Competency Based Assessment (CBA) – An Introduction for Assessors

Assessment is the process of identifying a participant's current knowledge, skills and attitudes sets against all elements of competency within a unit of competency.

Suggested Assessment Methods

For each unit of competency a number of assessment tools have been identified including:

- Work Projects
- Oral Questions
- Written Questions
- Third Party Statements
- Observation Checklists.

Instructions and Evidence Recording Sheets have been identified in this Assessment Manual for use by Assessors.

Alternative Assessment Methods

Whilst the above mentioned assessment methods are suggested assessment methods, the assessor may use an alternate method of assessment taking into account:

- a) The nature of the unit
- b) The strengths of participants
- c) The number of participants in the class
- d) Time required to complete assessments
- e) Time dedicated to assessment
- f) Equipment and resources required.

Alternate assessment methods include:

- Practical demonstrations
- Practical demonstrations in simulated work conditions
- Problem solving
- Portfolios of evidence
- Critical incident reports
- Journals
- Oral presentations
- Interviews
- Videos
- Visuals/slides/audiotapes
- Case studies

- Log books
- Projects and Role plays
- Group projects
- Recognition of Prior Learning.

Whilst there is no specific instruction or evidence collection documents for all the alternative assessment methods, assessors can record competency in the 'Other' section within the 'Competency Recording Sheet'.

Selection of Assessment Methods

Each assessor will determine the combination of Assessment Methods to be used to determine Competency for each Competency Unit on a student by student basis.

'Sufficient' evidence to support the 'Pass Competent'/'Not Yet Competent' decision must be captured.

In practice this means a minimum of 2 – 3 Assessment Methods for each candidate for each Competency Element is suggested.

At least one method should provide evidence of practical demonstration of competence.

The following assessment methods deemed to provide evidence of practical demonstration of competence include:

- Practical Work Projects
- Third Party Statement
- Observation Checklist.

Assessing Competency

Competency based assessment does not award grades, but simply identifies if the participant has the knowledge, skills and attitudes to undertake the required task to the specified standard.

Therefore, when assessing competency, an assessor has two possible results that can be awarded:

- 'Pass Competent' (PC)
- 'Not Yet Competent' (NYC).

Pass Competent (PC)

If the participant is able to successfully answer or demonstrate what is required, to the expected standards of the performance criteria, they will be deemed as 'Pass Competent' (PC).

The assessor will award a 'Pass Competent' (PC) if they feel the participant has the necessary knowledge, skills and attitudes in all assessment tasks for a unit.

Not Yet Competent' (NYC)

If the participant is unable to answer or demonstrate competency to the desired standard, they will be deemed to be 'Not Yet Competent' (NYC).

This does not mean the participant will need to complete all the assessment tasks again. The focus will be on the specific assessment tasks that were not performed to the expected standards.

The participant may be required to:

- a) Undertake further training or instruction
- b) Undertake the assessment task again until they are deemed to be 'Pass Competent'.

Regional Qualifications Framework and Skills Recognition System

The 'Regional Qualifications Framework and Skills Recognition System', also known as the 'RQFSRS' is the overriding educational framework for the ASEAN region.

The purpose of this framework is to provide:

- A standardised teaching and assessment framework
- Mutual recognition of participant achievement across the ASEAN region. This includes achievement in individual Units of Competency or qualifications as a whole.

The role of the 'RQFSRS' is to provide, ensure and maintain 'quality assurance' across all countries and educational providers across the ASEAN region.

Recognition of Prior Learning (RPL)

Recognition of Prior Learning is the process that gives current industry professionals who do not have a formal qualification, the opportunity to benchmark their extensive skills and experience against the standards set out in each unit of competency/subject.

This process is a learning and assessment pathway which encompasses:

- Recognition of Current Competencies (RCC)
- Skills auditing
- Gap analysis and training
- Credit transfer.

Code of Practice for Assessors

This Code of Practice provides:

- Assessors with direction on the standard of practice expected of them
- Candidates with assurance of the standards of practice expected of assessors
- Employers with assurance of the standards maintained in the conduct of assessment.

The Code detailed below is based on the International Code of Ethics and Practice (The National Council for Measurement in Education [NCME]):

- The differing needs and requirements of the person being assessed, the local enterprise and/or industry are identified and handled with sensitivity
- Potential forms of conflict of interest in the assessment process and/or outcomes are identified and appropriate referrals are made, if necessary
- All forms of harassment are avoided throughout the planning, conducting, reviewing and reporting of the assessment outcomes

- The rights of the candidate are protected during and after the assessment
- Personal and interpersonal factors that are not relevant to the assessment of competency must not influence the assessment outcomes
- The candidate is made aware of rights and process of appeal
- Evidence that is gathered during the assessment is verified for validity, reliability, authenticity, sufficiency and currency
- Assessment decisions are based on available evidence that can be produced and verified by another assessor
- Assessments are conducted within the boundaries of the assessment system policies and procedures
- Formal agreement is obtained from both the candidate and the assessor that the assessment was carried out in accordance with agreed procedures
- The candidate is informed of all assessment reporting processes prior to the assessment
- The candidate is informed of all known potential consequences of decisions arising from an assessment, prior to the assessment
- Confidentiality is maintained regarding assessment results
- The assessment results are used consistently with the purposes explained to the candidate
- Opportunities are created for technical assistance in planning, conducting and reviewing assessment procedures and outcomes.

Instructions and Checklist for Assessors

Instructions

General instructions for the assessment:

- Assessment should be conducted at a scheduled time that has been notified to the candidate
- Facilitators must ensure participants are made aware of the need to complete assessments and attend assessment sessions
- If a participant is unable to attend a scheduled session, they must make arrangements with the Assessor to undertake the assessment at an alternative time
- At the end of the assessment the Assessor must give feedback and advise the participant on their PC/NYC status
- Complete the relevant documentation and submit to the appropriate department.

Preparation

- Gain familiarity with the Unit of Competency, Elements of Competency and the Performance Criteria expected
- Study details assessment documentation and requirements
- Brief candidate regarding all assessment criteria and requirements.

Briefing Checklist

- Begin the assessment by implementing the following checklist and then invite the candidate to proceed with assessment.

Checklist for Assessors

Prior to the assessment I have:	Tick (✓)	Remarks
Ensured the candidate is informed about the venue and schedule of assessment.		
Received current copies of the performance criteria to be assessed, assessment plan, evidence gathering plan, assessment checklist, appeal form and the company's standard operating procedures (SOP).		
Reviewed the performance criteria and evidence plan to ensure I clearly understood the instructions and the requirements of the assessment process.		
Identified and accommodated any special needs of the candidate.		
Checked the set-up and resources for the assessment.		
During the assessment I have:		
Introduced myself and confirmed identities of candidates.		
Put candidates at ease by being friendly and helpful.		
Explained to candidates the purpose, context and benefits of the assessment.		
Ensured candidates understood the assessment process and all attendant procedures.		
Provided candidates with an overview of performance criteria to be assessed.		
Explained the results reporting procedure.		
Encouraged candidates to seek clarifications if in doubt.		
Asked candidates for feedback on the assessment.		
Explained legal, safety and ethical issues, if applicable.		
After the assessment I have:		
Ensured candidate is given constructive feedback.		
Completed and signed the assessment record.		
Thanked candidate for participating in the assessment.		

Instructions for Recording Competency

Specifications for Recording Competency

The following specifications apply to the preparation of Evidence Gathering Plans:

- A Competency Recording Sheet must be prepared for each candidate to ensure and demonstrate all Performance Criteria and Competency Elements are appropriately assessed. This Sheet indicates how the Assessor will gather evidence during their assessment of each candidate
- This Competency Recording Sheet is located at the end of the Assessment Plan
- It is the overriding document to record competency
- The Assessor may vary the Competency Recording Sheet to accommodate practical and individual candidate and/or workplace needs
- Assessor must place a tick (✓) in the 'Assessment Method' columns to identify the methods of assessment to be used for each candidate
- Multiple Competency Elements/Performance Criteria may be assessed at the one time, where appropriate
- The assessor and participant should sign and date the Competency Recording Sheet, when all forms of evidence and assessment have been completed
- The assessor may provide and feedback or clarify questions which the participant may have in regards to the assessment grade or findings
- All documents used to capture evidence must be retained, and attached to the Competency Recording Sheet for each candidate for each Competency Unit.

Instructions for Different Assessment Methods

Specifications for Work Project Assessment

These guidelines concern the use of work projects.

The work projects identified in the Training Manuals involve a range of tasks, to be performed at the discretion of the Assessor.

Work project tasks can be completed through any form of assessment as identified in the Trainer and Trainee Manuals and stated at the start of this section.

Assessors should follow these guidelines:

- Review the Work Projects at the end of each 'Element of Competency' in the Trainee Manual to ensure you understand the content and what is expected
- Prepare sufficient resources for the completion of work activities including:
 - Time – whether in scheduled delivery hours or suggested time participants to spend outside of class hours
 - Resources – this may involve technical equipment, computer, internet access, stationery and other supplementary materials and documents
- Prepare assessment location (if done in class) making it conducive to assessment
- Explain Work Projects assessment to candidate, at the start of each Element of Competency. This ensures that participants are aware of what is expected and can collate information as delivery takes place

- Assessors can use the following phrase as a guide (where an 'X' is identified, please input appropriate information):
 "At the end of each Element of Competency there are Work Projects which must be completed. These projects require different tasks that must be completed.
 These work projects are part of the formal assessment for the unit of competency titled X:
- You are required to complete these activities:
 - Using the 'X' method of assessment*
 - At 'X' location*
 - You will have 'X time period' for this assessment*
 - You are required to compile information in a format that you feel is appropriate to the assessment
 - Do you have any questions about this assessment?"
- Commence Work Project assessment:
 - The assessor may give time for participants to review the questions at this time to ensure they understand the nature of the questions. The assessor may need to clarify questions
 - Participants complete work projects in the most appropriate format
 - Participants must submit Work Project evidence to the assessor before the scheduled due date
- Assessor must assess the participant's evidence against the competency standards specified in each Element of Competency and their own understanding. The assessor can determine if the participant has provided evidence to a 'competent' standard
- Transcribe results/details to Competency Recording Sheet
- Forward/file assessment record.

Specifications for Oral Question Assessment

These guidelines concern the use of oral questioning.

Assessors should follow these guidelines.

- Prepare Assessment Record for Oral Questioning. One record for each candidate:
 - Enter Student name
 - Enter Assessor name
 - Enter Location
- Familiarise self with Questions to be asked
- Prepare assessment location (table and chairs) making it conducive to assessment
- Explain Oral Questioning assessment to candidate, using the following phrase as a guide (where a 'X' is identified, please input appropriate information):
"These oral questions are part of the formal assessment for the unit of competency titled X.
There are X questions and you are required to answer all of them to the best of your ability and I will record whether or not you have answered correctly.

We have 60 minutes for this assessment.

- I will give you feedback at the end of the assessment
- Do you have any questions about this assessment?”
- Commence Oral Questioning assessment:
 - Complete Assessment Record for the Oral Questioning by:
 - a) Ticking PC or NYC, as appropriate
 - b) Entering ‘Remarks’ as required
 - c) Completing Oral Questioning within 60 minutes
- Complete Oral Questioning and provide feedback to candidate
- Transcribe results/details to Competency Recording Sheet
- Forward/file assessment record.

Specifications for Written Question Assessment

These guidelines concern the use of written questioning.

Assessors should follow these guidelines:

- Familiarise self with Questions and Answers provided
- Print and distribute copies of ‘Written Questions’ for participants. Ideally this should take place with adequate time for participants to answer all questions before the expected due date
- Explain Written Questioning assessment to candidate, using the following phrase as a guide (where a ‘X’ is identified, please input appropriate information):

“These written questions are part of the formal assessment for the unit of competency titled X.

There are X questions and you are required to answer all of them to the best of your ability.

You may refer to your subject materials, however where possible try to utilise your existing knowledge when answering questions.

Where you are unsure of questions, please ask the Assessor for further instruction. This may be answering the question orally or asking the assessor to redefine the question.

We have X time for this assessment:

- The due date for completion of this assessment is X
- On this date you must forward the completed questions to the assessor by X time on the date of X
- Do you have any questions about this assessment?”
- The assessor may give time for participants to review the questions at this time to ensure they understand the nature of the questions. The assessor may need to clarify questions
- Participants may record written answers (where possible)
- Participants must submit the written answers to the assessor before the scheduled due date

- Assessor must assess the participant's written answers against the model answers provided as a guide, or their own understanding. The assessor can determine if the participant has answered the questions to a 'competent' standard
- Transcribe results/details to Competency Recording Sheet
- Forward/file assessment record.

Specifications for Observation Checklist

These specifications apply to the use of the Observation Checklist in determining competency for candidates.

Only an approved assessor is authorised to complete the Observation Checklist.

The assessor is required to observe the participant, ideally in a simulated environment or their practical workplace setting and record their performance (or otherwise) of the competencies listed on the Observation Checklist for the Competency Unit.

To complete the Observation Checklist the Assessor must:

- Insert name of candidate
- Insert assessor name
- Insert identify of location where observations are being undertaken
- Insert date/s of observations – may be single date or multiple dates
- Place a tick in either the 'Yes' or 'No' box for each listed Performance Criteria to indicate the candidate has demonstrated/not demonstrated that skill
- Provide written (and verbal) feedback to candidate – as/if appropriate
- Sign and date the form
- Present form to candidate for them to sign and date
- Transcribe results/details to Competency Recording Sheet for candidate
- Forward/file Observation Checklist.

This source of evidence combines with other forms of assessment to assist in determining the 'Pass Competent' or 'Not Yet Competent' decision for the participant.

Specifications for Third Party Statement

These specifications relate to the use of a relevant workplace person to assist in determining competency for candidates.

The Third Party Statement is to be supplied by the assessor to a person in the workplace who supervises and/or works closely with the participant.

This may be their Supervisor, the venue manager, the Department Manager or similar.

The Third Party Statement asks the Supervisor to record what they believe to be the competencies of the participant based on their workplace experience of the participant. This experience may be gained through observation of their workplace performance, feedback from others, inspection of candidate's work etc.

A meeting must take place between the Assessor and the Third Party to explain and demonstrate the use of the Third Party Statement.

To complete the Third Party Verification Statement the Assessor must:

- Insert candidate name
- Insert name and contact details of the Third Party
- Tick the box to indicate the relationship of the Third Party to the candidate
- Present the partially completed form to the Third Party for them to finalise
- Collect the completed form from the Third Party
- Transcribe results/details to Competency Recording Sheet for candidate
- Forward/file Third Party Statement.

The Third Party must:

- Record their belief regarding candidate ability/competency as either:
 - Pass Competent = Yes
 - Not Yet Competent = No
 - Unsure about whether candidate is competent or not = Not Sure
- Meet briefly with the assessor to discuss and/or clarify the form.

This source of evidence combines with other forms of assessment to assist in determining the 'Pass Competent' or 'Not Yet Competent' decision for the candidate.

A separate Third Party Statement is required for each Competency Unit undertaken by the candidate.

Competency standard

UNIT TITLE: DEVELOP/MONITOR ECOLOGICALLY SUSTAINABLE TOURISM OPERATIONS		NOMINAL HOURS: 80
UNIT NUMBER: D2.TCS.CL5.14		
UNIT DESCRIPTOR: This unit deals with skills and knowledge required to plan monitor and evaluate the introduction of ecologically sustainable tourism operations in selected destinations.		
ELEMENTS AND PERFORMANCE CRITERIA		UNIT VARIABLE AND ASSESSMENT GUIDE
Element 1: Develop plans for ecologically sustainable tourism operations 1.1 Verify the <i>ecological impacts</i> that apply to the selected destination 1.2 Identify <i>potential suitable tourism operations</i> that may be undertaken 1.3 Consult <i>stakeholders</i> 1.4 Identify the <i>economic and social returns to the destination community</i> of the introduction of tourism operations 1.5 Research <i>minimal impact techniques and methods of managing tourism impacts</i> 1.6 Incorporate stakeholder and other research information into the planning process 1.7 Establish <i>existing relationship between tourism and the environment</i>		Unit Variables The Unit Variables provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. It relates to the unit as a whole and facilitates holistic assessment. This unit applies to the effective management of ecologically sustainable tourism operations within the labour divisions of the hotel and travel industries and may include: 1. Travel Agencies 2. Tour Operation <i>Ecological impacts</i> may include positive and negative impacts and may involve: • Changes in the natural environment – including impacts on breeding events, species sighting, density of stocking rates, general and specific changes to flora and fauna • Opportunities for conservation and general ecological protection of sites and species • Education potential of visitors to raise awareness of environmental issues and species-specific concerns • Reclamation and improvement to sites already adversely impacted • Physical damage to landmarks and sensitive sites

1.8 <i>Identify and establish plans</i> for the implementation of agreed sustainable tourism operations 1.9 Establish <i>environmentally and ecologically-friendly policies and procedures</i> to support sustainable tourism operations 1.10 Develop <i>strategies to balance ecological sustainability and the economic viability of projected tourism operations</i> 1.11 Allocate <i>roles and responsibilities</i> for sustainable tourism development to <i>appropriate participants</i> 1.12 Identify and subscribe to recognised eco-tourism certification program for the proposed tourism operations Element 2: Monitor results of planned ecologically sustainable tourism operations 2.1 <i>Conduct site evaluations</i> to establish starting point for the measurement of ecological impacts 2.2 Apply suitable <i>methods of data collection</i> to record ecological impacts 2.3 Initiate immediate <i>remedial action</i> to address significant adverse real-time impacts on the ecology 2.4 Involve local communities in monitoring activities 2.5 Share information with stakeholders as it arises	• Introduction of exotic and/or feral species into the area • Pollution – including air, water, land and visual • Excess demand on limited resources – including energy, consumables and waste management facilities and infrastructure • Congestion of traffic causing potential for off-road driving and the creation of unauthorised tracks • Loss of habitats for threatened and other domestic fauna. <i>Potential suitable tourism operations</i> may include: • Retail shops • Attractions • Tours – including sight-seeing, short-stays, day trips and extended tours • Land, water and air-based activities • Accommodation and camping • Interpretive activities. <i>Stakeholders</i> may be related to: • The host community where the proposed tourism activity is to be sited • Investors • Local authorities • Land management agencies • Consumer group representatives – including tour operators, attraction operators, and service providers • Suppliers of environmentally-friendly technology, products and services • Peak industry bodies.
--	---

Element 3: Redress the negative impacts of ecologically sustainable tourism operations 3.1 Take <i>remedial action</i> to limit observable negative impacts 3.2 Undertake <i>habitat creation</i> 3.3 Engage in <i>habitat reinstatement and restoration</i> 3.4 Undertake <i>habitat and species translocation</i> Element 4: Report on the impacts of ecologically sustainable tourism operations 4.1 Prepare <i>report material</i> for dissemination 4.2 Share report material with stakeholders 4.3 Make report material available to the wider community 4.4 Identify report issues requiring attention	<i>Economic and social returns to the destination community</i> should include: • Protection of culture • Safety of local people • Employment and business-related opportunities • Enhanced infrastructure • Increase in standard of living • Maintenance of lifestyles for individuals and community groups • Retained ability to enjoy and use the area to be developed • Higher levels of income. <i>Minimal impact techniques</i> should relate to: • Informing visitors on expected behaviours • Site hardening techniques • Technological solutions • Public education campaigns • Barriers and constructions to restrict or limit access to areas and sites • Staged authenticity. <i>Methods of managing tourism impacts</i> may include: • Setting Limits of Acceptable Change (LAC) • Zoning of threatened areas • Total bans on access to nominated areas • Involvement of local community in identifying changed situations • Scheduling of visitations to govern access and use
---	---

	• Consideration of restricting access to times of suitable weather conditions and/or seasons • Limitations on the size of visiting groups • Bans on entry of nominated items – including pets, and certain vehicles • Bans on nominated activities – including hunting, picking flowers, getting near fauna, lighting fires, and taking items from the area • Integrating ecological best practice into plans and practical implementation of plans. <i>Establishing existing relationship between tourism and the environment</i> should include: • Identifying endangered or threatened species • Describing past impacts of tourism operations on the environment and ecology • Describing and evaluating past attempts at achieving ecological sustainability in the area • Researching projections relating to the future impact of continuing existing tourism operations at selected destination • Reviewing reports and environmental and ecological assessment already undertaken • Conducting environmental impact studies to generate fresh research material. <i>Identify and establish plans</i> should include: • Ensuring that development proposals are ecologically appropriate and genuinely sustainable as far as can be verified • Developing a suite of plans that align with the accepted requirements of plans to be SMART (Specific; Measurable; Accurate; Realistic and Relevant; Trackable and Time-related)
--	--

	• Developing policies and procedures to guide and govern the implementation of the plan(s) • Allocating tasks, resources and responsibilities to enable the attainment of the goals of the plan(s) • Identifying quality standards that will apply to plan implementation • Developing monitoring and evaluation criteria against which to assess the progress and success of the plan(s) – including development of benchmarks, Key Performance Indicators (KPIs), and operation cessation indicators • Submitting plans to key stakeholders for comment, feedback and approval • Revising plans as required on the basis of valid ecological concerns. <i>Environmentally and ecologically-friendly policies and procedures may include:</i> • Codes of practice • Standard operating procedures • Blanket prohibitions on certain products, operations or activities • Regular monitoring and testing • Consultation with relevant conservation groups – including adoption and adaptation of existing best practices. <i>Strategies to balance ecological sustainability and the economic viability of projected tourism operations may include:</i> • Prescribing triggers for action in relation to the cessation of tourism operations • Nominating objective and quantifiable indicators to guide and control operations and usage
--	--

	• Using external and independent third parties to monitor ecological and environmental impacts and issue cessation orders • Negotiating trade-offs – including reparations and rehabilitation at a later time. <i>Roles and responsibilities</i> may include: • Finance • Marketing • Promoting sustainability • Facilitating working partnerships • Liaison and communication with stakeholders. <i>Appropriate participants</i> may include: • Private sector organisations – including land owners, developers, businesses, transport providers • Public sector organisations – including tourism information centres, land management groups, government agencies • Voluntary organisations – including local community groups and service groups. <i>Conduct site evaluations</i> may include: • Recording existing data and statistics relating to the ecology in general terms • Conducting terrestrial and habitat surveys • Conducting fauna surveys • Specifying the condition of species that are of special concern • Recording images of the site/area • Involving independent third party ecological assessors
--	---

	• Filing the material gathered for future reference • Making the findings of the initial site evaluation available to key stakeholders. <i>Methods of data collection</i> may include: • Logbooks • Sighting forms • Temperature measurements • Recording of weather conditions • Estimations of percentage cover • Calculations of water flows and storage levels • Testing and analysis of levels of contamination as appropriate to the location • Recording visual images • Observations recorded in journals. <i>Remedial action</i> may include: • Ceasing operations • Limiting operations • Modifying the nature of operations and activities • Re-scheduling visitations • Reducing usage of affected areas • Reducing group numbers • Initiating professional appraisal of the identified or suspected impact • Seeking professional advice on action to be taken to retrieve the situation.
--	--

	<i>Habitat creation</i> refers to creating a new habitat on land previously occupied by another habitat. <i>Habitat reinstatement and restoration</i> refers to the re-establishment of a degraded environmental and the rehabilitation of nominated areas. <i>Habitat and species translocation</i>: refers to moving a habitat from one location to another along with as many species as possible. <i>Prepare report material</i> may include: • Generating a formal report on the ecological impacts of the tourism operations • Ensuring total disclosure and total transparency • Preparing material for stakeholder consumption and for wider general public consumption • Including comparative images • Providing statistics and graphs • Providing interpretation of data • Making predictions regarding the future ecological impacts of the operation • Using an independent third party to prepare and disseminate the report. Assessment Guide The following skills and knowledge must be assessed as part of this unit: • Enterprise policies and procedures in regard to sustainable tourism operations, interactions with local communities, government agencies and industry associations including protocols relating to public meetings, media liaison and the making of public comment on behalf of the enterprise • Principles of sustainable ecological practice • Knowledge of global and local environmental and ecological issues
--	---

	• Ability to use ecological monitoring and recording techniques • Knowledge of minimal impact techniques • Knowledge of and the ability to practice ecological and environmental management strategies • Knowledge of tourism trends in relation to selected sites and destinations • Knowledge of host country legislation and requirements in relation to the planning and implementation of ecologically sustainable tourism operations. Linkages To Other Units • Plan, trial and implement minimal impact operations • Develop and monitor culturally appropriate tourism activity • Develop host community awareness programs • Develop, implement and evaluate regional tourism plans • Promote tourism products and services • Manage and monitor innovative tourism programs and projects • Develop and update local knowledge • Establish and maintain a business relationship • Plan and establish systems and procedures • Plan, manage and conduct meetings • Manage legal requirements for business compliance.
--	---

	Critical Aspects of Assessment Evidence of the following is essential: • Understanding of host enterprise policies and procedures in regard to sustainable tourism operations, interactions with local communities, government agencies and industry associations including protocols relating to public meetings, media liaison and the making of public comment on behalf of the enterprise • Demonstrated ability to develop effective and comprehensive plan for (one or more) ecologically sustainable tourism operations – to be identified by the candidate - in a nominated area. The plans must fully describe the context of the proposed operations and provide detailed actions including particulars of how the proposal will be monitored and reported on to the identified stakeholders. Context of Assessment Assessment must ensure: • Actual geographical destination and community. Resource Implications Training and assessment must include a real destination, real historic patterns, real concerns and issues and simulated action to be taken to ensure ecologically sustainable operations. Note: • The assessment may focus on a theoretical situation within a real environment • There is no requirement for the candidate to implement the ecologically sustainable practices described in the plans due to time and cost considerations.
--	--

Assessment Methods

The following methods may be used to assess competency for this unit:

- Observation of practical candidate performance
- Portfolio of documentation produced by the candidate – including records of interviews and meetings, research material identified, and plans
- Role plays
- Oral and written questions
- Third party reports completed by a supervisor
- Project and assignment work.

Key Competencies in this Unit

Level 1 = competence to undertake tasks effectively

Level 2 = competence to manage tasks

Level 3 = competence to use concepts for evaluating

Key Competencies	Level	Examples
Collecting, organising and analysing information	1	Researching ecological issues that are relevant to community
Communicating ideas and information	2	Sharing information with identified stakeholders
Planning and organising activities	3	Determining plans for implementing sustainable tourism operations
Working with others and in teams	2	Organising community and other meetings

	Using mathematical ideas and techniques	1	Calculating statistics that relate to identified ecological issues
	Solving problems	2	Resolving ecological issues that have the potential to negatively impact on the host environment
	Using technology	1	Using ecological monitoring equipment

Oral questions

Student name	
Assessor name	
Location/venue	
Unit of competency	Develop/monitor ecologically sustainable tourism operations D2.TCS.CL5.14
Instructions	1. Ask student questions from the attached list to confirm knowledge, as necessary 2. Place tick in boxes to reflect student achievement (Pass Competent 'PC' or Not Yet Competent 'NYC') 3. Write short-form student answer in the space provided for each question.

Questions	Response	
	PC	NYC
1. When developing plans for ecologically sustainable tourism operations give me an example of how and when you have verified the ecological impacts that apply to the selected destination.	☐	☐
2. Use an example to illustrate how and when you have identified potential suitable tourism operations that may be undertaken as part of the process of developing plans for ecologically sustainable tourism operations.	☐	☐

Questions	Response	
	PC	NYC
3. Tell me what you do to consult with stakeholders as part of the process of developing plans for ecologically sustainable tourism operations.	☐	☐
4. Describe what you have done to identify the economic and social returns to the destination community of the introduction of tourism operations as part of the process of developing plans for ecologically sustainable tourism operations.	☐	☐
5. Identify and describe three examples of minimal impact techniques and methods of managing tourism impacts.	☐	☐

Questions	Response	
	PC	NYC
6. Give me an example of having incorporated stakeholder and other research information into the planning process when developing plans for ecologically sustainable tourism operations.	☐	☐
7. Use an example to describe what you have done to establish the existing relationship between tourism and the environment when developing plans for ecologically sustainable tourism operations.	☐	☐
8. Describe a plan you have prepared for the implementation of agreed sustainable tourism operations identifying how you developed the plan and its contents.	☐	☐

Questions	Response	
	PC	NYC
9. Describe two environmentally and ecologically-friendly policies and procedures you have produced to support sustainable tourism operations.	☐	☐
10. Describe two strategies you have developed to balance ecological sustainability and the economic viability of projected tourism operations for one (or more) ecologically sustainable tourism operations.	☐	☐
11. Identify/describe the roles and responsibilities you have allocated to appropriate participants for a sustainable tourism development.	☐	☐

Questions	Response	
	PC	NYC
12. Give me an example of a recognised eco-tourism certification program you have subscribed to for a proposed tourism operation. What were its key points? Why did you subscribe?	☐	☐
13. Describe the practices/activities you undertook to conduct a site evaluation to establish a starting point/benchmark for the measurement of ecological impacts of a planned ecologically sustainable tourism operation.	☐	☐
14. Describe the methods of data collection used to record ecological impacts in relation to a planned ecologically sustainable tourism operation.	☐	☐

Questions	Response	
	PC	NYC
15. Describe a situation where you needed to take action to retrieve/redress/recover a situation where you identified significant adverse real-time impacts on the ecology as a result of the implementation of a planned ecologically sustainable tourism operation.	☐	☐
16. Give me an example of how you have involved local communities in monitoring activities as part of the implementation process for a planned ecologically sustainable tourism operation.	☐	☐
17. How do you share project information with stakeholders as it arises?	☐	☐

Questions	Response	
	PC	NYC
18. Why is it necessary to take remedial action to limit observable negative impacts in relation to the implementation of a planned ecologically sustainable tourism operation?	☐	☐
19. Use an example to illustrate how you have undertaken habitat creation.	☐	☐
20. Describe and provide a context for situations where you have engaged in habitat reinstatement and restoration to help redress the negative impacts of an ecologically sustainable tourism operation.	☐	☐

Questions	Response	
	PC	NYC
21. Describe and provide a context for situations where you have engaged in habitat and species translocation to help redress the negative impacts of an ecologically sustainable tourism operation.	☐	☐
22. Describe a report you have prepared on the impacts of an ecologically sustainable tourism operation. What was the project? When was the report prepared? Who was the report audience?	☐	☐
23. In relation to the report identified in the answer to the previous question how did you communicate the contents of this report to stakeholders?	☐	☐

Questions	Response	
	PC	NYC
24. With reference to the report discussed in the previous two answers what did you do to make the report available to the wider community?	☐	☐
25. For the report we are discussing, identify the issues in the report you deemed were worthy of further attention. How did you identify these issues? Why did they merit more attention?	☐	☐

Written questions

Develop/monitor ecologically sustainable tourism operations – D2.TCS.CL5.14

Student Name: _____

Answer all the following questions and submit to your Trainer.

1. What is sustainable tourism? What are examples of sustainable tourism in your region?

2. What are environmental areas impacted by tourism?

3. Based on one of the areas impacted that you identified in Question 2, explain two causes and possible remedies to reduce the impact.

4. What are three categories of tourism operators?

5. What are characteristics of appropriate tourism operators?

6. What are types of stakeholders impacted by tourism?

7. What are three positive impacts of tourism?

8. What are three negative impacts of tourism?

9. What are two examples of techniques used to reduce and manage tourism impacts?

10. What are three possible focus areas for environmental management planning?

11. What strategies can you use to involve local community in the planning phase when developing sustainable initiatives?

12. What areas need to be addressed in developing the relationship between the environment and tourism?

13. What are three activities associated with developing sustainability plans?

14. What are three examples of sustainability policies?

15. Why is important to find a balance between economic benefit and environmental sustainability?

16. What are three examples of common roles and responsibilities relating to sustainability for senior managers?

17. What is an example of certification that must be obtained by key tourism and environmental departments and authorities in your region?

18. What are three monitoring and evaluation questions that may be developed to guide monitoring activities?

19. What methods can be used to identify environmental impact?

20. What are examples of remedial action that can be taken to minimise environmental impact?

21. What are methods you can use to involve local communities in monitoring activities?

22. What types of information relating to the overall sustainability plan need to be communicated to stakeholders?

23. What are ways of 'modifying the nature of operations and activities' to minimise environmental impact?

24. What are three activities associated with creating a habitat?

25. What are activities associated with habitat reinstatement and restoration?

26. What are the considerations when moving plant life?

27. What information should be included in a sustainability report?

28. What are activities associated with sharing report information?

29. What are methods that can be used to communicate report material with the wider community?

30. What are types of adjustments that can be made when addressing issues requiring attention?

Answers to written questions

Develop/monitor ecologically sustainable tourism operations – D2.TCS.CL5.14

The following are model answers only – Trainers/Assessors must use discretion when determining whether or not an answer provided by a Student is acceptable or not.

1. What is sustainable tourism? What are examples of sustainable tourism in your region?

- Sustainable tourism' is based on the principles of ecology
- It is based on 'minimising adverse impacts on landscapes, water resources, habitats and species while supporting social and economic development.

2. What are environmental areas impacted by tourism?

- Water
- Noise
- Flora and fauna
- Cultural heritage
- Marine heritage.

3. Based on one of the areas impacted that you identified in Question 2, explain two causes and possible remedies to reduce the impact.

The answer will vary depending on area impacted.

4. What are three categories of tourism operators?

- Transport operators
- Accommodation operators
- Attractions operators
- Travel services operators
- Entertainment operators
- Experiential travel operators
- Interpretive eco-tourism guiding and activities operators
- Adventure travel operators
- Business related operators.

5. What are characteristics of appropriate tourism operators?

- Encouraging community engagement
- Gaining agreement from the community
- Obtaining necessary authorisations and permissions
- Designing strategies and procedures that will balance economic viability with cultural appropriateness and environmental preservation
- Creates and implements environmentally sustainable practices
- Developing codes of practice
- Preparing implementation plans for operational activities with the local community and environment in mind
- Training staff, including cultural environmental awareness training
- Ensuring sustainable appropriateness of all operational activities
- Identifying appropriate behaviour to ensure the local environment is respected
- Supports local environmental issues
- Enhancing the overall community
- Ensuring operational activities do not impact negatively on the environment or local community
- Investing or supporting local community initiative.

6. What are types of stakeholders impacted by tourism?

- Current and potential employees
- Key internal personnel
- Customers and clients
- Investors and shareholders
- Local community
- Suppliers
- Employee unions
- Government agencies and regulators
- Industry associations
- Specialists
- Vocational training organisations
- Media.

7. What are three positive impacts of tourism?

- Growth of existing businesses
- Development of new businesses
- More jobs and employment opportunities
- A more sustainable economy
- Income redistribution
- Poverty alleviation
- Improved quality of life for people/families flowing from employment, economic growth and stability
- Strengthening communities
- Facilities developed for tourism can benefit residents
- Increased amount and variety of products, services and entertainment
- Greater investment in local infrastructure and public transport systems from governments
- Maintenance, growth and improvement in local facilities
- Cultural empowerment and increased sense of pride as locals become ambassadors for tourism in their region
- Revaluation of culture and traditions
- Facilitates civic involvement and pride
- Tax revenue for governments
- Enhanced public/international awareness of the country/location
- Economic diversification and general economic benefits to the local community
- Increased cultural understanding
- Locals and visitors exchange ideas
- Opportunity to share the culture and educate visitors
- Investment opportunities from the private sector in relation to businesses, real estate, and infrastructure
- Improved health and training facilities
- Greater educational opportunities occur through additional schools and other educational providers
- Opportunity to enhance the preservation of endangered or threatened aspects of the local culture, customs and community
- Opportunity to make the wider community aware of the problems facing the community.

8. What are three negative impacts of tourism?

- Impact of tourism on the social fabric of society
- Lack of local workers to fill the jobs which are generated
- Provision only of menial and low-paid jobs
- Seasonal employment only (in some areas)
- Increased number of people relocated for limited or seasonal work
- Shortage of labour in local industry
- Rises in prices
- Modification or decimation of moral or cultural characteristics of a society.
- Trivialisation or dilution of the culture
- Loss of local traditions and customs of local communities
- Commercialisation of culture may not be an accurate portrayal of the culture
- Members of the local community become envious of the tourist lifestyle
- Loss of a sense of community within the area
- Ultimate dependency on tourism and consequent need to accommodate whatever is required regardless of the consequences
- Damage to the land and environment including additional pollution
- Over-development resulting in decreased amenity of the area
- Money leaving the area because businesses are owned by external operators
- Unacceptable level of use of/stress on community resources by tourists to the detriment of the local community – over-crowding and traffic congestion
- Local attractions restricted to local communities
- Possible limited access to beaches and other areas set aside for tourists
- Increased social change
- Increased cost of living for the members of the community
- Racial and ethnic tension
- Undesirable activities such as begging, gambling, prostitution
- Child protection and child sex trade concerns
- Re-location and dislocation
- Unwanted intervention by tourists in normal everyday activities
- Control of the local area may move more to external people, businesses or authorities
- Changes in crime types and rates
- Introduction of diseases and pests
- Status alterations.

9. What are two examples of techniques used to reduce and manage tourism impacts?

- Informing visitors on expected behaviours
- Site hardening techniques
- Technological solutions
- Public education campaigns
- Barriers and constructions to restrict or limit access to areas and sites
- Staged authenticity
- Setting limits of acceptable change (LAC)
- Zoning of threatened areas
- Total bans on access to nominated areas
- Involvement of local community in identifying changed situations
- Scheduling of visitations to govern access and use
- Consideration of restricting access
- Limitations on the size of visiting groups
- Bans on entry of nominated items
- Bans on nominated activities
- Integrating ecological best practice.

10. What are three possible focus areas for environmental management planning?

- Improved environmental management and planning
- Cleaner production techniques
- Energy-efficient and non-polluting construction materials
- Efficient sewage systems
- Energy sources
- Improved waste treatment and disposal
- Environmental awareness raising
- Environmental protection
- Conservation and restoration of biological diversity
- Sustainable use of natural resources
- Regulatory measures
- Introduction of policies and procedures
- Controls on the number of tourist activities.

11. What strategies can you use to involve local community in the planning phase when developing sustainable initiatives?

- Developing tourism initiatives in conjunction with key local people
- Seeking approval for all major initiatives
- Involving local people in the planning and delivery stages
- Making appropriate recompense for the involvement of local people
- Provision of services to the community
- Ensuring accuracy and honesty in all activities
- Ensuring the integrity of the region is understood.

12. What areas need to be addressed in developing the relationship between the environment and tourism?

- Identifying endangered or threatened species
- Describing past impacts of tourism operations on the environment and ecology
- Describing and evaluating past attempts at achieving ecological sustainability in the area
- Researching projections relating to the future impact of continuing existing tourism operations
- Reviewing reports and environmental and ecological assessments already undertaken
- Results of environmental impact studies
- Determining the relative balance between costs and disadvantages relating to tourism operations.

13. What are three activities associated with developing sustainability plans?

- Ensuring proposals are ecologically appropriate and genuinely sustainable
- Developing SMART objectives
- Developing policies and procedures
- Allocating tasks, resources and responsibilities
- Identifying quality standards
- Developing monitoring and evaluation criteria
- Submitting plans to key stakeholders for comment, feedback and approval
- Revising plans as required on the basis of valid ecological concerns.

14. What are three examples of sustainability policies?

- Follow environmental guidelines
- Encourage ethical business practices
- Ensure your actions preserve natural resources and biodiversity
- Avoid buying products that exploit workers and poor nations
- Ensure financial transparency and openness in environmental practices
- Use business partners that can further your sustainability credentials
- Support and empower local communities
- Educate others on sustainability
- Reduce, re-use, recycle
- Incorporate life cycle analysis into decision making process
- Comply with relevant environmental legislation, agreement and standards at local, national and international levels.

15. Why is important to find a balance between economic benefit and environmental sustainability?

Answers will vary.

16. What are three examples of common roles and responsibilities relating to sustainability for senior managers?

- Continue to raise awareness of the policy initiatives and encourage environmental practices such as using emails instead of paper communications and making double-sided photocopying standard procedure
- Provide information about roles and responsibilities of employees, daily operational requirements, reporting mechanisms and consequences for non-compliance
- Prepare step-by-step procedures for carrying out specific tasks, such as purchasing sustainable products, recycling and energy usage
- Report progress regularly to staff and external stakeholders
- Implement purchasing agreements
- Ensure everyone complies with legislative requirements
- Organise sustainability audits and reviews
- Manage and rectify any breaches
- Make arrangements with a recycling contractor to remove used paper for recycling
- Install low-energy lighting to make better use of natural light wherever possible
- Save costs through waste reduction and purchasing decisions
- Arrange training for staff where needed.

17. What is an example of certification that must be obtained by key tourism and environmental departments and authorities in your region?

Answers will vary.

18. What are three monitoring and evaluation questions that may be developed to guide monitoring activities?

- To help the monitoring and evaluation process, you may wish to develop a range of questions which can help guide the monitoring process
- These questions can be used to evaluate how well your planning worked, and areas where they could be improved in future planning.

Some questions include, but not limited to:

- Was there sufficient consultation?
- Were more physical resources needed?
- Was more time needed?
- Did you have access to all relevant legislation, voluntary codes of practice and industry standards?
- Did you do sufficient research on current impact of the organisation on the environment?
- Did you collect information and data from internal and external sources, and analyse it to determine the strategies to be considered?
- Did you obtain agreement from stakeholders and set realistic targets?
- Was the implementation timeframe realistic?
- Did you use a range of communication strategies?
- Which ones were most successful?
- Did you gain commitment from everyone?
- Was everyone aware of the expectations on them, and need to comply with the initiative and meet the target set for the organisation and individuals?
- Did people receive training when needed?
- Were new procedures developed and disseminated?
- What difficulties did you encounter?
- Were they resolved or are they still present?

19. What methods can be used to identify environmental impact?

- Conduct region or site evaluations
- Logbooks
- Sighting forms
- Temperature measurements
- Recording of weather conditions
- Estimations of percentage cover
- Calculations of water flows and storage levels
- Testing and analysis of levels of contamination as appropriate to the location
- Recording visual images
- Observations recorded in journals.

20. What are examples of remedial action that can be taken to minimise environmental impact?

- Ceasing operations
- Limiting operations
- Modifying the nature of operations and activities
- Re-scheduling visitations
- Reducing usage of affected areas
- Reducing group numbers
- Initiating professional appraisal of the identified or suspected impact
- Seeking professional advice on action to be taken to retrieve the situation.

21. What are methods you can use to involve local communities in monitoring activities?

- Involvement in capturing information
- Providing feedback on observations
- Communicating with the local community
- Participants may provide examples from within these three points. That is also acceptable.

22. What types of information relating to the overall sustainability plan need to be communicated to stakeholders?

- Rationale behind the plan
- Areas that the plan covers
- Range of activities designed to implement the plan
- Expected outcomes of each plan strategy in measurable terms
- Benefits from a successfully implemented sustainability plan
- Support the organisation will provide to implement the plan.

23. What are ways of 'modifying the nature of operations and activities' to minimise environmental impact?

Answers will vary.

24. What are three activities associated with creating a habitat?

- Creating a habitat management team
- Identify any existing habitat
- Undertake research into suitable habitats
- Design suitable habitat
- Introduce native plants
- Introduce local wildlife
- Developing a management strategy for sustained growth.

25. What are activities associated with habitat reinstatement and restoration?

- Replanting activities
- Removal activities
- Habitat infrastructure activities
- Development of a zoning system
- Defining the appropriate types of tourism for protected areas
- Identify, reduce or eliminate 'high habitat damaging' activities
- Control of invasive species
- Increased funding for restoration and environmental activities
- Conservation efforts.

26. What are considerations when moving plant life?

- Identify plant life to be moved
- Identify the affect the removal of plant life will have on surrounding habitat
- Select a suitable location which mirrors its current 'environmental conditions'
- Prepare the designated new location by digging holes, preparing surfaces etc.

27. What information should be included in a sustainability report?

- Overview of sustainability plan
- Summary of objectives
- Summary of activities conducted
- Formal findings on the ecological impacts of the tourism operations
- Interpretation of data
- Comparative images
- Statistics and graphs
- Environmental records
- Comments regarding success of failure of sustainability plan
- Explaining if your strategy and effort worked
- Identifying the reasons why they worked or not work
- Significant variations and the factors associated with the changes
- Unusual results and determine their causes
- Weaknesses and potential areas of improvement
- Impact / implications of the results and conclusions on performance
- Predictions regarding the future ecological impacts of the operation
- Recommendations for improvement.

28. What are activities associated with sharing report information?

- Preparing written reports
- Preparation of brochures and glossary reports
- Supporting reports with fact-based evidence
- Providing verbal presentation and explanations
- Emailing information
- Couriering or mailing hard copy reports
- Disseminating information at staff briefings
- Organising meetings with relevant stakeholders
- Meeting with government authorities and environmental bodies.

29. What are methods that can be used to communicate report material with the wider community?

- Placing information on intranet or website
- Updating information on social media
- Preparing media releases and press kits
- Writing newspaper articles for local media
- Conducting interviews with the media
- Holding press conferences
- Conducting town hall meetings.

30. What are types of adjustments that can be made when addressing issues requiring attention?

Making adjustments to:

- Objectives
 - Targets
 - Policies and procedures
 - Number of people assigned to an activity
 - Increasing awareness and commitment.
-

Observation checklist

Student name	
Assessor name	
Location/venue	
Unit of competency	Develop/monitor ecologically sustainable tourism operations D2.TCS.CL5.14
Dates of observation	
Instructions	- Over a period of time observe the student completing each of the following tasks: - Develop plans for ecologically sustainable tourism operations - Monitor results of planned ecologically sustainable tourism operations - Redress the negative impacts of ecologically sustainable tourism operations - Report on the impacts of ecologically sustainable tourism operations - Enter the date on which the tasks were undertaken - Place a tick in the box to show they completed each aspect of the task to the standard expected in the enterprise - Complete the feedback sections of the form, if required.

Did the candidate	Yes	No
Element 1: Develop plans for ecologically sustainable tourism operations		
Verify the ecological impacts that apply to the selected destination	☐	☐
Identify potential suitable tourism operations that may be undertaken	☐	☐
Consult stakeholders	☐	☐
Identify the economic and social returns to the destination community of the introduction of tourism operations	☐	☐
Research minimal impact techniques and methods of managing tourism impacts	☐	☐
Incorporate stakeholder and other research information into the planning process	☐	☐

Did the candidate	Yes	No
Establish existing relationship between tourism and the environment	☐	☐
Identify and establish plans for the implementation of agreed sustainable tourism operations	☐	☐
Establish environmentally and ecologically-friendly policies and procedures to support sustainable tourism operations	☐	☐
Develop strategies to balance ecological sustainability and the economic viability of projected tourism operations	☐	☐
Allocate roles and responsibilities for sustainable tourism development to appropriate participants	☐	☐
Identify and subscribe to recognised eco-tourism certification program for the proposed tourism operations	☐	☐
Element 2: Monitor results of planned ecologically sustainable tourism operations		
Conduct site evaluations to establish starting point for the measurement of ecological impacts	☐	☐
Apply suitable methods of data collection to record ecological impacts	☐	☐
Initiate immediate remedial action to address significant adverse real-time impacts on the ecology	☐	☐
Involve local communities in monitoring activities	☐	☐
Share information with stakeholders as it arises	☐	☐
Element 3: Redress the negative impacts of ecologically sustainable tourism operations		
Take remedial action to limit observable negative impacts	☐	☐
Undertake habitat creation	☐	☐
Engage in habitat reinstatement and restoration	☐	☐
Undertake habitat and species translocation	☐	☐

Did the candidate	Yes	No
Element 4: Report on the impacts of ecologically sustainable tourism operations		
Prepare report material for dissemination	☐	☐
Share report material with stakeholders	☐	☐
Make report material available to the wider community	☐	☐
Identify report issues requiring attention	☐	☐
Did the student's overall performance meet the standard?	☐	☐
