Competency Based Training (CBT) and assessment - An introduction for trainers

Competency

Competency refers to the ability to perform particular tasks and duties to the standard of performance expected in the workplace.

Competency requires the application of specified knowledge, skills and attitudes relevant to effective participation, consistently over time and in the workplace environment.

The essential skills and knowledge are either identified separately or combined.

Knowledge identifies what a person needs to know to perform the work in an informed and effective manner.

Skills describe the application of knowledge to situations where understanding is converted into a workplace outcome.

Attitude describes the founding reasons behind the need for certain knowledge or why skills are performed in a specified manner.

Competency covers all aspects of workplace performance and involves:

- Performing individual tasks
- Managing a range of different tasks
- Responding to contingencies or breakdowns
- Dealing with the responsibilities of the workplace
- Working with others.

Unit of Competency

Like with any training qualification or program, a range of subject topics are identified that focus on the ability in a certain work area, responsibility or function.

Each manual focuses on a specific unit of competency that applies in the hospitality workplace.

In this manual a unit of competency is identified as a 'unit'.

Each unit of competency identifies a discrete workplace requirement and includes:

- Knowledge and skills that underpin competency
- Language, literacy and numeracy
- Occupational health and safety requirements.

Each unit of competency must be adhered to in training and assessment to ensure consistency of outcomes.

Element of Competency

An element of competency describes the essential outcomes within a unit of competency.

The elements of competency are the basic building blocks of the unit of competency. They describe in terms of outcomes the significant functions and tasks that make up the competency.

In this manual elements of competency are identified as an 'element'.

Performance criteria

Performance criteria indicate the standard of performance that is required to demonstrate achievement within an element of competency. The standards reflect identified industry skill needs.

Performance criteria will be made up of certain specified skills, knowledge and attitudes.

Learning

For the purpose of this manual learning incorporates two key activities:

- Training
- Assessment.

Both of these activities will be discussed in detail in this introduction.

Today training and assessment can be delivered in a variety of ways. It may be provided to participants:

- On-the-job – in the workplace
- Off-the-job – at an educational institution or dedicated training environment
- As a combination of these two options.

No longer is it necessary for learners to be absent from the workplace for long periods of time in order to obtain recognised and accredited qualifications.

Learning Approaches

This manual will identify two avenues to facilitate learning:

Competency Based Training (CBT)

This is the strategy of developing a participant's competency.

Educational institutions utilise a range of training strategies to ensure that participants are able to gain the knowledge and skills required for successful:

- Completion of the training program or qualification
- Implementation in the workplace.

The strategies selected should be chosen based on suitability and the learning styles of participants.

Competency Based Assessment (CBA)

This is the strategy of assessing competency of a participant.

Educational institutions utilise a range of assessment strategies to ensure that participants are assessed in a manner that demonstrates validity, fairness, reliability, flexibility and fairness of assessment processes.

Flexibility in Learning

It is important to note that flexibility in training and assessment strategies is required to meet the needs of participants who may have learning difficulties. The strategies used will vary, taking into account the needs of individual participants with learning difficulties. However they will be applied in a manner which does not discriminate against the participant or the participant body as a whole.

Catering for Participant Diversity

Participants have diverse backgrounds, needs and interests. When planning training and assessment activities to cater for individual differences, trainers and assessors should:

- Consider individuals' experiences, learning styles and interests
- Develop questions and activities that are aimed at different levels of ability
- Modify the expectations for some participants
- Provide opportunities for a variety of forms of participation, such as individual, pair and small group activities
- Assess participants based on individual progress and outcomes.

The diversity among participants also provides a good reason for building up a learning community in which participants support each other's learning.

Participant Centred Learning

This involves taking into account structuring training and assessment that:

- *Builds on strengths* – Training environments need to demonstrate the many positive features of local participants (such as the attribution of academic success to effort, and the social nature of achievement motivation) and of their trainers (such as a strong emphasis on subject disciplines and moral responsibility). These strengths and uniqueness of local participants and trainers should be acknowledged and treasured
- *Acknowledges prior knowledge and experience* – The learning activities should be planned with participants' prior knowledge and experience in mind
- *Understands learning objectives* – Each learning activity should have clear learning objectives and participants should be informed of them at the outset. Trainers should also be clear about the purpose of assignments and explain their significance to participants
- *Teaches for understanding* – The pedagogies chosen should aim at enabling participants to act and think flexibly with what they know
- *Teaches for independent learning* – Generic skills and reflection should be nurtured through learning activities in appropriate contexts of the curriculum. Participants should be encouraged to take responsibility for their own learning
- *Enhances motivation* – Learning is most effective when participants are motivated. Various strategies should be used to arouse the interest of participants

- *Makes effective use of resources* – A variety of teaching resources can be employed as tools for learning
- *Maximises engagement* – In conducting learning activities, it is important for the minds of participants to be actively engaged
- *Aligns assessment with learning and teaching* – Feedback and assessment should be an integral part of learning and teaching
- *Caters for learner diversity* – Trainers should be aware that participants have different characteristics and strengths and try to nurture these rather than impose a standard set of expectations.

Active Learning

The goal of nurturing independent learning in participants does not imply that they always have to work in isolation or solely in a classroom. On the contrary, the construction of knowledge in tourism and hospitality studies can often best be carried out in collaboration with others in the field. Sharing experiences, insights and views on issues of common concern, and working together to collect information through conducting investigative studies in the field (active learning) can contribute a lot to their eventual success.

Active learning has an important part to play in fostering a sense of community in the class. First, to operate successfully, a learning community requires an ethos of acceptance and a sense of trust among participants, and between them and their trainers. Trainers can help to foster acceptance and trust through encouragement and personal example, and by allowing participants to take risks as they explore and articulate their views, however immature these may appear to be. Participants also come to realise that their classmates (and their trainers) are partners in learning and solving.

Trainers can also encourage cooperative learning by designing appropriate group learning tasks, which include, for example, collecting background information, conducting small-scale surveys, or producing media presentations on certain issues and themes. Participants need to be reminded that, while they should work towards successful completion of the field tasks, developing positive peer relationships in the process is an important objective of all group work.

Competency Based Training (CBT)

Principle of Competency Based Training

Competency based training is aimed at developing the knowledge, skills and attitudes of participants, through a variety of training tools.

Training Strategies

The aims of this curriculum are to enable participants to:

- Undertake a variety of subject courses that are relevant to industry in the current environment
- Learn current industry skills, information and trends relevant to industry
- Learn through a range of practical and theoretical approaches
- Be able to identify, explore and solve issues in a productive manner

- Be able to become confident, equipped and flexible managers of the future
- Be 'job ready' and a valuable employee in the industry upon graduation of any qualification level.

To ensure participants are able to gain the knowledge and skills required to meet competency in each unit of competency in the qualification, a range of training delivery modes are used.

Types of Training

In choosing learning and teaching strategies, trainers should take into account the practical, complex and multi-disciplinary nature of the subject area, as well as their participant's prior knowledge, learning styles and abilities.

Training outcomes can be attained by utilising one or more delivery methods:

Lecture/Tutorial

This is a common method of training involving transfer of information from the trainer to the participants. It is an effective approach to introduce new concepts or information to the learners and also to build upon the existing knowledge. The listener is expected to reflect on the subject and seek clarifications on the doubts.

Demonstration

Demonstration is a very effective training method that involves a trainer showing a participant how to perform a task or activity. Through a visual demonstration, trainers may also explain reasoning behind certain actions or provide supplementary information to help facilitate understanding.

Group Discussions

Brainstorming in which all the members in a group express their ideas, views and opinions on a given topic. It is a free flow and exchange of knowledge among the participants and the trainer. The discussion is carried out by the group on the basis of their own experience, perceptions and values. This will facilitate acquiring new knowledge. When everybody is expected to participate in the group discussion, even the introverted persons will also get stimulated and try to articulate their feelings.

The ideas that emerge in the discussions should be noted down and presentations are to be made by the groups. Sometimes consensus needs to be arrived at on a given topic. Group discussions are to be held under the moderation of a leader guided by the trainer. Group discussion technique triggers thinking process, encourages interactions and enhances communication skills.

Role Play

This is a common and very effective method of bringing into the classroom real life situations, which may not otherwise be possible. Participants are made to enact a particular role so as to give a real feel of the roles they may be called upon to play. This enables participants to understand the behaviour of others as well as their own emotions and feelings. The instructor must brief the role players on what is expected of them. The role player may either be given a ready-made script, which they can memorize and enact, or they may be required to develop their own scripts around a given situation. This technique is extremely useful in understanding creative selling techniques and human relations. It can be entertaining and energizing and it helps the reserved and less literate to express their feelings.

Simulation Games

When trainees need to become aware of something that they have not been conscious of, simulations can be a useful mechanism. Simulation games are a method based on "here and now" experience shared by all the participants. The games focus on the participation of the trainees and their willingness to share their ideas with others. A "near real life" situation is created providing an opportunity to which they apply themselves by adopting certain behaviour. They then experience the impact of their behaviour on the situation. It is carried out to generate responses and reactions based on the real feelings of the participants, which are subsequently analysed by the trainer.

While use of simulation games can result in very effective learning, it needs considerable trainer competence to analyse the situations.

Individual /Group Exercises

Exercises are often introduced to find out how much the participant has assimilated. This method involves imparting instructions to participants on a particular subject through use of written exercises. In the group exercises, the entire class is divided into small groups, and members are asked to collaborate to arrive at a consensus or solution to a problem.

Case Study

This is a training method that enables the trainer and the participant to experience a real life situation. It may be on account of events in the past or situations in the present, in which there may be one or more problems to be solved and decisions to be taken. The basic objective of a case study is to help participants diagnose, analyse and/or solve a particular problem and to make them internalize the critical inputs delivered in the training. Questions are generally given at the end of the case study to direct the participants and to stimulate their thinking towards possible solutions. Studies may be presented in written or verbal form.

Field Visit

This involves a carefully planned visit or tour to a place of learning or interest. The idea is to give first-hand knowledge by personal observation of field situations, and to relate theory with practice. The emphasis is on observing, exploring, asking questions and understanding. The trainer should remember to brief the participants about what they should observe and about the customs and norms that need to be respected.

Group Presentation

The participants are asked to work in groups and produce the results and findings of their group work to the members of another sub-group. By this method participants get a good picture of each other's views and perceptions on the topic and they are able to compare them with their own point of view. The pooling and sharing of findings enriches the discussion and learning process.

Practice Sessions

This method is of paramount importance for skills training. Participants are provided with an opportunity to practice in a controlled situation what they have learnt. It could be real life or through a make-believe situation.

Games

This is a group process and includes those methods that involve usually fun-based activity, aimed at conveying feelings and experiences, which are everyday in nature, and applying them within the game being played. A game has set rules and regulations, and may or may not include a competitive element. After the game is played, it is essential that the participants be debriefed and their lessons and experiences consolidated by the trainer.

Research

Trainers may require learners to undertake research activities, including online research, to gather information or further understanding about a specific subject area.

Competency Based Assessment (CBA)

Principle of Competency Based Assessment

Competency based assessment is aimed at compiling a list of evidence that shows that a person is competent in a particular unit of competency.

Competencies are gained through a multitude of ways including:

- Training and development programs
- Formal education
- Life experience
- Apprenticeships
- On-the-job experience
- Self-help programs.

All of these together contribute to job competence in a person. Ultimately, assessors and participants work together, through the 'collection of evidence' in determining overall competence.

This evidence can be collected:

- Using different formats
- Using different people
- Collected over a period of time.

The assessor who is ideally someone with considerable experience in the area being assessed, reviews the evidence and verifies the person as being competent or not.

Flexibility in Assessment

Whilst allocated assessment tools have been identified for this subject, all attempts are made to determine competency and suitable alternate assessment tools may be used, according to the requirements of the participant.

The assessment needs to be equitable for all participants, taking into account their cultural and linguistic needs.

Competency must be proven regardless of:

- Language
- Delivery Method
- Assessment Method.

Assessment Objectives

The assessment tools used for subjects are designed to determine competency against the 'elements of competency' and their associated 'performance criteria'.

The assessment tools are used to identify sufficient:

- a) Knowledge, including underpinning knowledge
- b) Skills
- c) Attitudes

Assessment tools are activities that trainees are required to undertake to prove participant competency in this subject.

All assessments must be completed satisfactorily for participants to obtain competence in this subject. There are no exceptions to this requirement, however, it is possible that in some cases several assessment items may be combined and assessed together.

Types of Assessment

Allocated Assessment Tools

There are a number of assessment tools that are used to determine competency in this subject:

- Work projects
- Written questions
- Oral questions
- Third Party Report
- Observation Checklist.

Instructions on how assessors should conduct these assessment methods are explained in the Assessment Manuals.

Alternative Assessment Tools

Whilst this subject has identified assessment tools, as indicated above, this does not restrict the assessor from using different assessment methods to measure the competency of a participant.

Evidence is simply proof that the assessor gathers to show participants can actually do what they are required to do.

Whilst there is a distinct requirement for participants to demonstrate competency, there are many and diverse sources of evidence available to the assessor.

Ongoing performance at work, as verified by a supervisor or physical evidence, can count towards assessment. Additionally, the assessor can talk to customers or work colleagues to gather evidence about performance.

A range of assessment methods to assess competency include:

- Practical demonstrations
- Practical demonstrations in simulated work conditions
- Problem solving
- Portfolios of evidence
- Critical incident reports
- Journals
- Oral presentations
- Interviews
- Videos
- Visuals: slides, audio tapes
- Case studies
- Log books
- Projects
- Role plays
- Group projects
- Group discussions
- Examinations.

Recognition of Prior Learning

Recognition of Prior Learning is the process that gives current industry professionals who do not have a formal qualification, the opportunity to benchmark their extensive skills and experience against the standards set out in each unit of competency/subject.

Also known as a Skills Recognition Audit (SRA), this process is a learning and assessment pathway which encompasses:

- Recognition of Current Competencies (RCC)
- Skills auditing
- Gap analysis and training
- Credit transfer.

Assessing competency

As mentioned, assessment is the process of identifying a participant's current knowledge, skills and attitudes sets against all elements of competency within a unit of competency. Traditionally in education, grades or marks were given to participants, dependent on how many questions the participant successfully answered in an assessment tool.

Competency based assessment does not award grades, but simply identifies if the participant has the knowledge, skills and attitudes to undertake the required task to the specified standard.

Therefore, when assessing competency, an assessor has two possible results that can be awarded:

- Pass Competent (PC)
- Not Yet Competent (NYC).

Pass Competent (PC)

If the participant is able to successfully answer or demonstrate what is required, to the expected standards of the performance criteria, they will be deemed as 'Pass Competent' (PC).

The assessor will award a 'Pass Competent' (PC) if they feel the participant has the necessary knowledge, skills and attitudes in all assessment tasks for a unit.

Not Yet Competent' (NYC)

If the participant is unable to answer or demonstrate competency to the desired standard, they will be deemed to be 'Not Yet Competent' (NYC).

This does not mean the participant will need to complete all the assessment tasks again. The focus will be on the specific assessment tasks that were not performed to the expected standards.

The participant may be required to:

- a) Undertake further training or instruction
- b) Undertake the assessment task again until they are deemed to be 'Pass Competent'.

Competency standard

UNIT TITLE: PREPARE AND PRODUCE CAKES AND PASTRIES		NOMINAL HOURS: 30
UNIT NUMBER: D1.HPA.CL4.08		
UNIT DESCRIPTOR: This unit deals with skills and knowledge required by cooks, chefs and patissiers to prepare, produce, display and store a range of high quality cakes and pastries in commercial food production environments		
ELEMENTS AND PERFORMANCE CRITERIA		UNIT VARIABLE AND ASSESSMENT GUIDE
Element 1: Prepare and bake cakes and fillings 1.1 Select required <i>commodities</i> according to recipe and production requirements 1.2 Prepare a <i>variety of cakes</i> to desired <i>product characteristics</i> 1.3 Produce a variety of cakes according to standard recipes and enterprise standards 1.4 Use appropriate <i>equipment</i> to prepare and bake cakes 1.5 Use correct <i>techniques</i> to produce cakes to enterprise standards 1.6 Bake cakes to <i>enterprise requirements and standards</i> 1.7 Select correct <i>oven conditions</i> for baking cakes Element 2: Decorate and present/display cakes 2.1 Prepare a variety of <i>fillings and coating/icing, glazes and decorations</i> for cakes		Unit Variables The Unit Variables provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. It relates to the unit as a whole and facilitates holistic assessment This unit applies to all industry sectors that are responsible for preparing, cooking, displaying and storing a range of cakes and pastries within the labour divisions of the hotel and travel industries and may include: 1 Food Production. <i>Commodities</i> may include: • Flours • Sugars • Fruits • Nuts • Eggs • Milk • Cream

2.2 Decorate cakes using fillings and coating/icing and decorations according to standard recipes and/or enterprise standards and/or customer requests

2.3 Present/display cakes to enterprise standards using appropriate *service equipment*

Element 3: Prepare and produce pastries and fillings

3.1 Select required commodities according to recipe and production requirements

3.2 Prepare a variety of *pastries*

3.3 Produce a variety of pastries according to standard recipes and enterprise standards

3.4 Use appropriate equipment to prepare and bake pastries

3.5 Use correct techniques to produce pastries to enterprise standards

3.6 Bake pastries to enterprise requirements and standards

3.7 Select correct oven conditions for baking pastries

Element 4: Decorate and present pastries

4.1 Prepare a variety of fillings coating, icing, glazes and decorations for pastries

- Gelatin
- Flavourings and essences
- Chocolate
- Fats
- Water.

Variety of cakes should include:

- Madeira cake
- Genoese sponges
- Basic aerated sponge
- Swiss roll
- Fruit cake
- Muffins
- Cakes specific to cultural feasts and celebrations
- Health and diet specific items, such as gluten free and fat free.

Product characteristics is related to:

- Colour
- Consistency and texture
- Moisture content
- Mouth feel and eating properties
- Appearance.

Equipment may include:

- Ovens
- Trays

4.2 Decorate pastries using coating, icing and decorations according to standard recipes and/or enterprise standards and/or customer requests

4.3 Present/display pastries to enterprise standards using appropriate service equipment

Element 5: Store cakes and pastries

5.1 *Store at correct temperature and conditions of storage*

5.2 Maintain maximum eating quality, appearance and freshness

- Racks
- Bowls
- Mixing machine
- Scales
- Rings, tins and moulds
- Fridge and freezer
- Blenders
- Dough break
- Rolling pin
- Piping bags and nozzles
- Wooden spoons
- Cutters.

Techniques should include:

- Beating
- Whisking
- Folding
- Rolling
- Laminating
- Creaming
- Kneading
- Incorporating fat.

	<i>Enterprise requirements and standards</i> should relate to: • Scale to correct weight • Colour • Consistency • Texture • Moisture • Mouth feel • Appearance • Sale ability. <i>Oven conditions</i> may relate to: • Colour • Shape • Crust structure • Temperature • Rack position • Cooking times • Moisture. <i>Fillings and coating/icing, glazes and decorations</i> may include: • Fruits • Biscuits • Chocolate • Flowers and leaves
--	--

- Herbs
- Croquant
- Creams
- Glazes
- Icings
- Icing sugar or chocolate powder
- Fruit sauces
- Nuts and dried fruits
- Jams
- Mousses
- Custards
- Jellies
- Meringue.

Service equipment may include:

- Ceramics
- Glass
- Crystal
- Mirrors
- Trays
- Croquant stands
- Sugar work stands
- Chocolate stands
- Display cabinets.

	<i>Pastries</i> should include: • Short and sweet paste, including flans, tarts, fruit tartlets and quiche • Scotch shortbread, including linzer and other slices • Choux paste, including éclairs and profiteroles • Puff paste, including mille feuille, palmiers, bouchees, cream horns and pithiviers • Filo/strudel • Danish. <i>Store at correct temperature and conditions</i> may relate to: • Away from strong odours • Appropriate containers • Labelling • Cool room temperature • Cool room placement • Length of time in cool storage • Freezer temperature • Length of time in freezer storage. Assessment Guide The following skills and knowledge must be assessed as part of this unit: • Knowledge of the quality characteristics of cakes and pastries, including classical, modern/contemporary and culturally specific • Knowledge of the appropriate quality indicators, such as taste, texture, structure, shape and size to industry and/or enterprise standards • Knowledge of the principles of the production of cakes and pastries
--	---

	• Ability to maintain hygiene and food safety requirements • Knowledge of commodities • Knowledge of the historical and cultural aspects of cakes and pastries and their role on the menu and in the industry. Linkages To Other Units • Comply with workplace hygiene procedures • Implement occupational health and safety procedures • Prepare and store food • Work effectively with colleagues and customers • Maintain strategies for safe food • Present and display food products • Apply basic techniques of commercial cookery. Critical Aspects of Assessment Evidence of the following is essential: • Knowledge of the varieties and characteristics of cakes and pastries classifications, including classical and modern, size, shape, structure and assembly according to industry and enterprise standards • Demonstration of commodity knowledge, including quality aspects • Demonstrated ability to safely and hygienically handle products • Knowledge of specific terminology related to cakes and pastries • Demonstrated ability to prepare a variety of cakes and pastries from at least six different recipes and cultural backgrounds • Demonstration of creative and artistic skills in preparation, decoration and display of cakes and pastries
--	---

	• Demonstrated ability to store a range of cakes and pastries to industry and enterprises standards • Knowledge of appropriate portion control. Context of Assessment This unit may be assessed on or off the job • assessment should include practical demonstration either in the workplace or through a simulation activity, supported by a range of methods to assess underpinning knowledge • Assessment must relate to the individual's work area or area of responsibility • Demonstration of skills on more than one occasion • Preparation, decoration and display of cakes and pastries within typical workplace conditions and timeframes. Resource Implications Training and assessment must include access and use to a fully equipped commercial kitchen, use of real ingredients and service equipment; and access to workplace standards, procedures, policies, guidelines, tools and equipment. Assessment Methods The following methods may be used to assess competency for this unit: • Observation of practical candidate performance • Oral and written questions • Third party reports completed by a supervisor • Project and assignment work • Sampling of dishes prepared by the student. Key Competencies in this Unit <i>Level 1 = competence to undertake tasks effectively</i>
--	--

	<i>Level 2 = competence to manage tasks</i> <i>Level 3 = competence to use concepts for evaluating</i>		
	Key Competencies	Level	Examples
	Collecting, organising and analysing information	1	Determine requirements of standard recipes and/or menu requirements; collect equipment, commodities and ingredients; select and obtain commodities, organise ingredients and task sheets.
	Communicating ideas and information	1	Share information with other kitchen and floor service staff; read recipes, menus and instructions and orders
	Planning and organising activities	1	Complete preparation (mise-en-place) and organise for the production of cakes and pastries; working within time constraints in a logical sequence
	Working with others and in teams	1	Work cooperatively with other team members
	Using mathematical ideas and techniques	1	Calculate quantities and portions against standard recipes and/or menu requirements
	Solving problems	2	Identify and correct problems in the preparation, production of cakes and pastries such as ingredient quality and use of equipment; deal with minor problems such as failure of cakes to rise, batter too moist, overcooking and dough too soft or dry
	Using technology	1	Use mechanical kitchen equipment, including weighing equipment

Notes and PowerPoint slides

Slide

PREPARE AND PRODUCE CAKES AND PASTRIES

D1.HPA.CL4.08

Slide 1

Slide No	Trainer Notes
1.	Trainer to introduce self and talk of personal bone fide to be able to teach this unit. Give brief overview of your experience in patisserie and baking Industry.

Slide

Prepare and produce cakes and pastries

Assessment for this Unit may include:

- Oral questions
- Written questions
- Work projects
- Workplace observation of practical skills
- Practical exercises
- Formal report from employer/supervisor

Slide 2

Slide No	Trainer Notes
2.	Trainer advises students that assessment for this Unit may take several forms all of which are aimed at verifying they have achieved competency for the Unit as required. Trainer indicates to students the methods of assessment that will be applied to them for this Unit.

Slide

Prepare and produce cakes and pastries

This unit comprises five Elements

1. Prepare and bake cakes and fillings
2. Decorate and present/display cakes
3. Prepare and produce pastries and fillings
4. Decorate and present pastries
5. Store cakes and pastries

Slide 3

Slide No	Trainer Notes
3.	Trainer advises students this Unit comprises five Elements, as listed on the slide explaining: • Each Element comprises a number of Performance Criteria which will be identified throughout the class and explained in detail • Students can obtain more detail from their Trainee Manual • The course presents advice and information but where their workplace requirements differ to what is presented, the workplace practices and standards must be observed.

Slide

Element 1: Prepare and bake cakes and fillings

Performance Criteria

- Select required commodities according to recipe and production requirements
- Prepare a variety of cakes to desired product characteristics
- Produce a variety of cakes according to standard recipes and enterprise standards
- Use appropriate equipment to prepare and bake cakes
- Use correct techniques to produce cakes to enterprise standards
- Bake cakes to enterprise requirements and standards
- Select correct oven conditions for baking cakes

Slide 4

Slide No

Trainer Notes

4.

Trainer to discuss:

Performance criteria relating to Element 1 - Prepare and bake cakes and fillings.

Slide

Element 1: Prepare and bake cakes and fillings

Select commodities

- ◉ Flours
- ◉ Sugars
- ◉ Eggs
- ◉ Milk
- ◉ Cream
- ◉ Gelatin
- ◉ Flavourings and essences
- ◉ Chocolate
- ◉ Fats, oils, butter, margarines

Slide 5

Slide No	Trainer Notes
5.	Trainer to discuss: Give a brief synopsis of all the ingredients that may be used to produce cakes and pastries.

Slide

Element 1: Prepare and bake cakes and fillings

Select commodities

Flours:

- Plain Flour
- Self Raising Flour
- Soft Cake Flour
- Special Cake Flour

Slide 6

Slide No	Trainer Notes
6.	Trainer to discuss: • There are many different types of flour on the market for making cakes • They are different to bread baking flours, they do not have the same gluten content • They are weaker in gluten • But of equal food value. Each have a different role: Plain Flour General purpose flour that can be used across wide variety of goods. Self Raising Flour • Plain flour that has an aerating agent (baking powder) added. 60g per kilo of flour is standard • Variation can be used but the majority of premixed self raising flour is in this ratio. Soft Cake Flour Plain flour with low gluten content that has been finely milled to allow for more surface area to be able to absorb and hold liquid.

Special Cake Flour

- Flour which has had the protein denatured by being chlorinated after milling
- This has a bleaching effect and makes the flour appear whiter
- The flour has been finely milled so it has smaller particle size. This finer size allows for greater ability to hold liquid
- This Special flour works with special shortenings with emulsifiers that allow for all ingredients to be placed into the same bowl and will aerate during the mixing process
- In contrast to sugar batter and flour batter methods.

Slide

Element 1: Prepare and bake cakes and fillings

Select commodities

- Sugars
 - Caster
 - Brown
 - A1 crystal
 - Glucose, powder and liquid
 - Icing
- Fondant

Slide 7

Slide No

Trainer Notes

7.

Trainer to discuss:

Different types of sugar in the market place:

- Castor sugar is the best sugar to use in cake making because it dissolves best during the baking process and less evidence of un-dissolved grains after baking
- Brown sugar is normal sucrose that has a portion of molasses added to the end product
- Brown sugar comes in light brown and dark brown
- A1 sugar crystal is the normal everyday sugar that most people know. It is not recommended for baking due to the grain size. Castor sugar is best because it has finer grain and will dissolve better in batters and pastry during the baking process.

Glucose

- Comes in either liquid or powder form
- Liquid form is used in baking and its main role beside sweetening is to help keep moisture in product
- Liquid glucose is derived from starch. The starch is gelatinised and an acid is added and over time it converts to a sugar; glucose.

Icing sugar

Finer grind of sugar, very small particles.

	Fondant
--	----------------

- | | |
|--|---|
| | <ul style="list-style-type: none">• Fondant is a sugar solution that has been boiled to 114-117C and then cooled and while cooling it is agitated to form a white mass• Before applying it needs to be tempered. |
|--|---|

Slide

Element 1: Prepare and bake cakes and fillings

Select commodities

- Eggs
- Dairy products and substitutes
 - Milk
 - Cream
 - Fats, oils, butter, margarines

Slide 8

Slide No	Trainer Notes
8.	Trainer to discuss: Products in the marketplace: ● Eggs ■ Are available in many forms ■ Fresh, frozen, powdered ● Milk comes in several forms, fresh, powdered ■ Cream comes both fresh and imitation ■ Fresh need refrigeration and is hard to control in hot humid climates ● Fats, oils, butter, margarines ■ All are fats and come in many forms ■ Practitioner needs to choose what is best adapted to the needs of the product.

Slide

Element 1: Prepare and bake cakes and fillings

Select commodities

- Chocolate
- Cocoa powder
- Nuts
- Gelatin
- Flavourings and essences

Slide 9

Slide No	Trainer Notes
9.	Trainer to discuss: Products in the marketplace: • Chocolate ▪ Cocoa powder ▪ Chocolate couverture and bakers chocolate can be used ▪ Cocoa powder is the powder flavour of the cocoa pod • Nuts ▪ Ground varieties are used in bakery products, sliced and chopped may be roasted and used for decoration • Gelatin and agar agar are just two gelling agents that can be used • Flavourings and essences ▪ Spices and liquid flavourings and colourings are also used, varieties are endless.

Slide

Element 1: Prepare and bake cakes and fillings

Prepare a variety of cakes:

- Sponge
- Pound cakes
- High ratio cakes
- Fudge style cakes
- Special dietary needs
- Honey and spice cakes
- Fruit cakes, Light
- Fruit cakes, Dark

Slide 10

Slide No

Trainer Notes

10.

Trainer to discuss:

Each of the following in the subsequent slides:

- Pound cakes
- High ratio cakes
- Fudge style cakes
- Special dietary needs
- Honey and spice cakes
- Fruit cakes, Light
- Fruit cakes, Dark.

Slide

Element 1: Prepare and bake cakes and fillings

Prepare a variety of cakes

Sponge:

- Genoise
- Sponge drops
- Sponge sheets
- Emulsified sponge

Slide 11

Slide No	Trainer Notes
11.	Trainer to discuss: What are sponge cakes and how to prepare them: • Genoise • Sponge drops • Sponge sheets • Emulsified sponge.

Slide

Element 1: Prepare and bake cakes and fillings

Prepare a variety of cakes

Pound cakes:

- Madeira cakes
- Butter cake
- Pandowdy cakes
- Carrot cake
- Vegetable oil based cakes

Slide 12

Slide No

Trainer Notes

12.

Trainer to discuss:

The different varieties of pound cakes and their preparation:

- Madeira cakes
- Butter cake
- Pandowdy cakes
- Carrot cake
- Vegetable oil based cakes.

Slide

Element 1: Prepare and bake cakes and fillings

Prepare a variety of cakes

High ratio cakes

- Special shortening and emulsifiers used to produce fine texture and gentle eating products
- Special flours of finer starch grain
- Flour has protein de-natured
- Holds more water
- Formula contains more sugar

Slide 13

Slide No	Trainer Notes
13.	Trainer to discuss: What are High ratio cakes and their preparation method: • Special shortening and emulsifiers used to produce fine texture and gentle eating products • Special flours of finer starch grain • Flour has protein de-natured • Holds more water • Formula contains more sugar.

Slide

Element 1: Prepare and bake cakes and fillings

Prepare a variety of cakes

Fudge style cakes:

- Caramel fudge
- Banana
- Chocolate fudge

Slide 14

Slide No	Trainer Notes
14.	Trainer to discuss: What are Fudge style cakes, their varieties and preparation methods: • Caramel fudge • Banana • Chocolate fudge.

Slide

Element 1: Prepare and bake cakes and fillings

Prepare a variety of cakes

Special dietary needs:

- Gluten free
- Milk free
- Egg free
- Soy free
- Low fat

Slide 15

Slide No	Trainer Notes
15.	Trainer to discuss: What are the special dietary needs in preparing cakes: • Gluten free • Milk free • Egg free • Soy free • Low fat.

Slide

Element 1: Prepare and bake cakes and fillings

Prepare a variety of cakes

- Honey and spice cakes
- Ginger breads
- Honey cakes

Slide 16

Slide No	Trainer Notes
16.	Trainer to discuss: Other varieties of cakes such as: • Honey and spice cakes • Ginger breads • Honey cakes.

Slide

Element 1: Prepare and bake cakes and fillings

Prepare a variety of cakes

Fruit cakes, Light:

- Dundee
- Simnel

Fruit cakes, dark:

- Heavily fruited and spiced
- Very heavy and dense

Slide 17

Slide No	Trainer Notes
17.	Trainer to discuss: The different types and characteristics of fruit cakes: • Fruit cakes - light • Fruit cakes – dark.

Slide

Element 1: Prepare and bake cakes and fillings

Prepare a variety of cakes

To be able to produce a variety of cakes pastry cooks (pâtisseries) need to be able to be adaptive

- Styles change
- Traditions evolve
- History gets lost
- Seasonality fades

Slide 18

Slide No	Trainer Notes
18.	Trainer to discuss: The importance of being adaptive in order to produce a wide variety of cakes due to the following reasons: • Styles change • Traditions evolve • History gets lost • Seasonality fades.

Slide

Element 1: Prepare and bake cakes and fillings

Use appropriate equipment

- Mixers
- Ovens
- Scales
- Moulds and forms
- Baking trays and racks

Slide 19

Slide No	Trainer Notes
19.	Trainer to discuss: The appropriate equipment to prepare and bake cakes and fillings.

Slide

Element 1: Prepare and bake cakes and fillings

Bake to enterprise standards:

- Bakery
- Patisserie
- Wholesale
- 5 Star Hotel
- Budget market place

Slide 20

Slide No

Trainer Notes

20.

Trainer to discuss:

The importance of baking to enterprise standards.

Slide

Element 1: Prepare and bake cakes and fillings

- Standards and quality will change as enterprise changes
- Standards are kept by pastry cooks working to high standards and producing consistent quality no matter where they work
- Quality is relative to how much the customer is prepared to pay

Slide 21

Slide No	Trainer Notes
21.	Trainer to discuss: • Standards and quality will change as enterprise changes • Standards are kept by pastry cooks working to high standards and producing consistent quality no matter where they work • Quality is relative to how much the customer is prepared to pay.

Slide

Element 2: Decorate and present/display cakes

Performance Criteria

- Prepare a variety of fillings and coatings, icings, glazes and decorations for cakes
- Decorate cakes using fillings, coatings, icings and decorations according to standard recipes and or enterprise standards and or customer requests
- Present and display cakes to enterprise standards using appropriate service equipment

Slide 22

Slide No	Trainer Notes
----------	---------------

22.	Trainer to discuss: Performance criteria relating to Element 2 - Decorate and present/display cakes.
-----	---

Slide

Element 2: Decorate and present/display cakes

Prepare a variety of fillings icings decorations for cakes:

- Fillings
- Creams, fresh
- Creams, butter creams
- Creams, imitation
- Creams, others

Slide 23

Slide No	Trainer Notes
23.	Trainer to discuss: The different types of fillings for cakes.

Slide

Element 2: Decorate and present/display cakes

Prepare a variety of fillings icings decorations for cakes:

- Icing and glaze
- Fudge
- Fondant
- Plastic
- Ganache

Slide 24

Slide No	Trainer Notes
----------	---------------

24.	
-----	--

	Trainer to discuss and provide examples: The different icings and decorations for cakes.
--	--

Slide

Element 2: Decorate and present/display cakes

Decoration to enterprise standard:

- Icing sugar
- Fondant
- Apricot jam
- Roasted nuts
- Glaze and gel

Slide 25

Slide No	Trainer Notes
25.	Trainer to discuss: • Decoration is the final part of the production of any product • Some need no further additions • Some are added before the baking begins. Icing Sugar • Sprinkled over product after it has come out of the oven • If sprinkled while product is still hot icing sugar has a tendency to bond to the product. Con: when people go to eat the product and breath in it can cause people to cough, Customers have to lick fingers after eating. Fondant • Fondant is cooked sugar. It needs to be tempered so it will maintain the gloss or shine • Used in Australia and Europe extensively. Limited use in Asia due to availability and humid conditions.

	Apricot jam • Boiling Apricot jam is applied to baked Danish and sweet yeast goods as a glaze. It must be applied to hot product so it will dry to touch when cool • Adds flavour and slows moisture migration from fondant icing and pastry. Roasted Nuts • Sliced and roasted are commonly used to decorate Danish style pastries after baking • Can be expensive to use, use sparingly. Glazes and gels • These are available in the commercial market. Seaweed based gels are used to apply a shine to finished product • Used mainly on Danish pastries with crème patisserie and fruit fillings • Protects from dehydration, exposure to the air.
--	---

Slide

Element 2: Decorate and present/display cakes

Present and display to enterprise standards:

- Bakery
- Trays
- Platters
- Cellophane bags
- Boxes
- Doyleys
- Labels

Slide 26

Slide No	Trainer Notes
26.	Trainer to discuss: Trays After taking from oven product is placed onto cooling wires, decorated and then placed on trays or platters. Doyleys Some larger product might be placed on to a doyley and displayed individually. The role of the doyley is to have a barrier under product and protect from surface contamination. Boxes • Product might be placed into boxes and displayed for sale, lots of 6 or 12 • Some boxes might have seen through lids. Cellophane bags Bags are clear, see through. Product is placed inside bags to protect from outside contamination and to slow the staling process. Staling is caused by air passing through product and removing moisture. Or moisture evaporates from surface. Labels • Packaged products will have label showing ingredients, name of manufacture and other legal requirements • They make good advertising.

Slide

Element 3: Prepare and produce pastries and fillings

Performance Criteria

- Select required commodities according to recipe and production requirements
- Prepare a variety of pastries
- Produce a variety of pastries according to standard recipes and enterprise standards
- Use appropriate equipment to prepare and bake pastries
- Use correct techniques to produce pastries to enterprise standards
- Bake pastries to enterprise requirements and standards
- Select correct oven conditions for baking pastries

Slide 27

Slide No

Trainer Notes

27.

Trainer to discuss:

Performance criteria relating to Element 3 - Prepare and produce pastries and fillings.

Slide

Element 3: Prepare and produce pastries and fillings

Select required commodities:

- ◉ Flours
- ◉ Sugars
- ◉ Eggs
- ◉ Milk
- ◉ Cream
- ◉ Gelatin
- ◉ Flavourings and essences
- ◉ Chocolate
- ◉ Fats, oils, butter, margarines

Slide 28

Slide No	Trainer Notes
28.	Trainer to discuss: The selection of required commodities in the preparation and production of pastries and fillings in the subsequent slides.

Slide

Element 3: Prepare and produce pastries and fillings

Select required commodities:

Flours

- Strong flour Flour
- Self Raising Flour
- Pastry Flour
- High Ratio Flour

Slide 29

Slide No

Trainer Notes

29.

Trainer to discuss:

- There are many different types of flour on the market
- Each have a different role
- Gluten content is different in each.

Slide

Element 3: Prepare and produce pastries and fillings

Select required commodities:

- Sugars
 - Caster
 - Brown
 - A1 crystal
 - Glucose, powder and liquid
 - Icing
- Fondant

Slide 30

Slide No	Trainer Notes
30.	Trainer to discuss: Different types of sugar in the market place: • Castor sugar is the best sugar to use in cake making because it dissolves best during the baking process and less evidence of un-dissolved grains after baking • Brown sugar is normal sucrose that has a portion of molasses added to the end product • Brown sugar comes in light brown and dark brown • A1 sugar crystal is the normal everyday sugar that most people know. It is not recommended for baking due to the grain size. Castor sugar is best because it has finer grain and will dissolve better in batters and pastry during the baking process. Glucose • Comes in either liquid or powder form • Liquid form is used in baking and its main role beside sweetening is to help keep moisture in product • Liquid glucose is derived from starch. The starch is gelatinised and an acid is added and over time it converts to a sugar; glucose. Icing sugar • Finer grind of sugar, very small particles.

	Fondant • Fondant is a sugar solution that has been boiled to 114-117C and then cooled and while cooling it is agitated to form a white mass • Before applying it needs to be tempered.
--	--

Slide

Element 3: Prepare and produce pastries and fillings

Select required commodities:

- ◉ Eggs
- ◉ Dairy products and substitutes
 - Milk
 - Cream
 - Fats, oils, butter, margarines

Slide 31

Slide No	Trainer Notes
31.	Trainer to discuss: Products in the marketplace: • Eggs • Are available in many forms • Fresh, frozen, powdered • Milk comes in several forms, fresh, powdered • Cream comes both fresh and imitation • Fresh need refrigeration and is hard to control in hot humid climates • Fats, oils, butter, margarines • All are fats and come in many forms • Practitioner needs to choose what is best adapted to the needs of the product.

Slide

Element 3: Prepare and produce pastries and fillings

Prepare variety of pastries:

- Puff pastry
- Mille feuille
- Vol au vents
- Chausson aux pommes

Slide 32

Slide No

Trainer Notes

32.

Trainer to discuss:

Examples of items made from each of these pastry varieties.

Slide

Element 3: Prepare and produce pastries and fillings

Prepare variety of pastries:

- Short pastry
- Quiche
- Savoury rolls
- Pie bases
- Crusts

Slide 33

Slide No	Trainer Notes
33.	Trainer to discuss: Examples of items made from each of these pastry varieties.

Slide

Element 3: Prepare and produce pastries and fillings

Prepare variety of pastries:

- Sweet short pastry
- Fruit pies
- Sweet rolls
- Pie bases
- Shortbread biscuits

Slide 34

Slide No

Trainer Notes

34.

Trainer to discuss:

Examples of items made from each of these pastry varieties.

Slide

Element 4: Decorate and present pastries

Performance Criteria

- Prepare a variety of fillings, coatings, icings glazes and decorations for pastries
- Decorate pastries using coating, icing and decorations according to standard recipes and or enterprise standards and or customer requests
- Present and display pastries to enterprise standards using appropriate service equipment

Slide 35

Slide No	Trainer Notes
35.	Trainer to discuss: Performance criteria relating to Element 4 - Decorate and present pastries.

Slide

Element 4: Decorate and present pastries

Prepare variety of fillings and glazes:

- Cream
- Fruit fillings
- Savoury meat fillings
- Savoury vegetable fillings

Slide 36

Slide No	Trainer Notes
----------	---------------

36.	
-----	--

Trainer to discuss:

Examples of the use of these fillings in producing various items/dishes.

Slide

Element 4: Decorate and present pastries

Decorate pastries to enterprise standards:

- ◉ Everyday presentation
- ◉ Celebratory occasion

Slide 37

Slide No	Trainer Notes
37.	Trainer to discuss: Examples of everyday presentation and examples of a variety of celebratory occasions.

Slide

Element 4: Decorate and present pastries

Present/display to enterprise standards:

- Formal
- Casual
- In house
- Take home

Slide 38

Slide No

Trainer Notes

38.

Trainer to discuss:

The decoration and presentation of pastries needs to take into account the setting and the use of the pastry items.

Ask the class to provide examples for each of the following:

- Formal
- Casual
- In house
- Take home.

Slide

Element 5: Store cakes and pastries

Performance Criteria

- Store at correct temperature and conditions of storage
- Maintain maximum eating quality, appearance and freshness

Slide 39

Slide No	Trainer Notes
39.	Trainer to discuss: Performance criteria relating to Element 5 - Store cakes and pastries.

Slide

Element 5: Store cakes and pastries

Store at correct temperatures:

- Room Temperature
- Protect from outside contamination
- Date of production
- Labelling

Slide 40

Slide No	Trainer Notes
40.	Trainer to discuss: The important aspects of each of these: • Room Temperature – Discuss variations of room temperature in various climates, particular emphasis on heat and humidity in Southeast Asian nations • Protect from outside contamination – Discuss various forms of contamination including chemical, biological and vermin/pests • Date of production – Discuss the importance of absolute freshness in pastry products • Labelling – As with all fresh food products, complete and correct labelling is vital.

Slide

Element 5: Store cakes and pastries

Maintain maximum eating quality:

- Produce as needed
- Make in small batches
- Protect from contamination

Slide 41

Slide No	Trainer Notes
41.	Trainer to discuss: • Produce as needed ▪ Produce only what is required as the product will stale quickly and eating quality will diminish • Make in small batches ▪ Smaller batches will keep quality at maximum • Protect from contamination ▪ Keep covered to protect from outside contamination and slow staling process.

Recommended training equipment

The equipment and kitchen consumables required for the delivery of practical patisserie training classes are listed below, in the following categories:

- A: Items of equipment which should be available for trainer and student use in the training kitchen
- B: The cleaning equipment and cleaning products which should be available in a cleaning room located adjacent to the kitchen, so that students can clean down to leave the kitchen in “as found” condition at the end of each class or session
- C: Consumables other than foodstuffs which need to be kept in the kitchen and available for everyday use in each class or session
- D: The items required by each student which would make up their own individual use kit of tools and small equipment.

A: Equipment in the training kitchen:	
• Baking ovens • Baking trays • Bakery racks for baking trays • Cooling wires • Proofers • Stainless steel benches or benches with washable surfaces • Stainless steel sinks • Dishwasher • Electronic scales or balance scales • Cake forms, round and square, rectangular • Cooking pots of various sizes • Sugar work kit	• Pie forms • Quiche forms • Measuring jugs • Rolling pins • Food storage containers large and small • Tartlet moulds • Brioche moulds • Pastry docker • Baking paper • Silicon baking sheets • Sieves for dry ingredients • Chocolate tempering kit
B: Cleaning equipment and consumables:	
• Scrubbing brush • Scourers • Sink plugs • Floor brooms • Small brush and shovel • Floor mop	• Mop bucket • Rubbish bins • Detergent • Hand dishwashing detergent • Paper hand towel

C: Consumables (non-food) to be available in the kitchen:

- | | |
|---|---|
| <ul style="list-style-type: none"> • Silicon baking paper • Plain white butchers paper • Greaseproof paper • Aluminium foil | <ul style="list-style-type: none"> • Plastic wrap, clear • Plastic sheeting clear • Product boxes of various required sizes • Doyleys as required |
|---|---|

D: Student equipment kit should include:

- | | |
|--|---|
| <ul style="list-style-type: none"> • Cooks knife • Serrated edge knife for cake cutting • Pastry cutters, round and crinkled • Paring knife • Pastry brushes • Thermometers digital • Dough scrapers, plastic • Bench scrapers, metal • Piping bags, disposable or re-useable • Piping tubes, various sizes • Rubber spatulas • Pastry brushes • Pallet knives of various sizes | <ul style="list-style-type: none"> • Angled Pallet knife • Measuring spoons • Measuring cups • Grater • Zester • Scissors • Carborundum sharpening stone • Balloon whisks of various sizes • Vegetable peeler • Serving spoons, perforated and non perforated • Tongs for handling foods • Marzipan shaping tools |
|--|---|

Instructions for Trainers for using PowerPoint – Presenter View

Connect your laptop or computer to your projector equipment as per manufacturers' instructions.

In PowerPoint, on the **Slide Show** menu, click **Set up Show**.

Under Multiple monitors, select the Show Presenter View check box.

In the **Display slide show** on list, click the monitor you want the slide show presentation to appear on.

Source: <http://office.microsoft.com>

Note:

In Presenter View:

You see your notes and have full control of the presentation

Your trainees only see the slide projected on to the screen

More Information

You can obtain more information on how to use PowerPoint from the Microsoft Online Help Centre, available at:

<http://office.microsoft.com/training/training.aspx?AssetID=RC011298761033>

Note Regarding Currency of URLs

Please note that where references have been made to URLs in these training resources trainers will need to verify that the resource or document referred to is still current on the internet. Trainers should endeavour, where possible, to source similar alternative examples of material where it is found that either the website or the document in question is no longer available online.
