Competency Based Assessment (CBA) – An Introduction for Assessors

Assessment is the process of identifying a participant's current knowledge, skills and attitudes sets against all elements of competency within a unit of competency.

Suggested Assessment Methods

For each unit of competency a number of assessment tools have been identified including:

- Work Projects
- Oral Questions
- Written Questions
- Third Party Statements
- Observation Checklists.

Instructions and Evidence Recording Sheets have been identified in this Assessment Manual for use by Assessors.

Alternative Assessment Methods

Whilst the above mentioned assessment methods are suggested assessment methods, the assessor may use an alternate method of assessment taking into account:

- a) The nature of the unit
- b) The strengths of participants
- c) The number of participants in the class
- d) Time required to complete assessments
- e) Time dedicated to assessment
- f) Equipment and resources required.

Alternate assessment methods include:

- Practical demonstrations
- Practical demonstrations in simulated work conditions
- Problem solving
- Portfolios of evidence
- Critical incident reports
- Journals
- Oral presentations
- Interviews
- Videos
- Visuals/slides/audiotapes
- Case studies

- Log books
- Projects and Role plays
- Group projects
- Recognition of Prior Learning.

Whilst there is no specific instruction or evidence collection documents for all the alternative assessment methods, assessors can record competency in the 'Other' section within the 'Competency Recording Sheet'.

Selection of Assessment Methods

Each assessor will determine the combination of Assessment Methods to be used to determine Competency for each Competency Unit on a student by student basis.

'Sufficient' evidence to support the 'Pass Competent'/'Not Yet Competent' decision must be captured.

In practice this means a minimum of 2 – 3 Assessment Methods for each candidate for each Competency Element is suggested.

At least one method should provide evidence of practical demonstration of competence.

The following assessment methods deemed to provide evidence of practical demonstration of competence include:

- Practical Work Projects
- Third Party Statement
- Observation Checklist.

Assessing Competency

Competency based assessment does not award grades, but simply identifies if the participant has the knowledge, skills and attitudes to undertake the required task to the specified standard.

Therefore, when assessing competency, an assessor has two possible results that can be awarded:

- 'Pass Competent' (PC)
- 'Not Yet Competent' (NYC).

Pass Competent (PC)

If the participant is able to successfully answer or demonstrate what is required, to the expected standards of the performance criteria, they will be deemed as 'Pass Competent' (PC).

The assessor will award a 'Pass Competent' (PC) if they feel the participant has the necessary knowledge, skills and attitudes in all assessment tasks for a unit.

Not Yet Competent' (NYC)

If the participant is unable to answer or demonstrate competency to the desired standard, they will be deemed to be 'Not Yet Competent' (NYC).

This does not mean the participant will need to complete all the assessment tasks again. The focus will be on the specific assessment tasks that were not performed to the expected standards.

The participant may be required to:

- a) Undertake further training or instruction
- b) Undertake the assessment task again until they are deemed to be 'Pass Competent'.

Regional Qualifications Framework and Skills Recognition System

The 'Regional Qualifications Framework and Skills Recognition System', also known as the 'RQFSRS' is the overriding educational framework for the ASEAN region.

The purpose of this framework is to provide:

- A standardised teaching and assessment framework
- Mutual recognition of participant achievement across the ASEAN region. This includes achievement in individual Units of Competency or qualifications as a whole.

The role of the 'RQFSRS' is to provide, ensure and maintain 'quality assurance' across all countries and educational providers across the ASEAN region.

Recognition of Prior Learning (RPL)

Recognition of Prior Learning is the process that gives current industry professionals who do not have a formal qualification, the opportunity to benchmark their extensive skills and experience against the standards set out in each unit of competency/subject.

This process is a learning and assessment pathway which encompasses:

- Recognition of Current Competencies (RCC)
- Skills auditing
- Gap analysis and training
- Credit transfer.

Code of Practice for Assessors

This Code of Practice provides:

- Assessors with direction on the standard of practice expected of them
- Candidates with assurance of the standards of practice expected of assessors
- Employers with assurance of the standards maintained in the conduct of assessment.

The Code detailed below is based on the International Code of Ethics and Practice (The National Council for Measurement in Education [NCME]):

- The differing needs and requirements of the person being assessed, the local enterprise and/or industry are identified and handled with sensitivity
- Potential forms of conflict of interest in the assessment process and/or outcomes are identified and appropriate referrals are made, if necessary
- All forms of harassment are avoided throughout the planning, conducting, reviewing and reporting of the assessment outcomes
- The rights of the candidate are protected during and after the assessment

- Personal and interpersonal factors that are not relevant to the assessment of competency must not influence the assessment outcomes
- The candidate is made aware of rights and process of appeal
- Evidence that is gathered during the assessment is verified for validity, reliability, authenticity, sufficiency and currency
- Assessment decisions are based on available evidence that can be produced and verified by another assessor
- Assessments are conducted within the boundaries of the assessment system policies and procedures
- Formal agreement is obtained from both the candidate and the assessor that the assessment was carried out in accordance with agreed procedures
- The candidate is informed of all assessment reporting processes prior to the assessment
- The candidate is informed of all known potential consequences of decisions arising from an assessment, prior to the assessment
- Confidentiality is maintained regarding assessment results
- The assessment results are used consistently with the purposes explained to the candidate
- Opportunities are created for technical assistance in planning, conducting and reviewing assessment procedures and outcomes.

Instructions and Checklist for Assessors

Instructions

General instructions for the assessment:

- Assessment should be conducted at a scheduled time that has been notified to the candidate
- Facilitators must ensure participants are made aware of the need to complete assessments and attend assessment sessions
- If a participant is unable to attend a scheduled session, they must make arrangements with the Assessor to undertake the assessment at an alternative time
- At the end of the assessment the Assessor must give feedback and advise the participant on their PC/NYC status
- Complete the relevant documentation and submit to the appropriate department.

Preparation

- Gain familiarity with the Unit of Competency, Elements of Competency and the Performance Criteria expected
- Study details assessment documentation and requirements
- Brief candidate regarding all assessment criteria and requirements.

Briefing Checklist

- Begin the assessment by implementing the following checklist and then invite the candidate to proceed with assessment.

Checklist for Assessors

Prior to the assessment I have:	Tick (✓)	Remarks
Ensured the candidate is informed about the venue and schedule of assessment.		
Received current copies of the performance criteria to be assessed, assessment plan, evidence gathering plan, assessment checklist, appeal form and the company's standard operating procedures (SOP).		
Reviewed the performance criteria and evidence plan to ensure I clearly understood the instructions and the requirements of the assessment process.		
Identified and accommodated any special needs of the candidate.		
Checked the set-up and resources for the assessment.		
During the assessment I have:		
Introduced myself and confirmed identities of candidates.		
Put candidates at ease by being friendly and helpful.		
Explained to candidates the purpose, context and benefits of the assessment.		
Ensured candidates understood the assessment process and all attendant procedures.		
Provided candidates with an overview of performance criteria to be assessed.		
Explained the results reporting procedure.		
Encouraged candidates to seek clarifications if in doubt.		
Asked candidates for feedback on the assessment.		
Explained legal, safety and ethical issues, if applicable.		
After the assessment I have:		
Ensured candidate is given constructive feedback.		
Completed and signed the assessment record.		
Thanked candidate for participating in the assessment.		

Instructions for Recording Competency

Specifications for Recording Competency

The following specifications apply to the preparation of Evidence Gathering Plans:

- A Competency Recording Sheet must be prepared for each candidate to ensure and demonstrate all Performance Criteria and Competency Elements are appropriately assessed. This Sheet indicates how the Assessor will gather evidence during their assessment of each candidate
- This Competency Recording Sheet is located at the end of the Assessment Plan
- It is the overriding document to record competency
- The Assessor may vary the Competency Recording Sheet to accommodate practical and individual candidate and/or workplace needs
- Assessor must place a tick (✓) in the 'Assessment Method' columns to identify the methods of assessment to be used for each candidate
- Multiple Competency Elements/Performance Criteria may be assessed at the one time, where appropriate
- The assessor and participant should sign and date the Competency Recording Sheet, when all forms of evidence and assessment have been completed
- The assessor may provide and feedback or clarify questions which the participant may have in regards to the assessment grade or findings
- All documents used to capture evidence must be retained, and attached to the Competency Recording Sheet for each candidate for each Competency Unit.

Instructions for Different Assessment Methods

Specifications for Work Project Assessment

These guidelines concern the use of work projects.

The work projects identified in the Training Manuals involve a range of tasks, to be performed at the discretion of the Assessor.

Work project tasks can be completed through any form of assessment as identified in the Trainer and Trainee Manuals and stated at the start of this section.

Assessors should follow these guidelines:

- Review the Work Projects at the end of each 'Element of Competency' in the Trainee Manual to ensure you understand the content and what is expected
- Prepare sufficient resources for the completion of work activities including:
 - Time – whether in scheduled delivery hours or suggested time participants to spend outside of class hours
 - Resources – this may involve technical equipment, computer, internet access, stationery and other supplementary materials and documents
- Prepare assessment location (if done in class) making it conducive to assessment
- Explain Work Projects assessment to candidate, at the start of each Element of Competency. This ensures that participants are aware of what is expected and can collate information as delivery takes place

- Assessors can use the following phrase as a guide (where an 'X' is identified, please input appropriate information):
 "At the end of each Element of Competency there are Work Projects which must be completed. These projects require different tasks that must be completed.
 These work projects are part of the formal assessment for the unit of competency titled X:
- You are required to complete these activities:
 - Using the 'X' method of assessment*
 - At 'X' location*
 - You will have 'X time period' for this assessment*
 - You are required to compile information in a format that you feel is appropriate to the assessment
 - Do you have any questions about this assessment?"
- Commence Work Project assessment:
 - The assessor may give time for participants to review the questions at this time to ensure they understand the nature of the questions. The assessor may need to clarify questions
 - Participants complete work projects in the most appropriate format
 - Participants must submit Work Project evidence to the assessor before the scheduled due date
- Assessor must assess the participant's evidence against the competency standards specified in each Element of Competency and their own understanding. The assessor can determine if the participant has provided evidence to a 'competent' standard
- Transcribe results/details to Competency Recording Sheet
- Forward/file assessment record.

Specifications for Oral Question Assessment

These guidelines concern the use of oral questioning.

Assessors should follow these guidelines.

- Prepare Assessment Record for Oral Questioning. One record for each candidate:
 - Enter Student name
 - Enter Assessor name
 - Enter Location
- Familiarise self with Questions to be asked
- Prepare assessment location (table and chairs) making it conducive to assessment
- Explain Oral Questioning assessment to candidate, using the following phrase as a guide (where a 'X' is identified, please input appropriate information):
"These oral questions are part of the formal assessment for the unit of competency titled X.

There are X questions and you are required to answer all of them to the best of your ability and I will record whether or not you have answered correctly.

We have 60 minutes for this assessment.

- I will give you feedback at the end of the assessment
- Do you have any questions about this assessment?"
- Commence Oral Questioning assessment:
 - Complete Assessment Record for the Oral Questioning by:
 - a) Ticking PC or NYC, as appropriate
 - b) Entering 'Remarks' as required
 - c) Completing Oral Questioning within 60 minutes
- Complete Oral Questioning and provide feedback to candidate
- Transcribe results/details to Competency Recording Sheet
- Forward/file assessment record.

Specifications for Written Question Assessment

These guidelines concern the use of written questioning.

Assessors should follow these guidelines:

- Familiarise self with Questions and Answers provided
- Print and distribute copies of 'Written Questions' for participants. Ideally this should take place with adequate time for participants to answer all questions before the expected due date
- Explain Written Questioning assessment to candidate, using the following phrase as a guide (where a 'X' is identified, please input appropriate information):

"These written questions are part of the formal assessment for the unit of competency titled X.

There are X questions and you are required to answer all of them to the best of your ability.

You may refer to your subject materials, however where possible try to utilise your existing knowledge when answering questions.

Where you are unsure of questions, please ask the Assessor for further instruction. This may be answering the question orally or asking the assessor to redefine the question.

We have X time for this assessment:

- The due date for completion of this assessment is X
- On this date you must forward the completed questions to the assessor by X time on the date of X
- Do you have any questions about this assessment?"
- The assessor may give time for participants to review the questions at this time to ensure they understand the nature of the questions. The assessor may need to clarify questions
- Participants may record written answers (where possible)
- Participants must submit the written answers to the assessor before the scheduled due date

- Assessor must assess the participant's written answers against the model answers provided as a guide, or their own understanding. The assessor can determine if the participant has answered the questions to a 'competent' standard
- Transcribe results/details to Competency Recording Sheet
- Forward/file assessment record.

Specifications for Observation Checklist

These specifications apply to the use of the Observation Checklist in determining competency for candidates.

Only an approved assessor is authorised to complete the Observation Checklist.

The assessor is required to observe the participant, ideally in a simulated environment or their practical workplace setting and record their performance (or otherwise) of the competencies listed on the Observation Checklist for the Competency Unit.

To complete the Observation Checklist the Assessor must:

- Insert name of candidate
- Insert assessor name
- Insert identify of location where observations are being undertaken
- Insert date/s of observations – may be single date or multiple dates
- Place a tick in either the 'Yes' or 'No' box for each listed Performance Criteria to indicate the candidate has demonstrated/not demonstrated that skill
- Provide written (and verbal) feedback to candidate – as/if appropriate
- Sign and date the form
- Present form to candidate for them to sign and date
- Transcribe results/details to Competency Recording Sheet for candidate
- Forward/file Observation Checklist.

This source of evidence combines with other forms of assessment to assist in determining the 'Pass Competent' or 'Not Yet Competent' decision for the participant.

Specifications for Third Party Statement

These specifications relate to the use of a relevant workplace person to assist in determining competency for candidates.

The Third Party Statement is to be supplied by the assessor to a person in the workplace who supervises and/or works closely with the participant.

This may be their Supervisor, the venue manager, the Department Manager or similar.

The Third Party Statement asks the Supervisor to record what they believe to be the competencies of the participant based on their workplace experience of the participant. This experience may be gained through observation of their workplace performance, feedback from others, inspection of candidate's work etc.

A meeting must take place between the Assessor and the Third Party to explain and demonstrate the use of the Third Party Statement.

To complete the Third Party Verification Statement the Assessor must:

- Insert candidate name
- Insert name and contact details of the Third Party
- Tick the box to indicate the relationship of the Third Party to the candidate
- Present the partially completed form to the Third Party for them to finalise
- Collect the completed form from the Third Party
- Transcribe results/details to Competency Recording Sheet for candidate
- Forward/file Third Party Statement.

The Third Party must:

- Record their belief regarding candidate ability/competency as either:
 - Pass Competent = Yes
 - Not Yet Competent = No
 - Unsure about whether candidate is competent or not = Not Sure
- Meet briefly with the assessor to discuss and/or clarify the form.

This source of evidence combines with other forms of assessment to assist in determining the 'Pass Competent' or 'Not Yet Competent' decision for the candidate.

A separate Third Party Statement is required for each Competency Unit undertaken by the candidate.

Competency standard

UNIT TITLE: DRIVE LARGE TOUR BUSES OR COACHES		NOMINAL HOURS: 60
UNIT NUMBER: D2.TTO.CL4.08		
UNIT DESCRIPTOR: This unit deals with skills and knowledge required to drive large tour buses or coaches, safely monitoring road and traffic conditions and monitoring the safety and reliability of the vehicles. This unit requires participants to sit and pass the necessary driver's license test(s) as prescribed by the host country to allow them to drive designated buses or coaches as required.		
ELEMENTS AND PERFORMANCE CRITERIA		UNIT VARIABLE AND ASSESSMENT GUIDE
Element 1: Obtain driver's license(s) 1.1 Identify the <i>vehicles</i> that have to be driven 1.2 <i>Identify the driver's license(s)</i> that need to be obtained 1.3 Undertake <i>training</i> to obtain the necessary license(s) 1.4 <i>Undertake driver license assessment</i> successfully Element 2: Monitor vehicle 2.1 <i>Perform regular preventative maintenance and operational checks</i> of designated vehicles 2.2 Complete and retain service reports as required		Unit Variables The Unit Variables provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. It relates to the unit as a whole and facilitates holistic assessment. This unit applies to organisations that are involved in driving large tour buses or coaches within the labour divisions of the hotel and travel industries and may include: 1. Travel Agencies 2. Tour Operation <i>Vehicles</i> will include any large bus or coach used by the employer to support the delivery of tours and/or transfers and may include: • Minibus • Sleeper bus • Double-decker bus • Articulated bus

2.3 Adhere to scheduled maintenance and service requirements as set out by the vehicle manufacturer 2.4 Conduct <i>special checks and service</i> after designated trips 2.5 Check <i>performance and efficiency</i> of vehicle during operation 2.6 Undertake <i>minor routine repairs</i> Element 3: Monitor road conditions 3.1 Assess <i>road conditions</i> 3.2 Assess <i>traffic conditions</i> 3.3 Feedback information about road and traffic conditions to head office 3.4 Identify <i>factors that may cause delays or route deviations</i> 3.5 Factor <i>conditions into choice of route</i> to be taken 3.6 Read a map Element 4: Drive vehicles 4.1 Demonstrate <i>basic operational driving practices</i> 4.2 Demonstrate <i>practices related to the towing of a trailer</i> 4.3 Demonstrate <i>reversing practices</i> 4.4 Demonstrate <i>parking and shutting down procedures</i>	• Coach where a coach differs from a bus in that a coach has provision for passenger luggage and/or cargo • Dual-mode/dual-fuel vehicles. <i>Identify the driver's license(s)</i> will include: • Contacting the relevant traffic authorities in the host country to determine what driver's licenses are required for different classifications of vehicles • Identifying the pre-requisites for obtaining necessary driver's license(s) including age, previous experience and supplementary license(s) • Identifying the requirements necessary to pass the required license(s) including practical and theoretical assessments and the nature and scope of these assessments. <i>Training</i> may be related to: • Formal training conducted by the authorities • Formal training conducted by private companies, including driver training establishments • In-house training provided on-the-job • Practice required to reinforce training and enhance practice • Obtaining experience with conditions that can be expected to be encountered while on tours and/or undertaking transfers which may include: ▪ Day and night driving ▪ On-road and off-road conditions ▪ Within employer premises ▪ Manual and automatic transmission. <i>Undertake driver license assessment</i> must include: • Successfully completing the theory component of the driver's license assessment • Successfully completing the practical component of the driver's license assessment • Being issued with appropriate license(s).
--	--

4.5 Identify and modify driving techniques to accommodate <i>driving hazards</i> 4.6 Modify driving style to accommodate identified vehicle problems and faults 4.7 Follow <i>emergency procedures</i> Element 5: Operate communication systems 5.1 Use the <i>on-board public address system</i> 5.2 Use <i>on-board two-way communications systems</i> 5.3 Use <i>on-board entertainment systems</i>	<i>Perform regular preventative maintenance and operational checks</i> should relate to conducting visual inspections of vehicles that may relate to: • General vehicle inspection including verifying required equipment and checking for leaks • Checking and topping up fluid levels oil, transmission fluids, gearbox, radiator, windscreen washer and brake fluid • Checking tires, including tire pressures, spare tires, tire tread and damage inspection • Checking operation of all lights, including turning lights, brake lights, low and high beam headlights, driving lights, interior lights, internal safety lights and reversing lights • Checking cleanliness of glass, including windscreen, rear window(s), side windows and mirrors • Checking seat belts, including operational efficiency of driver/passenger seat belts and security of anchorage points • Checking brakes, including brake pedal and slow-roll braking test • Checking communication facilities, including on-board public address system and other two-way systems • Checking security features, including locks, latches and other equipment designed to securely store luggage, equipment and supplies • Running the engine and checking for noise, smoke, leaks and other indicators of the need for service • Checking maintenance reports from previous trips to identify issues recorded by other drivers • Updating on-board vehicle usage records, including recording distances travelled, destinations, dates and times, expenses incurred, matters requiring attention and driver signature.
--	--

	<i>Special checks and service</i> may relate to: • Providing extra service and maintenance following severe conditions, including extended periods in dust, dirt, mud and sand, water crossings, long periods in low gears, long periods where four-wheel drive was engaged, or significant times in mountainous terrain • Regular periodic checks on tool kit and on-board spare parts carried by each vehicle to ensure all items are present as required. <i>Check performance and efficiency</i> may include: • Monitoring vehicle operation including noise, vibrations, smells, smoke, malfunctioning equipment/items and intermittent faults • Checking fuel consumption and comparing it against distance travelled, including consideration of terrain covered and passengers and cargo carried • Recording issues that require attention, including use of log books and record books • Reporting issues to the appropriate person • Obtaining scheduled maintenance while on tour, as required. <i>Minor routine repairs</i> must include: • Replacing blown globes, including turning lights, brake lights, low and high beam headlights driving lights, interior lights, internal safety lights, reversing lights • Replacing broken fan belts • Replacing top and bottom radiator hoses • Changing spark or glow plugs • Replacing air and fuel filter • Replacing blown fuse • Replacing and re-aligning of external mirrors
--	--

	• Replacing tail light glass/cover and reflectors • Changing a tire, including the repairing of a tire using an emergency patching kit and the re-inflation of the tire • Recording and reporting defective items and/or irregular performance, or malfunction issues that cannot be addressed through minor servicing. <i>Assess road conditions</i> must relate to: • Checking the route before commencing journey, including identification of potential hazards such as weather related, difficult terrain, changing conditions and road conditions • Obtaining details regarding road conditions from road authorities, motoring bodies or emergency authorities • Factoring in potential support and emergency services that could be called on for assistance in the event of an accident or breakdown. <i>Assess traffic conditions</i> must relate to: • Determining expected levels of traffic • Considering expected type of traffic • Considering the direction of moving traffic. <i>Factors that may cause delays or route deviations</i> may include: • Traffic accidents • Floods • Weight limits on roads and bridges • Restrictions on road usage placed on vehicles over stated dimensions • Road damage and landslides
--	---

	• Bridge and/or tunnel damage • Road works, including those occasioned by repairs to utilities such as gas/water • Building construction • Emergency situations impacting on road use, including bush and building fires • Road closures due to special events, including festivals, marches, parades • Holiday traffic. <i>Factor conditions into choice of route may include:</i> • Amending the itinerary to optimise safety • Changing route to ensure non-negotiable deadlines and destinations are met • Revising inclusions to ensure destination is reached. <i>Basic operational driving practices must include:</i> • Starting the vehicle, including key start and application of choke and hand controls to govern speed/engine revolutions • Steering the vehicle and manoeuvring the vehicle, including uphill, downhill and on level ground • Managing engine performance, including managing engine operation within recommended torque and temperature ranges through effective use of the transmission • Using all vehicle controls, instruments and indicators, including foot and hand operated controls • Positioning and parking the vehicle • Slowing and stopping the vehicle, including uphill, downhill and on level ground • Defensive driving techniques, including speed control, safe lane changing, indicating intention, anticipating conditions, reading the traffic, need help notifications, seat belts, safe braking distances and variety of driving conditions.
--	--

	<i>Practices related to the towing of a trailer</i> must include: • Stowing/loading of the trailer • Attaching the trailer and securing it to the vehicle • Detaching the trailer from the towing vehicle • Towing the trailer up hill, downhill and across level ground, including across/through water. <i>Reversing practices</i> must include: • Reversing up hill, downhill and on level ground • Maintaining safety • Maintaining visibility • Achieving accurate positioning • Reversing a trailer including uphill, downhill, on level ground and into confined spaces. <i>Parking and shutting down procedures</i> may include: • Bringing the vehicle to a complete stop • Stopping the engine • Applying parking brake • Securing the vehicle on level ground and on an incline • Securing the vehicle to protect it from theft • Complying with manufacturer's instructions and host enterprise standard operating procedures. <i>Driving hazards</i> may include: • Wet and iced roads • Oil on road
--	---

- Animals and objects on road
- Parked vehicles on road
- Pedestrians on and crossing road
- Flooded road
- Windy sections of road
- Reduced visibility.

Emergency procedures may include procedures to be followed in the event of:

- Vehicle accident/collision
- Fire on board the vehicle
- Leaking fuel
- Faulty brakes
- Faulty steering
- Breakdown, including specific procedures where the breakdown occurs in a dangerous location.

Use the on-board public address system may include:

- Adjusting controls, including volume and individual speaker controls
- Microphone techniques.

On-board two-way communications systems may include:

- UHF radios
- CB radios
- Single side band radios
- Sending, receiving and interpreting messages
- Adhering to standard operational protocols.

On-board entertainment systems may include:

- Radio receivers
- Televisions
- Video and DVD players.

Assessment Guide

The following skills and knowledge must be assessed as part of this unit:

- Enterprise policies and procedures in regard to the use and driving of buses and coaches
- Principles of safe, defensive and off-road driving
- Knowledge of local road conditions
- Knowledge of manufacturer's operating instructions and service manuals for the vehicle that is being driven
- General mechanical ability
- Evidence of holding current and appropriate driver's license (s) for the vehicle that is being driven
- Ability to read a map.

Linkages To Other Units

- Establish and maintain safe touring conditions
- Drive various types of service vehicles
- Manage operational risk
- Maintain tourism vehicles in safe and clean operational condition
- Operate and maintain a 4WD vehicle in safe working condition
- Operate tours in remote areas.

	Critical Aspects of Assessment Evidence of the following is essential: • Understanding of the road rules and regulations of the host country in which the vehicles are being driven and/or the road rules, regulations and requirements that specifically or exclusively apply to the driving of buses and coaches • Proof of holding a current and valid driver's license to suit the vehicle being driven and any local legal requirements that apply to the vehicle(s) • Demonstrated ability to perform required preventative maintenance and operational checks as indicated on a supplied checklist for a designated bus or coach and provide written or verbal report on the condition of that vehicle • Demonstrated ability to perform nominated and effective minor routine repairs to a designated bus or coach in order to return the vehicle to a safe and effective operating condition • Demonstrated ability to accurately determine and describe the road and traffic conditions that are likely to apply to a nominated route at a given time for a certain bus or coach • Demonstrated ability to use a map to identify a safe and efficient route from a nominated starting point through two designated way-points to a nominated finishing point • Demonstrated ability to drive a nominated bus or coach in prescribed conditions so as to display at least seven of the following skill sets: ▪ Driving in sand ▪ Driving in mud ▪ Driving across rough terrain ▪ Driving up and down steep inclines ▪ Starting the vehicle, including key start and application of choke and hand controls to govern speed/engine revolutions ▪ Steering the vehicle and manoeuvring the vehicle, including up hill, down hill and on level ground
--	---

- Managing engine performance
- Using all vehicle controls, instruments and indicators, including foot and hand operated controls
- Positioning and parking the vehicle
- Slowing and stopping the vehicle, including up hill, down hill and on level ground
- Defensive driving techniques, including speed control, safe lane changing, indicating intention to turn, anticipating conditions, reading the traffic, need help notifications, using seat belts and applying safe braking distances.

Context of Assessment

This unit may be assessed on or off the job:

- Assessment should include practical demonstration either in the workplace or through a simulation activity, supported by a range of methods to assess underpinning knowledge
- Assessment must relate to the individual's work area or area of responsibility
- Assessment of actual or simulated workplace application of driving skills.

Resource Implications

- Training and assessment must include the use of real vehicles in real or simulated driving conditions, situations and environments; and access to workplace standards, procedures, policies, guidelines, tools and equipment.

Assessment Methods

The following methods may be used to assess competency for this unit:

- Observation of practical candidate performance
- Portfolio of records used to record maintenance provided, service requirements and vehicle usage
- Oral and written questions
- Third party reports completed by a supervisor
- Project and assignment work

	Key Competencies in this Unit <i>Level 1 = competence to undertake tasks effectively</i> <i>Level 2 = competence to manage tasks</i> <i>Level 3 = competence to use concepts for evaluating</i>		
	Key Competencies	Level	Examples
	Collecting, organising and analysing information	1	Gather information to assist in determining road and traffic conditions
	Communicating ideas and information	1	Explain vehicle faults and problems to management or service technicians
	Planning and organising activities	1	Plan the best route to take given conditions that apply at the time
	Working with others and in teams	1	Drive safely and courteously in relation to other road users
	Using mathematical ideas and techniques	1	Calculate distances and fuel consumption
	Solving problems	1	Overcome delays, breakdowns and other road and vehicle related difficulties
	Using technology	2	Drive vehicles; use the instruments within a vehicle

Oral questions

Student name	
Assessor name	
Location/venue	
Unit of competency	Drive large tour buses or coaches D2.TTO.CL4.08
Instructions	1. Ask student questions from the attached list to confirm knowledge, as necessary 2. Place tick in boxes to reflect student achievement (Pass Competent 'PC' or Not Yet Competent 'NYC') 3. Write short-form student answer in the space provided for each question.

Questions	Response	
	PC	NYC
1. Identify different types of vehicles that fit within the bus and coach category.	☐	☐
2. What type of driver's license needs to be obtained to drive a bus or coach?	☐	☐

Questions	Response	
	PC	NYC
3. What training needs to be undertaken to obtain the appropriate license?	☐	☐
4. Identify some of the documents required in order to undertake a driver's license for a bus or coach	☐	☐
5. What preventative maintenance checks would you conduct on your vehicle?	☐	☐

Questions	Response	
	PC	NYC
6. What details might you need to complete for service reports?	☐	☐
7. Explain what might be included in a scheduled maintenance service.	☐	☐
8. What is meant by conducting special checks and service after designated trips?	☐	☐

Questions	Response	
	PC	NYC
9. How would you check the performance and efficiency of your vehicle?	☐	☐
10. Identify minor routine repairs you might undertake.	☐	☐
11. What would you consider when assessing road conditions?	☐	☐

Questions	Response	
	PC	NYC
12. What would you consider when assessing traffic conditions?	☐	☐
13. Explain why you would need to feed-back information about road and traffic conditions to head office.	☐	☐
14. What factors may cause delays or route deviations?	☐	☐

Questions	Response	
	PC	NYC
15. What factors would you consider when choosing a travel route?	☐	☐
16. What skills do you need in order to read a map?	☐	☐
17. Basic driving skills involve what checks and adjustments before moving off in the vehicle?	☐	☐

Questions	Response	
	PC	NYC
18. What factors should you consider when loading a trailer?	☐	☐
19. What factors should you consider when reversing the vehicle?	☐	☐
20. What checks would you complete when parking and shutting down the vehicle?	☐	☐

Questions	Response	
	PC	NYC
21. Identify hazards that would cause you to modify your driving technique.	☐	☐
22. What vehicle problems or faults may cause you to modify your driving style?	☐	☐
23. Identify the three vehicle emergencies that can be very dangerous.	☐	☐

Questions	Response	
	PC	NYC
24. Why would you need to use a public address system on a vehicle?	☐	☐
25. Recite the phonetic alphabet	☐	☐
26. What pre-departure checks might be completed of on-board entertainment systems?	☐	☐

Written questions

Drive large tour buses or coaches – D2.TTO.CL4.08

Student Name: _____

Answer all the following questions and submit to your Trainer.

1. Buses and coaches can be powered by what types of fuels?

2. How many passengers can a minibus carry?

3. Once you have a car license you are also able to drive a bus or coach.

True or False

4. Some ASEAN countries will accept and recognise driver's licences issued from any other ASEAN country.

True or False

5. What additional training can be completed to reinforce formal training and enhance practice?

6. Identify three standard requirements you need to undertake a driver license assessment

7. Identify three key points that apply if you fail to pass your driver license assessment.

8. How often may inspections or checks of buses or coaches be conducted?

9. What is involved in a visual inspection with regard to preventative maintenance?
(List three)

10. Identify three points to note when documenting in-house repairs and maintenance performed on vehicles

11. What methods may be used to indicate when a bus or coach is due for maintenance?

12. What requirements are involved in a Maintenance Management System (MMS)?

13. Why might you conduct a special check on a vehicle after a designated trip?

14. Post-trip checks should include what areas?

15. What should you take into account when comparing fuel consumption with distance travelled?

16. What formula is used for calculating fuel consumption?

17. Why is it necessary to check if a vehicle is under warranty before undertaking any repairs?

18. What would be considered a minor or routine repair? (List three)

19. Why is it necessary to monitor and assess road conditions? (List three)

20. Where could you obtain details regarding road conditions?

21. Why do road and traffic conditions need to be continually monitored and assessed when on-the-road? (List three)

22. What should you note in regard to the proximity of other vehicles to the bus or coach?

23. Why do you need to feed-back information on road and traffic conditions to head office?

24. List three factors that may cause delays or route deviations.

25. Emergency situations that may impact on road use would include.....? (List three)

26. Give an example of an unacceptable risk regarding passenger safety and road hazards.

27. What actions and considerations need to be addressed when choosing an alternative route?

28. What features should you be familiar with when reading a road map? (List three)

29. Why would you need to use a road map?

30. What is the total stopping distance you require to stop your vehicle from the following speeds

60kms – _____

80kms – _____

100kms – _____

31. When there are two left turning lanes, why should you start your turn mostly in the turning lane that is furthest on your left?

32. When loading a trailer how should the weight be distributed?

33. List three tips to remember when towing a trailer.

34. What key points should you consider when reversing? (List three)

35. List three key points to keep in mind when parking and shutting down the bus or coach.

36. What should you do to modify your driving technique when driving on wet roads? (List three)

37. Why should you not brake while turning in an emergency situation?

38. What would you do if your bus or coach was having problems with overheating?

39. What are considered as standard practices when a problem emerges with the vehicle?

40. What are the three vehicle emergencies that can be very dangerous?

41. What is identified as the major causes of large vehicle fires? (List three)

42. For what reasons might you use an on-board PA system?

43. Identify three key points you should follow when speaking into a microphone.

44. What are the two-way communication options?

45. How would you transmit the following name using the phonetic alphabet?

ASEAN

46. What entertainment systems might be included in pre-departure checks?

47. What pre-departure checks should be physically completed with the radio receiver?

Answers to written questions

Drive large tour buses or coaches – D2.TTO.CL4.08

The following are model answers only – Trainers/Assessors must use discretion when determining whether or not an answer provided by a Student is acceptable or not.

1. Buses and coaches can be powered by what types of fuels?

- Petrol
- Diesel
- Gas/LPG
- Dual-mode/dual-fuel vehicles – where one fuel is either petrol or diesel and the other is gas.

2. How many passengers can a minibus carry?

Will seat around nine to 20 pax

3. Once you have a car license you are also able to drive a bus or coach.

False

4. Some ASEAN countries will accept and recognise driver's licences issued from any other ASEAN country.

True

5. What additional training can be completed to reinforce formal training and enhance practice?

- On-the-job training
- Practice, drill and exercises.

6. Identify three standard requirements you need to undertake a driver license assessment

Any of the following:

- Properly and fully completed application form
- Payment of a fee
- Evidence of successful completion of a nominated driver training course for bus drivers
- Proof of identity or age
- Evidence of having held a nominated other/lower classification of licence for a stated period
- Medical report stating that, in the opinion of the designated medical practitioner/examiner, the applicant is fit to hold such a licence
- Copy of passport and/or work or other visa

- Satisfactory completion of a Theory test
- Satisfactory completion of a Practical test –

7. Identify three key points that apply if you fail to pass your driver licence assessment.

Any of the following:

- Another fee is payable for re-application
- Another application has to be made
- There may be a minimum waiting time between applications
- If the Theory test was passed but the Practical test was failed, only the Practical test may need to be done
- The Theory test must be passed before the Practical test can be attempted.

8. How often may inspections or checks of buses or coaches be conducted?

- At the start of each day a bus/coach is used
- On some other basis – such as every 2nd or 3rd day, or weekly
- Before nominated trips/tours or other activities such as external hiring to another business/operator.

9. What is involved in a visual inspection with regard to preventative maintenance? (List three)

Any of the following:

- Looking at and under the vehicle and closely checking all aspects of the vehicle
- Lighting the areas being inspected
- Using a checklist
- Inspecting the vehicle in pairs
- Looking for signs of damage to the vehicle
- Checking for missing parts
- Noting leaking fluids
- Identifying projections from the vehicle
- Taking immediate action to rectify problems
- Checking condition of vehicle instruments.

10. Identify three points to note when documenting in-house repairs and maintenance performed on vehicles.

Any of the following:

- Using the approved template/form
- The document is commonly hard copy but may be electronic
- Identifying the vehicle which has been serviced/repaired
- Completing the form immediately after the work has been completed
- Describing service and repairs provided
- Noting matters that will/may require attention at the *next* service
- Recording the action taken for cost and stock control purposes
- Updating next scheduled service for the vehicle
- Attaching the inspection checklist (or copy) which initiated/triggered the work to the completed 'Service Report' – if required
- Returning the vehicle to its normal location
- Notifying personnel who may be waiting on the vehicle
- Processing paperwork.

11. What methods may be used to indicate when a bus or coach is due for maintenance?

- Distance travelled, or
- Operating hours.

12. What requirements are involved in a Maintenance Management System (MMS)?

- Accountabilities and authorities
- Competence
- Maintenance
- Inspections
- Defect reporting and clearance
- Records.

13. Why might you conduct a special check on a vehicle after a designated trip?

- After vehicle has been used in severe conditions, including extended periods in dust, dirt, mud and sand, water crossings
- After long periods in low gears or long periods where four-wheel drive was engaged
- After significant times in mountainous terrain.

14. Post-trip checks should include what areas?

- Internal checks
- External checks.

15. What should you take into account when comparing fuel consumption with distance travelled?

- Type of terrain covered – hilly/mountainous, on-road or off-road conditions
- Load/weight of the vehicle with reference to passengers and cargo carried
- Gear which was primarily being used
- Type of traffic – ‘stop-start’ or highway travelling.

16. What formula is used for calculating fuel consumption?

To calculate fuel consumption (in terms of kilometres per litre) divide distance travelled by fuel used.

17. Why is it necessary to check if a vehicle is under warranty before undertaking any repairs?

Performing repairs to vehicles which are still under warranty can void the warranty.

18. What would be considered a minor or routine repair? (List three)

Any of the following:

- Replacing blown globes
- Replacing a fan belt
- Replacing radiator hoses
- Replacing spark plugs
- Replacing glow plugs
- Replacing a fuse
- Replacing mirrors
- Changing tyres
- Repairing punctures.

19. Why is it necessary to monitor and assess road conditions? (List three)

Any of the following:

- An idea of the conditions to be expected can be obtained
- The optimum route can be selected where the driver has the option of picking roads
- An alternate route can be chosen if necessary
- Driving times can be calculated
- The driver can decide which vehicle type needs to be taken.

20. Where could you obtain details regarding road conditions?

- Telephoning road authorities
- Visiting websites of motoring bodies
- Contacting emergency authorities
- Talking to other drivers and/or destination or local attraction contacts.

21. Why do road and traffic conditions need to be continually monitored and assessed when on-the-road? (List three)

Any of the following:

- Driving can be adjusted to reflect the conditions
- Passengers receive a safer and smoother ride
- The optimum path of travel can be selected on the road
- A suitable CAS can be maintained around the bus/coach
- An alternate route can be chosen if necessary
- Information about the observed conditions can be communicated to Head Office and/or shared with other drivers.

22. What should you note in regard to the proximity of other vehicles to the bus or coach?

- Vehicles in front and behind
- Vehicles in adjacent lanes
- Oncoming vehicle position and number
- Parked and stopped vehicles.

23. Why do you need to feed-back information on road and traffic conditions to head office?

- Notifying waiting passengers
- Scheduling other services
- Tracking progress
- Contacting venues/destinations to advise of delays.

24. List three factors that may cause delays or route deviations.

Any of the following:

- Vehicle-related problems
- Floods
- Weight limits on roads and bridges
- Restrictions on road usage placed on vehicles over stated dimensions
- Weather related damage to roads
- Road works
- Building construction
- Emergency situations impacting on road use
- Road closures due to local, special events
- Unusual levels of traffic.

25. Emergency situations that may impact on road use would include.....? (List three)

Any of the following:

- Police operations
- Official road blocks
- Bush/wildfires
- Building fires
- Chemical spills
- Fuel leaks.

26. Give an example of an unacceptable risk regarding passenger safety and road hazards.

Any of the following:

- Trying to drive a bus across a flooded road, river or causeway
- Driving at night in some situations
- The driver spending 'too long' behind the wheel without adequate rest breaks.

27. What actions and considerations need to be addressed when choosing an alternative route?

Any of the following:

- Safety of the passengers is always the primary consideration
- Taking a shorter way than the road identified on the itinerary
- Safety of the vehicle
- Keeping passengers informed about what is happening
- Revising scheduled/advertised inclusions.

28. What features should you be familiar with when reading a road map? (List three)

Any of the following:

- The scale used on the map to show distances
- How different classes of roads are indicated
- How distances between points are shown
- Whether distances are in kilometres or miles
- Symbols used to indicate landmarks/points of interest.

29. Why would you need to use a road map?

Any of the following:

- Identifying point of departure/present location of the bus
- Locating the required destination point
- Drawing an imaginary (or actual) straight line between the two points
- Looking at the map to determine suitable roads which approximate the imaginary (or actual) straight line between the two points
- Writing down a list of destinations and distances.

30. What is the total stopping distanced you require to stop your vehicle from the following speeds

- 60kms – 97mt
- 80kms – 158mt
- 100kms – 215mt.

31. When there are two left turning lanes, why should you start your turn mostly in the turning lane that is furthest on your left?

If you only use the left turning lane that is closer to the centre of the road, a car may try to move into the lane on your left. The car driver will not expect your vehicle's rear to move into their lane as the back of your vehicle cuts in.

Remember, vehicles on your left side are always harder to see in your mirrors.

32. When loading a trailer how should the weight be distributed?

To optimise stability: balance should be approximately 60% towards the front of the trailer and 40% to the rear.

33. List three tips to remember when towing a trailer.

Any of the following:

- Remember there is a trailer connected to the bus/coach – do not forget it is there
- Slow down – travel at a reduced speed when towing a trailer
- Allow extra space between the bus/coach and the traffic in front – to allow for the extra braking distance required to accommodate the extra weight of the trailer
- Observe the trailer on a regular basis through the mirrors – to detect any problems at the earliest opportunity
- Check the trailer at all stops – as part of standard vehicle inspection protocols
- If the trailer starts to sway, take foot off the accelerator – do not hit the brake and do not try to accelerate out of this kind of trouble
- Factor in extra time when overtaking – to allow for the added length of the trailer
- Do not travel in the 'fast' lane
- Make sure there is enough room for the bus/coach *and trailer* to get into any space being considered
- Realise the extra time/space required when entering a road and getting up-to-speed
- Take corners a little wider – to allow room for the trailer to properly negotiate the corner
- Fit extension mirrors – to try to reduce extra blind spots created by the trailer.

34. What key points should you consider when reversing? (List three)

Any of the following:

- Do not rush
- Check the area and/or path to be reversed into – never assume it is clear and/or safe to use
- Use the mirrors
- In some countries it is illegal for buses/coaches to reverse on a road – because it is deemed too dangerous
- Some companies forbid the reversing of buses/coaches with passengers on board
- Limit the amount/distance of reversing that is done.

35. List three key points to keep in mind when parking and shutting down the bus or coach.

Any of the following:

- Locate the bus/coach in a safe position
- Park legally
- Seek to drive into a parking area – rather than reverse into one
- Give other vehicles 'sufficient' space and room to manoeuvre
- Apply the parking brake when stopped
- Leave the vehicle in gear or 'Park'
- Shut down the vehicle – by turning off accessories and turning the engine off
- Illuminate parking lights if leaving the bus/coach on street/road at night
- When parked on an incline, turn the front wheels in to the kerb
- Never open the doors to allow passengers to leave the bus/coach until the vehicle is finally parked
- Secure valuable items out-of-sight – to help prevent break-ins
- Activate/apply anti-theft devices – if leaving the vehicle
- Double-check no passengers are left on-board prior to exiting the vehicle as the driver
- Secure the vehicle when leaving it – SOP is to lock the vehicle
- Complying with any other manufacturer's instructions which apply
- Adhere to all Tour Operator standard operating procedures.

36. What should you do to modify your driving technique when driving on wet roads? (List three)

Any of the following:

- Slow down
- Turn headlights on
- Activate wipers
- Activate de-misters
- Allow greater distance to vehicles in front – to give more braking distance and avoid spray
- Exercise greater patience
- Realise the road surface is most slippery when the rain starts – as a result of oil/grease build-up which has not yet been washed away
- Allow more travel time for distances to be covered.

37. Why should you not brake while turning in an emergency situation?

It is very easy to lock your wheels in a turn. If that happens, you'll be skidding out of control before you realise it.

38. What would you do if your bus or coach was having problems with overheating?

Over-heating *may* be able to be addressed by travelling more slowly, more regular stopping to allow the motor to cool down, or effecting roadside repairs (such as replacing fan belts or radiator hoses).

39. What are considered as standard practices when a problem emerges with the vehicle?

- Do nothing to risk causing further damage to the bus/coach or to make matters worse
- Slow down, and continue to drive while continuing to monitor the situation using:
 - The senses and personal observation
 - The gauges on the vehicle
- Stop, where the problem has been identified as significant
- Be prepared to call for a replacement vehicle.

40. What are the three vehicle emergencies that can be very dangerous?

- Brake failure
- Tyre failure
- Fire.

41. What is identified as the major causes of large vehicle fires? (List three)

Any of the following:

- Crashes
- Tyres
- Brakes
- Wheel bearings
- Electrical system
- Exhaust system
- Fuel
- Load.

42. For what reasons might you use an on-board PA system?

- Provide commentaries when on-tour
- Announce stops and destinations
- Deliver on-board briefings
- Conduct on-tour Activities.

43. Identify three key points you should follow when speaking into a microphone.

Any of the following:

- Do not blow into microphone or tap it when starting the commentary – this is unprofessional and annoying to tour group members
- Speak at normal speaking volume – and let the equipment/technology amplify and project the voice
- Do not shout into the microphone
- Set or maintain an even distance between the mouth and the microphone
- Avoid altering the gap between the mouth and the microphone
- Speak clearly – the microphone will not ‘clean up’ words which are mumbled: it will simply amplify/project the mumbled words
- Be distinct and articulate properly
- Concentrate – focus on what is being done and said:
 - Keep in mind a microphone is being used
 - Animate/vary the voice to help create/maintain interest as necessary.

44. What are the two-way communication options?

- UHF radio
- CB radio
- Single side band radio
- A cell or satellite phone.

45. How would you transmit the following name using the phonetic alphabet?

ASEAN = Alpha Sierra Echo Alpha November.

46. What entertainment systems might be included in pre-departure checks?

- Radio receiver
- Television receiver
- Music system.

47. What pre-departure checks should be physically completed with the radio receiver?

- Operation of station selection and AM/FM selector
 - Operation of volume and other controls
 - Visual displays
 - Condition of speakers – with attention to physical damage and clarity of sound
 - Condition of the aerial.
-

Observation checklist

Student name	
Assessor name	
Location/venue	
Unit of competency	Drive large tour buses or coaches D2.TTO.CL4.08
Dates of observation	
Instructions	- Over a period of time observe the student completing each of the following tasks: - Obtain driver's license(s) - Monitor vehicle - Monitor road conditions - Drive vehicles - Operate communication systems - Enter the date on which the tasks were undertaken - Place a tick in the box to show they completed each aspect of the task to the standard expected in the enterprise - Complete the feedback sections of the form, if required.

Did the candidate	Yes	No
Element 1: Obtain driver's license(s)		
Identify the vehicles that have to be driven	☐	☐
Identify the driver's license(s) that need to be obtained	☐	☐
Undertake training to obtain the necessary license(s)	☐	☐
Undertake driver license assessment successfully	☐	☐
Element 2: Monitor vehicle		
Perform regular preventative maintenance and operational checks of designated vehicles	☐	☐
Complete and retain service reports as required	☐	☐
Adhere to scheduled maintenance and service requirements as set out by the vehicle manufacturer	☐	☐
Conduct special checks and service after designated trips	☐	☐

Did the candidate	Yes	No
Check performance and efficiency of vehicle during operation	☐	☐
Undertake minor routine repairs	☐	☐
Element 3: Monitor road conditions		
Assess road conditions	☐	☐
Assess traffic conditions	☐	☐
Feedback information about road and traffic conditions to head office	☐	☐
Identify factors that may cause delays or route deviations	☐	☐
Factor conditions into choice of route to be taken	☐	☐
Read a map	☐	☐
Element 4: Drive vehicles		
Demonstrate basic operational driving practices	☐	☐
Demonstrate practices related to the towing of a trailer	☐	☐
Demonstrate reversing practices	☐	☐
Demonstrate parking and shutting down procedures	☐	☐
Identify and modify driving techniques to accommodate driving hazards	☐	☐
Modify driving style to accommodate identified vehicle problems and faults	☐	☐
Follow emergency procedures	☐	☐
Element 5: Operate communication systems		
Use the on-board public address system	☐	☐
Use on-board two-way communications systems	☐	☐
Use on-board entertainment systems	☐	☐
Did the student's overall performance meet the standard?	☐	☐
