- Hold and kill live seafood humanely and to regulations ✓

Slide 28

Slide No	Trainer Notes
----------	---------------

28.	Trainer to relate the performance criteria to element 3.
-----	--

Slide

Prepare fish and shellfish

Prepare and portion fish and shellfish products to enterprise requirements

- Portion yield
- Cost per portion
- Work involved
- Staff skills

Slide 29

Slide No	Trainer Notes
29.	Trainer to advise: • Ensure the portion size required is obtained • If portions are too small customers will not be happy and not return • If portion sizes are too large then profit margins will not be obtained; boss not happy • Are the staff capable of performing tasks competently?

Slide

Prepare fish and shellfish

Minimise wastage and trimmings through appropriate preparation and storage

- Skill level of staff
- Method of purchasing
- Customer requirements

Slide 30

Slide No	Trainer Notes
30.	Trainer to advise: If all parts of the fish are not going to be utilised then why purchase whole fish? These decisions need to be asked as it will determine requirements when setting up business. • How is food to be cooked? • Is customer going to select from live fish? • What skill level is needed in staff? • What type of customer am I going to attract?

Slide

Prepare fish and shellfish

Identify correct equipment

- Equipment for storage 'raw'
- Equipment for preparation and processing
- Equipment for cooking
- Equipment for hot holding

Slide 31

Slide No	Trainer Notes
31.	Trainer to advise: • Equipment for all steps may be required • Seafood storage areas • Cooling rooms • Workbenches and large cleaning areas • Sufficient stoves; grills; wok burners; ovens; steamers • Equipment required for hot holding; Bain Maries; hot boxes.

Slide

Prepare fish and shellfish

Hold live seafood humanely and to regulations

Live crustacean and Live fish:

- Clean tanks - no green slime on wall
- Check oxygen levels - check pH of water
- Water temperature and quality - records to be kept
- Floor space to keep tanks

(Floor space costs money)

Slide 32

Slide No	Trainer Notes
32.	Trainer to advise: • Keeping of live animals is extra work • Tanks must be clean • Water must be clean • Keeping tanks will cost extra money and extra staff cost in caring for crustaceans and fish

Slide

Prepare fish and shellfish

Kill live seafood humanely and to regulations

Live crustacean:

- Place in ice slurry for 20 minutes
- Chilling stuns the animal
- Remove from ice and knife through head between eyes
- No movement when touched

Slide 33

Slide No	Trainer Notes
33.	Trainer to advise: • Shellfish (Lobsters and crayfish) must be stunned before killing • Ice slurry (3 parts ice/1 part water) with salt for 20 minutes • Another practice is placing in freezer for 15 minutes before cooking or cutting takes place • Remove from freezer and plunge into boiling water immediately.

Slide

Prepare fish and shellfish

Kill live seafood humanely and to regulations

Live fish:

- 'Iki Jime' (Japanese method):

- Hold live fish securely
- Spike into brain and move spike to destroy brain
- Cut gills to bleed fish immediately
- Gut as needed immediately

Slide 34

Slide No	Trainer Notes
34.	Trainer to advise: • Killing live seafood humanely takes experience and expertise • If this process is going to be part of the kitchen process ensure that staff are properly trained and competent in this skill.

Slide

Prepare and cook seafood

Element 4: Cook and present seafood

- Select appropriate cooking method to fish variety and cuts ✓
- Prepare and cook following standard recipes within a commercial environment ✓
- Hold prepared products as required prior to presenting ✓
- Present fish and shellfish, including slice/carve and portion size ✓
- Prepare garnishes, sauces and accompaniments for fish and shellfish dishes ✓

Slide 35

Slide No	Trainer Notes
35.	Trainer to relate performance criteria to element 4.

Slide

Cook and present seafood

Select appropriate cooking methods to fish and varieties

Most whole fish is best to:

- Steam
- Poach
- Bake whole in banana leaves: this is actually steaming
- Fillet portions better for grilling
- Thin whole fillets

Slide 36

Slide No

Trainer Notes

36.

Trainer to advise:

Seafood and fish will can be cooked many ways:

- Whole fish: poach; steam; bake
- Portions; grill; fry; deep fry
- Off cuts and small portions: Stew.

Slide

Cook and present seafood

Prepare and cook following standard recipes within commercial environment

- Select recipes
- Collect ingredients
- Follow instruction
- Cook dish
- Receive feedback
- Make adjustments to recipe or method as required

Slide 37

Slide No	Trainer Notes
37.	Trainer to advise: • Find a recipe • Replicate that recipe • Obtain feedback • Revise where needed.

Slide

Cook and present seafood

Hold prepared products as required prior to presenting

- Hold at required temperature for specified time
- Cook to order
- Wet dishes better than single serve grill

Slide 38

Slide No

Trainer Notes

38.

Trainer to advise:

Rarely is cooked seafood 'held' after cooking before serving.

Buffet food is the main area where seafood may be held but then it is only for short periods of time.

Seafood normally cooked to order.

Seafood casseroles may be held but whole pieces tend to break up if stirred too much.

Slide

Cook and present seafood

Present fish and shellfish, including slice, carve and portion size

- ◉ Whole fish can be presented:
 - On side
 - Upright
- ◉ Garnish or accompaniment on side of platter
- ◉ Grilled portions presented on plate with sauce

Slide 39

Slide No	Trainer Notes
39.	Trainer to advise: • Many ways to present seafood dish • Final decision is up to Chef of the kitchen.

Slide

Cook and present seafood

Prepare garnishes, sauces and accompaniment for fish and shellfish dishes

- Keep them simple
- Make or supply fresh

Slide 40

Slide No

Trainer Notes

40.

Trainer to advise:

- Garnishes need to be related to the dish
- Need to be simple
- Need to be fresh.

Slide

Prepare and cook seafood

Element 5: Store fish and shellfish to enterprise requirements

- Fresh or vacuum packed items stored correctly ✓
- Prepare and maintain correct thawing of fish and shellfish ✓
- Fish and shellfish are appropriately stored in correct containers ✓
- Fish and shellfish are correctly labelled ✓
- Ensure correct conditions are maintained for freshness and quality ✓

Slide 41

Slide No	Trainer Notes
41.	Trainer to relate performance criteria to element 5.

Slide

Store fish and shellfish

Fresh and or vacuum packed items are stored correctly

In tanks: if keeping and storing live fish:

- Provide filtered water system
- Aerate adequately
- Keep out of bright lights
- Comply with animal welfare requirements
- Do not agitate the fish
- Do not feed; this will dirty the water

Slide 42

Slide No

Trainer Notes

42.

Trainer to advise:

- Keeping live fish and crustacean has problems and responsibility of its own
- Water storage area needs to be maintained and up to standard
- Care of live animals need to be followed.

Slide

Store fish and shellfish

Fresh or vacuum packed items are stored correctly

Fresh fish - gilled and gutted:

- Keep chilled
- Keep moist
- Keep covered
- No direct contact with ice

Slide 43

Slide No	Trainer Notes
43.	Trainer to advise: • Fresh killed fish need to be kept chilled as close to 0°C as possible • If ice is to be used then a clean cloth laid over fish then ice over cloth.

Slide

Store fish and shellfish

Fresh and or vacuum packed items are stored correctly

Fresh fish: vacuum packed:

- Keep chilled in single layers in clean trays
- Make sure label is still attached and in view

Slide 44

Slide No

Trainer Notes

44.

Trainer to advise:

Vacuum packed foods need to be kept in single layers to ensure seal of packaging is not compromised.

Slide

Store fish and shellfish

Fresh items are stored correctly

Fresh live shellfish:

- Keep moist in wet hessian bags
- Keep covered in suitable environment
- Tropical lobster – 20°C to 25°C; 6 hours
- Southern Rock Lobster – 6°C to 10°C; 6 hours
- Balmain bugs – 6°C; 12 hours
- Moreton Bay bugs – 12 to 15°C; 12 hours

Source information Guidelines on aquatic animal welfare; Welfare for aquaculture industry in Western Australia, 2001: Simon Benison

Slide 45

Slide No	Trainer Notes
45.	Trainer to advise: Correct storage of fresh live shellfish and storage life.

Slide

Store fish and shellfish

Prepare and maintain correct thawing of fish and shellfish

- Thaw in controlled environment
- Remove any accumulated water
- Use as soon as possible

Slide 46

Slide No	Trainer Notes
46.	Trainer to advise: • When thawing frozen product care needs to be taken that it is a controlled environment • If thawed out of cool room product needs to be watched closely to ensure no contamination occurs.

Slide

Store fish and shellfish

Fish and shellfish are appropriately stored in correct containers

- Containers need to be food grade containers
- Containers need to be clean

Slide 47

Slide No	Trainer Notes
47.	Trainer to advise: • Product must be in correct containers • Use no container for food storage that has stored chemicals • Ensure shellfish are in stress free environment • Change containers as needed.

Slide

Store fish and shellfish

Fish and shellfish are labeled correctly

Label must be legible:

- Name of product
- Date of storage
- Use by date recommendation
- Name of person storing
- Suppliers name and address

Slide 48

Slide No

Trainer Notes

48.

Trainer to advise:

- Ensure labelling is correct.

Slide

Store fish and shellfish

Ensure correct conditions are maintained for freshness and quality

- Keep equipment in efficient running conditions
- Keep environment clean and tidy
- Remove old stock when date expires
- Ensure temperatures are correct for efficient storage

Slide 49

Slide No	Trainer Notes
49.	Trainer to advise: • Keep cool rooms and freezers serviced to ensure efficient operation • Clean cool room on daily basis, check all stock; change storage tray and discard melted ice • Check for old stock; discard old stock; rotate old and new stock • Check temperatures of each area to ensure correct as they are intended to be.

Recommended training equipment

The equipment and kitchen consumables required for the delivery of practical cookery training classes are listed below, in the following categories:

- A Items of equipment which should be available for trainer and student use in the training kitchen.
- B The cleaning equipment and cleaning products which should be available in a cleaning room located adjacent to the kitchen, so that students can clean down to leave the kitchen in “as found” condition at the end of each class or session.
- C Consumables other than foodstuffs which need to be kept in the kitchen and available for everyday use in each class or session.
- D The items required by each student which would make up their own individual use kit of tools and small equipment.

A: Equipment in the training kitchen:	
- Commercial cooking stove 4 burner minimum - Stainless steel workbench - Stainless steel sinks - Dishwasher - Refrigeration - Freezers - Cooking pots, multiple sizes - Lids for pots - Frypan - Woks - Chinois of various sizes - Measuring jugs - Moullis	- Food processors - Ramekins - Sieves for dry ingredients - Deep fryers - Steamers - Weighing scales - Baking trays - Roasting dishes - Chopping boards for preparation - Gas fire lighters, cigarette lighters not recommended - Tongs for handling foods - Spiders for handling deep fried foods
B: Cleaning equipment and consumables:	
- Detergent - Scrubbing brushes - Scourers - Sink plugs - Brooms - Shovel and small brooms	- Floor mops - Mop buckets - Wet and dry vacuums - Detergent - Hand dishwashing detergent - Paper hand towel

C: Consumables (non-food) to be available in the kitchen:

- | | |
|--|--|
| <ul style="list-style-type: none">• Silicon baking paper• Plain white butchers paper• Greaseproof paper• Aluminium foil | <ul style="list-style-type: none">• Plastic wrap, clear• Plastic sheeting clear• Product boxes of various required sizes• Doyleys as required |
|--|--|

D: Student equipment kit should include:

- | | |
|--|--|
| <ul style="list-style-type: none">• Chef's knife 21 cm• Boning knife 15cm• Paring knives 9cm• Sharpening stone• Honing steel 30cm• Pallet knives• Wooden spoons 3• Whisk 30cm 1• Vegetable peeler• Pastry brush | <ul style="list-style-type: none">• Piping bags• Piping tubes, various sizes• Spatula, flexible• Tongs• Digital thermometer• Tea towels 6• Cutlery set• Scissors• Fine strainer• Carry case for equipment |
|--|--|

Instructions for Trainers for using PowerPoint – Presenter View

Connect your laptop or computer to your projector equipment as per manufacturers' instructions.

In PowerPoint, on the **Slide Show** menu, click **Set up Show**.

Under Multiple monitors, select the Show Presenter View check box.

In the **Display slide show** on list, click the monitor you want the slide show presentation to appear on.

Source: <http://office.microsoft.com>

Note:

In Presenter View:

You see your notes and have full control of the presentation

Your trainees only see the slide projected on to the screen

More Information

You can obtain more information on how to use PowerPoint from the Microsoft Online Help Centre, available at:

<http://office.microsoft.com/training/training.aspx?AssetID=RC011298761033>

Note Regarding Currency of URLs

Please note that where references have been made to URLs in these training resources trainers will need to verify that the resource or document referred to is still current on the internet. Trainers should endeavour, where possible, to source similar alternative examples of material where it is found that either the website or the document in question is no longer available online.
