Competency Based Assessment (CBA) – An Introduction for Assessors

Assessment is the process of identifying a participant's current knowledge, skills and attitudes sets against all elements of competency within a unit of competency.

Suggested Assessment Methods

For each unit of competency a number of assessment tools have been identified including:

- Work Projects
- Oral Questions
- Written Questions
- Third Party Statements
- Observation Checklists.

Instructions and Evidence Recording Sheets have been identified in this Assessment Manual for use by Assessors.

Alternative Assessment Methods

Whilst the above mentioned assessment methods are suggested assessment methods, the assessor may use an alternate method of assessment taking into account:

- a) The nature of the unit
- b) The strengths of participants
- c) The number of participants in the class
- d) Time required to complete assessments
- e) Time dedicated to assessment
- f) Equipment and resources required.

Alternate assessment methods include:

- Practical demonstrations
- Practical demonstrations in simulated work conditions
- Problem solving
- Portfolios of evidence
- Critical incident reports
- Journals
- Oral presentations
- Interviews
- Videos
- Visuals/slides/audiotapes

- Case studies
- Log books
- Projects and Role plays
- Group projects
- Recognition of Prior Learning.

Whilst there is no specific instruction or evidence collection documents for all the alternative assessment methods, assessors can record competency in the 'Other' section within the 'Competency Recording Sheet'.

Selection of Assessment Methods

Each assessor will determine the combination of Assessment Methods to be used to determine Competency for each Competency Unit on a student by student basis.

'Sufficient' evidence to support the 'Pass Competent'/'Not Yet Competent' decision must be captured.

In practice this means a minimum of 2 – 3 Assessment Methods for each candidate for each Competency Element is suggested.

At least one method should provide evidence of practical demonstration of competence.

The following assessment methods deemed to provide evidence of practical demonstration of competence include:

- Practical Work Projects
- Third Party Statement
- Observation Checklist.

Assessing Competency

Competency based assessment does not award grades, but simply identifies if the participant has the knowledge, skills and attitudes to undertake the required task to the specified standard.

Therefore, when assessing competency, an assessor has two possible results that can be awarded:

- 'Pass Competent' (PC)
- 'Not Yet Competent' (NYC).

Pass Competent (PC)

If the participant is able to successfully answer or demonstrate what is required, to the expected standards of the performance criteria, they will be deemed as 'Pass Competent' (PC).

The assessor will award a 'Pass Competent' (PC) if they feel the participant has the necessary knowledge, skills and attitudes in all assessment tasks for a unit.

Not Yet Competent' (NYC)

If the participant is unable to answer or demonstrate competency to the desired standard, they will be deemed to be 'Not Yet Competent' (NYC).

This does not mean the participant will need to complete all the assessment tasks again. The focus will be on the specific assessment tasks that were not performed to the expected standards.

The participant may be required to:

- a) Undertake further training or instruction
- b) Undertake the assessment task again until they are deemed to be 'Pass Competent'.

Regional Qualifications Framework and Skills Recognition System

The 'Regional Qualifications Framework and Skills Recognition System', also known as the 'RQFSRS' is the overriding educational framework for the ASEAN region.

The purpose of this framework is to provide:

- A standardised teaching and assessment framework
- Mutual recognition of participant achievement across the ASEAN region. This includes achievement in individual Units of Competency or qualifications as a whole.

The role of the 'RQFSRS' is to provide, ensure and maintain 'quality assurance' across all countries and educational providers across the ASEAN region.

Recognition of Prior Learning (RPL)

Recognition of Prior Learning is the process that gives current industry professionals who do not have a formal qualification, the opportunity to benchmark their extensive skills and experience against the standards set out in each unit of competency/subject.

This process is a learning and assessment pathway which encompasses:

- Recognition of Current Competencies (RCC)
- Skills auditing
- Gap analysis and training
- Credit transfer.

Code of Practice for Assessors

This Code of Practice provides:

- Assessors with direction on the standard of practice expected of them
- Candidates with assurance of the standards of practice expected of assessors
- Employers with assurance of the standards maintained in the conduct of assessment.

The Code detailed below is based on the International Code of Ethics and Practice (The National Council for Measurement in Education [NCME]):

- The differing needs and requirements of the person being assessed, the local enterprise and/or industry are identified and handled with sensitivity
- Potential forms of conflict of interest in the assessment process and/or outcomes are identified and appropriate referrals are made, if necessary
- All forms of harassment are avoided throughout the planning, conducting, reviewing and reporting of the assessment outcomes

- The rights of the candidate are protected during and after the assessment
- Personal and interpersonal factors that are not relevant to the assessment of competency must not influence the assessment outcomes
- The candidate is made aware of rights and process of appeal
- Evidence that is gathered during the assessment is verified for validity, reliability, authenticity, sufficiency and currency
- Assessment decisions are based on available evidence that can be produced and verified by another assessor
- Assessments are conducted within the boundaries of the assessment system policies and procedures
- Formal agreement is obtained from both the candidate and the assessor that the assessment was carried out in accordance with agreed procedures
- The candidate is informed of all assessment reporting processes prior to the assessment
- The candidate is informed of all known potential consequences of decisions arising from an assessment, prior to the assessment
- Confidentiality is maintained regarding assessment results
- The assessment results are used consistently with the purposes explained to the candidate
- Opportunities are created for technical assistance in planning, conducting and reviewing assessment procedures and outcomes.

Instructions and Checklist for Assessors

Instructions

General instructions for the assessment:

- Assessment should be conducted at a scheduled time that has been notified to the candidate
- Facilitators must ensure participants are made aware of the need to complete assessments and attend assessment sessions
- If a participant is unable to attend a scheduled session, they must make arrangements with the Assessor to undertake the assessment at an alternative time
- At the end of the assessment the Assessor must give feedback and advise the participant on their PC/NYC status
- Complete the relevant documentation and submit to the appropriate department.

Preparation

- Gain familiarity with the Unit of Competency, Elements of Competency and the Performance Criteria expected
- Study details assessment documentation and requirements
- Brief candidate regarding all assessment criteria and requirements.

Briefing Checklist

- Begin the assessment by implementing the following checklist and then invite the candidate to proceed with assessment.

Checklist for Assessors

Prior to the assessment I have:	Tick (✓)	Remarks
Ensured the candidate is informed about the venue and schedule of assessment.		
Received current copies of the performance criteria to be assessed, assessment plan, evidence gathering plan, assessment checklist, appeal form and the company's standard operating procedures (SOP).		
Reviewed the performance criteria and evidence plan to ensure I clearly understood the instructions and the requirements of the assessment process.		
Identified and accommodated any special needs of the candidate.		
Checked the set-up and resources for the assessment.		
During the assessment I have:		
Introduced myself and confirmed identities of candidates.		
Put candidates at ease by being friendly and helpful.		
Explained to candidates the purpose, context and benefits of the assessment.		
Ensured candidates understood the assessment process and all attendant procedures.		
Provided candidates with an overview of performance criteria to be assessed.		
Explained the results reporting procedure.		
Encouraged candidates to seek clarifications if in doubt.		
Asked candidates for feedback on the assessment.		
Explained legal, safety and ethical issues, if applicable.		
After the assessment I have:		
Ensured candidate is given constructive feedback.		
Completed and signed the assessment record.		
Thanked candidate for participating in the assessment.		

Instructions for Recording Competency

Specifications for Recording Competency

The following specifications apply to the preparation of Evidence Gathering Plans:

- A Competency Recording Sheet must be prepared for each candidate to ensure and demonstrate all Performance Criteria and Competency Elements are appropriately assessed. This Sheet indicates how the Assessor will gather evidence during their assessment of each candidate
- This Competency Recording Sheet is located at the end of the Assessment Plan
- It is the overriding document to record competency
- The Assessor may vary the Competency Recording Sheet to accommodate practical and individual candidate and/or workplace needs
- Assessor must place a tick (✓) in the 'Assessment Method' columns to identify the methods of assessment to be used for each candidate
- Multiple Competency Elements/Performance Criteria may be assessed at the one time, where appropriate
- The assessor and participant should sign and date the Competency Recording Sheet, when all forms of evidence and assessment have been completed
- The assessor may provide and feedback or clarify questions which the participant may have in regards to the assessment grade or findings
- All documents used to capture evidence must be retained, and attached to the Competency Recording Sheet for each candidate for each Competency Unit.

Instructions for Different Assessment Methods

Specifications for Work Project Assessment

These guidelines concern the use of work projects.

The work projects identified in the Training Manuals involve a range of tasks, to be performed at the discretion of the Assessor.

Work project tasks can be completed through any form of assessment as identified in the Trainer and Trainee Manuals and stated at the start of this section.

Assessors should follow these guidelines:

- Review the Work Projects at the end of each 'Element of Competency' in the Trainee Manual to ensure you understand the content and what is expected
- Prepare sufficient resources for the completion of work activities including:
 - Time – whether in scheduled delivery hours or suggested time participants to spend outside of class hours
 - Resources – this may involve technical equipment, computer, internet access, stationery and other supplementary materials and documents
- Prepare assessment location (if done in class) making it conducive to assessment
- Explain Work Projects assessment to candidate, at the start of each Element of Competency. This ensures that participants are aware of what is expected and can collate information as delivery takes place

- Assessors can use the following phrase as a guide (where an 'X' is identified, please input appropriate information):
 "At the end of each Element of Competency there are Work Projects which must be completed. These projects require different tasks that must be completed.
 These work projects are part of the formal assessment for the unit of competency titled X:
- You are required to complete these activities:
 - Using the 'X' method of assessment*
 - At 'X' location*
 - You will have 'X time period' for this assessment*
 - You are required to compile information in a format that you feel is appropriate to the assessment
 - Do you have any questions about this assessment?"
- Commence Work Project assessment:
 - The assessor may give time for participants to review the questions at this time to ensure they understand the nature of the questions. The assessor may need to clarify questions
 - Participants complete work projects in the most appropriate format
 - Participants must submit Work Project evidence to the assessor before the scheduled due date
- Assessor must assess the participant's evidence against the competency standards specified in each Element of Competency and their own understanding. The assessor can determine if the participant has provided evidence to a 'competent' standard
- Transcribe results/details to Competency Recording Sheet
- Forward/file assessment record.

Specifications for Oral Question Assessment

These guidelines concern the use of oral questioning.

Assessors should follow these guidelines.

- Prepare Assessment Record for Oral Questioning. One record for each candidate:
 - Enter Student name
 - Enter Assessor name
 - Enter Location
- Familiarise self with Questions to be asked
- Prepare assessment location (table and chairs) making it conducive to assessment
- Explain Oral Questioning assessment to candidate, using the following phrase as a guide (where a 'X' is identified, please input appropriate information):
"These oral questions are part of the formal assessment for the unit of competency titled X.

There are X questions and you are required to answer all of them to the best of your ability and I will record whether or not you have answered correctly.

We have 60 minutes for this assessment.

- I will give you feedback at the end of the assessment
- Do you have any questions about this assessment?”
- Commence Oral Questioning assessment:
 - Complete Assessment Record for the Oral Questioning by:
 - a) Ticking PC or NYC, as appropriate
 - b) Entering ‘Remarks’ as required
 - c) Completing Oral Questioning within 60 minutes
- Complete Oral Questioning and provide feedback to candidate
- Transcribe results/details to Competency Recording Sheet
- Forward/file assessment record.

Specifications for Written Question Assessment

These guidelines concern the use of written questioning.

Assessors should follow these guidelines:

- Familiarise self with Questions and Answers provided
- Print and distribute copies of ‘Written Questions’ for participants. Ideally this should take place with adequate time for participants to answer all questions before the expected due date
- Explain Written Questioning assessment to candidate, using the following phrase as a guide (where a ‘X’ is identified, please input appropriate information):

“These written questions are part of the formal assessment for the unit of competency titled X.

There are X questions and you are required to answer all of them to the best of your ability.

You may refer to your subject materials, however where possible try to utilise your existing knowledge when answering questions.

Where you are unsure of questions, please ask the Assessor for further instruction. This may be answering the question orally or asking the assessor to redefine the question.

We have X time for this assessment:

- The due date for completion of this assessment is X
- On this date you must forward the completed questions to the assessor by X time on the date of X
- Do you have any questions about this assessment?”
- The assessor may give time for participants to review the questions at this time to ensure they understand the nature of the questions. The assessor may need to clarify questions
- Participants may record written answers (where possible)
- Participants must submit the written answers to the assessor before the scheduled due date

- Assessor must assess the participant's written answers against the model answers provided as a guide, or their own understanding. The assessor can determine if the participant has answered the questions to a 'competent' standard
- Transcribe results/details to Competency Recording Sheet
- Forward/file assessment record.

Specifications for Observation Checklist

These specifications apply to the use of the Observation Checklist in determining competency for candidates.

Only an approved assessor is authorised to complete the Observation Checklist.

The assessor is required to observe the participant, ideally in a simulated environment or their practical workplace setting and record their performance (or otherwise) of the competencies listed on the Observation Checklist for the Competency Unit.

To complete the Observation Checklist the Assessor must:

- Insert name of candidate
- Insert assessor name
- Insert identify of location where observations are being undertaken
- Insert date/s of observations – may be single date or multiple dates
- Place a tick in either the 'Yes' or 'No' box for each listed Performance Criteria to indicate the candidate has demonstrated/not demonstrated that skill
- Provide written (and verbal) feedback to candidate – as/if appropriate
- Sign and date the form
- Present form to candidate for them to sign and date
- Transcribe results/details to Competency Recording Sheet for candidate
- Forward/file Observation Checklist.

This source of evidence combines with other forms of assessment to assist in determining the 'Pass Competent' or 'Not Yet Competent' decision for the participant.

Specifications for Third Party Statement

These specifications relate to the use of a relevant workplace person to assist in determining competency for candidates.

The Third Party Statement is to be supplied by the assessor to a person in the workplace who supervises and/or works closely with the participant.

This may be their Supervisor, the venue manager, the Department Manager or similar.

The Third Party Statement asks the Supervisor to record what they believe to be the competencies of the participant based on their workplace experience of the participant. This experience may be gained through observation of their workplace performance, feedback from others, inspection of candidate's work etc.

A meeting must take place between the Assessor and the Third Party to explain and demonstrate the use of the Third Party Statement.

To complete the Third Party Verification Statement the Assessor must:

- Insert candidate name
- Insert name and contact details of the Third Party
- Tick the box to indicate the relationship of the Third Party to the candidate
- Present the partially completed form to the Third Party for them to finalise
- Collect the completed form from the Third Party
- Transcribe results/details to Competency Recording Sheet for candidate
- Forward/file Third Party Statement.

The Third Party must:

- Record their belief regarding candidate ability/competency as either:
 - Pass Competent = Yes
 - Not Yet Competent = No
 - Unsure about whether candidate is competent or not = Not Sure
- Meet briefly with the assessor to discuss and/or clarify the form.

This source of evidence combines with other forms of assessment to assist in determining the 'Pass Competent' or 'Not Yet Competent' decision for the candidate.

A separate Third Party Statement is required for each Competency Unit undertaken by the candidate.

Competency standard

UNIT TITLE: DRIVE VARIOUS TYPES OF SERVICE VEHICLES		NOMINAL HOURS: 120
UNIT NUMBER: D2.TTG.CL3.09		
UNIT DESCRIPTOR: This unit deals with skills and knowledge required to drive tour support vehicles, such as light commercial vehicles and cars, safely monitoring road and traffic conditions and monitoring the safety and reliability of the vehicles. This unit requires participants to sit and pass the necessary driver's license test(s) as prescribed by the host country to allow them to drive designated vehicles as required.		
ELEMENTS AND PERFORMANCE CRITERIA		UNIT VARIABLE AND ASSESSMENT GUIDE
Element 1: Obtain driver's license(s) 1.1 Identify the <i>vehicles</i> that have to be driven 1.2 <i>Identify the driver's license(s)</i> that need to be obtained 1.3 Undertake <i>training</i> to obtain the necessary license(s) 1.4 <i>Undertake driver license assessment</i> successfully Element 2: Monitor service vehicles 2.1 <i>Perform regular preventative maintenance and operational checks</i> of designated small vehicles 2.2 Complete and retain service reports as required		Unit Variables The Unit Variables provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. It relates to the unit as a whole and facilitates holistic assessment. This unit applies to driving various types of service vehicles within the labour divisions of the hotel and travel industries and may include: 1. Travel Agencies 2. Tour Operation <i>Vehicles</i> will include any vehicles (excluding buses/coaches) used by the employer to support the delivery of tours and/or transfers and may include: • Cars • Four-wheel drives • Utilities • Light commercial vehicles, including those capable of carrying up to 12 people/passengers and/or up to 2 tons in weight and in line with the host countries rules and regulations.

2.3 Adhere to scheduled maintenance and service requirements as set out by the vehicle manufacturer 2.4 Conduct <i>special checks and service</i> after designated trips 2.5 Check <i>performance and efficiency</i> of vehicle during operation 2.6 Undertake <i>minor routine repairs</i> Element 3: Monitor road conditions 3.1 Assess <i>road conditions</i> 3.2 Assess <i>traffic conditions</i> 3.3 Feedback information to head office about road and traffic conditions 3.4 Identify <i>factors that may cause delays or route deviations</i> 3.5 Factor <i>conditions into choice of route</i> to be taken 3.6 Read a map Element 4: Drive vehicles 4.1 Demonstrate <i>basic operational driving practices</i> 4.2 Demonstrate <i>practices related to the towing of a trailer</i> 4.3 Demonstrate <i>reversing practices</i> 4.4 Demonstrate <i>parking and shutting down procedures</i>	<i>Identify the driver's license(s)</i> will include: • Contacting the relevant traffic authority in the host country to determine what driver's licenses are required for different classifications of vehicles • Identifying the pre-requisites for obtaining necessary driver's licenses, including age, previous experience, supplementary licenses • Identifying the requirements necessary to pass the required license(s), including practical and theoretical assessments and the nature and scope of these assessments. <i>Training</i> may be related to: • Formal training conducted by the authorities • Formal training conducted by private companies, including driver training establishments • In-house training provided on-the-job • Practice required to reinforce training and enhance practice • Obtaining experience with conditions that can be expected to be encountered while on tours and/or undertaking transfers which may include: ▪ Day and night driving ▪ On-road and off-road conditions ▪ Within employer premises ▪ Manual and automatic transmission ▪ Various weather conditions. <i>Undertake driver license assessment</i> may include: • Successfully completing the theory component of the driver's license assessment • Successfully completing the practical component of the driver's license assessment • Being issued with appropriate license(s) • Meeting legislative requirements of the relevant country.
--	---

4.5 Identify and modify driving techniques to accommodate <i>driving hazards</i> 4.6 Modify driving style to accommodate identified vehicle problems and faults 4.7 Follow <i>emergency procedures</i>	<i>Perform regular preventative maintenance and operational checks</i> should relate to conducting visual inspections of vehicles that may include: • General vehicle inspection, including verifying required equipment, checking for leaks • Checking and topping up fluid levels: oil, transmission fluids, gearbox, radiator, windscreen washer, brake fluid • Checking tires, including tire pressures and spare tires, tread, damage inspection • Checking operation of all lights, including turning lights, brake lights, low beam and high beam headlights, driving lights, interior lights, internal safety lights, reversing lights • Checking cleanliness of glass, including windscreen, rear window(s), side windows, mirrors • Checking seat belts, including operational efficiency • Checking brakes, including brake pedal and slow-roll braking test • Checking communication facilities • Checking security features, including locks, latches and other equipment designed to securely store luggage, equipment and supplies • Running the engine and checking for noise, smoke, leaks and other indicators of the need for service • Checking maintenance reports from previous trips to identify issues recorded by other drivers. <i>Special checks and service</i> may relate to: • Providing extra service and maintenance following severe conditions, including extended periods in dust, dirt, mud and sand, water crossings, long periods in low gears, long periods where four-wheel drive was engaged, or significant time in mountainous terrain • Regular periodic checks on tool kit and on-board spare parts carried by each vehicle to ensure all items are present as required.
--	--

	<i>Check performance and efficiency</i> may include: • Monitoring vehicle operation, including noise, vibrations, smells, smoke, malfunctioning equipment/items, and intermittent faults • Checking fuel consumption and comparing it against distance travelled, including consideration of the terrain covered, passengers and cargo carried • Recording issues that require attention • Reporting issues to the appropriate person • Obtaining scheduled maintenance, as required, while on tour. <i>Minor routine repairs</i> may include: • Replacement of blown globes, including turning lights, brake lights, low beam and high beam headlights, driving lights, interior lights, internal safety lights, reversing lights • Replacement of broken fan belts • Replacement of top and bottom radiator hose • Changing spark or glow plugs • Replacing air and fuel filter • Replacement of blown fuse • Replacement and re-alignment of external mirrors • Replacement of tail light glass/cover and reflectors • Changing a tire, including the repairing of a tire using an emergency patching kit and the re-inflation of the tire. <i>Assess road conditions</i> may relate to: • Checking the route to be taken before commencing journey, including identification of potential hazards such as weather-related, terrain, changing conditions, road conditions
--	---

	• Obtaining details in regard to road conditions from road authorities, motoring bodies, or emergency authorities • Factoring in potential support and emergency services that could be called on for assistance in the event of an accident or breakdown. <i>Assess traffic conditions may relate to:</i> • Determining expected levels of traffic • Considering expected type of traffic • Considering the direction of movement of traffic. <i>Factors that may cause delays or route deviations may include:</i> • Traffic accidents • Floods • Road damage and landslides • Bridge and/or tunnel damage • Road works, including those occasioned by repairs to utilities such as gas/water • Building construction • Emergency situations impacting on road use, including bush and building fires • Road closures due to special events, including festivals, marches, parades • Holiday traffic. <i>Factor conditions into choice of route may include:</i> • Amending the itinerary to optimise safety • Changing route to ensure non-negotiable deadlines and destinations are met • Revising inclusions to ensure destination is reached.
--	---

	<i>Basic operational driving practices</i> must include compliance with host country driving rules and regulations as well as demonstrated competency under normal driving conditions and touring conditions. Where off-road driving is required, it must be demonstrated which may include: • Driving in sand • Driving in mud • Driving across rough terrain • Driving up and down steep inclines • Drive through water. <i>Basic operational driving practices</i> must include: • Starting the vehicle, including key start and application of choke and hand controls to govern speed/engine revolutions • Steering the vehicle and manoeuvring the vehicle, including up hill, down hill and on level ground • Managing engine performance • Using all vehicle controls, instruments and indicators, including foot and hand operated controls • Positioning and parking the vehicle • Stopping the vehicle, including up hill, down hill and on level ground • Defensive driving techniques, including speed control, safe lane changing, indicating intentions to other drivers, anticipating conditions, reading the traffic, 'need help' notifications, seat belts, safe braking distances. <i>Practices related to the towing of a trailer</i> may include: • Stowing/loading of the trailer • Attaching the trailer and securing it to the vehicle
--	---

	• Detaching the trailer from the towing vehicle • Towing the trailer up hill, down hill and across level ground, including across/through water • Demonstrating performance with additional length to vehicle. <i>Reversing practices</i> may include: • Reversing a trailer, including up hill, down hill, on level ground and into confined spaces • Maintaining safety • Maintaining visibility • Achieving accurate positioning. <i>Parking and shutting down procedures</i> may include: • Bringing the vehicle to a complete stop • Stopping the engine • Applying park brake • Securing the vehicle on level ground and on an incline • Securing the vehicle to protect it from theft • Complying with manufacturer's instructions and host enterprise standard operating procedures. <i>Driving hazards</i> may include: • Wet and iced roads • Oil on road • Animals and objects on road • Parked vehicles on road • Pedestrians on and crossing road
--	---

	• Flooded road • Windy sections of road • Reduced visibility. <i>Emergency procedures</i> may include: • Vehicle accident/collision • Fire on board the vehicle • Leaking fuel • Faulty brakes • Faulty steering • Breakdown, including specific procedures where the breakdown occurs in a dangerous location. Assessment Guide The following skills and knowledge must be assessed as part of this unit: • Enterprise policies and procedures in regard to the use and driving of vehicles, excluding buses/coaches • Principles of safe, defensive and off-road driving • Knowledge of local road conditions • General mechanical ability • Evidence of holding current and appropriate driver's license for the vehicle that is being driven • Ability to read a map.
--	---

	Linkages To Other Units • Establish and maintain safe touring conditions • Drive large tour buses or coaches • Manage operational risk • Maintain tourism vehicles in safe and clean operational condition • Operate and maintain a 4-WD vehicle in safe working condition • Operate tours in remote areas. Critical Aspects of Assessment Evidence of the following is essential: • Understanding of the road rules and regulations of the host country and/or the road rules and regulations in which the service vehicles are being driven • Proof of holding a current and valid driver's license to suit the vehicle and local legal requirements of the vehicle(s) being driven • Demonstrated ability to perform required preventative maintenance and operational checks, as indicated on a supplied checklist, on a designated vehicle/s and provide written or verbal report on the condition of that vehicle • Demonstrated ability to perform nominated and effective minor routine repairs to a designated vehicle in order to return the vehicle to a safe and effective operating condition • Demonstrated ability to accurately determine and describe the road and traffic conditions that are likely to apply to a nominated route at a given time for a certain vehicle • Demonstrated ability to use a map to identify a safe and efficient route from a nominated starting point through two designated way-points to a nominated finishing point • Demonstrated ability to drive a nominated vehicle in prescribed conditions so as to display at least seven of the following skill sets: ▪ Driving in sand
--	---

	▪ Driving in mud ▪ Driving across rough terrain ▪ Driving up and down steep inclines ▪ Starting the vehicle, including key start and application of choke and hand controls to govern speed/engine revolutions ▪ Steering the vehicle and manoeuvring the vehicle, including up hill, down hill and on level ground ▪ Managing engine performance ▪ Using all vehicle controls, instruments and indicators, including foot and hand operated controls ▪ Positioning and parking the vehicle ▪ Stopping the vehicle, including up hill, down hill and on level ground ▪ Defensive driving techniques, including speed control, safe lane changing, indicating intention, anticipating conditions, reading the traffic, 'need help' notifications, seat belts, safe braking distances. Context of Assessment Assessment must ensure: • Actual workplace application of driving skills using a variety of vehicles and under various actual or simulated road conditions. Resource Implications • Training and assessment must include the use of real vehicles in real or simulated driving conditions, situations and environments. Assessment Methods The following methods may be used to assess competency for this unit: • Observation of candidate practical performance
--	---

	• Oral and written questions • Third party reports completed by a supervisor • Project and assignment work. Key Competencies in this Unit <i>Level 1 = competence to undertake tasks effectively</i> <i>Level 2 = competence to manage tasks</i> <i>Level 3 = competence to use concepts for evaluating</i>		
	Key Competencies	Level	Examples
	Collecting, organising and analysing information	1	Gathering information to assist in determining road and traffic conditions
	Communicating ideas and information	1	Explaining vehicle faults and problems to management or service technicians
	Planning and organising activities	1	Planning the best route to take given conditions that apply at the time
	Working with others and in teams	1	Driving safely and courteously with other road users
	Using mathematical ideas and techniques	1	Calculating distances and fuel consumption
	Solving problems	1	Overcoming delays, breakdown and other road and vehicle related difficulties
	Using technology	2	Driving vehicles; using the instruments within a vehicle

Oral questions

Student name	
Assessor name	
Location/venue	
Unit of competency	Drive various types of service vehicles D2.TTG.CL3.09
Instructions	1. Ask student questions from the attached list to confirm knowledge, as necessary 2. Place tick in boxes to reflect student achievement (Pass Competent 'PC' or Not Yet Competent 'NYC') 3. Write short-form student answer in the space provided for each question.

Questions	Response	
	PC	NYC
1. Identify different types of service vehicles.	☐	☐
2. Identify what type of driving license may be needed for the different types of service vehicles.	☐	☐

Questions	Response	
	PC	NYC
3. Explain what training may be necessary in order to obtain the different types of vehicle licenses.	☐	☐
4. Explain the procedure in the event a candidate fails their driving license test.	☐	☐
5. Identify what operational checks you might undertake of your vehicle.	☐	☐

Questions	Response	
	PC	NYC
6. Explain what details you may be required to complete with regard to filling in service reports.	☐	☐
7. Why is it necessary to adhere to maintenance and service requirements of vehicles?	☐	☐
8. Why is it necessary to conduct 'post-trip checks' of service vehicles?	☐	☐

Questions	Response	
	PC	NYC
9. In what ways would you monitor performance and efficiency of your vehicle during operation?	☐	☐
10. What minor routine repairs might you be able to complete without risking vehicle warranty?	☐	☐
11. Why is it necessary to monitor road conditions?	☐	☐

Questions	Response	
	PC	NYC
12. Why is it necessary to monitor traffic conditions?	☐	☐
13. Why would it be necessary to feedback information to head office about road and/or traffic conditions?	☐	☐
14. Identify factors that may cause delay or route deviations.	☐	☐

Questions	Response	
	PC	NYC
15. What factors might you consider If road or traffic conditions cause you to take an alternate route?	☐	☐
16. What are the basic requirements of reading a map?	☐	☐
17. Identify types of terrain you may need to negotiate with caution.	☐	☐

Questions	Response	
	PC	NYC
18. What are some key considerations when loading a trailer?	☐	☐
19. What are some key considerations when reversing?	☐	☐
20. What checks might you conduct when parking and shutting down your service vehicle?	☐	☐

Questions	Response	
	PC	NYC
21. What road hazards might cause you to modify your driving techniques?	☐	☐
22. Explain duty of care and how this relates to driving service vehicles.	☐	☐
23. What emergency procedure would you follow in the event of a brake failure?	☐	☐

Questions	Response	
	PC	NYC
24. What emergency procedure would you follow in the event of a collision where you as the driver were not severely hurt?	☐	☐

Written questions

Drive various types of service vehicles – D2.TTG.CL3.09

Student Name: _____

Answer all the following questions and submit to your Trainer.

1. What is identified as a service vehicle? (List three)

2. List three factors that determine the type of vehicles a business may use?

3. A special license is required to drive what vehicles?

4. Identify five possible classes of driving license that may be available.

5. Who may provide training for learner driver applicants?

6. The theory component of a driver license test may consist of what topics? (List five)

7. Identify three pre-requisites authorities may require in order to assess an applicant for a license.

8. What may an applicant be required to do in the event they fail their driving assessment? (List three)

9. When conducting a visual inspection, list three points the process could or should involve .

10. When conducting vehicle checks, why would you start the vehicle and run the motor? (List three)

11. When conducting vehicle checks, identify five fluids you might check or top up.

12. When conducting vehicle checks identify five lights you would check are working properly.

13. What standard internal document may be completed in order to have service and repairs provided to a vehicle?

14. What vehicle details might you record to identify which vehicle has been serviced or repaired?

15. Vehicle servicing schedules are generally determined by what two key factors?

16. In order to protect a valid vehicle warranty, vehicle servicing may be required to be undertaken by a specified business. Who might that be?

17. Identify three internal Post-trip checks.

18. Identify three external Post-trip checks.

19. Identify three things you would be on the lookout for to indicate a vehicle performance concern while driving.

20. You have travelled 875 kilometres and used 294 litres of fuel. List your method and answer for calculating fuel consumption.

21. Why should you check vehicle warranty before undertaking any minor repairs?

22. Identify five minor repairs that might be undertaken by the vehicle driver?

23. When assessing road conditions driving times can be calculated based on what factors?

24. Obtaining details regarding road conditions may require you to do what?

25. Identify three reasons why you need to continually monitor road and traffic conditions.

26. When evaluating road conditions identify three things you may need to do.

27. How would you feedback information on road and traffic conditions to relevant people.

28. Identify the key reasons you need to feedback information.

29. Identify three key factors that may cause road delays or deviations.

30. How can weather damage roads?

31. What non-negotiable deadline may cause you to take a shorter route than planned?

32. What reason is given that may make driving at night unsafe?

33. Identify three features on a map that enable you to read and interpret it.

34. How would you determine the shortest way between two points on a map?

35. Before driving off-road what might you need to have the vehicle fitted with to ensure it is properly prepared?

36. The Trainee manual lists five key types of terrain or road surface requiring modified driving technique, vehicle preparation and driver cautions. What are they?

37. What should you consider when loading a trailer in relation to the overall weight of the load?

38. Identify three key points to remember when towing a trailer.

39. What are the key points to remember when reversing a trailer?

40. When reversing, which way will you turn the steering wheel when you need the trailer to move?

41. Identify any reasons that would cause vehicle parking and shutting down procedures to vary.

42. Identify five possible parking and shutting down procedures.

43. Identify three driving hazards that may be encountered when driving?

44. List three general techniques to apply to cope effectively with driving hazards.

45. In practice 'duty of care' means the driver has a responsibility for ensuring.....?
(List three)

46. What are the consequences of a driver failing to meet Duty of Care obligations?

47. What are the three dangerous vehicle emergencies?

48. Identify the signs for tyre failure.

Answers to written questions

Drive various types of service vehicles – D2.TTG.CL3.09

The following are model answers only – Trainers/Assessors must use discretion when determining whether or not an answer provided by a Student is acceptable or not.

1. What is identified as a service vehicle? (List three)

Any of the following'

- Any vehicle the tour operator/travel agency uses to conduct its day-to-day business – such as:
 - Visiting potential clients and other businesses
 - Undertaking general everyday tasks including banking, post, obtaining supplies
 - Scouting locations, sites and destinations
- Any vehicle driven by tour guides while on tour
- Any vehicle used to transfer passengers – for example, from hotels to a tour mustering point
- Any vehicle that provides support to a tour – such as transportation of gear and/or catering.

2. List three factors that determine the type of vehicles a business may use?

Any of the following'

- The types of tours they offer
- Frequency and duration of tours
- Number of passengers carried
- Destinations visited and condition/type of roads travelled
- Extent to which they use vehicles provided by third party operators.

3. A special license is required to drive what vehicles?

- Buses/coaches or vehicles carrying paying customers/passengers – this means a 'car' licence or a motorcycle' licence is not sufficient/not acceptable
- Light and heavy vehicles – such as trucks and large vans

4. Identify five possible classes of driving license that may be available

Any of the following;

- Motor cycle
- Private motor cars/vehicles
- Commercial car
- Buses and coaches
- Light vehicles
- Medium vehicles
- Heavy vehicles

5. Who may provide training for learner driver applicants?

- Private companies operating as licensed Driving schools or Driving Centres
- Licensed individuals operating as private driving instructors.

6. The theory component of a driver license test may consist of what topics? (List five)

Any of the following;

- Basic rules and responsibilities
- Alcohol, drugs, medicine and driving
- Need for and use of seat belts
- Meaning of road signs
- Speed limits
- Give way rules
- Road marking
- Traffic control/traffic lights
- Road courtesy
- Safe and/or defensive driving
- Parking
- Offences and penalties
- Legal responsibilities.

7. Identify three pre-requisites authorities may require in order to assess an applicant for a license.

Any of the following;

- Properly and fully completed application form
- Payment of a fee
- Evidence of successful completion of a nominated driver training course
- Satisfactory completion of a Practical test
- Evidence of having held a nominated other/lower classification of licence for a stated period
- Medical report
- Copy of passport and/or work or other visa
- Satisfactory completion of a Theory test
- Proof of identity or age

8. What may an applicant be required to do in the event they fail their driving assessment? (List three)

Any of the following;

- Another fee is payable for re-application
- Another application has to be made
- There may be a minimum waiting time between applications
- If the Theory test was passed but the Practical test was failed, only the Practical test may need to be done
- The Theory test must be passed before the Practical test can be attempted

9. When conducting a visual inspection, list three points the process could or should involve.

- Looking at and under the vehicle and closely checking all aspects of the vehicle
- Lighting the areas being inspected
- Using a checklist
- Inspecting the vehicle in pairs
- Looking for signs of damage to the vehicle – as these signs can indicate:
- Checking for missing parts
- Noting leaking fluids
- Checking condition of vehicle instruments
- Taking immediate action to rectify problems

10. When conducting vehicle checks, why would you start the vehicle and run the motor? (List three)

Starting the vehicle and running the motor – and:

- Listening for abnormal engine sounds and/or evidence of exhaust leaks
- Observing the exhaust for signs of smoke
- Checking for leaks
- Making sure the horn works
- Checking dash board indicators.

11. When conducting vehicle checks, identify five fluids you might check or top up.

Any of the following;

- Engine oil
- Transmission fluid
- Water in the radiator and radiator reservoir
- Windscreen washer water
- Power steering fluid
- Brake fluid
- Clutch fluid
- Water if the battery

12. When conducting vehicle checks identify five lights you would check are working properly

Any of the following;

- Left and right indicators – at the front and rear of the vehicle
- Brake lights
- Headlights – on high and low beam
- Driving lights and fog lights – where fitted
- Parking/side lights
- Reversing lights
- Number plate lights – front and rear
- Hazard warning lights
- Interior lights and internal safety lights
- Dashboard lights and instrument illumination

13. What standard internal document may be completed in order to have service and repairs provided to a vehicle?

Standard practice as part of the process for providing service and repairs to vehicles is to complete a **'Service Report' form/log, 'Defect Report' or 'Request for Service/Maintenance'**.

14. What vehicle details might you record to identify which vehicle has been serviced or repaired?

Identifying the vehicle which has been serviced or repaired – as required by the business, which requires recording of:

- Registration number
- Make and model
- Odometer reading

15. Vehicle servicing schedules are generally determined by what two key factors?

Vehicles must be serviced at nominated times – as appropriate, designated by either:

- Distance travelled, or
- Operating hours

16. In order to protect a valid vehicle warranty, vehicle servicing may be required to be undertaken by a specified business. Who might that be?

Scheduled maintenance and service may need to be undertaken by specified businesses in order to preserve vehicle warranties – these may be:

- The organisation from whom the vehicle was purchased
- An authorised service dealer

17. Identify three internal Post-trip checks

Any of the following;

- Checking to for luggage/property
- Removing loose debris from floor, seats, bins and similar
- Sweeping and cleaning vehicle trays
- Vacuum cleaning and spot cleaning carpeted floors and other surfaces
- Cleaning upholstery
- Cleaning door jambs and steps
- Cleaning all inside glass and mirrors
- Cleaning the steering wheel, dashboard, vehicle controls and consoles
- Completing necessary paperwork

18. Identify three external Post-trip checks

Any of the following;

- Using a pressure washer to clean external surfaces and vehicle wheels
- Cleaning the outside windows and mirrors
- Polishing chrome and fittings
- Applying tyre black

19. Identify three things you would be on the lookout for to indicate a vehicle performance concern while driving.

Any of the following;

- Unusual noises or sounds that are not normal or indicate a problem
- Unusual or excessive vibrations
- Unusual smells or odours that may indicate components are getting too hot
- The presence of smoke
- Equipment that is malfunctioning
- Intermittent faults with equipment, items or technology/systems

20. You have travelled 875 kilometres and used 294 litres of fuel. List your method and answer for calculating fuel consumption

Distance travelled = 875 kilometres

Fuel used = 294 litres

$875 \div 294 = 2.98 \text{ km/L}$

21. Why should you check vehicle warranty before undertaking any minor repairs?

Performing repairs to vehicles which are still under warranty can void the warranty – so there is a need to check this before proceeding any further

22. Identify five minor repairs that might be undertaken by the vehicle driver?

Any of the following;

- Replacing blown globes
- Replacing a fan belt
- Replacing radiator hoses
- Replacing spark plugs
- Replacing glow plugs
- Replacing a fuse
- Replacing mirrors
- Changing tyres
- Repairing punctures.

23. When assessing road conditions driving times can be calculated based on what factors?

Driving times can be calculated – based on:

- Distances to be travelled
- Types of terrain and roads which are expected
- Local laws regarding driving times and rest breaks for drivers
- Plans for the trip, itineraries or trip-related schedules

24. Obtaining details regarding road conditions may require you to do what?

Obtaining details regarding road conditions – which may necessitate:

- Telephoning road authorities
- Visiting websites of motoring bodies
- Contacting emergency authorities
- Talking to other drivers and/or destination or local attraction contacts

25. Identify three reasons why you need to continually monitor road and traffic conditions.

Any of the following;

- Driving can be adjusted to reflect the conditions
- Passengers receive a safer and smoother ride
- The optimum path of travel can be selected on the road
- A suitable CAS can be maintained around the vehicle
- An alternate route can be chosen if necessary
- Information about the observed conditions can be communicated to Head Office and/or shared with other drivers.

26. When evaluating road conditions identify three things you may need to do.

Any of the following:

- When driving there is a need to:
 - Be aware of the volume of traffic on the road
 - Judge need to slow average travel speed
 - Note the proximity of other vehicles
 - Assess the speed of other road users
 - Be familiar with the type of other vehicles using the road
 - Use the extra height of the vehicle (where applicable) to look above cars/other traffic to 'see ahead'

27. How would you feedback information on road and traffic conditions to relevant people?

Feedback about road and traffic conditions is usually provided:

- Using the two-way radio on board the vehicle
- Using driver cell phone – in compliance with local laws regarding use of these when driving a vehicle.

28. Identify the key reasons you need to feedback information

- Keep head office up-to-date regarding their progress
- Provide up-to-date advice for other drivers
- Give road and weather reports

29. Identify three key factors that may cause road delays or deviations.

Any of the following;

- Vehicle-related problems
- Floods
- Restrictions on road usage placed on vehicles over stated dimensions
- Weather related damage to roads
- Road works
- Building construction
- Emergency situations impacting on road use
- Road closures due to local, special events
- Unusual levels of traffic

30. How can weather damage roads?

Weather related damage to roads – such as:

- Severe potholes
- Wash-away – roads and bridges
- Landslides
- General damage to bridges and/or tunnels

31. What non-negotiable deadline may cause you to take a shorter route than planned?

There is a risk a non-negotiable deadline has to be met – such as:

- Providing catering/meal service to a tour group
- Arriving at a venue to meet their check-in times for accommodation
- Transferring passengers to another carrier who has a scheduled departure time.

32. What reason is given that may make driving at night unsafe?

Driving at night in an area known to be teeming with wildlife thus posing a very high risk of hitting an animal is unacceptable

33. Identify three features on a map that enable you to read and interpret it.

Any of the following:

- Check out the map and learn its features – in terms of:
 - The scale used on the map to show distances
 - How different classes of roads are indicated
 - How distances between points are shown
 - Whether distances are in kilometres or miles
 - Symbols used to indicate landmarks/points of interest.

34. How would you determine the shortest way between two points on a map?

- Identifying point of departure/present location of the vehicle
- Locating the required destination point
- Drawing an imaginary (or actual) straight line between the two points
- Looking at the map to determine suitable roads which approximate the imaginary (or actual) straight line between the two points
- Writing down a list of destinations and distances.

35. Before driving off-road what might you need to have the vehicle fitted with to ensure it is properly prepared?

- Fitting protection and bash plates to the underside of the vehicle
- Fitting appropriate tyres
- Fitting a snorkel
- Fitting a viscous fan
- Fitting extended differential breathers.

36. The Trainee manual lists five key types of terrain or road surface requiring modified driving technique, vehicle preparation and driver cautions. What are they?

- Driving on sand
- Driving on very soft ground or through mud
- Driving across rocky terrain
- Driving inclines
- Driving through water.

37. What should you consider when loading a trailer in relation to the overall weight of the load?

Balance the weight of the load to the best extent possible based on the size and weight of individual items – to optimise stability: balance should be approximately 60% towards the front of the trailer and 40% to the rear

38. Identify three key points to remember when towing a trailer.

Any of the following;

- Remember there is a trailer connected to the vehicle
- Slow down
- Allow extra space between the vehicle and the traffic in front
- Observe the trailer on a regular basis through the mirrors
- Check the trailer at all stops
- If the trailer starts to sway, take foot off the accelerator
- Factor in extra time when overtaking
- Do not travel in the 'fast' lane
- Make sure there is enough room for the vehicle *and trailer* to get into any space being considered
- Realise the extra time/space required due to the extra length of the unit when entering a road and getting up-to-speed
- Take corners a little wider
- Fit extension mirrors.

39. What are the key points to remember when reversing a trailer?

Important points to note when reversing are:

- Do not rush
- Check the area and/or path to be reversed into
- Use the mirrors
- In some countries it is illegal to reverse on freeways
- Limit the amount/distance of reversing that is done.

40. When reversing which way will you turn the steering wheel when you need the trailer to move?

Turn the steering wheel in the **opposite direction** to which the trailer is required to move.

41. Identify any reasons that would cause vehicle parking and shutting down procedures to vary.

- Vary between different makes and models of vehicles
- Differ between Tour Operators according to their individual SOPs.

42. Identify five possible parking and shutting down procedures

Any of the following:

- Locate the vehicle in a safe position
- Park legally
- Seek to drive into a parking area – rather than reverse into one
- Give other vehicles ‘sufficient’ space and room to manoeuvre
- Apply the parking brake when stopped
- Leave the vehicle in gear or ‘Park’
- Shut down the vehicle – by turning off accessories and turning the engine off
- Illuminate parking lights if leaving the vehicle on street/road at night
- When parked on an incline, turn the front wheels in to the kerb
- Secure valuable items out-of-sight
- Activate/apply anti-theft devices – if leaving the vehicle
- Secure the vehicle when leaving it
- Complying with any other manufacturer’s instructions which apply
- Adhere to all Tour Operator standard operating procedures.

43. Identify three driving hazards that may be encountered when driving?

Any of the following:

- Driving hazards which may be encountered can include:
 - Wet and iced roads
 - Oil on the road
 - Animals and objects on the road
 - Parked vehicles on the road
 - Pedestrians on and crossing the road
 - Flooded roads
 - Windy sections of a road
 - Reduced visibility.

44. List three general techniques to apply to cope effectively with driving hazards.

Any of the following:

- Generic requirements for coping effectively with these conditions are:
 - Constant vigilance when driving – especially in relation to observational skills
 - Talking to other drivers on the road to obtain up-dates and advice on local conditions
 - Listening to two-way radio chatter regarding road and traffic conditions
 - Advising others about hazardous conditions encountered – when and if safe to do so
 - Slowing down
 - Using common sense
 - Never placing passengers or the vehicle at risk
 - Abiding by all applicable road laws.

45. In practice ‘duty of care’ means the driver has a responsibility for ensuring.....? (List three)

Any of the following:

- In practice this means the driver needs to/has responsibility for ensuring:
 - The vehicle is safe/roadworthy when it departs
 - The safety/roadworthiness of the vehicle is maintained through the trip
 - All road rules and speed limits are obeyed
 - The vehicle is driven in a safe and responsible manner
 - Obvious risks are avoided or controlled
 - Passengers are informed about potential risks/hazards
 - Passengers comply with safety rules
 - Cargo is stored/stowed appropriately

46. What are the consequences of a driver failing to meet Duty of Care obligations?

- They may be sued by passengers/those they injure or who lose property for negligence
- The Tour Operator they work for may be sued for not discharging their Due Diligence obligations by properly training their drivers.

47. What are the three dangerous vehicle emergencies?

There are three vehicle emergencies that can be very dangerous:

- Brake failure
- Tyre failure
- Fires.

48. Identify the signs for tyre failure.

- Sound
 - Feel
 - Vibration.
-

Observation checklist

Student name	
Assessor name	
Location/venue	
Unit of competency	Drive various types of service vehicles D2.TTG.CL3.09
Dates of observation	
Instructions	- Over a period of time observe the student completing each of the following tasks: - Obtain driver's license(s) - Monitor service vehicles - Monitor road conditions - Drive vehicles - Enter the date on which the tasks were undertaken - Place a tick in the box to show they completed each aspect of the task to the standard expected in the enterprise - Complete the feedback sections of the form, if required.

Did the candidate	Yes	No
Element 1: Obtain driver's license(s)		
Identify the vehicles that have to be driven	☐	☐
Identify the driver's license(s) that need to be obtained	☐	☐
Undertake training to obtain the necessary license(s)	☐	☐
Undertake driver license assessment successfully	☐	☐
Element 2: Monitor service vehicles		
Perform regular preventative maintenance and operational checks of designated small vehicles	☐	☐
Complete and retain service reports as required	☐	☐
Adhere to scheduled maintenance and service requirements as set out by the vehicle manufacturer	☐	☐

Did the candidate	Yes	No
Conduct special checks and service after designated trips	☐	☐
Check performance and efficiency of vehicle during operation	☐	☐
Undertake minor routine repairs	☐	☐
Element 3: Monitor road conditions		
Assess road conditions	☐	☐
Assess traffic conditions	☐	☐
Feedback information to head office about road and traffic conditions	☐	☐
Identify factors that may cause delays or route deviations	☐	☐
Factor conditions into choice of route to be taken	☐	☐
Read a map	☐	☐
Element 4: Drive vehicles		
Demonstrate basic operational driving practices	☐	☐
Demonstrate practices related to the towing of a trailer	☐	☐
Demonstrate reversing practices	☐	☐
Demonstrate parking and shutting down procedures	☐	☐
Identify and modify driving techniques to accommodate driving hazards	☐	☐
Modify driving style to accommodate identified vehicle problems and faults	☐	☐
Follow emergency procedures	☐	☐
Did the student's overall performance meet the standard?	☐	☐

Third Party Statement

Student name:			
Name of third party:		Contact no:	
Relationship to student:	☐ Employer ☐ Supervisor ☐ Colleague ☐ Other Please specify: _____ <i>Please do not complete the form if you are a relative, close friend or have a conflict of interest]</i>		
Unit of competency:	Drive various types of service vehicles D2.TTG.CL3.09		
The student is being assessed against industry competency standards and we are seeking your support in the judgement of their competence. Please answer these questions as a record of their performance while working with you. Thank you for your time.			
Do you believe the trainee has demonstrated the following skills? <i>(tick the correct response]</i>	Yes	No	Not sure
Element 1: Obtain driver's license(s)			
Identified the vehicles that have to be driven	☐	☐	☐
Identified the driver's license(s) that need to be obtained	☐	☐	☐
Undertaken training to obtain the necessary license(s)	☐	☐	☐
Undertaken driver license assessment successfully	☐	☐	☐
Element 2: Monitor service vehicles			
Performed regular preventative maintenance and operational checks of designated small vehicles	☐	☐	☐
Completed and retained service reports as required	☐	☐	☐
Adhered to scheduled maintenance and service requirements as set out by the vehicle manufacturer	☐	☐	☐
Conducted special checks and service after designated trips	☐	☐	☐
Checked performance and efficiency of vehicle during operation	☐	☐	☐

Undertaken minor routine repairs	☐	☐	☐
Element 3: Monitor road conditions			
Assessed road conditions	☐	☐	☐
Assessed traffic conditions	☐	☐	☐
Fed back information to head office about road and traffic conditions	☐	☐	☐
Identified factors that may cause delays or route deviations	☐	☐	☐
Factored conditions into choice of route to be taken	☐	☐	☐
Read a map	☐	☐	☐
Element 4: Drive vehicles			
Demonstrated basic operational driving practices	☐	☐	☐
Demonstrated practices related to the towing of a trailer	☐	☐	☐
Demonstrated reversing practices	☐	☐	☐
Demonstrated parking and shutting down procedures	☐	☐	☐
Identified and modified driving techniques to accommodate driving hazards	☐	☐	☐
Modified driving style to accommodate identified vehicle problems and faults	☐	☐	☐
Followed emergency procedures	☐	☐	☐
