Competency Based Training (CBT) and assessment – An introduction for trainers

Competency

Competency refers to the ability to perform particular tasks and duties to the standard of performance expected in the workplace.

Competency requires the application of specified knowledge, skills and attitudes relevant to effective participation, consistently over time and in the workplace environment.

The essential skills and knowledge are either identified separately or combined.

Knowledge identifies what a person needs to know to perform the work in an informed and effective manner.

Skills describe the application of knowledge to situations where understanding is converted into a workplace outcome.

Attitude describes the founding reasons behind the need for certain knowledge or why skills are performed in a specified manner.

Competency covers all aspects of workplace performance and involves:

- Performing individual tasks
- Managing a range of different tasks
- Responding to contingencies or breakdowns
- Dealing with the responsibilities of the workplace
- Working with others.

Unit of Competency

Like with any training qualification or program, a range of subject topics are identified that focus on the ability in a certain work area, responsibility or function.

Each manual focuses on a specific unit of competency that applies in the hospitality workplace.

In this manual a unit of competency is identified as a 'unit'.

Each unit of competency identifies a discrete workplace requirement and includes:

- Knowledge and skills that underpin competency
- Language, literacy and numeracy
- Occupational health and safety requirements.

Each unit of competency must be adhered to in training and assessment to ensure consistency of outcomes.

Element of Competency

An element of competency describes the essential outcomes within a unit of competency.

The elements of competency are the basic building blocks of the unit of competency. They describe in terms of outcomes the significant functions and tasks that make up the competency.

In this manual elements of competency are identified as an 'element'.

Performance criteria

Performance criteria indicate the standard of performance that is required to demonstrate achievement within an element of competency. The standards reflect identified industry skill needs.

Performance criteria will be made up of certain specified skills, knowledge and attitudes.

Learning

For the purpose of this manual learning incorporates two key activities:

- Training
- Assessment.

Both of these activities will be discussed in detail in this introduction.

Today training and assessment can be delivered in a variety of ways. It may be provided to participants:

- On-the-job – in the workplace
- Off-the-job – at an educational institution or dedicated training environment
- As a combination of these two options.

No longer is it necessary for learners to be absent from the workplace for long periods of time in order to obtain recognised and accredited qualifications.

Learning Approaches

This manual will identify two avenues to facilitate learning:

Competency Based Training (CBT)

This is the strategy of developing a participant's competency.

Educational institutions utilise a range of training strategies to ensure that participants are able to gain the knowledge and skills required for successful:

- Completion of the training program or qualification
- Implementation in the workplace.

The strategies selected should be chosen based on suitability and the learning styles of participants.

Competency Based Assessment (CBA)

This is the strategy of assessing competency of a participant.

Educational institutions utilise a range of assessment strategies to ensure that participants are assessed in a manner that demonstrates validity, fairness, reliability, flexibility and fairness of assessment processes.

Flexibility in Learning

It is important to note that flexibility in training and assessment strategies is required to meet the needs of participants who may have learning difficulties. The strategies used will vary, taking into account the needs of individual participants with learning difficulties. However they will be applied in a manner which does not discriminate against the participant or the participant body as a whole.

Catering for Participant Diversity

Participants have diverse backgrounds, needs and interests. When planning training and assessment activities to cater for individual differences, trainers and assessors should:

- Consider individuals' experiences, learning styles and interests
- Develop questions and activities that are aimed at different levels of ability
- Modify the expectations for some participants
- Provide opportunities for a variety of forms of participation, such as individual, pair and small group activities
- Assess participants based on individual progress and outcomes.

The diversity among participants also provides a good reason for building up a learning community in which participants support each other's learning.

Participant Centred Learning

This involves taking into account structuring training and assessment that:

- *Builds on strengths* – Training environments need to demonstrate the many positive features of local participants (such as the attribution of academic success to effort, and the social nature of achievement motivation) and of their trainers (such as a strong emphasis on subject disciplines and moral responsibility). These strengths and uniqueness of local participants and trainers should be acknowledged and treasured
- *Acknowledges prior knowledge and experience* – The learning activities should be planned with participants' prior knowledge and experience in mind
- *Understands learning objectives* – Each learning activity should have clear learning objectives and participants should be informed of them at the outset. Trainers should also be clear about the purpose of assignments and explain their significance to participants
- *Teaches for understanding* – The pedagogies chosen should aim at enabling participants to act and think flexibly with what they know
- *Teaches for independent learning* – Generic skills and reflection should be nurtured through learning activities in appropriate contexts of the curriculum. Participants should be encouraged to take responsibility for their own learning

- *Enhances motivation* – Learning is most effective when participants are motivated. Various strategies should be used to arouse the interest of participants
- *Makes effective use of resources* – A variety of teaching resources can be employed as tools for learning
- *Maximises engagement* – In conducting learning activities, it is important for the minds of participants to be actively engaged
- *Aligns assessment with learning and teaching* – Feedback and assessment should be an integral part of learning and teaching
- *Caters for learner diversity* – Trainers should be aware that participants have different characteristics and strengths and try to nurture these rather than impose a standard set of expectations.

Active Learning

The goal of nurturing independent learning in participants does not imply that they always have to work in isolation or solely in a classroom. On the contrary, the construction of knowledge in tourism and hospitality studies can often best be carried out in collaboration with others in the field. Sharing experiences, insights and views on issues of common concern, and working together to collect information through conducting investigative studies in the field (active learning) can contribute a lot to their eventual success.

Active learning has an important part to play in fostering a sense of community in the class. First, to operate successfully, a learning community requires an ethos of acceptance and a sense of trust among participants, and between them and their trainers. Trainers can help to foster acceptance and trust through encouragement and personal example, and by allowing participants to take risks as they explore and articulate their views, however immature these may appear to be. Participants also come to realise that their classmates (and their trainers) are partners in learning and solving.

Trainers can also encourage cooperative learning by designing appropriate group learning tasks, which include, for example, collecting background information, conducting small-scale surveys, or producing media presentations on certain issues and themes. Participants need to be reminded that, while they should work towards successful completion of the field tasks, developing positive peer relationships in the process is an important objective of all group work.

Competency Based Training (CBT)

Principle of Competency Based Training

Competency based training is aimed at developing the knowledge, skills and attitudes of participants, through a variety of training tools.

Training Strategies

The aims of this curriculum are to enable participants to:

- Undertake a variety of subject courses that are relevant to industry in the current environment
- Learn current industry skills, information and trends relevant to industry
- Learn through a range of practical and theoretical approaches
- Be able to identify, explore and solve issues in a productive manner

- Be able to become confident, equipped and flexible managers of the future
- Be 'job ready' and a valuable employee in the industry upon graduation of any qualification level.

To ensure participants are able to gain the knowledge and skills required to meet competency in each unit of competency in the qualification, a range of training delivery modes are used.

Types of Training

In choosing learning and teaching strategies, trainers should take into account the practical, complex and multi-disciplinary nature of the subject area, as well as their participant's prior knowledge, learning styles and abilities.

Training outcomes can be attained by utilising one or more delivery methods:

Lecture/Tutorial

This is a common method of training involving transfer of information from the trainer to the participants. It is an effective approach to introduce new concepts or information to the learners and also to build upon the existing knowledge. The listener is expected to reflect on the subject and seek clarifications on the doubts.

Demonstration

Demonstration is a very effective training method that involves a trainer showing a participant how to perform a task or activity. Through a visual demonstration, trainers may also explain reasoning behind certain actions or provide supplementary information to help facilitate understanding.

Group Discussions

Brainstorming in which all the members in a group express their ideas, views and opinions on a given topic. It is a free flow and exchange of knowledge among the participants and the trainer. The discussion is carried out by the group on the basis of their own experience, perceptions and values. This will facilitate acquiring new knowledge. When everybody is expected to participate in the group discussion, even the introverted persons will also get stimulated and try to articulate their feelings.

The ideas that emerge in the discussions should be noted down and presentations are to be made by the groups. Sometimes consensus needs to be arrived at on a given topic. Group discussions are to be held under the moderation of a leader guided by the trainer. Group discussion technique triggers thinking process, encourages interactions and enhances communication skills.

Role Play

This is a common and very effective method of bringing into the classroom real life situations, which may not otherwise be possible. Participants are made to enact a particular role so as to give a real feel of the roles they may be called upon to play. This enables participants to understand the behaviour of others as well as their own emotions and feelings. The instructor must brief the role players on what is expected of them. The role player may either be given a ready-made script, which they can memorize and enact, or they may be required to develop their own scripts around a given situation. This technique is extremely useful in understanding creative selling techniques and human relations. It can be entertaining and energizing and it helps the reserved and less literate to express their feelings.

Simulation Games

When trainees need to become aware of something that they have not been conscious of, simulations can be a useful mechanism. Simulation games are a method based on "here and now" experience shared by all the participants. The games focus on the participation of the trainees and their willingness to share their ideas with others. A "near real life" situation is created providing an opportunity to which they apply themselves by adopting certain behaviour. They then experience the impact of their behaviour on the situation. It is carried out to generate responses and reactions based on the real feelings of the participants, which are subsequently analysed by the trainer.

While use of simulation games can result in very effective learning, it needs considerable trainer competence to analyse the situations.

Individual /Group Exercises

Exercises are often introduced to find out how much the participant has assimilated. This method involves imparting instructions to participants on a particular subject through use of written exercises. In the group exercises, the entire class is divided into small groups, and members are asked to collaborate to arrive at a consensus or solution to a problem.

Case Study

This is a training method that enables the trainer and the participant to experience a real life situation. It may be on account of events in the past or situations in the present, in which there may be one or more problems to be solved and decisions to be taken. The basic objective of a case study is to help participants diagnose, analyse and/or solve a particular problem and to make them internalize the critical inputs delivered in the training. Questions are generally given at the end of the case study to direct the participants and to stimulate their thinking towards possible solutions. Studies may be presented in written or verbal form.

Field Visit

This involves a carefully planned visit or tour to a place of learning or interest. The idea is to give first-hand knowledge by personal observation of field situations, and to relate theory with practice. The emphasis is on observing, exploring, asking questions and understanding. The trainer should remember to brief the participants about what they should observe and about the customs and norms that need to be respected.

Group Presentation

The participants are asked to work in groups and produce the results and findings of their group work to the members of another sub-group. By this method participants get a good picture of each other's views and perceptions on the topic and they are able to compare them with their own point of view. The pooling and sharing of findings enriches the discussion and learning process.

Practice Sessions

This method is of paramount importance for skills training. Participants are provided with an opportunity to practice in a controlled situation what they have learnt. It could be real life or through a make-believe situation.

Games

This is a group process and includes those methods that involve usually fun-based activity, aimed at conveying feelings and experiences, which are everyday in nature, and applying them within the game being played. A game has set rules and regulations, and may or may not include a competitive element. After the game is played, it is essential that the participants be debriefed and their lessons and experiences consolidated by the trainer.

Research

Trainers may require learners to undertake research activities, including online research, to gather information or further understanding about a specific subject area.

Competency Based Assessment (CBA)

Principle of Competency Based Assessment

Competency based assessment is aimed at compiling a list of evidence that shows that a person is competent in a particular unit of competency.

Competencies are gained through a multitude of ways including:

- Training and development programs
- Formal education
- Life experience
- Apprenticeships
- On-the-job experience
- Self-help programs.

All of these together contribute to job competence in a person. Ultimately, assessors and participants work together, through the 'collection of evidence' in determining overall competence.

This evidence can be collected:

- Using different formats
- Using different people
- Collected over a period of time.

The assessor who is ideally someone with considerable experience in the area being assessed, reviews the evidence and verifies the person as being competent or not.

Flexibility in Assessment

Whilst allocated assessment tools have been identified for this subject, all attempts are made to determine competency and suitable alternate assessment tools may be used, according to the requirements of the participant.

The assessment needs to be equitable for all participants, taking into account their cultural and linguistic needs.

Competency must be proven regardless of:

- Language
- Delivery Method
- Assessment Method.

Assessment Objectives

The assessment tools used for subjects are designed to determine competency against the 'elements of competency' and their associated 'performance criteria'.

The assessment tools are used to identify sufficient:

- a) Knowledge, including underpinning knowledge
- b) Skills
- c) Attitudes

Assessment tools are activities that trainees are required to undertake to prove participant competency in this subject.

All assessments must be completed satisfactorily for participants to obtain competence in this subject. There are no exceptions to this requirement, however, it is possible that in some cases several assessment items may be combined and assessed together.

Types of Assessment

Allocated Assessment Tools

There are a number of assessment tools that are used to determine competency in this subject:

- Work projects
- Written questions
- Oral questions
- Third Party Report
- Observation Checklist.

Instructions on how assessors should conduct these assessment methods are explained in the Assessment Manuals.

Alternative Assessment Tools

Whilst this subject has identified assessment tools, as indicated above, this does not restrict the assessor from using different assessment methods to measure the competency of a participant.

Evidence is simply proof that the assessor gathers to show participants can actually do what they are required to do.

Whilst there is a distinct requirement for participants to demonstrate competency, there are many and diverse sources of evidence available to the assessor.

Ongoing performance at work, as verified by a supervisor or physical evidence, can count towards assessment. Additionally, the assessor can talk to customers or work colleagues to gather evidence about performance.

A range of assessment methods to assess competency include:

- Practical demonstrations
- Practical demonstrations in simulated work conditions
- Problem solving
- Portfolios of evidence
- Critical incident reports
- Journals
- Oral presentations
- Interviews
- Videos
- Visuals: slides, audio tapes
- Case studies
- Log books
- Projects
- Role plays
- Group projects
- Group discussions
- Examinations.

Recognition of Prior Learning

Recognition of Prior Learning is the process that gives current industry professionals who do not have a formal qualification, the opportunity to benchmark their extensive skills and experience against the standards set out in each unit of competency/subject.

Also known as a Skills Recognition Audit (SRA), this process is a learning and assessment pathway which encompasses:

- Recognition of Current Competencies (RCC)
- Skills auditing
- Gap analysis and training
- Credit transfer.

Assessing competency

As mentioned, assessment is the process of identifying a participant's current knowledge, skills and attitudes sets against all elements of competency within a unit of competency. Traditionally in education, grades or marks were given to participants, dependent on how many questions the participant successfully answered in an assessment tool.

Competency based assessment does not award grades, but simply identifies if the participant has the knowledge, skills and attitudes to undertake the required task to the specified standard.

Therefore, when assessing competency, an assessor has two possible results that can be awarded:

- Pass Competent (PC)
- Not Yet Competent (NYC).

Pass Competent (PC)

If the participant is able to successfully answer or demonstrate what is required, to the expected standards of the performance criteria, they will be deemed as 'Pass Competent' (PC).

The assessor will award a 'Pass Competent' (PC) if they feel the participant has the necessary knowledge, skills and attitudes in all assessment tasks for a unit.

Not Yet Competent' (NYC)

If the participant is unable to answer or demonstrate competency to the desired standard, they will be deemed to be 'Not Yet Competent' (NYC).

This does not mean the participant will need to complete all the assessment tasks again. The focus will be on the specific assessment tasks that were not performed to the expected standards.

The participant may be required to:

- a) Undertake further training or instruction
- b) Undertake the assessment task again until they are deemed to be 'Pass Competent'.

Competency standard

UNIT TITLE: PREPARE AND DISPLAY SUGAR WORK		NOMINAL HOURS: 55
UNIT NUMBER: D1.HPA.CL4.03		
UNIT DESCRIPTOR: This unit deals with skills and knowledge required by cooks, chefs and <i>patissiers</i> to prepare, display and store sugar based display pieces in a commercial food production environment		
ELEMENTS AND PERFORMANCE CRITERIA		UNIT VARIABLE AND ASSESSMENT GUIDE
Element 1: Prepare sugar for boiling 1.1 Select and weigh <i>ingredients</i> 1.2 Combine ingredients and prepare sugar for boiling 1.3 Collect <i>equipment</i> required to prepare sugar Element 2: Boil sugar 2.1 Collect equipment required to boil sugar 2.2 Follow specified method of sugar boiling 2.3 Use colours appropriately 2.4 Handle boiled sugar solution safely Element 3: Pull boiled sugar 3.1 Collect equipment required to pull boiled sugar 3.2 <i>Manipulate boiled sugar</i> 3.3 <i>Store/hold</i> pulled sugar		Unit Variables The Unit Variables provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. It relates to the unit as a whole and facilitates holistic assessment This unit applies to all industry sectors that are responsible for preparing, displaying and storing sugar work within the labour divisions of the hotel and travel industries and may include: 1. Food Production <i>Ingredients</i> will include: • Sugar • Water • Glucose • Colouring agents • Calcium carbonate • Cream of tartar.

Element 4: Use pulled sugar to produce display sugar work 4.1 Collect equipment required to produce display sugar pieces 4.2 Produce <i>blown sugar shapes</i> 4.3 Produce <i>ribbons and bows</i> 4.4 Shape sugar pieces into <i>leaves and flowers</i> 4.5 Weave <i>sugar</i> to form baskets Element 5: Pour boiled sugar to produce cast display sugar work 5.1 Collect equipment required to produce cast display sugar work pieces 5.2 Add specific ingredients to create effects 5.3 Pour and set sugar 5.4 Release sugar from forms Element 6: Plan sugar display piece 6.1 Plan <i>display piece</i> appropriate to client, occasion or theme able to be produced in time available using a <i>variety of techniques</i> 6.2 Prepare a sketch or outline of display 6.3 Prepare forms and shapes as required by the design 6.4 Calculate quantities required for components of display piece	<i>Equipment</i> may be related to: • Copper pots • Sugar thermometer • Heat proof gloves • Cold water bath • Marble slab • Oil • Pulling hook • Metal, plaster, plasticine and rubber moulds • Mouth or hand pump • Weaving board • Pallet knife/spatula • Heat lamp • Sugar box • Patterns • Scissors • Rubber mats • Foil • Silicone paper. <i>Manipulate boiled sugar</i> should relate to: • Turn out sugar • Pour sugar
---	---

Element 7: Assemble and display sugar work piece 7.1 Assemble sugar work 7.2 Decorate sugar work piece 7.3 Display sugar work piece Element 8: Store sugar display pieces 8.1 Store according to enterprise and standard industry practice 8.2 Store in appropriate conditions 8.3 Store to maintain maximum quality and appearance	• Manipulate sugar • Pull sugar • Standard practices and safety requirements. <i>Store/hold</i> should include: • Keep warm under lamp • Allow to cool for use later • Re-heat for use • Store moisture free. <i>Blown sugar shapes</i> may include: • Fruits • Animals • Figures. <i>Ribbons and bows</i> may relate to: • Preparing colours • Joining colours • Pulling ribbons to required length and width • Joining ribbons • Folding ribbon to form bows. <i>Leaves and flowers</i> may relate to: • Use of hands or moulds • Produce petals • Produce leaves • Join pieces to form flowers.
---	--

	<i>Weave sugar</i> may relate to: • Correct temperature • Correct consistency • Preparing weaving frame • Ensuring consistent thickness of weave • Joining sugar • Finishing top and base • Joining handle. <i>Display piece</i> may include: • Size • Shape • Style • Theme. <i>Variety of techniques</i> may include: • Blown • Woven • Cast • Blown. <i>Assemble</i> may relate to: • Using warm sugar to join pieces • Using a heat lamp to melt edges to join pieces • Using royal icing to join pieces.
--	---

	<i>Decorate</i> may include: • Using warm sugar, piped • Using royal icing. <i>Display</i> may relate to the use of: • Ceramic • Glass • Mirrors • Wood • Fabric. Appropriate conditions relates to: • As appropriate to each type of petit fours • Cool • Dry • Moisture free • Low humidity. Assessment Guide The following skills and knowledge must be assessed as part of this unit: • Ability to use safe sugar boiling and handling techniques • Knowledge of sugar crystallisation during sugar preparation, boiling and production and prevention methods • Knowledge of the ingredients used and reactions between them • Knowledge of cleanliness in the preparation and production of sugar
--	---

	• Knowledge of commodities • Ability to maintain hygiene and food safety requirements • Ability to maintain safety requirements in relation to the preparation, cooking and handling of hot sugar solutions • Knowledge of historical and cultural aspects of sugar work and its role in the industry and the menu • Ability to use creative and artistic skills in the design, preparation, decoration and display of sugar work • Ability to produce a range of sugar display pieces including casting, pulling, weaving and blowing. Linkages To Other Units • Comply with workplace hygiene procedures • Implement occupational health and safety procedures • Prepare and store food • Work effectively with colleagues and customers • Present and display food products • Apply basic techniques of commercial cookery • Other food units as appropriate, such as pastry, cakes, yeast goods, desserts, buffet and food service operation. Critical Aspects of Assessment Evidence of the following is essential: • Demonstration of commodity knowledge including quality aspects • Demonstrated ability to safely and hygienically handle products • Knowledge of terminology related to sugar work
--	--

- Demonstrated ability to prepare a variety of sugar pieces for at least two different events or occasions
- Demonstration of creative and artistic skills in the preparation, decoration and display of sugar work pieces
- Demonstrated ability to store sugar work pieces to industry and enterprise standards.

Context of Assessment

This unit may be assessed on or off the job

- Assessment should include practical demonstration either in the workplace or through a simulation activity, supported by a range of methods to assess underpinning knowledge
- Assessment must relate to the individuals work area or area of responsibility
- Preparation, decoration and display of sugar display pieces with typical workplace conditions and timeframes
- Demonstration of skills on more than one occasion.

Resource Implications

Training and assessment must include access and use of a fully equipped commercial kitchen; and use of real ingredients and service equipment; and access to workplace standards, procedures, policies, guidelines, tools and equipment.

Assessment Methods

The following methods may be used to assess competency for this unit:

- Observation of practical candidate performance
- Oral and written questions
- Third party reports completed by a supervisor
- Project and assignment work.

	Key Competencies in this Unit <i>Level 1 = competence to undertake tasks effectively</i> <i>Level 2 = competence to manage tasks</i> <i>Level 3 = competence to use concepts for evaluating</i>		
	Key Competencies	Level	Examples
	Collecting, organising and analysing information	2	Determine requirements of standard recipes and/or menu requirements; collect equipment, commodities and ingredients; select and obtain commodities; organise ingredients and task sheets
	Communicating ideas and information	1	Share information with other kitchen and floor service staff; read recipes, menus, instructions and orders
	Planning and organising activities	2	Complete preparation <i>mise-en-place</i> and organise for the production of sugar work pieces; work within time constraints in a logical sequence
	Working with others and in teams	1	Work cooperatively with other team members
	Using mathematical ideas and techniques	1	Calculate quantities and portions against standard recipes and/or menu requirements
	Solving problems	1	Identify and correct problems in the preparation and production of sugar work such as ingredient quality
	Using technology	1	Use mechanical kitchen equipment including weighing equipment

Notes and PowerPoint slides

Slide

PREPARE AND DISPLAY SUGAR WORK

D1.HPA.CL4.03

Slide 1

Slide No	Trainer Notes
1.	Welcome the Students to the class.

Slide

Prepare and display sugar work

Assessment for this Unit may include:

- Oral questions
- Written questions
- Work projects
- Workplace observation of practical skills
- Practical exercises
- Formal report from employer/supervisor

Slide 2

Slide No	Trainer Notes
2.	Trainer to Advise Trainer advises students that assessment for this Unit may take several forms all of which are aimed at verifying they have achieved competency for the Unit as required. Trainer indicates to students the methods of assessment that will be applied to them for this Unit.

Slide

Prepare and display sugar work

References and further reading for this unit:

- There are many visual stimuli on YouTube
- Search: pulled sugar, blown sugar

Excellent book reference

The art of the confectioner:

- Pastillage and Sugar work
- Ewald Notter
- Basic preparations and advanced work

Slide 3

Slide No	Trainer Notes
3.	Trainer to Advise • There are many books and guides in the market place • Difficult to learn this without hands on experience and also an artistic flair is very beneficial • Visual stimuli is available on YouTube.

Slide

Prepare and display sugar work

This unit comprises eight elements:

1. Prepare sugar for boiling
2. Boil sugar
3. Pull boiled sugar
4. Use pulled sugar to produce display work
5. Pour boiled sugar to produce cast display sugar work
6. Plan sugar display piece
7. Assemble and display sugar work
8. Store sugar display pieces

Slide 4

Slide No	Trainer Notes
4.	Trainer to advise Trainer advises students this Unit comprises eight elements, as listed on the slide explaining: • Each Element comprises a number of Performance Criteria which will be identified throughout the class and explained in detail • Students can obtain more detail from their Trainee Manual • The course presents advice and information but where their workplace requirements differ to what is presented, the workplace practices and standards must be observed.

Slide

Prepare and display sugar work

Element 1: Prepare sugar for boiling

- Select and weigh ingredients
- Combine ingredients and prepare sugar for boiling
- Collect equipment required to prepare sugar

Slide 5

Slide No	Trainer Notes
5.	Trainer to advise • Trainer to relate performance criteria to element 1 • Performance criteria is the process by which the students training match the learning element • The element is the skill • To assess competency in the skill; the performance criteria is used to outline activities that can be used to assess competency • The trainer should relate how the performance criteria is related to the element • To be able to Prepare and display sugar work the students must be able to; Pull boiled sugar • The student should be able to do: ▪ Collect equipment required to pull boiled sugar ▪ Manipulate boiled sugar ▪ Store/hold pulled sugar.

Slide

Prepare sugar for boiling

Select and weigh ingredients:

- Sugar
- Glucose
- Water
- Titanium oxide, if required
- Colour, if required

Slide 6

Slide No	Trainer Notes
6.	Trainer to advise • Select and Weigh all ingredients before beginning the process • Ensure that enough of each ingredient is available • Normal table sugar is best for this activity • Students need to find an explanation or definition of how sugar can be purchased in their market place • The term market place is not where you purchase general food items for the home • The market place is the Bakery Patisserie in which they are conducting business: ▪ A1 or 1A sugar – general table sugar ▪ Caster sugar – best for use in pastry ▪ Pure icing sugar – very fine grind, can be referred to confectioners sugar ▪ Soft icing mixture – icing sugar with starch added to stop clumping due to hygroscopic properties of sugar ▪ Brown sugar – sugar with residual molasses added • These are types of sugar available in the Australian market for the patissier.

Slide

Prepare sugar for boiling

Collect equipment required to prepare sugar:

- **Pot:** Good quality, preferable copper or stainless steel
- **Heat source:** Kitchen stove, portable gas burner
- **Stirrer:** Steel spoon, clean wooden, heat resistant silicon
- **Work surface:** Marble or Granite
- **Silicon mat:** Several if possible
- **Small Equipment:** Heavy duty scissors; knife; spoons
- **Scales:** Digital scales, portable

Slide 7

Slide No	Trainer Notes
7.	Trainer to advise • Equipment required for the preparation of sugar will depend on the type being produced • A well set up kitchen will be ideal but people become inventive when lacking the best equipment • Sugar can be boiled and moulded in any area when person becomes familiar with the skills required.

Slide

Prepare sugar for boiling

Combine ingredients and prepare sugar for boiling:

- Water in pot
- Sugar in water
- Mix together
- Dissolve sugar before water boils

Slide 8

Slide No	Trainer Notes
8.	Trainer to advise • Place the water into a clean pot • Add sugar to the water • This moistens all the sugar and helps it to dissolve • Sugar can re-crystallise when in solution merely due to the fact that a grain of sugar has fallen into the solution • This can happen when sugar is 160 degrees plus. It merely goes hard again and the process needs to start all over again • Keep side of pots clean with pastry brush and cold water • Do not stir after sugar solution has started to boil because the agitation can also cause the sugar to re-crystallise.

Slide

Prepare and display sugar work

Element 2: Boil sugar

- Collect equipment required to boil sugar
- Follow specified method of sugar boiling
- Use colours appropriately
- Handle boiled sugar solution safely

Slide 9

Slide No	Trainer Notes
9.	Trainer to advise • Trainer to relate performance criteria to element 2 • Performance criteria is the process by which the students training match the learning element • The element is the skill • To assess competency in the skill; the performance criteria is used to outline activities that can be used to assess competency. • The trainer should relate how the performance criteria is related to the element • To be able to Prepare and display sugar work the students must be able to; Boil sugar • The student should be able to do: ▪ Collect equipment required to boil sugar ▪ Follow specified method of sugar boiling ▪ Use colours appropriately ▪ Handle boiled sugar solution safely.

Slide

Boil Sugar

Collect equipment required to boil sugar

- **Pot:** Good quality, preferable copper or stainless steel
- **Heat source:** Kitchen stove, portable gas burner
- **Stirrer:** Steel spoon, clean wooden, heat resistant silicon
- **Work surface:** Marble or Granite
- **Silicon mat:** Several if possible
- **Small Equipment:** Heavy duty scissors; knife; spoons
- **Pastry brush:** Stainless steel bowl with water

Slide 10

Slide No	Trainer Notes
10.	Trainer to advise • Equipment required for the preparation of sugar will depend on the type being produced • A well set up kitchen will be ideal but people become inventive when lacking the best equipment • Sugar can be boiled and moulded in any area when person becomes familiar with the skills required • For the boiling process to begin all equipment required for the process of moulding should be prepared • Before you begin to cook the sugar the mould must be prepared ready to accept the sugar • When the sugar reaching correct temperature it must be poured immediately • Either into the prepared cast or mould or onto a prepared surface for pulling to produce satin finish.

Slide

Boil Sugar

Follow specified method for boiling sugar

- Water and sugar in pot
- Glucose, if required, set aside
- Apply heat source, stir to dissolve
- Bring to boil
- Skim any scum that rises
- Add glucose, stir to mix in
- Stir no more
- Cook to required temperature

Slide 11

Slide No	Trainer Notes
11.	Trainer to advise • Basic procedure for boiling all sugar solutions • Place on the heat source and stir slowly to dissolve the sugar • Wash sides of pot down with cold water and pastry brush • This is to prevent the sugar solution that sticks to the sides of the pot from dehydrating and forming sugar crystals. If the sugar crystals fall back into the solution there is the possibility that it will act as a seeding agent and this will cause all the sugar to re-crystallise • The glucose can be warmed before going into solution; in microwave or just warmed in another pot; this is recommended in colder environments as when it is added to boiling solution it does not slow down the boiling process to a great extent • When the solution has come to the boil add the glucose • Stir to distribute the glucose through the solution then remove stirrer • Do not stir the solution again; agitation of the solution can cause crystallization • Cook the solution to the required temperature • Add tartaric acid if required at 145 degrees • If colour is to be added then add at approximately 150 degrees • Continue to cook to 160 degrees.

Slide

Boil Sugar

Use colours appropriately

- Add colours just before reaching required temperature
- Paste colours
- Water based colours better
- Alcohol based colours can distort colours after boiling

Slide 12

Slide No	Trainer Notes
12.	Trainer to advise • Adding colours to sugar takes practice. It is not the adding of the colour but how the colour looks after it has been added • The brand • Quality of colour • Concentration of the colour • Brightness • HOW MUCH of the colour do you need to add • It all takes practice; keep note as with all recipes and methods; keep notes on the reactions when using a new product for the first time • Water based colours are best added in the last few minutes of the boiling so excess moisture can be evaporated off.

Slide

Boil Sugar

Handle boiled sugar solution safely

- Heat resistant material
- Thick folded tea towels
- Wooden blocks
- Cold water reserve

Slide 13

Slide No	Trainer Notes
13.	Trainer to advise Sugar is boiled to temperatures in excess of 160 degrees: • At this temperature the human skin will just be destroyed within 1 second of contact • RESPECT the sugar • Respect the temperature • THINK • There will be no second chance • Heat resistant material • Thick folded tea towels: ▪ Thick gloves can be difficult to use and thick cotton gloves are not recommended because if the gloves are wet or even damp and the gloves come into contact with hot metal for any period of time they will heat up and produce STEAM; if the gloves cannot be removed quickly then they become a danger in themselves ▪ Steam burn are just as bad as dry burns on the human skin ▪ Folded tea towels between the hot metal and the human skin allows for a faster release of the pot handle ▪ Care must be taken to still control the molten sugar and not to drop the pot of sugar and cause more damage. Put the pot of molten sugar onto a stable flat surface before releasing grip of hot pot

	• Wooden blocks: ▪ Wooden blocks are a good medium to use to reduce heating the workbench surface • Cold water reserve: ▪ Always have a bowl of cold water nearby to cool any sugar that comes into contact with human skin. It is easy to remove from skin when it has set ▪ If you try to remove while it is still molten you will just increase the damage.
--	--

Slide

Prepare and display sugar work

Element 3: Pull boiled sugar

- Collect equipment required to pull boiled sugar
- Manipulate boiled sugar
- Store/hold pulled sugar

Slide 14

Slide No	Trainer Notes
14.	Trainer to advise • Trainer to relate performance criteria to element 3 • Performance criteria is the process by which the students training match the learning element • The element is the skill • To assess competency in the skill; the performance criteria is used to outline activities that can be used to assess competency. • The trainer should relate how the performance criteria is related to the element • To be able to Prepare and display sugar work the students must be able to; Pull boiled sugar • The student should be able to do: ▪ Collect equipment required to pull boiled sugar ▪ Manipulate boiled sugar ▪ Store/hold pulled sugar.

Slide

Pull boiled sugar

Collect required equipment

- Silicon mat or sheet
- Marble or granite stone workbench or slab
- Oil, food grade, non flavoured
- Gloves
- Scissors
- Spatulas

Slide 15

Slide No	Trainer Notes
15.	Trainer to advise ● Silicon mat or sheet: ▪ The boiled sugar will be poured onto this or an oiled marble bench or oiled slab of granite stone ● Marble or granite stone workbench or slab: ▪ Oiled to prevent sugar sticking and will aid in the cooling ● Oil, food grade, non flavoured: ▪ Needs to be applied very sparsely, you do not want the oil entering inside the sugar when folding and pulling ● Gloves: ▪ Always wear latex gloves when pulling. Sometime it is advisable to have thin cotton gloves under latex gloves to insulate ● Scissors: ▪ Are used to cut pulled sugar into portions when ready so it can be stored until required. Easier to reheat ● Spatulas: ▪ Small triangle blade plaster spreaders or cooks spatulas are ideal for turning the sugar back onto itself while it is cooling until it can be handled by hand ▪ Used to lift the edge and drop back into the centre of the hot solution as it cools.

Slide

Pull boiled sugar

Manipulate pulled sugar

- Pull apart
- Fold back together
- Twist and pull
- Fold back

Continue action until desired look is achieved.

Slide 16

Slide No

Trainer Notes

16.

Trainer to advise

- When the sugar has cooled sufficiently to be picked up and handled it can be gripped with two hands and pulled slightly and then fold back together
- This process will happen up to 35 times
- When folding it can be twisted and folded back together
- Why?
- This action introduces air into the sugar mass and it takes on a satin or opaque sheen

This action is continued until the desired look is achieved.

Slide

Pull boiled sugar

Store or hold pulled sugar

- Portion buy cutting with heavy duty scissors
- Allow to cool completely
- Wrap in plastic until required

Slide 17

Slide No	Trainer Notes
17.	Trainer to advise • The sugar needs to be portioned while it is still pliable • When portioned it should be left to cool completely • Seal in plastic. Remove all air and store in sealable container • In warmer climates silica gel sachets need to be placed into storage containers • Moisture is the enemy of sugar.

Slide

Prepare and display sugar work

Element 4: Use pulled sugar to produce display work

- Collect equipment required to produce display sugar pieces
- Produce blown sugar shapes
- Produce ribbons and bows
- Shape sugar pieces into leaves and flowers
- Weave sugar to form baskets

Slide 18

Slide No	Trainer Notes
18.	Trainer to advise • Trainer to relate performance criteria to element 4 • Performance criteria is the process by which the students training match the learning element • The element is the skill • To assess competency in the skill; the performance criteria is used to outline activities that can be used to assess competency • The trainer should relate how the performance criteria is related to the element • To be able to Prepare and display sugar work the students must be able to; Use pulled sugar to produce display work • The student should be able to: ▪ Collect equipment required to produce display sugar pieces ▪ Produce blown sugar shapes ▪ Produce ribbons and bows ▪ Shape sugar pieces into leaves and flowers ▪ Weave sugar to form baskets.

Slide

Use pulled sugar

Collect equipment required

- **Plan:** What are you making
- **Heat source:** heat lamp to reheat sugar
- **Work surface:** Marble or Granite
- **Silicon mat:** several if possible
- **Blower:** Copper or heat resistant pipe attached to hand pump
- **Small Equipment:** Heavy duty scissors, knife, heat gel, cooling fan, small plastic containers, plastic wrap

Slide 19

Slide No	Trainer Notes
19.	Trainer to advise ● Plan: What are you making ● Heat source: Heat lamp to reheat sugar: ▪ The sugar portion will be placed onto a silicon mat under the heat lamp ▪ The heat lamp slowly warms the sugar ▪ Sugar needs to be regularly turned so the sugar cane heat evenly ● Blower: Copper or heat resistant reed attached to hand pump: ▪ Sugar is attached to end and air is introduce to inside of piece of sugar and while sugar is pliable different shapes are formed ▪ Then cooled to hold shape produced ● Work surface: Marble or Granite: ▪ Good surface to work with ● Silicon mat: Several if possible ● Small Equipment: Heavy duty scissors; knife: ▪ As the sugar is formed pieces may need to be trimmed ● Small plastic containers: ▪ Can be handy to hold small pieces after they have been formed ▪ Line with plastic wrap scrunched up loosely to give support to still warm pieces

	without deforming them on flat surface
	• heat gel: ▪ Burns a single flame that can be used to melt sections without warming the whole model; for binding sugar pieces together • Plastic wrap: ▪ To line containers to stop pieces banging into each other • Cooling fan, Hair dryer: ▪ Some have a hot and cold fan; for fast temperature changes to sugar.

Slide

Use pulled sugar

Produce blow sugar

- Consult plan
- Attach portion of softened sugar to blower pipe
- Introduce air to inside of sugar slowly and in short bursts
- Manipulate into desired shape
- Re warm under heat source if needed
- Remove from blower
- Cool to hold shape

Watch this you tube video:

<http://www.youtube.com/watch?v=vxciGVtOmFg>

Slide 20

Slide No	Trainer Notes
20.	Trainer to advise • YouTube Chef Robert Lombardy: Inland Northwest Culinary; Spokane; Washington State; USA: ▪ http://www.youtube.com/watch?v=vxciGVtOmFg • Consult plan • What are you going to produce/ Do you have a drawing to compare your model with? • Attach portion of softened sugar to blower pipe • Take a portion of softened sugar and totally enclose the end of a pipe. When totally sealed: ▪ Introduce air to inside of sugar slowly and in short bursts ▪ Manipulate into desired shape ▪ Re warm under heat source if needed ▪ Remove from pipe by cutting while retaining shape ▪ Cool to hold shape.

Slide

Use pulled sugar

Produce ribbons and bows

- Multiple colours
- 2 colours: red and green
- Roll into sticks
- Refer to youtube video 'sugar ribbon'
- Stretch to size required
- Cut and mould as shown in video

Slide 21

Slide No

Trainer Notes

21.

Trainer to advise

- Start with just two colours
- Warm pieces of sugar size of finger
- Attach to each other
- Manipulate long, stretch, trying to keep same thickness
- Stretch to final thickness
- Cut to length
- Warm and shape
- Cool to shape.

Slide

Use pulled sugar

- Shape sugar pieces into leaves and ribbons
- Weaving a sugar basket and fruits
- Youtube: The art of sugar craft, filmed and edited by Leon Arndt, ICT Services:
 - <http://www.youtube.com/watch?v=7vK7ITghbe0&feature=g-vrec>
- Refer to manual

Slide 22

Slide No	Trainer Notes
22.	Trainer to advise • Refer to manual or obtain a video from you tube source for visual display • Weaving a sugar basket and fruits. You tube • The art of sugar craft; filmed and edited by Leon Arndt, ICT Services: ▪ http://www.youtube.com/watch?v=7vK7ITghbe0&feature=g-vrec.

Slide

Prepare and display sugar work

Element 5: Pour boiled sugar to produce cast display sugar work

- Collect equipment required to produce cast display sugar work pieces
- Add specific ingredients to create effects
- Pour and set sugar
- Release sugar from forms

Slide 23

Slide No

Trainer Notes

23.

Trainer to advise

- Trainer to relate performance criteria to element 5
- Performance criteria is the process by which the students training match the learning element
- The element is the skill
- To assess competency in the skill; the performance criteria is used to outline activities that can be used to assess competency.
- The trainer should relate how the performance criteria is related to the element
- To be able to Prepare and display sugar work the students must be able to; pour boiled sugar to produce cast display sugar work
- The student should be able to:
 - Collect equipment required to produce cast display sugar work pieces
 - Add specific ingredients to create effects
 - Pour and set sugar
 - Release sugar from forms.

Slide

Pour boiled sugar to produce cast model

Collect equipment required to produce cast sugar

- **Plan:** What are you making
- **Stove:** stove or portable gas burner
- **Moulds:** plain or textured
- **Work surface:** Marble or Granite
- **Silicon mat:** several if possible
- **Small Equipment:** Heavy duty scissors, knife
- **Silicon paper**

Slide 24

Slide No	Trainer Notes
24.	Trainer to advise • Working from a plan the model must be broken down into sections: ▪ Cast models have several sections that may sit at different level ▪ Cast models may lay flat ▪ May stand up; several pieces set at different places on the base give appearance of Depth • Moulds of the shapes that are going to be moulded • Stove and pot • Small equipment: should always be on hand.

Slide

Prepare and display sugar work

Add specific ingredients to create effects:

- Titanium dioxide:
 - Turns sugar solutions white
- Elements to be suspended inside:
 - Gold, green fleck
- Crinkled foil:
 - Uneven base shows through clear sugar
- Preformed mould cast

Slide 25

Slide No

Trainer Notes

25.

Trainer to advise

- **Titanium dioxide:**
 - Is a natural substance that can be used to give boiled sugar a white colour; helps with showing opaque colours
- **Elements to be suspended inside:**
 - Silver sparkle or small filings can be added for sparkle in clear
- **Crinkled foil:**
 - Crinkling the foil will show imperfection in foil surface and this will show through a clear sugar cast
- **Preformed mould cast:**
 - Silicon moulds can be preformed to shapes of leaves and these do not have to be added as when hand moulding
 - See Chicago School of mould making website.

Slide

Prepare and display sugar work

Pour and set sugar

- Prepare mould, trim edges
- Oil inside to reduce sticking
- One pour
- Continuous motion
- Bottom to top, side to side

Slide 26

Slide No	Trainer Notes
26.	Trainer to advise • Before pouring ensure that the mould is ready • It is sitting correctly • Edges are sealed • Mould edges are not going to move when sugar is poured • When pouring into cast pour slowly for an even flow • Move from one end or side of mould to the other • This will take practice • If you pour and move too quickly on large moulds and then come back to 'Top up' the amount of sugar it may show a wave in the sugar • If waves in cast do not matter then all will be ok • Allow sugar to set • If pieces are small they may be able to be slid into base of baking tray and set aside to cool if tray base is flat and will not distort model.

Slide

Prepare and display sugar work

Release sugar from forms

- Care needs to be taken
- When will sugar hold shapes and not distort when released from mould
- Metal moulds are hardest
- Tap to loosen
- Poured on to oiled marble
- Sugar needs to be 'lifted to prevent sticking

Slide 27

Slide No

Trainer Notes

27.

Trainer to advise

- You have boiled the sugar and poured into mould
- All can be for nothing because it has failed to come out of the mould
- Firm moulds like steel cake rings can be a problem of the sugar sets and it may crack if it is too cold
- You cannot have the sugar 'flex' or bend when cold. It does not do this, it cracks
- So remove from mould as soon as possible; it just needs to hold shape
- Sometimes a light tap will release
- Warm the edges of the mould with blow torch
- If poured directly onto oiled marble bench it will need to be lifted slightly to allow air under to prevent the sugar sticking when cooling

Slide

Prepare and display sugar work

- **Element 6: Plan sugar display piece**
- Plan display piece appropriate to client, occasion or theme able to be produced in time available using a variety of techniques
- Prepare a sketch or outline of display
- Prepare forms and shapes as required by the design
- Calculate quantities required for components of display piece

Slide 28

Slide No	Trainer Notes
28.	Trainer to advise • Trainer to relate performance criteria to element 6 • Performance criteria is the process by which the students training match the learning element • The element is the skill • To assess competency in the skill; the performance criteria is used to outline activities that can be used to assess competency • The trainer should relate how the performance criteria is related to the element • To be able to Prepare and display sugar work the students must be able to; Plan sugar display piece • The student should be able to: ▪ Plan display piece appropriate to client, occasion or theme able to be produced in time available using a variety of techniques ▪ Prepare a sketch or outline of display ▪ Prepare forms and shapes as required by the design ▪ Calculate quantities required for components of display piece.

Slide

Plan sugar display piece

Plan display piece

- 2 dimensional or 3 dimensional
- Height
- Width
- Be realistic
- Base drawing on A4 size paper

Slide 29

Slide No	Trainer Notes
29.	Trainer to advise • When designing a piece to begin keep it basic; be realistic • Use A4 size paper as your base for all drawings • All stencils must be able to fit inside the parameters of this size, if not smaller.

Slide

Plan sugar display piece

Plan display piece

- 2 dimensional or 3 dimensional
- Two dimensional: height and width
- Theme
- Colour

Slide 30

Slide No	Trainer Notes
30.	Trainer to advise • Plan before you start • In beginning it is best to copy another work. • See how others have planned and developed their them • To begin just do one colour, then two, develop technique.

Slide

Plan sugar display piece

Plan display piece

- Three dimensional:
 - Height
 - Width
 - Depth
- Base to stand it on
- Back to be higher than the front
- Cascade forward

Slide 31

Slide No	Trainer Notes
31.	Trainer to advise • When planning your piece look for it to fall forward toward the front • Do not have something sitting at the back that cannot be seen, unless you have it on a rotating base.

Slide

Plan sugar display piece

Prepare sketch or outline of display

- Rough outline
- Theme
- Simplicity

Slide 32

Slide No	Trainer Notes
32.	Trainer to advise • Keep drawing simple • Look to set up curves so they run evenly • Remember to have base flat so it can sit • Keep it simple in beginning • Squares • Ovals • Circles • Geometric shapes of different sizes.

Slide

Plan sugar display piece

Prepare forms or shapes to match design

- Use stencil to cut design in plasticine
- Use round metal ring to shape foil for mould
- Hand mould to shape
- Oil inside so sugar does not stick

Slide 33

Slide No	Trainer Notes
33.	Trainer to advise • Stencil: a cardboard shape of design laid over the plasticine to cut into plasticine for desired shape • This is a onetime mould; stencil can be used many times • Keep plasticine wrapped to prevent drying • Some practitioners lay thin foil inside plasticine to prevent sticking, some apply oil to edge • Shape some foil using a metal cake ring; this comes in handy when more than one piece is required • Smaller pastry cutters can also be used for moulding As long as they are secured and will withstand the heat of the molten solution.

Slide

Plan sugar display piece

- Calculate quantities required for display
- Practice cast or piece sizes

Slide 34

Slide No	Trainer Notes
34.	Trainer to advise • Depends on the size that is being made • Up to 50% more than the actual finished piece.

Slide

Prepare and display sugar work

- **Element 7: Assemble and display sugar work**
- Assemble sugar work
- Decorate sugar work piece
- Display sugar work piece

Slide 35

Slide No	Trainer Notes
35.	Trainer to advise • Trainer to relate performance criteria to element 7 • Performance criteria is the process by which the students training match the learning element • The element is the skill • To assess competency in the skill; the performance criteria is used to outline activities that can be used to assess competency • The trainer should relate how the performance criteria is related to the element • To be able to Prepare and display sugar work the students must be able to; Assembly and display sugar work • The student should be able to do: ▪ Plan display piece appropriate to client, occasion or theme able to be produced in time available using a variety of techniques ▪ Prepare a sketch or outline of display ▪ Prepare forms and shapes as required by the design ▪ Calculate quantities required for components of display piece.

Slide

Assemble and display sugar work

Assemble sugar work

- Start from the base
- Front to back or back to front
- Try to keep seals hidden from front view

Slide 36

Slide No	Trainer Notes
36.	Trainer to advise • Starting with a clean workspace have all pieces lined up in assembly line • Check all equipment is available • Heat edges of pieces to be joined with spirit lamp or blow torch • REMEMBER: you only need to heat to join, do not melt and deform the shape • Have a fan to assist with cooling • In warmer climates cooling of sugar will be slower.

Slide

Assemble and display sugar work

Decorate sugar work piece

- Adding to base design
- Edging
- Painting with fine brushes
- Other sugar pieces

Slide 37

Slide No	Trainer Notes
37.	Trainer to advise • Decoration of the sugar can be done after it has been assembled • Balls can be painted with food colours to produce faces • Smaller pieces of sugar can be melted and touched to other colours to show eyes, noses attached • Liquid colours can be sprayed to add lustre to the sugar surface.

Slide

Assemble and display sugar work

Display sugar work piece

- Positioning
- Lighting
- Static or rotating

Slide 38

Slide No	Trainer Notes
38.	Trainer to advise • There are many ways to show a sugar display • Behind protection shield • Static surface • Rotating base; requires electric motor • How will lighting be used to highlight piece.

Slide

Prepare and display sugar work

Element 8: Store sugar display pieces

- Store according to enterprise and standard industry practice
- Store in appropriate conditions
- Store to maintain maximum quality and appearance

Slide 39

Slide No	Trainer Notes
39.	Trainer to advise • Trainer to relate performance criteria to element 8 • Performance criteria is the process by which the students training match the learning element • The element is the skill • To assess competency in the skill; the performance criteria is used to outline activities that can be used to assess competency. • The trainer should relate how the performance criteria is related to the element • To be able to Prepare and display sugar work the students must be able to; Store sugar display pieces • The student should be able to: ▪ Store according to enterprise and standard industry practice ▪ Store in appropriate conditions ▪ Store to maintain maximum quality and appearance.

Slide

Store sugar display work

- Store according to enterprise requirements
- Store in appropriate conditions
- Store to maintain maximum quality and appearance
- Store in closed dry environment
- Sealed containers
- Store with silica gel sachets

Slide 40

Slide No	Trainer Notes
40.	Trainer to advise • Sugar works will not have a long life due to its hygroscopic properties • Isomalt is better for storage of finished sugar work.

Patisserie practical classes: Recommended training equipment

The equipment and kitchen consumables required for the delivery of practical patisserie training classes are listed below, in the following categories:

- A Items of equipment which should be available for trainer and student use in the training kitchen.
- B The cleaning equipment and cleaning products which should be available in a cleaning room located adjacent to the kitchen, so that students can clean down to leave the kitchen in “as found” condition at the end of each class or session.
- C Consumables other than foodstuffs which need to be kept in the kitchen and available for everyday use in each class or session.
- D The items required by each student which would make up their own individual use kit of tools and small equipment.

A: Equipment in the training kitchen:

- | | |
|---|---|
| <ul style="list-style-type: none"> • Baking ovens • Baking trays • Bakery racks for baking trays • Cooling wires • Proofers • Stainless steel benches or benches with washable surfaces • Stainless steel sinks • Dishwasher • Electronic scales or balance scales • Cake forms ,round and square, rectangular • Cooking pots of various sizes • Sugar work kit | <ul style="list-style-type: none"> • Pie forms • Quiche forms • Measuring jugs • Rolling pins • Food storage containers large and small • Tartlet moulds • Brioche moulds • Pastry docker • Baking paper • Silicon baking sheets • Sieves for dry ingredients • Chocolate tempering kit |
|---|---|

B: Cleaning equipment and consumables:

- | | |
|--|---|
| <ul style="list-style-type: none"> • Scrubbing brush • Scourers • Sink plugs • Floor brooms • Small brush and shovel • Floor mop | <ul style="list-style-type: none"> • Mop bucket • Rubbish bins • Detergent • Hand dishwashing detergent • Paper hand towel |
|--|---|

C: Consumables (non-food) to be available in the kitchen:

- | | |
|---|---|
| <ul style="list-style-type: none"> • Silicon baking paper • Plain white butchers paper • Greaseproof paper • Aluminium foil | <ul style="list-style-type: none"> • Plastic wrap, clear • Plastic sheeting clear • Product boxes of various required sizes • Doyleys as required |
|---|---|

D: Student equipment kit should include:

- | | |
|--|---|
| <ul style="list-style-type: none"> • Cooks knife • Serrated edge knife for cake cutting • Pastry cutters, round and crinkled • Paring knife • Pastry brushes • Thermometers digital • Dough scrapers, plastic • Bench scrapers, metal • Piping bags, disposable or re-useable • Piping tubes, various sizes • Rubber spatulas • Pastry brushes • Pallet knives of various sizes | <ul style="list-style-type: none"> • Angled Pallet knife • Measuring spoons • Measuring cups • Grater • Zester • Scissors • Carborundum sharpening stone • Balloon whisks of various sizes • Vegetable peeler • Serving spoons, perforated and non perforated • Tongs for handling foods • Marzipan shaping tools |
|--|---|

Instructions for Trainers for using PowerPoint – Presenter View

Connect your laptop or computer to your projector equipment as per manufacturers' instructions.

In PowerPoint, on the **Slide Show** menu, click **Set Up Show**.

Under Multiple monitors, select the Show Presenter View check box.

In the **Display slide show** on list, click the monitor you want the slide show presentation to appear on.

Source: <http://office.microsoft.com>

Note:

In Presenter View:

You see your notes and have full control of the presentation

Your trainees only see the slide projected on to the screen

More Information

You can obtain more information on how to use PowerPoint from the Microsoft Online Help Centre, available at:

<http://office.microsoft.com/training/training.aspx?AssetID=RC011298761033>

Note Regarding Currency of URLs

Please note that where references have been made to URLs in these training resources trainers will need to verify that the resource or document referred to is still current on the internet. Trainers should endeavour, where possible, to source similar alternative examples of material where it is found that either the website or the document in question is no longer available online.
