Competency Based Assessment (CBA) – An Introduction for Assessors

Assessment is the process of identifying a participant's current knowledge, skills and attitudes sets against all elements of competency within a unit of competency.

Suggested Assessment Methods

For each unit of competency a number of assessment tools have been identified including:

- Work Projects
- Oral Questions
- Written Questions
- Third Party Statements
- Observation Checklists.

Instructions and Evidence Recording Sheets have been identified in this Assessment Manual for use by Assessors.

Alternative Assessment Methods

Whilst the above mentioned assessment methods are suggested assessment methods, the assessor may use an alternate method of assessment taking into account:

- a) The nature of the unit
- b) The strengths of participants
- c) The number of participants in the class
- d) Time required to complete assessments
- e) Time dedicated to assessment
- f) Equipment and resources required.

Alternate assessment methods include:

- Practical demonstrations
- Practical demonstrations in simulated work conditions
- Problem solving
- Portfolios of evidence
- Critical incident reports
- Journals
- Oral presentations
- Interviews
- Videos
- Visuals/slides/audiotapes

- Case studies
- Log books
- Projects and Role plays
- Group projects
- Recognition of Prior Learning.

Whilst there is no specific instruction or evidence collection documents for all the alternative assessment methods, assessors can record competency in the 'Other' section within the 'Competency Recording Sheet'.

Selection of Assessment Methods

Each assessor will determine the combination of Assessment Methods to be used to determine Competency for each Competency Unit on a student by student basis.

'Sufficient' evidence to support the 'Pass Competent'/'Not Yet Competent' decision must be captured.

In practice this means a minimum of 2 – 3 Assessment Methods for each candidate for each Competency Element is suggested.

At least one method should provide evidence of practical demonstration of competence.

The following assessment methods deemed to provide evidence of practical demonstration of competence include:

- Practical Work Projects
- Third Party Statement
- Observation Checklist.

Assessing Competency

Competency based assessment does not award grades, but simply identifies if the participant has the knowledge, skills and attitudes to undertake the required task to the specified standard.

Therefore, when assessing competency, an assessor has two possible results that can be awarded:

- 'Pass Competent' (PC)
- 'Not Yet Competent' (NYC).

Pass Competent (PC)

If the participant is able to successfully answer or demonstrate what is required, to the expected standards of the performance criteria, they will be deemed as 'Pass Competent' (PC).

The assessor will award a 'Pass Competent' (PC) if they feel the participant has the necessary knowledge, skills and attitudes in all assessment tasks for a unit.

Not Yet Competent' (NYC)

If the participant is unable to answer or demonstrate competency to the desired standard, they will be deemed to be 'Not Yet Competent' (NYC).

This does not mean the participant will need to complete all the assessment tasks again. The focus will be on the specific assessment tasks that were not performed to the expected standards.

The participant may be required to:

- a) Undertake further training or instruction
- b) Undertake the assessment task again until they are deemed to be 'Pass Competent'.

Regional Qualifications Framework and Skills Recognition System

The 'Regional Qualifications Framework and Skills Recognition System', also known as the 'RQFSRS' is the overriding educational framework for the ASEAN region.

The purpose of this framework is to provide:

- A standardised teaching and assessment framework
- Mutual recognition of participant achievement across the ASEAN region. This includes achievement in individual Units of Competency or qualifications as a whole.

The role of the 'RQFSRS' is to provide, ensure and maintain 'quality assurance' across all countries and educational providers across the ASEAN region

Recognition of Prior Learning (RPL)

Recognition of Prior Learning is the process that gives current industry professionals who do not have a formal qualification, the opportunity to benchmark their extensive skills and experience against the standards set out in each unit of competency/subject.

This process is a learning and assessment pathway which encompasses:

- Recognition of Current Competencies (RCC)
- Skills auditing
- Gap analysis and training
- Credit transfer.

Code of Practice for Assessors

This Code of Practice provides:

- Assessors with direction on the standard of practice expected of them
- Candidates with assurance of the standards of practice expected of assessors
- Employers with assurance of the standards maintained in the conduct of assessment.

The Code detailed below is based on the International Code of Ethics and Practice (The National Council for Measurement in Education [NCME]):

- The differing needs and requirements of the person being assessed, the local enterprise and/or industry are identified and handled with sensitivity
- Potential forms of conflict of interest in the assessment process and/or outcomes are identified and appropriate referrals are made, if necessary
- All forms of harassment are avoided throughout the planning, conducting, reviewing and reporting of the assessment outcomes

- The rights of the candidate are protected during and after the assessment
- Personal and interpersonal factors that are not relevant to the assessment of competency must not influence the assessment outcomes
- The candidate is made aware of rights and process of appeal
- Evidence that is gathered during the assessment is verified for validity, reliability, authenticity, sufficiency and currency
- Assessment decisions are based on available evidence that can be produced and verified by another assessor
- Assessments are conducted within the boundaries of the assessment system policies and procedures
- Formal agreement is obtained from both the candidate and the assessor that the assessment was carried out in accordance with agreed procedures
- The candidate is informed of all assessment reporting processes prior to the assessment
- The candidate is informed of all known potential consequences of decisions arising from an assessment, prior to the assessment
- Confidentiality is maintained regarding assessment results
- The assessment results are used consistently with the purposes explained to the candidate
- Opportunities are created for technical assistance in planning, conducting and reviewing assessment procedures and outcomes.

Instructions and Checklist for Assessors

Instructions

General instructions for the assessment:

- Assessment should be conducted at a scheduled time that has been notified to the candidate
- Facilitators must ensure participants are made aware of the need to complete assessments and attend assessment sessions
- If a participant is unable to attend a scheduled session, they must make arrangements with the Assessor to undertake the assessment at an alternative time
- At the end of the assessment the Assessor must give feedback and advise the participant on their PC/NYC status
- Complete the relevant documentation and submit to the appropriate department.

Preparation

- Gain familiarity with the Unit of Competency, Elements of Competency and the Performance Criteria expected
- Study details assessment documentation and requirements
- Brief candidate regarding all assessment criteria and requirements.

Briefing Checklist

- Begin the assessment by implementing the following checklist and then invite the candidate to proceed with assessment.

Checklist for Assessors

Prior to the assessment I have:	Tick (✓)	Remarks
Ensured the candidate is informed about the venue and schedule of assessment.		
Received current copies of the performance criteria to be assessed, assessment plan, evidence gathering plan, assessment checklist, appeal form and the company's standard operating procedures (SOP).		
Reviewed the performance criteria and evidence plan to ensure I clearly understood the instructions and the requirements of the assessment process.		
Identified and accommodated any special needs of the candidate.		
Checked the set-up and resources for the assessment.		
During the assessment I have:		
Introduced myself and confirmed identities of candidates.		
Put candidates at ease by being friendly and helpful.		
Explained to candidates the purpose, context and benefits of the assessment.		
Ensured candidates understood the assessment process and all attendant procedures.		
Provided candidates with an overview of performance criteria to be assessed.		
Explained the results reporting procedure.		
Encouraged candidates to seek clarifications if in doubt.		
Asked candidates for feedback on the assessment.		
Explained legal, safety and ethical issues, if applicable.		
After the assessment I have:		
Ensured candidate is given constructive feedback.		
Completed and signed the assessment record.		
Thanked candidate for participating in the assessment.		

Instructions for Recording Competency

Specifications for Recording Competency

The following specifications apply to the preparation of Evidence Gathering Plans:

- A Competency Recording Sheet must be prepared for each candidate to ensure and demonstrate all Performance Criteria and Competency Elements are appropriately assessed. This Sheet indicates how the Assessor will gather evidence during their assessment of each candidate
- This Competency Recording Sheet is located at the end of the Assessment Plan
- It is the overriding document to record competency
- The Assessor may vary the Competency Recording Sheet to accommodate practical and individual candidate and/or workplace needs
- Assessor must place a tick (✓) in the 'Assessment Method' columns to identify the methods of assessment to be used for each candidate
- Multiple Competency Elements/Performance Criteria may be assessed at the one time, where appropriate
- The assessor and participant should sign and date the Competency Recording Sheet, when all forms of evidence and assessment have been completed
- The assessor may provide and feedback or clarify questions which the participant may have in regards to the assessment grade or findings
- All documents used to capture evidence must be retained, and attached to the Competency Recording Sheet for each candidate for each Competency Unit.

Instructions for Different Assessment Methods

Specifications for Work Project Assessment

These guidelines concern the use of work projects.

The work projects identified in the Training Manuals involve a range of tasks, to be performed at the discretion of the Assessor.

Work project tasks can be completed through any form of assessment as identified in the Trainer and Trainee Manuals and stated at the start of this section.

Assessors should follow these guidelines:

- Review the Work Projects at the end of each 'Element of Competency' in the Trainee Manual to ensure you understand the content and what is expected
- Prepare sufficient resources for the completion of work activities including:
 - Time – whether in scheduled delivery hours or suggested time participants to spend outside of class hours
 - Resources – this may involve technical equipment, computer, internet access, stationery and other supplementary materials and documents
- Prepare assessment location (if done in class) making it conducive to assessment
- Explain Work Projects assessment to candidate, at the start of each Element of Competency. This ensures that participants are aware of what is expected and can collate information as delivery takes place

- Assessors can use the following phrase as a guide (where an 'X' is identified, please input appropriate information):

“At the end of each Element of Competency there are Work Projects which must be completed. These projects require different tasks that must be completed.

These work projects are part of the formal assessment for the unit of competency titled X:

 - You are required to complete these activities:
 - Using the 'X' method of assessment*
 - At 'X' location*
 - You will have 'X time period' for this assessment*
 - You are required to compile information in a format that you feel is appropriate to the assessment
 - Do you have any questions about this assessment?”
- Commence Work Project assessment:
 - The assessor may give time for participants to review the questions at this time to ensure they understand the nature of the questions. The assessor may need to clarify questions
 - Participants complete work projects in the most appropriate format
 - Participants must submit Work Project evidence to the assessor before the scheduled due date
- Assessor must assess the participant's evidence against the competency standards specified in each Element of Competency and their own understanding. The assessor can determine if the participant has provided evidence to a 'competent' standard
- Transcribe results/details to Competency Recording Sheet
- Forward/file assessment record.

Specifications for Oral Question Assessment

These guidelines concern the use of oral questioning.

Assessors should follow these guidelines.

- Prepare Assessment Record for Oral Questioning. One record for each candidate:
 - Enter Student name
 - Enter Assessor name
 - Enter Location
- Familiarise self with Questions to be asked
- Prepare assessment location (table and chairs) making it conducive to assessment
- Explain Oral Questioning assessment to candidate, using the following phrase as a guide (where a 'X' is identified, please input appropriate information):

“These oral questions are part of the formal assessment for the unit of competency titled X.

There are X questions and you are required to answer all of them to the best of your ability and I will record whether or not you have answered correctly.

We have 60 minutes for this assessment.

- I will give you feedback at the end of the assessment
- Do you have any questions about this assessment?”
- Commence Oral Questioning assessment:
 - Complete Assessment Record for the Oral Questioning by:
 - a) Ticking PC or NYC, as appropriate
 - b) Entering ‘Remarks’ as required
 - c) Completing Oral Questioning within 60 minutes
- Complete Oral Questioning and provide feedback to candidate
- Transcribe results/details to Competency Recording Sheet
- Forward/file assessment record.

Specifications for Written Question Assessment

These guidelines concern the use of written questioning.

Assessors should follow these guidelines:

- Familiarise self with Questions and Answers provided
- Print and distribute copies of ‘Written Questions’ for participants. Ideally this should take place with adequate time for participants to answer all questions before the expected due date
- Explain Written Questioning assessment to candidate, using the following phrase as a guide (where a ‘X’ is identified, please input appropriate information):

“These written questions are part of the formal assessment for the unit of competency titled X.

There are X questions and you are required to answer all of them to the best of your ability.

You may refer to your subject materials, however where possible try to utilise your existing knowledge when answering questions.

Where you are unsure of questions, please ask the Assessor for further instruction. This may be answering the question orally or asking the assessor to redefine the question.

We have X time for this assessment:

- The due date for completion of this assessment is X
- On this date you must forward the completed questions to the assessor by X time on the date of X
- Do you have any questions about this assessment?”
- The assessor may give time for participants to review the questions at this time to ensure they understand the nature of the questions. The assessor may need to clarify questions
- Participants may record written answers (where possible)
- Participants must submit the written answers to the assessor before the scheduled due date

- Assessor must assess the participant's written answers against the model answers provided as a guide, or their own understanding. The assessor can determine if the participant has answered the questions to a 'competent' standard
- Transcribe results/details to Competency Recording Sheet
- Forward/file assessment record.

Specifications for Observation Checklist

These specifications apply to the use of the Observation Checklist in determining competency for candidates.

Only an approved assessor is authorised to complete the Observation Checklist.

The assessor is required to observe the participant, ideally in a simulated environment or their practical workplace setting and record their performance (or otherwise) of the competencies listed on the Observation Checklist for the Competency Unit.

To complete the Observation Checklist the Assessor must:

- Insert name of candidate
- Insert assessor name
- Insert identify of location where observations are being undertaken
- Insert date/s of observations – may be single date or multiple dates
- Place a tick in either the 'Yes' or 'No' box for each listed Performance Criteria to indicate the candidate has demonstrated/not demonstrated that skill
- Provide written (and verbal) feedback to candidate – as/if appropriate
- Sign and date the form
- Present form to candidate for them to sign and date
- Transcribe results/details to Competency Recording Sheet for candidate
- Forward/file Observation Checklist.

This source of evidence combines with other forms of assessment to assist in determining the 'Pass Competent' or 'Not Yet Competent' decision for the participant.

Specifications for Third Party Statement

These specifications relate to the use of a relevant workplace person to assist in determining competency for candidates.

The Third Party Statement is to be supplied by the assessor to a person in the workplace who supervises and/or works closely with the participant.

This may be their Supervisor, the venue manager, the Department Manager or similar.

The Third Party Statement asks the Supervisor to record what they believe to be the competencies of the participant based on their workplace experience of the participant. This experience may be gained through observation of their workplace performance, feedback from others, inspection of candidate's work etc.

A meeting must take place between the Assessor and the Third Party to explain and demonstrate the use of the Third Party Statement.

To complete the Third Party Verification Statement the Assessor must:

- Insert candidate name
- Insert name and contact details of the Third Party
- Tick the box to indicate the relationship of the Third Party to the candidate
- Present the partially completed form to the Third Party for them to finalise
- Collect the completed form from the Third Party
- Transcribe results/details to Competency Recording Sheet for candidate
- Forward/file Third Party Statement.

The Third Party must:

- Record their belief regarding candidate ability/competency as either:
 - Pass Competent = Yes
 - Not Yet Competent = No
 - Unsure about whether candidate is competent or not = Not Sure
- Meet briefly with the assessor to discuss and/or clarify the form.

This source of evidence combines with other forms of assessment to assist in determining the 'Pass Competent' or 'Not Yet Competent' decision for the candidate.

A separate Third Party Statement is required for each Competency Unit undertaken by the candidate.

Competency standard

UNIT TITLE: MANAGE PHYSICAL ASSETS AND INFRASTRUCTURE		NOMINAL HOURS: 50
UNIT NUMBER: D1.HML.CL10.06 D1.HRM.CL9.11 D2.TRM.CL9.11		
UNIT DESCRIPTOR: This unit deals with the skills and knowledge required to manage physical assets and infrastructure in a range of settings within the hotel and travel industries		
ELEMENTS AND PERFORMANCE CRITERIA		UNIT VARIABLE AND ASSESSMENT GUIDE
Element 1: Develop strategies for systematic maintenance, repair and purchase of physical assets 1.1 Develop strategies for managing <i>physical assets</i> that reflect overall enterprise business and marketing objectives 1.2 Evaluate current and potential financial objectives and constraints in developing <i>asset management strategies</i> 1.3 Integrate all <i>occupational safety, health and welfare requirements</i> into physical asset management 1.4 Develop and maintain an accurate and current <i>physical assets register</i> as part of the asset management strategy 1.5 Incorporate maintenance and repair regimes, which minimise disruption and loss of revenue and which involve <i>appropriate specialists</i>		Unit Variables The Unit Variables provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. It relates to the unit as a whole and facilitates holistic assessment. This unit applies to managing physical assets and infrastructure within the labour divisions of the hotel and travel industries and may include: 1. Front Office 2. Housekeeping 3. Food and Beverage Service 4. Food Production 5. Travel Agencies 6. Tour Operation <i>Physical assets</i> may include: • Buildings • Equipment

Element 2: Monitor the condition and performance of physical assets in the workplace 2.1 Establish and implement <i>systems to ensure that the condition and performance of physical assets</i> are regularly reported and discussed within the enterprise 2.2 Establish and implement systems to identify timely replacement of physical assets 2.3 Make assessments of physical asset performance based on safety, operational efficiency and customer service quality 2.4 Identify problems promptly and take appropriate action 2.5 Identify the need for and access <i>appropriate specialist</i> assistance when required Element 3: Co-ordinate financing of physical assets 3.1 Prepare accurate <i>work or equipment specifications</i> to guide the acquisition process 3.2 Estimate acquisition costs based on evaluation of <i>current, accurate and relevant data</i>, including supplier quotations and estimates 3.3 Make appropriate decisions on the acquisition of physical assets in accordance with enterprise policies and procedures 3.4 Select <i>methods of financing</i> to meet in accordance with enterprise policies and procedures 3.5 Implement the financing process in accordance with enterprise policies and procedures 3.6 Make and keep accurate records of all financial agreements and related documents	• Fixtures, fittings and furnishings • Vehicles • Gardens • Pools • Rides and games. <i>Asset management strategies</i> may include: • Maintenance • Repair • Replacement. <i>Occupational health, safety and welfare requirements</i> may include: • Routine servicing of equipment • Tagging electrical equipment • Reporting faults in assets • Recording near-misses and accidents when handling equipment. <i>Assets register</i> may be used to: • Record, track and manage assets • Provide complete, accurate and timely data • Provide information for internal management and external financial reporting purposes. <i>Appropriate specialists</i> may include: • Trades people • Professional cleaners
--	--

- Contractors
- Manufacturers
- Assessors.

Systems to monitor condition and performance of physical assets may include:

- Integration of reporting into day to day operating procedures
- Regular management reports
- Internal/external inspections and audits
- Regular staff feedback
- Analysis of maintenance costs over a period of time.

Work or equipment specifications may relate to:

- Description of equipment or work to be provided
- Standard of equipment or work to be provided
- Purpose of equipment or work to be provided
- Design and/or capability requirements.

Current, accurate and relevant data used for estimating costs may include:

- Quotations from suppliers
- Current maintenance contracts
- Published or advertised prices
- Previous contracts and costs.

Methods of financing may include:

- Vendor financing
- Capital lease

	• Overdraft • Direct purchasing. Assessment Guide The following skills and knowledge must be assessed as part of this unit: • Types of physical assets required within various travel and hotel enterprises • Maintenance requirements for different types of physical assets • Features and benefits of different financing options for asset acquisition, including purchase, lease and hire purchase • Features of an assets register • Overview of taxation arrangements in relation to the acquisition and disposal of physical assets • Specific legislation relevant to the management and maintenance of physical assets, e.g. In relation to vehicles, food production equipment • Environmental standards and requirements in relation to different types of physical asset. Linkages To Other Units • Lead and manage people • Manage and implement small projects • Develop and implement a business plan • Develop new products and services • Plan and establish systems and procedures • Maintain financial standards and records.
--	--

	Critical Aspects of Assessment Evidence of the following is essential: • Demonstrated ability to plan for and manage the acquisition, maintenance and replacement of physical assets within a specific tourism and hospitality workplace • Demonstrated understanding of the financial and legal issues that impact on the management of physical assets • Demonstrated ability to develop asset management strategies and financing arrangements for a specific business operation • Demonstrated ability to implement knowledge of current financial data and regulations. Context of Assessment This unit may be assessed on or off the job • Assessment should include practical demonstration either in the workplace or through a simulation activity, supported by a range of methods to assess underpinning knowledge • Assessment must relate to the individual's work area or area of responsibility. Resource Implications Training and assessment to include access to a real or simulated workplace that provides the candidate with an opportunity to demonstrate application of knowledge of financial and legal issues that impact on the management of physical assets to specific tourism and hospitality workplace situations and problems; and access to workplace standards, procedures, policies, guidelines, tools and current financial data and regulations.
--	--

	Assessment Methods The following methods may be used to assess competency for this unit: • Case studies • Observation of practical candidate performance • Oral and written questions • Portfolio evidence • Problem solving • Third party reports completed by a supervisor • Project and assignment work		
	Key Competencies in this Unit <i>Level 1 = competence to undertake tasks effectively</i> <i>Level 2 = competence to manage tasks</i> <i>Level 3 = competence to use concepts for evaluating</i>		
	Key Competencies	Level	Examples
	Collecting, organising and analysing information	3	Assess information to determine whether it is more economically viable to lease or purchase
	Communicating ideas and information	2	Develop specifications that provide clear and concise information about enterprise needs
	Planning and organising activities	3	Develop and monitor systems and work procedures to ensure effective management of physical assets

	Working with others and in teams	2	Liaise with the accountant to develop optimum approaches to the acquisition of physical assets
	Using mathematical ideas and techniques	2	Estimate costs and financial implications of asset acquisition
	Solving problems	2	Develop and implement a system to provide ongoing maintenance during peak season, avoiding disruption to service and breakdowns
	Using technology	2	Use spread sheet technology to develop and assess different financial scenarios

Oral questions

Assessor name	
Location/venue	
Unit of competency	Manage physical assets and infrastructure D1.HML.CL10.06 D1.HRM.CL9.11 D2.TRM.CL9.11
Instructions	1. Ask student questions from the attached list to confirm knowledge, as necessary 2. Place tick in boxes to reflect student achievement (Pass Competent 'PC' or Not Yet Competent 'NYC') 3. Write short-form student answer in the space provided for each question.

Questions	Response	
	PC	NYC
1. Why are physical assets important in a tourism organisation?	☐	☐
2. How can you evaluate current and potential financial objectives and constraints when developing asset management strategies?	☐	☐

Questions	Response	
	PC	NYC
3. Why is it important to identify OSH requirements when selecting assets?	☐	☐
4. Why is it important to have an asset register?	☐	☐
5. What must be taken into account when scheduling maintenance?	☐	☐

Questions	Response	
	PC	NYC
6. Why is it important to monitor asset performance and conditions?	☐	☐
7. How can you identify when assets need to be replaced?	☐	☐
8. Provide an example of how can monitor the condition and performance of physical assets in the workplace.	☐	☐

Questions	Response	
	PC	NYC
9. What is 'TQM' and how can it be beneficial in identifying problems with assets?	☐	☐
10. Why may outsourcing asset management be beneficial to a tourism organisation?	☐	☐
11. Why are specifications important when selecting assets for an organisation?	☐	☐

Questions	Response	
	PC	NYC
12. What considerations would you identify when selecting a contractor or supplier of an asset?	☐	☐
13. What payment requirements do suppliers have in place when selling major assets to your organisation?	☐	☐
14. What are factors for consideration when making a final financial decision?	☐	☐

Questions	Response	
	PC	NYC
15. What are investment decision considerations?	☐	☐
16. Why is it important to keep accurate records relating to the purchase and management of assets?	☐	☐

Written questions

Manage physical assets and infrastructure D1.HML.CL10.06
D1.HRM.CL9.11
D2.TRM.CL9.11

Student Name: _____

Answer all the following questions and submit to your Trainer.

1. What are types of physical assets commonly found in a tourism organisation?

2. What are steps in developing an asset strategy?

3. What are the three main strategies that can be applied to asset management?

4. What are short term and medium to long term benefits of strategic asset planning?

5. What are examples of occupational health, safety and welfare requirements that must be considered when selecting assets for a tourism organisation?

6. What are the responsibilities of a manager to ensure the safety of people using assets?

7. What is an asset register?

8. What are examples of information about a particular asset that would appear on an asset register?

9. What is the definition of maintenance?

10. What are the 6 categories of maintenance?

11. What are examples of systems that can be used to monitor condition and performance of physical assets?

12. What are examples of 'preventative' maintenance?

13. What are the three actions that can be taken when an asset is not performing well?

14. What considerations must be taken into account when deciding to replace, refurbish or augment an asset?

15. What are questions you could ask yourself when monitoring the 'condition' of an asset?

16. What are questions you could ask yourself when monitoring the 'performance' of an asset?

17. What are examples of 'Total Quality Management' initiatives that can be implemented in the workplace to manage assets?

18. What are support mechanisms that can be used to identify problems with assets?

19. What are types of appropriate specialists that may be used to help manage and maintain assets?

20. What are commonly outsourced asset management areas or activities?

21. What is a 'Specification'?

22. What information should be included in a specification?

23. What information can be used to estimate costs when acquiring an asset?

24. What are the major steps in the purchasing cycle?

25. What are different ways to purchase assets?

26. What are examples of 'early costs' associated with the purchase of a major asset?

27. What are the three main methods of financing assets?

28. What are the 'pros' and 'cons' of purchasing?

29. From whom can you seek assistance from when acquiring assets?

30. What are examples of maintenance records that must be kept and maintained accurately?

Answers to written questions

Manage physical assets and infrastructure D1.HML.CL10.06

D1.HRM.CL9.11

D2.TRM.CL9.11

The following are model answers only – Trainers/Assessors must use discretion when determining whether or not an answer provided by a Student is acceptable or not.

1. What are types of physical assets commonly found in a tourism organisation?

- Buildings
- Land
- Equipment and machinery
- Fixtures, furniture and fittings
- Vehicles
- Computer systems
- Office equipment
- Physical surroundings.

2. What are steps in developing an asset strategy?

- Assess what opportunities you have in improvement in your market position
- Assess what opportunities you have in creating new markets
- Assess trends and indicators from the economy, consumerism and social change
- Review your competition's assets
- Review current asset performances
- Understand that assets are simultaneously securities and risks.

3. What are the three main strategies that can be applied to asset management?

Asset management strategies may include:

- Maintenance
- Repair
- Replacement.

4. What are short term and medium to long term benefits of strategic asset planning?

Short term benefits

- More effective use of limited resources by monitoring and ranking
- Support for the validity of accounting reports
- Improved accuracy in budget preparation and in the development of forward work programs
- Greater service at a reduced cost
- Recognition of asset consumption through methods of depreciation used
- Increased knowledge
- Improved customer relations
- Reduced exposure to litigation
- Overall reduction of risk
- Justification staff and resource levels.

Medium to long term benefits

- Improved effectiveness of operations and maintenance activities
- Reduced long term costs
- Greater understanding of asset deterioration
- Cost effective extensions to asset life
- Reduced need for impulsive technical decisions
- Greater awareness of asset management responsibilities
- Competitive life cycle operations and maintenance contracts
- Better decisions.

5. What are examples of occupational health, safety and welfare requirements that must be considered when selecting assets for a tourism organisation?

- Routine servicing of equipment
- Tagging electrical equipment
- Reporting faults in assets
- Recording near-misses and accidents when handling equipment.

6. What are the responsibilities of a manager to ensure the safety of people using assets?

- To ensure development of a safety policy and to ensure that its provisions are being effectively carried out
- To bring the provisions of this policy, in so far as they affect the personnel, to the attention of the employee
- To inspect machinery, equipment and structures regularly and to ensure that any defects discovered are remedied
- To prevent access by the workforce or other persons to any defective machinery, equipment or structures until faults have been rectified
- To ensure that employees are adequately instructed in the safe operation of equipment and machinery
- To ensure that any areas of the site to which the general public or visitors may have access, are maintained to ensure their safety
- To arrange for all necessary insurances, certificates etc., appropriate to the site's size and function
- To arrange for the reporting of all incidents where appropriate
- To arrange the appropriate fire-certificates for each site, the proper maintenance of fire fighting equipment, regular fire drills and adequate access to fire-fighting services
- To ensure that adequate first-aid facilities are available and adequately maintained
- To ensure that all accidents are reported in accordance with legal and best practice obligations
- To ensure that no unnecessary risks are taken by the employees in pursuance of their duties and ensure a site disciplinary procedure is in place for offenders
- To give advice on this policy when requested by management or staff.

7. What is an asset register?

- Asset Register requires the identification and registration of all physical assets.
- The registration process involves the use of an asset information system.
- The asset information system is a database of asset information and is generally referred to as an Asset Register.

8. What are examples of information about a particular asset that would appear on an asset register?

- The purchase price
- The date and place of purchase
- The manufacturers serial number
- An estimate of disposal value and estimated life
- The depreciation rate used in the accounts
- The current value
- The insurer and its insurance value
- The reference number of the organisation
- The maintenance schedule
- The location of the asset.

9. What is the definition of maintenance?

Maintenance is all work that concerns effective preservation of facilities, equipment and systems so that they can perform at a level that is satisfactory to needs.

10. What are the 6 categories of maintenance?

- Preventive and predictive maintenance
- Routine maintenance and minor repairs
- Major repairs
- Emergency repairs
- Alterations and improvements
- Housekeeping.

11. What are examples of systems that can be used to monitor condition and performance of physical assets?

- Integration of reporting into day to day operating procedures
- Regular management reports
- Internal and external inspections and audits
- Regular staff feedback
- Analysis of maintenance costs over a period of time.

12. What are examples of 'preventative' maintenance?

- Cleaning of air conditioning filters and exhaust fans
- Oiling machinery
- Tightening of screws
- Oiling locks and door hinges
- Regular servicing of all machinery. This includes items such as cleaning equipment, computers and photocopying machines
- Checking gutters and down pipes for leakages, blockages and rust
- Checking roofs for loose or missing tiles
- Checking drains to make sure they are not blocked by inefficient cleaning practices or tree roots
- Regular checking and maintenance of all fire-fighting equipment.

13. What are the three actions that can be taken when an asset is not performing well?

- Replaced
- Refurbished
- Augmented.

14. What considerations must be taken into account when deciding to replace, refurbish or augment an asset?

- Initial cost
- Annual and periodic maintenance and operating costs
- When capital will be needed and whether it is likely to be available
- Possible increases in effective life or expected life
- Benefits to customers.

15. What are questions you could ask yourself when monitoring the 'condition' of an asset?

- Where is the asset or component of an asset in its life cycle?
- When was the asset constructed, last replaced or refurbished?
- What is the asset's effective or expected life?
- What is the residual life of the asset before:
 - Replacement is necessary?
 - Refurbishment is required?
- Has the asset been inspected and by whom, using what process?
- Can the asset's deterioration be measured and predicted?
- Can the asset's failure be predicted? If so, how?

- Can planned maintenance prevent the asset's failure or extend the time before failure?
- Can the asset be refurbished?
- What will it cost to refurbish the asset?
- What level of service will the asset deliver once it is refurbished?
- Is the asset technically or commercially obsolete?

16. What are questions you could ask yourself when monitoring the 'performance' of an asset?

- Is the asset performing adequately?
- What is the asset's current utilisation rate compared to its total capacity? Is it below, at or above its capacity?
- Have standards of service been set for each type of asset?
- Is the performance of the asset being reported to the people who made the acquisition decision?
- Does the asset meet:
 - Occupational health and safety regulations?
 - Public safety requirements?
 - Environmental requirements?
- What is the risk of the asset's failure?

17. What are examples of 'Total Quality Management' initiatives that can be implemented in the workplace to manage assets?

- Inspecting
- Assessing
- Recording processes
- Determining protocols and responsibilities
- Apportioning or delegating responsibilities
- Tuning operability as a whole.

18. What are support mechanisms that can be used to identify problems with assets?

- Build up staff communication mechanisms
- Create a sense of ownership among staff of quality operability.
- Avoid culpability track-downs if some asset fails
- Keep the incident records up to scratch.
- Have your contractors and emergency service listing up to date, including out of hours numbers.
- Note customer comments and whether an asset investigation is required.

19. What are types of appropriate specialists that may be used to help manage and maintain assets?

- Trades people
- Professional cleaners
- Contractors
- Manufacturers
- Assessors.

20. What are commonly outsourced asset management areas or activities?

- Security
- Pest control
- Recycling
- Garbage disposal
- Electrical testing
- Landscaping
- Elevators (lifts)
- Window washing
- Fire extinguishers
- Sprinkler system maintenance.

21. What is a 'Specification'?

- A specification refers to the manner in which a good or service is to be provided
- This includes constituents, construction, appearance, performance of a material or apparatus or the standard of workmanship required in its manufacturer.

22. What information should be included in a specification?

- Characteristics of an item in terms of quality, size, weight, production, age, degree and preparation
- A precise listing and regime of the tasks you want done
- Name and description of product or service
- The performance requirement
- The intended use of the product or service
- Quality, durability and cost limitations
- Test or inspection procedures
- Warranty or service requirements
- Frequency of use related to product or service
- Size, weight, amount and number of items
- Energy usage specifications
- General instructions
- Source
- Specific bidder instructions
- Payment methodology
- Bonus and penalty scenarios
- Agreed mechanisms for performance assessment
- Equipment to be supplied by parties
- Report methodology
- Duration of contract
- Early severance conditions
- Procedures for contract variations
- Required qualification levels of labour.

23. What information can be used to estimate costs when acquiring an asset?

- Evaluation of quotations
- Tenders from external suppliers
- Appropriate maintenance agreements
- In-house advice from appropriate departments.

24. What are the major steps in the purchasing cycle?

- Recognising the need to purchase goods or services
- Preparing specifications
- Collecting current, accurate and relevant data relating to items and prices
- Selecting a supplier
- Ordering the goods or services
- Receiving the goods or services.

25. What are different ways to purchase assets?

- Off-the-shelf products
- Custom built
- Used equipment.

26. What are examples of 'early costs' associated with the purchase of a major asset?

- Testing or compliance costs
- Transportation costs
- Site preparation costs
- Installation costs
- Training costs
- Specialty training may be required
- Make-ready costs
- Tooling, parts and suppliers
- Spare parts costs.

27. What are the three main methods of financing assets?

- Purchasing
- Leasing
- Hiring.

28. What are the 'pros' and 'cons' of purchasing?

Pros

- Excellent if paying cash upfront is possible
- You own the equipment
- You can purchase the equipment without the bells and whistles and outsource for larger jobs.

Cons

- Can reduce cash flow
- Equipment may become obsolete faster than anticipated
- If under a limited warranty, may find repairs or maintenance expensive after warranty expires.

29. From whom can you seek assistance from when acquiring assets?

- Your accountant
- Your auditor
- Your management and executive team
- Local government business development advisory units
- Peak body industry advisors
- Government business advisory services
- Bureau of Statistics
- Local commercial land agents
- Your financier or broker
- Other facilities not in direct competition to you.

30. What are examples of maintenance records that must be kept and maintained accurately?

- Maintenance scheduling
- Maintenance checklists
- Manufacturers' specifications
- Fault reports
- Backlog reports
- Work orders.

Observation checklist

Student name	
Assessor name	
Location/venue	
Unit of competency	Manage physical assets and infrastructure D1.HML.CL10.06 D1.HRM.CL9.11 D2.TRM.CL9.11
Dates of observation	
Instructions	- Over a period of time observe the student completing each of the following tasks: - Develop strategies for systematic maintenance, repair and purchase of physical assets - Monitor the condition and performance of physical assets in the workplace - Co-ordinate financing of physical assets - Enter the date on which the tasks were undertaken - Place a tick in the box to show they completed each aspect of the task to the standard expected in the enterprise - Complete the feedback sections of the form, if required.

Did the candidate	Yes	No
Element 1: Develop strategies for systematic maintenance, repair and purchase of physical assets		
Develop strategies for managing physical assets that reflect overall enterprise business and marketing objectives	☐	☐
Evaluate current and potential financial objectives and constraints in developing asset management strategies	☐	☐
Integrate all occupational health, safety and welfare requirements into physical asset management	☐	☐
Develop and maintain an accurate and current physical assets register as part of the asset management strategy	☐	☐
Incorporate maintenance and repair regimes, which minimise disruption and loss of revenue and which involve appropriate specialists	☐	☐

Did the candidate	Yes	No
Element 2: Monitor the condition and performance of physical assets in the workplace		
Establish and implement systems to ensure that the condition and performance of physical assets are regularly reported and discussed within the enterprise	☐	☐
Establish and implement systems to identify timely replacement of physical assets	☐	☐
Make assessments of physical asset performance based on safety, operational efficiency and customer service quality	☐	☐
Identify problems promptly and take appropriate action	☐	☐
Identify the need for and access appropriate specialist assistance when required	☐	☐
Element 3: Co-ordinate financing of physical assets		
Prepare accurate work or equipment specifications to guide the acquisition process	☐	☐
Estimate acquisition costs based on evaluation of current, accurate and relevant data, including supplier quotations and estimates	☐	☐
Make appropriate decisions on the acquisition of physical assets in accordance with enterprise policies and procedures	☐	☐
Select methods of financing to meet in accordance with enterprise policies and procedures	☐	☐
Implement the financing process in accordance with enterprise policies and procedures	☐	☐
Make and keep accurate records of all financial agreements and related documents	☐	☐
Did the student's overall performance meet the standard?	☐	☐
