Competency Based Assessment (CBA) – An Introduction for Assessors

Assessment is the process of identifying a participant's current knowledge, skills and attitudes sets against all elements of competency within a unit of competency.

Suggested Assessment Methods

For each unit of competency a number of assessment tools have been identified including:

- Work Projects
- Oral Questions
- Written Questions
- Third Party Statements
- Observation Checklists.

Instructions and Evidence Recording Sheets have been identified in this Assessment Manual for use by Assessors.

Alternative Assessment Methods

Whilst the above mentioned assessment methods are suggested assessment methods, the assessor may use an alternate method of assessment taking into account:

- a) The nature of the unit
- b) The strengths of participants
- c) The number of participants in the class
- d) Time required to complete assessments
- e) Time dedicated to assessment
- f) Equipment and resources required.

Alternate assessment methods include:

- Practical demonstrations
- Practical demonstrations in simulated work conditions
- Problem solving
- Portfolios of evidence
- Critical incident reports
- Journals
- Oral presentations
- Interviews
- Videos
- Visuals/slides/audiotapes

- Case studies
- Log books
- Projects and Role plays
- Group projects
- Recognition of Prior Learning.

Whilst there is no specific instruction or evidence collection documents for all the alternative assessment methods, assessors can record competency in the 'Other' section within the 'Competency Recording Sheet'.

Selection of Assessment Methods

Each assessor will determine the combination of Assessment Methods to be used to determine Competency for each Competency Unit on a student by student basis.

'Sufficient' evidence to support the 'Pass Competent'/'Not Yet Competent' decision must be captured.

In practice this means a minimum of 2 – 3 Assessment Methods for each candidate for each Competency Element is suggested.

At least one method should provide evidence of practical demonstration of competence.

The following assessment methods deemed to provide evidence of practical demonstration of competence include:

- Practical Work Projects
- Third Party Statement
- Observation Checklist.

Assessing Competency

Competency based assessment does not award grades, but simply identifies if the participant has the knowledge, skills and attitudes to undertake the required task to the specified standard.

Therefore, when assessing competency, an assessor has two possible results that can be awarded:

- 'Pass Competent' (PC)
- 'Not Yet Competent' (NYC).

Pass Competent (PC)

If the participant is able to successfully answer or demonstrate what is required, to the expected standards of the performance criteria, they will be deemed as 'Pass Competent' (PC).

The assessor will award a 'Pass Competent' (PC) if they feel the participant has the necessary knowledge, skills and attitudes in all assessment tasks for a unit.

Not Yet Competent' (NYC)

If the participant is unable to answer or demonstrate competency to the desired standard, they will be deemed to be 'Not Yet Competent' (NYC).

This does not mean the participant will need to complete all the assessment tasks again. The focus will be on the specific assessment tasks that were not performed to the expected standards.

The participant may be required to:

- a) Undertake further training or instruction
- b) Undertake the assessment task again until they are deemed to be 'Pass Competent'.

Regional Qualifications Framework and Skills Recognition System

The 'Regional Qualifications Framework and Skills Recognition System', also known as the 'RQFSRS' is the overriding educational framework for the ASEAN region.

The purpose of this framework is to provide:

- A standardised teaching and assessment framework
- Mutual recognition of participant achievement across the ASEAN region. This includes achievement in individual Units of Competency or qualifications as a whole.

The role of the 'RQFSRS' is to provide, ensure and maintain 'quality assurance' across all countries and educational providers across the ASEAN region.

Recognition of Prior Learning (RPL)

Recognition of Prior Learning is the process that gives current industry professionals who do not have a formal qualification, the opportunity to benchmark their extensive skills and experience against the standards set out in each unit of competency/subject.

This process is a learning and assessment pathway which encompasses:

- Recognition of Current Competencies (RCC)
- Skills auditing
- Gap analysis and training
- Credit transfer.

Code of Practice for Assessors

This Code of Practice provides:

- Assessors with direction on the standard of practice expected of them
- Candidates with assurance of the standards of practice expected of assessors
- Employers with assurance of the standards maintained in the conduct of assessment.

The Code detailed below is based on the International Code of Ethics and Practice (The National Council for Measurement in Education [NCME]):

- The differing needs and requirements of the person being assessed, the local enterprise and/or industry are identified and handled with sensitivity
- Potential forms of conflict of interest in the assessment process and/or outcomes are identified and appropriate referrals are made, if necessary
- All forms of harassment are avoided throughout the planning, conducting, reviewing and reporting of the assessment outcomes

- The rights of the candidate are protected during and after the assessment
- Personal and interpersonal factors that are not relevant to the assessment of competency must not influence the assessment outcomes
- The candidate is made aware of rights and process of appeal
- Evidence that is gathered during the assessment is verified for validity, reliability, authenticity, sufficiency and currency
- Assessment decisions are based on available evidence that can be produced and verified by another assessor
- Assessments are conducted within the boundaries of the assessment system policies and procedures
- Formal agreement is obtained from both the candidate and the assessor that the assessment was carried out in accordance with agreed procedures
- The candidate is informed of all assessment reporting processes prior to the assessment
- The candidate is informed of all known potential consequences of decisions arising from an assessment, prior to the assessment
- Confidentiality is maintained regarding assessment results
- The assessment results are used consistently with the purposes explained to the candidate
- Opportunities are created for technical assistance in planning, conducting and reviewing assessment procedures and outcomes.

Instructions and Checklist for Assessors

Instructions

General instructions for the assessment:

- Assessment should be conducted at a scheduled time that has been notified to the candidate
- Facilitators must ensure participants are made aware of the need to complete assessments and attend assessment sessions
- If a participant is unable to attend a scheduled session, they must make arrangements with the Assessor to undertake the assessment at an alternative time
- At the end of the assessment the Assessor must give feedback and advise the participant on their PC/NYC status
- Complete the relevant documentation and submit to the appropriate department.

Preparation

- Gain familiarity with the Unit of Competency, Elements of Competency and the Performance Criteria expected
- Study details assessment documentation and requirements
- Brief candidate regarding all assessment criteria and requirements.

Briefing Checklist

- Begin the assessment by implementing the following checklist and then invite the candidate to proceed with assessment.

Checklist for Assessors

Prior to the assessment I have:	Tick (✓)	Remarks
Ensured the candidate is informed about the venue and schedule of assessment.		
Received current copies of the performance criteria to be assessed, assessment plan, evidence gathering plan, assessment checklist, appeal form and the company's standard operating procedures (SOP).		
Reviewed the performance criteria and evidence plan to ensure I clearly understood the instructions and the requirements of the assessment process.		
Identified and accommodated any special needs of the candidate.		
Checked the set-up and resources for the assessment.		
During the assessment I have:		
Introduced myself and confirmed identities of candidates.		
Put candidates at ease by being friendly and helpful.		
Explained to candidates the purpose, context and benefits of the assessment.		
Ensured candidates understood the assessment process and all attendant procedures.		
Provided candidates with an overview of performance criteria to be assessed.		
Explained the results reporting procedure.		
Encouraged candidates to seek clarifications if in doubt.		
Asked candidates for feedback on the assessment.		
Explained legal, safety and ethical issues, if applicable.		
After the assessment I have:		
Ensured candidate is given constructive feedback.		
Completed and signed the assessment record.		
Thanked candidate for participating in the assessment.		

Instructions for Recording Competency

Specifications for Recording Competency

The following specifications apply to the preparation of Evidence Gathering Plans:

- A Competency Recording Sheet must be prepared for each candidate to ensure and demonstrate all Performance Criteria and Competency Elements are appropriately assessed. This Sheet indicates how the Assessor will gather evidence during their assessment of each candidate
- This Competency Recording Sheet is located at the end of the Assessment Plan
- It is the overriding document to record competency
- The Assessor may vary the Competency Recording Sheet to accommodate practical and individual candidate and/or workplace needs
- Assessor must place a tick (✓) in the 'Assessment Method' columns to identify the methods of assessment to be used for each candidate
- Multiple Competency Elements/Performance Criteria may be assessed at the one time, where appropriate
- The assessor and participant should sign and date the Competency Recording Sheet, when all forms of evidence and assessment have been completed
- The assessor may provide and feedback or clarify questions which the participant may have in regards to the assessment grade or findings
- All documents used to capture evidence must be retained, and attached to the Competency Recording Sheet for each candidate for each Competency Unit.

Instructions for Different Assessment Methods

Specifications for Work Project Assessment

These guidelines concern the use of work projects.

The work projects identified in the Training Manuals involve a range of tasks, to be performed at the discretion of the Assessor.

Work project tasks can be completed through any form of assessment as identified in the Trainer and Trainee Manuals and stated at the start of this section.

Assessors should follow these guidelines:

- Review the Work Projects at the end of each 'Element of Competency' in the Trainee Manual to ensure you understand the content and what is expected
- Prepare sufficient resources for the completion of work activities including:
 - Time – whether in scheduled delivery hours or suggested time participants to spend outside of class hours
 - Resources – this may involve technical equipment, computer, internet access, stationery and other supplementary materials and documents
- Prepare assessment location (if done in class) making it conducive to assessment
- Explain Work Projects assessment to candidate, at the start of each Element of Competency. This ensures that participants are aware of what is expected and can collate information as delivery takes place

- Assessors can use the following phrase as a guide (where an 'X' is identified, please input appropriate information):
 "At the end of each Element of Competency there are Work Projects which must be completed. These projects require different tasks that must be completed.
 These work projects are part of the formal assessment for the unit of competency titled X:
- You are required to complete these activities:
 - Using the 'X' method of assessment*
 - At 'X' location*
 - You will have 'X time period' for this assessment*
 - You are required to compile information in a format that you feel is appropriate to the assessment
 - Do you have any questions about this assessment?"
- Commence Work Project assessment:
 - The assessor may give time for participants to review the questions at this time to ensure they understand the nature of the questions. The assessor may need to clarify questions
 - Participants complete work projects in the most appropriate format
 - Participants must submit Work Project evidence to the assessor before the scheduled due date
- Assessor must assess the participant's evidence against the competency standards specified in each Element of Competency and their own understanding. The assessor can determine if the participant has provided evidence to a 'competent' standard
- Transcribe results/details to Competency Recording Sheet
- Forward/file assessment record.

Specifications for Oral Question Assessment

These guidelines concern the use of oral questioning.

Assessors should follow these guidelines.

- Prepare Assessment Record for Oral Questioning. One record for each candidate:
 - Enter Student name
 - Enter Assessor name
 - Enter Location
- Familiarise self with Questions to be asked
- Prepare assessment location (table and chairs) making it conducive to assessment
- Explain Oral Questioning assessment to candidate, using the following phrase as a guide (where a 'X' is identified, please input appropriate information):
"These oral questions are part of the formal assessment for the unit of competency titled X.

There are X questions and you are required to answer all of them to the best of your ability and I will record whether or not you have answered correctly.

We have 60 minutes for this assessment.

- I will give you feedback at the end of the assessment
- Do you have any questions about this assessment?”
- Commence Oral Questioning assessment:
 - Complete Assessment Record for the Oral Questioning by:
 - a) Ticking PC or NYC, as appropriate
 - b) Entering ‘Remarks’ as required
 - c) Completing Oral Questioning within 60 minutes
- Complete Oral Questioning and provide feedback to candidate
- Transcribe results/details to Competency Recording Sheet
- Forward/file assessment record.

Specifications for Written Question Assessment

These guidelines concern the use of written questioning.

Assessors should follow these guidelines:

- Familiarise self with Questions and Answers provided
- Print and distribute copies of ‘Written Questions’ for participants. Ideally this should take place with adequate time for participants to answer all questions before the expected due date
- Explain Written Questioning assessment to candidate, using the following phrase as a guide (where a ‘X’ is identified, please input appropriate information):

“These written questions are part of the formal assessment for the unit of competency titled X.

There are X questions and you are required to answer all of them to the best of your ability.

You may refer to your subject materials, however where possible try to utilise your existing knowledge when answering questions.

Where you are unsure of questions, please ask the Assessor for further instruction. This may be answering the question orally or asking the assessor to redefine the question.

We have X time for this assessment:

- The due date for completion of this assessment is X
- On this date you must forward the completed questions to the assessor by X time on the date of X
- Do you have any questions about this assessment?”
- The assessor may give time for participants to review the questions at this time to ensure they understand the nature of the questions. The assessor may need to clarify questions
- Participants may record written answers (where possible)
- Participants must submit the written answers to the assessor before the scheduled due date

- Assessor must assess the participant's written answers against the model answers provided as a guide, or their own understanding. The assessor can determine if the participant has answered the questions to a 'competent' standard
- Transcribe results/details to Competency Recording Sheet
- Forward/file assessment record.

Specifications for Observation Checklist

These specifications apply to the use of the Observation Checklist in determining competency for candidates.

Only an approved assessor is authorised to complete the Observation Checklist.

The assessor is required to observe the participant, ideally in a simulated environment or their practical workplace setting and record their performance (or otherwise) of the competencies listed on the Observation Checklist for the Competency Unit.

To complete the Observation Checklist the Assessor must:

- Insert name of candidate
- Insert assessor name
- Insert identify of location where observations are being undertaken
- Insert date/s of observations – may be single date or multiple dates
- Place a tick in either the 'Yes' or 'No' box for each listed Performance Criteria to indicate the candidate has demonstrated/not demonstrated that skill
- Provide written (and verbal) feedback to candidate – as/if appropriate
- Sign and date the form
- Present form to candidate for them to sign and date
- Transcribe results/details to Competency Recording Sheet for candidate
- Forward/file Observation Checklist.

This source of evidence combines with other forms of assessment to assist in determining the 'Pass Competent' or 'Not Yet Competent' decision for the participant.

Specifications for Third Party Statement

These specifications relate to the use of a relevant workplace person to assist in determining competency for candidates.

The Third Party Statement is to be supplied by the assessor to a person in the workplace who supervises and/or works closely with the participant.

This may be their Supervisor, the venue manager, the Department Manager or similar.

The Third Party Statement asks the Supervisor to record what they believe to be the competencies of the participant based on their workplace experience of the participant. This experience may be gained through observation of their workplace performance, feedback from others, inspection of candidate's work etc.

A meeting must take place between the Assessor and the Third Party to explain and demonstrate the use of the Third Party Statement.

To complete the Third Party Verification Statement the Assessor must:

- Insert candidate name
- Insert name and contact details of the Third Party
- Tick the box to indicate the relationship of the Third Party to the candidate
- Present the partially completed form to the Third Party for them to finalise
- Collect the completed form from the Third Party
- Transcribe results/details to Competency Recording Sheet for candidate
- Forward/file Third Party Statement.

The Third Party must:

- Record their belief regarding candidate ability/competency as either:
 - Pass Competent = Yes
 - Not Yet Competent = No
 - Unsure about whether candidate is competent or not = Not Sure
- Meet briefly with the assessor to discuss and/or clarify the form.

This source of evidence combines with other forms of assessment to assist in determining the 'Pass Competent' or 'Not Yet Competent' decision for the candidate.

A separate Third Party Statement is required for each Competency Unit undertaken by the candidate.

Competency standard

UNIT TITLE: DEVELOP ASSESSMENT TOOLS AND PROCEDURES		NOMINAL HOURS: 50
UNIT NUMBER: D2.TRD.CL8.07		
UNIT DESCRIPTOR: This unit deals with skills and knowledge required to develop and produce assessment tools suitable for in-house use.		
ELEMENTS AND PERFORMANCE CRITERIA		UNIT VARIABLE AND ASSESSMENT GUIDE
Element 1: Determine the focus of the assessment tools 1.1 Identify and clarify the <i>target group of candidates, purpose and context of assessment</i> 1.2 Access and interpret the <i>benchmarks for assessment</i> to establish the <i>evidence</i> required to demonstrate competency 1.3 Identify <i>related documentation</i> to inform the development of the assessment tools Element 2: Determine assessment tool needs 2.1 Select <i>assessment methods</i> to meet identified context and <i>principles of assessment</i> 2.2 Select assessment <i>instruments</i> and options for assessment activities		Unit Variables The Unit Variables provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. It relates to the unit as a whole and facilitates holistic assessment. This unit applies to all industry sectors that conduct in-house assessment of training provision within the labour divisions of the hotel and travel industries and may include: 1. Travel Agencies 2. Tour Operation <i>Assessment tools</i> contain the instruments to be used for gathering evidence, such as: • A profile of acceptable performance measures • Templates/pro-forma • Specific questions or activities • Evidence/observation checklists • Checklists for the evaluation of work samples • Candidate self-assessment materials • The procedures, information and instructions for the assessor and/or candidate relating to the use of assessment instruments and the conditions for assessment.

Element 3: Design and produce assessment tools 3.1 Develop identified assessment tools 3.2 Ensure the <i>rules of evidence</i> are incorporated within assessment tools 3.3 Describe the <i>assessment procedures</i> for candidates and assessors 3.4 Comply with <i>assessment system policy and procedures</i> Element 4: Review and trial assessment tools 4.1 Check draft assessment tools against <i>evaluation criteria</i> 4.2 Amend draft assessment tools as necessary 4.3 <i>Trial draft assessment tools</i> 4.4 Collect and document <i>feedback</i> from <i>relevant people</i> 4.5 Finalise <i>amendments to the assessment tools</i> 4.6 <i>File finalised assessment tools</i> for use	<i>Target group of candidates</i> may be: • Broadly based or specifically targeted • Drawn from a range of backgrounds • From a defined industry or organisation • Trade or professionally based • Determined by training arrangement requirements including apprenticeships and traineeships • Defined by specific needs • Defined by a funding body, including government agency or head office. <i>Purpose</i> will include: • Recognising current existing competence • Determining if competence has been achieved following learning activities • Determining language, literacy and innumeracy needs of candidate • Determining training gaps of candidate • Measuring work performance • Classifying candidate work position for the purposes of remuneration and promotion. <i>Context of assessment</i> may be related to: • The environment in which the assessment will be carried out • Opportunities for collecting evidence in a number of situations • Identification of assessor(s) • Relationship between identified competency standards and work activities in candidate workplace • Assessment under partnership arrangements
---	--

	• Timing of the assessment, including duration • Quality assurance mechanisms • Individual unit or integrated approaches to assessment. <i>Benchmarks for assessment</i> should include: • The criteria against which the candidate is assessed which may be: ▪ A competency standard ▪ Workplace and/or industry specific performance specifications ▪ Product specifications. <i>Evidence is:</i> • Material collected which, when matched against the specifications in the competency standard or similar, provides proof of competency achievement. <i>Related documentation</i> may include: • Competency standards including resources required, assessment context and appropriate assessment methods • Legislation, codes of practice, regulations and guidelines • Internal organisational requirements relating to requirements for demonstration of work performance • Product specifications. <i>Assessment methods</i> must support the collection of evidence and may include: • Direct observation of real and simulated workplace activities • Structured activities including simulation exercises/role plays, projects, presentations, activity sheets • Questioning including written questions, interviews, self-assessment, verbal questioning, questionnaires, oral and written examinations
--	---

	• Portfolios of work produced by the candidate including collections of work samples, products with supporting documentation, historical evidence, journal/log book entries, information about life experience • Review of products including products produced as a result of a project, work samples, or work • Third party feedback including testimonials/reports from employees and supervisors, evidence of training, authenticated prior achievements, interviews with employer, peer, or supervisor. <i>Principles of assessment</i> may include: • Validity • Reliability • Flexibility • Fairness. <i>Instruments</i> are the documented questions/assessment activities developed to support the selected assessment method(s) used to collect the evidence of candidate competence and may include: • Oral and written questions • Observation/demonstration checklists • Projects, case studies, scenarios • Candidate self-assessment guides • Workplace portfolios • Simulation activities • A profile of acceptable performance measures • Templates/pro-forma.
--	---

	<i>Rules of evidence</i> relate closely to the assessment principles and provide guidance on the collection of evidence to ensure it is: • Valid • Sufficient • Authentic • Current. <i>Assessment procedures</i> guide the application of assessment instruments and may include: • Instructions for candidates • Instructions for administering the assessment tool, including: ▪ Resources required ▪ Context for the use of tools • Guidance for the development or review of decision making processes regarding attainment of competence • Specified variations or restrictions on the use of tools • Rules for verifying assessment decisions • Occupational health, safety and welfare requirements during assessment. <i>Assessment system policy and procedures</i> may include: • Assessment records, data management and information management • Recognition of current competency, recognition of prior learning and credit transfer arrangements • Assessors including needs, qualifications and the maintenance of currency • Assessment reporting procedures including internal and external notification, as required • Assessment appeals, grievances and complaints procedures
--	---

	• Validation requirements • Evaluation and internal audit of assessments • Cost and re-sourcing considerations • Partnership arrangements including consideration of externally imposed assessment requirements • Links with human resources and/or industrial relations issues • Links with enterprise quality management systems. <i>Evaluation criteria</i> may include: • Effectiveness and relevance to the competency standards • Whether the assessment tool meets the principles of assessment • Whether the assessment tool meets the rules of evidence • Whether the assessment tool is appropriate to selected assessment methods • Whether the assessment tool appropriate to the target group and/or the assessment context • Whether the assessment tool provides guidance on reasonable adjustments • Whether the assessment tool addresses organisational, legal and ethical requirements, including occupational health, safety and welfare • Whether the assessment tool enables the candidate to demonstrate current competency • Level of engagement and direct participation of candidates • Appropriateness of language and literacy used for intended audience • Clarity • Simplicity, ease of use and practicality • Inclusiveness and avoidance of bias • Cost effectiveness.
--	---

	<i>Trial draft assessment tools</i> may include: • Undertaking expert review by individuals with expertise in assessment and the relevant competency standard(s) • Conducting field or pilot tests with groups of assessors and candidates • Undertaking peer review by other assessors in the relevant industry. <i>Feedback</i> may relate to: • Reliability, flexibility, validity and fairness • Relevance to the workplace context • Content accuracy • Ease of use • Cost and time effectiveness for assessors and candidates • Language, literacy and numeracy requirements in terms of the relevant competencies. <i>Relevant people</i> may include: • Managers and supervisors • Technical subject experts • Literacy and numeracy specialists • Occupational health, safety and welfare specialists • Training and assessment coordinators • Industry regulators • Union and employer representatives • Members of professional associations • Registration and accreditation agencies.
--	---

	<i>Amendments to the assessment tools</i> should include: • Changes to the assessment tools to reflect feedback received • Maintaining version control • Replacing previous assessment tools with revised tools • Notifying assessors in relation to the changes made. <i>File finalised assessment tools</i> may include: • Keeping of paper-based and/or electronic versions. Assessment Guide The following skills and knowledge must be assessed as part of this unit: • Enterprise policies and procedures in regard to training and assessment • Principles of training and assessment • Knowledge of quality assurance principles and practices • Ability to identify relevant and appropriate assessment activities to determine competency in specific workplace roles, situations and applications • Ability to use planning, research, communication, negotiation, evaluation and analytical skills • Knowledge of the legislated and enterprise requirements in relation to privacy and confidentiality • Knowledge of design and format options suitable for use in the development of assessment tools • Knowledge of assessment practices being employed elsewhere within the relevant industry sector • Knowledge of the requirements relating to assessment practices imposed by relevant external third party providers and/or agencies.
--	--

	Linkages To Other Units • Produce documents, reports and worksheets on a computer • Maintain a paper-based filing and retrieval system • Plan and establish systems and procedures • Develop and implement operational policies • Evaluate the effectiveness of an assessment system • Manage an assessment system for training outcomes • Monitor and evaluate the effectiveness of training outcomes • Plan and implement a series of training events • Prepare and deliver training sessions • Manage contractual agreements/commitments • Analyse competency requirements • Implement, monitor and evaluate a training and development program • Review training outcomes • Prepare and monitor budgets • Design and establish a training system. Critical Aspects of Assessment Evidence of the following is essential: • Understanding of host enterprise policies and procedures in regard to training and assessment • Demonstrated ability to develop assessment tools and procedures for a nominated real or simulated industry situation including: ▪ Identification of the purpose and context of the assessment
--	---

	▪ Identification of benchmarks for assessment ▪ Identification of evidence required to determine competency ▪ Identification of the competency standards (or similar) to be used as the basis for assessment ▪ Documentation used to assist in the development of the assessment tools ▪ Appropriate assessment methods ▪ How recognition of current competencies will be incorporated into the assessment process ▪ Presentation of at least two different, clear, effective and easy to use assessment tools appropriate to identified need that meet the rules of evidence requirements, embody the principles of assessment and provide comprehensive advice to assessors and candidates. Context of Assessment This unit may be assessed on or off the job: • Assessment should include practical demonstration either in the workplace or through a simulation activity, supported by a range of methods to assess underpinning knowledge • Assessment must relate to the individual's work area or area of responsibility. Resource Implications Training and assessment to include access to a real or simulated workplace; and access to workplace standards, procedures, policies, guidelines, tools and equipment. Assessment Methods The following methods may be used to assess competency for this unit: • Observation of practical candidate performance
--	---

- Analysis of a portfolio of documents produced by the candidate including plans, assessment tools, feedback received, evidence of research, amendments made to initial documents, collection of assessment evidence, review procedures
- Oral and written questions
- Third party reports completed by a supervisor.

Project and assignment work.

Key Competencies in this Unit

Level 1 = competence to undertake tasks effectively

Level 2 = competence to manage tasks

Level 3 = competence to use concepts for evaluating

Key Competencies	Level	Examples
Collecting, organising and analysing information	3	Determine content and context for assessment tools
Communicating ideas and information	2	Inform assessors and candidates in relation to assessment requirements
Planning and organising activities	3	Schedule trials and pilots of assessment tools
Working with others and in teams	2	Liaise with key stakeholders to validate assessments
Using mathematical ideas and techniques	3	Manage costs relating to assessments
Solving problems	2	Revise assessment tools on the basis of feedback received
Using technology	2	Use software programs to manage the operation of the assessment system

Oral questions

Student name	
Assessor name	
Location/venue	
Unit of competency	Develop assessment tools and procedures D2.TRD.CL8.07
Instructions	1. Ask student questions from the attached list to confirm knowledge, as necessary 2. Place tick in boxes to reflect student achievement (Pass Competent 'PC' or Not Yet Competent 'NYC') 3. Write short-form student answer in the space provided for each question.

Questions	Response	
	PC	NYC
1. Use an example to illustrate how you have determined the target group of candidates, purpose and context of assessment for a workplace situation.	☐	☐
2. Give me an example of how and when you have accessed and interpreted the <i>benchmarks for assessment</i> to establish the <i>evidence</i> required to demonstrate competency for a workplace situation.	☐	☐

Questions	Response	
	PC	NYC
3. Tell me about the documentation you identified as being necessary for specific workplace training assessment.	☐	☐
4. Name a workplace situation and describe how you selected assessment methods to meet identified context and principles of assessment.	☐	☐
5. For the workplace identified in the answer to the last question how did you select the assessment instruments and options for assessment activities in that situation?	☐	☐

Questions	Response	
	PC	NYC
6. Give two examples of assessment tools you have developed for workplace situations and describe the development processes for them.	☐	☐
7. What are the 'rules of evidence' and how do you ensure they have been incorporated into assessment tools you have developed for workplace situations?	☐	☐
8. Describe the assessment procedures for candidates and assessors for two examples of workplace assessments you have developed.	☐	☐

Questions	Response	
	PC	NYC
9. Explain how you ensure the assessment tools you have developed comply with workplace assessment system policy and procedures.	☐	☐
10. Describe in detail the process you used to trial, review, revise and finalise draft assessment tools you developed.	☐	☐

Written questions

Develop assessment tools and procedures – D2.TRD.CL8.07

Student Name: _____

Answer all the following questions and submit to your Trainer.

1. In your own words describe CBA.

This image shows a blank sheet of white paper with horizontal ruling lines. The lines are evenly spaced and extend across the width of the page. There are no margins, text, or other markings on the paper.

2. Describe what is meant by the generic term 'assessment tools'.

3. What is meant by the generic term 'assessment procedures'?

4. Give four reasons it is important to know the 'target groups' when determining the focus for assessment tools.

5. Identify four possible purposes of assessment.

6. List five factors which will contribute to providing the 'context of assessment'.

7. In relation to assessment, what are 'benchmarks'?

8. Name three ways to interpret benchmarks for assessment.

9. Define 'evidence' in relation to CBA.

10. Identify and differentiate between the three types of evidence that may be used to provide the basis for making the C/NYC decision in CBA.

11. What is the base document for determining the focus for assessment when developing assessment tools?

12. Identify four examples of 'related documentation' that may need to be considered when determining the focus for assessment when developing assessment tools.

13. Give four reasons there is a need to consider 'related documentation' when developing assessment tools.

14. Identify five generic assessment methods which may be used when designing assessment tools for quality outcomes in VET.

15. List and differentiate between the five types of assessment.

16. Name the **five** 'dimensions of competence'.

17. What is the role of an Evidence Matrix?

18. What are the four Principles of Assessment?

19. Select and briefly describe one of the following assessment options: oral questions **or** written questions.

20. Select and briefly describe one of the following assessment options: Real work and simulation activities **or** Work-related projects.

21. In relation to CBA what is a 'Third party Report/Statement?

22. Identify six factors that need to be taken into account when developing assessment tools.

23. Name four 'Questions to ask yourself' before writing/selecting knowledge-based questions.

24. Provide six examples from the 'Guidelines for effective questioning'.

25. Identify and explain the four 'Rules of Evidence'.

26. Describe six factors that should provide a basis for assessment procedures for candidates

27. In relation to assessment procedures for assessors, what is the role of a Briefing Checklist/Checklist for Assessors?

28. Identify one assessment option and describe suitable assessor instructions for same.

29. Describe four points addressed under an Assessor Code generated under the International Code of Ethics and Practice (The National Council for Measurement in Education [NCME]).

30. Identify four of the generic headings which are commonly contained in an assessment policy.

31. Name four criteria which may be used to prescribe the required standards for Assessors.

32. List four keys in the appeals, grievances and complaints processes which should be available to candidates.

33. In relation to assessment, what is 'validation' and why is it undertaken?

34. Describe four factors which provide the context for checking draft assessment tools.

35. Name four issues to address when checking draft assessment tools.

36. Give four important factors providing a context for amending draft assessment tools.

37. List six important activities to consider when conducting a trial of a draft assessment tool.

38. What are the two generic ways to collect feedback on the trial of a draft assessment tool?

39. Give four topics which may be the focus of feedback from the trial of a draft assessment tool.

40. Identify six examples of 'relevant people' who may provide feedback on the trial of a draft assessment tool.

41. Describe four considerations and activities relating to the finalisation of amendments to assessment tools.

42. Identify four considerations relating to the filing of finalised assessment items.

Answers to written questions

Develop assessment tools and procedures – D2.TRD.CL8.07

The following are model answers only – Trainers/Assessors must use discretion when determining whether or not an answer provided by a Student is acceptable or not.

1. In your own words describe CBA.

Answer must address:

- It is a process of systematically collecting evidence and making a judgement of a person's performance against the prescribed competency standard/criteria set for an activity or task – this means the process is 'criteria-referenced'
- It seeks evidence/proof of trainee competency, in relation to the competency standards against which they are being assessed
- The process focuses on what a person can do – and not on how they acquired that competency
- It is not time-based – people do not have to train/learn for a set amount of time in order to be deemed competent
- The results of CBA are either 'Competent' (C) or 'Not Yet Competent' (NYC) [also/commonly referred to as PC {Pass Competent} or N { Not Yet Competent }] – the concept of Pass or Fail and/or percentages (such as 75% pass, or 82 out of 100) does not exist within CBA *however* (due to pressure from industry for training institutions to indicate the relative merits of students) the use of 'graded assessments' has emerged.

2. Describe what is meant by the generic term 'assessment tools'.

Assessment tools contain the instruments and procedures to be used for gathering and interpreting evidence to be used to make the C/NYC decision.

3. What is meant by the generic term 'assessment procedures'?

Procedures are the information or instructions given to the candidate and the assessor about how the assessment is to be conducted and recorded.

4. Give four reasons it is important to know the 'target groups' when determining the focus for assessment tools.

- Assist with putting the assessment into perspective
- Indicate purpose and context for the assessment
- Guide the development of the assessment to be applied
- Influence the nature of the assessment method to be used
- Dictate reasonable adjustments to be included
- Determine where the assessment will take place.

5. Identify four possible purposes of assessment.

- Recognising current existing competence
- Helping to determine application for RPL
- Determining if competence has been achieved following learning activities
- Determining individual language, literacy and numeracy needs of candidates for special reasons such as Training delivery and Provision of workplace assistance to workers
- Measuring work performance.

6. List five factors which will contribute to providing the ‘context of assessment’.

- The environment in which the assessment will be carried out
- Opportunities for collecting evidence in a number of situations
- Identification of assessor(s)
- Relationship between identified competency standards and work activities in candidate workplace
- Assessment under partnership arrangements
- Timing of the assessment
- Quality assurance mechanisms
- Assessment of an Individual unit or application of an integrated approach to assessment.

7. In relation to assessment, what are ‘benchmarks’?

Answer should address:

- In terms of assessment, ‘Benchmarks’ are:
 - The standards used to judge competency
 - Criteria against which candidates are assessed
- Exactly what counts as a benchmark will depend on the training being delivered and the assessment being conducted as each ‘benchmark’ (or set of benchmarks) will be specific to individual competencies and may vary between and/or within some workplaces.

8. Name three ways to interpret benchmarks for assessment.

- Reading competency standards which have to be assessed
- Talking to ‘relevant others’
- Attending training sessions conducted by trainers.

9. Define ‘evidence’ in relation to CBA.

Evidence:

- Is material collected which, when matched against the specifications in the competency standard or similar, provides proof of competency achievement – that is, enables the C/NYC decision to be made
- Must provide proof of competency based on interpretation of the benchmarks identified for the specific assessment – there must be a direct link between the standards required and the evidence obtained/captured
- Must be gathered over a number of times – the evidence needs to prove the candidate demonstrated competency over a period of time and not just ‘in isolation’ (that is, just once).

10. Identify and differentiate between the three types of evidence that may be used to provide the basis for making the C/NYC decision in CBA.

- Direct – that is, it may be obtained through:
 - Watching a candidate perform a task in their workplace as part of their normal work activities
 - Observing a candidate undertake a required demonstration to prove they have nominated skills
 - Verbally asking candidates questions in a face-to-face situation
- Indirect – that is, it can be gained as a result of:
 - Analysing and evaluating specific /required finished products and/or work activities completed by candidates – comparing the end products to the identified standards
 - Reviewing (‘marking’ or ‘assessing’) written responses to a variety of assessment items – such as work projects, assignments, written questions, exercises or case studies
- Supplementary – that is, it can be captured through:
 - Written support from ‘relevant others’ – such as testimonials or ‘Third Party Reports’ co-workers, supervisors and/or customers
 - Analysis of designated/required work diaries, log books or work books – which would demonstrate/provide proof of work done in relation to competencies being assessed.

11. What is the base document for determining the focus for assessment when developing assessment tools?

The approved competency standard

12. Identify four examples of ‘related documentation’ that may need to be considered when determining the focus for assessment when developing assessment tools.

- Legislation of the host country
- Codes of practice
- Regulations
- Guidelines
- Internal organisational requirements
- Product and/or service specifications.

13. Give four reasons there is a need to consider ‘related documentation’ when developing assessment tools.

- Provide a suitable context for the assessment
- Identify words, terms and phrases contained in these documents which can be used in the assessment items
- Assist in determining the relevant standards/criteria which should be used for the assessment
- Ensure the assessment embraces the same documentation, information and standards used by the trainer
- Guarantee holistic assessment of candidates.

14. Identify five generic assessment methods which may be used when designing assessment tools for quality outcomes in VET.

- Direct observation
- Structured assessment activities
- Questioning
- Evidence compiled by the student
- Review of products
- Third-party feedback.

15. List and differentiate between the five types of assessment.

- Diagnostic – undertaken before learning takes place to evaluate/determine ('diagnose') level of the learner/worker and to help identify their training needs.
- Formative – ongoing assessment throughout the period of practice/learning.
- Summative – assessment of performance which occurs at the end of the period of practice/learning or at nominated points throughout the learning.
- Holistic – an assessment approach that covers, in an integrated way, multiple elements and/or units from the Competency Standards together with assessment of knowledge and skills.
- Recognition of prior/current learning/competency – to acknowledge existing skills/knowledge regardless of how they were obtained.

16. Name the five 'dimensions of competence'.

- Task skills – which relates to performing at an acceptable level of skills
- Task management skills – which relates to managing a range of different tasks
- Contingency management skills – which refers to responding appropriately when things go wrong
- Job/role environment skills – involving fulfilling the responsibilities and expectations of the workplace
- Transfer skills – which looks at passing on knowledge, skills and attitudes to others.

17. What is the role of an Evidence Matrix?

To identify the various methods of assessment which will be used to capture the evidence which has been identified as being necessary to support the 'Competent/Not Yet Competent' decision

18. What are the four Principles of Assessment?

- Validity
- Reliability
- Flexibility
- Fairness.

19. Select and briefly describe one of the following assessment options: oral questions or written questions.

Oral questions:

Common assessment technique, and can be used in a number of situations. It does not involve a large investment of time and responses to oral questions provide useful evidence of:

- Students' vocational/technical knowledge; and
- Their understanding of workplace procedures, legislation and safety requirements
- Verbal questioning allows probing to obtain clarification, confirmation or supplementation when needed. For example, responses to 'what would you do if ...' questions are effective ways of determining whether a student is able to deal effectively with contingencies (an important dimension of competency) and to anticipate and pre-empt problems that may arise out of the work process
- Verbal questioning may also be a reasonable way to accommodate a student's need for consideration of his/her language and literacy skill levels. Assessment should not demand higher literacy, language or communication skills than those required for the job itself.

Written questions:

Written questions can be framed so that students are required to:

- Choose the correct answer (given multiple choices or true/false options) or to match information with another set of given information; and
- Construct answers themselves, as in short-answer responses or longer reports or essays.

These two styles are sometimes used in combination to capture the benefits or minimise the risks associated with each.

Clearly, the former is more time-friendly for students and the people marking the responses, but the questions can be difficult to construct.

Questions that require a response from students are clearly easier to construct but take a longer time to complete and to assess.

20. Select and briefly describe one of the following assessment options: Real work and simulation activities or Work-related projects.

Real work and simulation:

- Observation/demonstration checklists are used when the assessment involves an assessor watching the candidate perform a task
- The task may be performed in an actual workplace setting (on-the-job) or off-the-job in a simulated (or 'mock') setting
- An Observation/demonstration checklist is provided for assessors (only) to record observations of actual candidate performance of the required competencies for a unit of competency as described by the competency standard.

Work-related projects

- Projects can be used for assessments and may take a variety of forms
- When assessing work-related projects such as designing a product, writing a workplace document, solving a problem, conducting a presentation or developing a proposal for management, you may find it useful to design a project brief or instruction sheet
- Projects can be designed for completion by individuals or groups.

21. In relation to CBA what is a 'Third party Report/Statement'?

Answer should address:

- These relate to the use of a relevant workplace person to assist in determining competency for candidates. The Third Party Statement is supplied by the assessor to a person in the workplace who supervises and/or works closely with the participant
- This may be their Supervisor, a manager, or similar
- The Third Party Statement asks the person to record what they believe to be the competencies of the participant based on their workplace experience of the participant. This experience may be gained through observation of their workplace performance, feedback from others, and/or inspection of candidate's work.

22. Identify six factors that need to be taken into account when developing assessment tools.

- Must be 'fit for purpose'
- Must embrace the Principles of Assessment
- Implicit in this is every assessment tool must be developed to accommodate all necessary 'reasonable adjustments' which are able to be incorporated.
- Have to ensure evidence captured must align with the Rules of Assessment
- Must address access and equity issues
- Must be written in a way that make them user-friendly for the intended/identified candidates
- Need to be designed in a way that facilitates their application and implementation
- Should be developed using an appropriate medium
- Must be clearly written
- Must contain clear and detailed instructions, as required
- Need to be confirmed by trainers
- May be developed or 'acquired'
- Must be able to be implemented by appropriate supporting resources
- Should feature underpinning user-instructions for assessors
- Should stipulate any limitations on the use of the assessment tool
- Should be developed with a view to repeat use
- Must be re-developed/altered when the competency standard changes
- Must be version controlled.

23. Name four 'Questions to ask yourself' before writing/selecting knowledge-based questions.

- Have you identified the purpose of the test?
- Have you identified the required knowledge in the relevant unit(s) of competency?
- Have you addressed the foundation skills relevant to the competencies?
- Have you decided on the most appropriate types of questions for the purpose of the test?
- Does the level of difficulty of the test match the [qualification level] outcome descriptors for the level?

24. Provide six examples from the ‘Guidelines for effective questioning’.

- Keep questions short and focused on one key concept
- Ensure that questions are structured
- Test the questions to check that they are not ambiguous
- Use open-ended questions such as ‘What if ... ?’ and ‘Why ... ?’ rather than closed questions
- Keep questions clear and straightforward, and ask one question at a time
- Use words that the student is able to understand
- Look at the student when asking questions
- Check to ensure that the student fully understands the question
- Ask the student to clarify or rephrase his/her answer if you do not understand the initial response
- Confirm the student’s response by repeating the answer back in his/her own words
- Encourage a conversational approach with the student to put him/her at ease
- Use questions or statements as prompts for keeping focused on the purpose of the questions and the kind of evidence being collected
- Use a level of language that is suitable for the student
- Listen carefully to the answers for opportunities to find unexpected evidence
- Follow up responses with further questions, if useful, to draw out more evidence or to make links between knowledge areas
- Compile a list of acceptable responses to ensure reliability of assessments.

25. Identify and explain the four ‘Rules of Evidence’.

- Valid:
 - Relates to the unit(s) of competency appropriately
 - Reflects all four dimensions of competency
 - Provides evidence of employability skills
 - Is appropriate to the [qualification level] being assessed
- Sufficient:
 - Provides enough evidence to make a judgement about the competence of the individual in relation to all four dimensions of competency
 - Meets all the evidence requirements for the unit of competency
- Current:
 - Is recent enough to show that the skills and knowledge are still able to be applied to a current work situation
- Authentic:
 - Is the student’s own work (and procedures have been developed to ensure this).

26. Describe six factors that should provide a basis for assessment procedures for candidates

- Candidates must be advised in advance of the assessments they will be required to complete
- Assessment must only cover the content which has been delivered during training
- There must never be any surprises for the candidates
- An indication of the relationship between assessment items and course content may be provided
- Time allowed to complete assessments must be realistic
- Written assessments must contain instructions for the assessment
- Verbal and practical assessments must be accompanied by verbal instructions
- Candidates must be advised of the orientation taken by the training provider in relation to re-assessments (where the candidate achieves a NYC result)
- Candidates must be made aware of the Appeals process available to them
- Candidates must have free access to their assessment outcomes
- Candidates must be supplied with all relevant resources for the assessment
- Assessments must stop if there is a danger to the candidate.

27. In relation to assessment procedures for assessors, what is the role of a Briefing Checklist/Checklist for Assessors?

To make sure all required protocols relating to assessment have been addressed as required.

28. Identify one assessment option and describe suitable assessor instructions for same.

No model answer – response will depend on the method selected.

29. Describe four points addressed under an Assessor Code generated under the International Code of Ethics and Practice (The National Council for Measurement in Education [NCME]).

- The differing needs and requirements of the person being assessed, the local enterprise and/or industry are identified and handled with sensitivity
- Potential forms of conflict of interest in the assessment process and/or outcomes are identified and appropriate referrals are made, if necessary
- All forms of harassment are avoided throughout the planning, conducting, reviewing and reporting of the assessment outcomes
- The rights of the candidate are protected during and after the assessment
- Personal and interpersonal factors that are not relevant to the assessment of competency must not influence the assessment outcomes
- The candidate is made aware of rights and process of appeal
- Evidence that is gathered during the assessment is verified for validity, reliability, authenticity, sufficiency and currency
- Assessment decisions are based on available evidence that can be produced and verified by another assessor
- Assessments are conducted within the boundaries of the assessment system policies and procedures
- Formal agreement is obtained from both the candidate and the assessor that the assessment was carried out in accordance with agreed procedures
- The candidate is informed of all assessment reporting processes prior to the assessment
- The candidate is informed of all known potential consequences of decisions arising from an assessment, prior to the assessment
- Confidentiality is maintained regarding assessment results
- The assessment results are used consistently with the purposes explained to the candidate
- Opportunities are created for technical assistance in planning, conducting and reviewing assessment procedures and outcomes.

30. Identify four of the generic headings which are commonly contained in an assessment policy.

- Purpose of the policy – explaining why the document is in existence
- Scope of the policy – identifying who/what the document applies to
- Definitions – interpreting words and terms used in the document
- Principles – specifying the foundations for the assessment policy
- Policy proper – setting out the basic requirements for the Policy
- Documentation – naming documents which exist under the Policy.

31. Name four criteria which may be used to prescribe the required standards for Assessors.

- Basic/minimum certification required – as an assessor
- Basic/minimum certification required – as an industry worker/professional
- Industry experience required in years – for the competencies being assessed, at a certain level/in a given position
- Need to maintain currency of certification – if required
- Need to hold nominated industry permits/licences – if applicable to the content being assessed.

32. List four keys in the Appeals, grievances and complaints processes which should be available to candidates.

- They must be communicated to learners/candidates
- Candidates must be given a hard copy of the process/es
- An 'Appeals' committee should be established
- All matters must receive prompt attention
- Candidates who initiate a complaint, appeal or grievance must not be victimised
- Principles of natural justice must apply
- Confidentiality of all matters and those involved must be maintained
- Formal and/or informal means should form the basis of resolution
- Anyone making a complaint/raising an issue has the right to withdraw it
- Staff and candidates have the right to be supported and/or represented by nominated others
- Making the appeals process a free service to candidates
- Specification of when complaints, appeals and grievances may be made
- Identification of the notification/communication process
- Time-frame within which complaints and issues must be resolved
- Nomination of documentation to be kept.

33. In relation to assessment, what is 'validation' and why is it undertaken?

- A quality review process
- It involves checking that the assessment tool and process produced valid, reliable, sufficient, current and authentic evidence to enable reasonable judgements to be made as to whether the requirements of the relevant aspects of the Training Package or accredited course had been met
- It includes reviewing and making recommendations for future improvements to the assessment tool, process and/or outcomes.

34. Describe four factors which provide the context for checking draft assessment tools.

- Be a formalised approach with definite structure and specific objectives – as opposed to an *ad hoc* procedure
- Must include input by all relevant stakeholders – especially (as appropriate):
 - Trainers and assessors
 - Learners and candidates
 - Representatives from the Training Authority
 - Management representatives
- Be documented – so the process is recorded for later/subsequent analysis and discussion
- Occur for all assessment items – as standard practice.

35. Name four issues to address when checking draft assessment tools.

- Effectiveness and relevance to the competency standards
- Whether the assessment tool meets the Principles of Assessment
- Whether the assessment tool meets the Rules of Evidence
- Whether the assessment tool is appropriate
- Whether the assessment tool provides appropriate and effective guidance on reasonable adjustments
- Whether the assessment tool addresses all necessary requirements
- Format and layout of the documents.

36. Give four important factors providing a context for amending draft assessment tools.

- The findings of the review and the trial must always form the basis of amendments which are made to the assessment tools
- There must always be objective proof of the need for change
- Change must never be made just for the sake of change
- Changes must result in genuine improvements to the original.

37. List six important activities to consider when conducting a trial of a draft assessment tool.

- All assessment tools should be piloted before they are implemented
- Revised drafts (as required on the basis of experience/feedback) should form the basis of the trial process
- The trial should be documented
- All relevant stakeholders must be included as part of the piloting process
- The schedule/plan for implementation of assessment tools needs to be developed to accommodate sufficient time for the total trial process
- Trials need to be conducted under actual/realistic assessment conditions
- The trial process needs to be evaluated
- The trial process needs to be structured and formalised.

38. What are the two generic ways to collect feedback on the trial of a draft assessment tool?

- Provision of verbal reports/input
- Completion of nominated documentation.

39. Give four topics which may be the focus of feedback from the trial of a draft assessment tool.

- Reliability, flexibility, validity and fairness of the evidence generated
- Relevance of the evidence to:
 - The aspect/s of the competency standard being assessed
 - The workplace context for the assessment
 - The Rules of Evidence
- Accuracy of content provided by candidates – as referenced against standards/criteria and the training content
- Practical aspects of assessment items
- Cost and time-effectiveness of the assessment tools
- Suggestions – for:
 - Revisions to the trial assessment tools
 - Alternative assessment tools.

40. Identify six examples of ‘relevant people’ who may provide feedback on the trial of a draft assessment tool.

- Managers and supervisors – from within the organisation
- Technical subject experts – with expertise in the content of the individual competency standards
- Literacy and numeracy specialists
- Health, safety and welfare specialists
- Training and assessment coordinators
- Industry regulators
- Union and employer representatives
- Members of professional industry associations – and peak bodies
- Registration and accreditation agencies – such as the relevant Training Authority.

41. Describe four considerations and activities relating to the finalisation of amendments to assessment tools.

- Finalisation should follow reviews, draft revisions and trials
- Changes made must result in improvements to the final product
- Changes to the assessment tools must be based on feedback received
- Formal approval needs to be obtained from relevant stakeholders
- Version control protocols must be applied
- Previous assessment tools must be replaced, where appropriate with the new/finalised assessment tool
- Assessors must be formally notified of the changes made and the completed nature of the finalised assessment item
- Once finalised the assessment tools cannot be altered without consultation with relevant others
- The Training Authority may need to be given a final copy of the assessment tool
- ‘Other matters’ identified as part of the development process for assessment tools and procedures (such as issues relating to training content, delivery, resourcing) should be addressed and followed up – as appropriate.

42. Identify four considerations relating to the filing of finalised assessment items.

- Creating and maintaining paper-based and/or electronic files – or a combination of both
 - Daily back-up – for electronic files – and/or off-site storage of all final documents
 - Ensuring proper version control protocols are adhered to – to ensure the correct version is being released/used
 - Retaining development details – regarding how the ‘final version’ was arrived at and who was involved in the process
 - Keeping source documentation and feedback/contributions – which were used to generate the final assessment tools
 - Recording file movement – so a track can be kept of:
 - Who accesses electronic files
 - Who takes hard copy files – and when
 - When files are returned
 - Maintaining security protocols – so access is restricted only to those who have been authorised to have access
 - Providing notification and necessary training to approved users – regarding user protocols to facilitate use of files/assessment tools
 - Archiving all dated files – in accordance with internal organisational filing protocols.
-

Observation checklist

Student name	
Assessor name	
Location/venue	
Unit of competency	Develop assessment tools and procedures D2.TRD.CL8.07
Dates of observation	
Instructions	- Over a period of time observe the student completing each of the following tasks: - Determine the focus of the assessment tools - Determine assessment tool needs - Design and produce assessment tools - Review and trial assessment tools - Enter the date on which the tasks were undertaken - Place a tick in the box to show they completed each aspect of the task to the standard expected in the enterprise - Complete the feedback sections of the form, if required.

Did the candidate	Yes	No
Element 1: Determine the focus of the assessment tools		
Identify and clarify the target group of candidates, purpose and context of assessment	☐	☐
Access and interpret the benchmarks for assessment to establish the evidence required to demonstrate competency	☐	☐
Identify related documentation to inform the development of the assessment tools	☐	☐
Element 2: Determine assessment tool needs		
Select assessment methods to meet identified context and principles of assessment	☐	☐
Select assessment instruments and options for assessment activities	☐	☐
Element 3: Design and produce assessment tools		
Develop identified assessment tools	☐	☐
Ensure the rules of evidence are incorporated within assessment tools	☐	☐

Did the candidate	Yes	No
Describe the assessment procedures for candidates and assessors	☐	☐
Comply with assessment system policy and procedures	☐	☐
Element 4: Review and trial assessment tools		
Check draft assessment tools against evaluation criteria	☐	☐
Amend draft assessment tools as necessary	☐	☐
Trial draft assessment tools	☐	☐
Collect and document feedback from relevant people	☐	☐
Finalise amendments to the assessment tools	☐	☐
File finalised assessment tools for use	☐	☐
Did the student's overall performance meet the standard?	☐	☐
