Competency Based Training (CBT) and assessment – An introduction for trainers

Competency

Competency refers to the ability to perform particular tasks and duties to the standard of performance expected in the workplace.

Competency requires the application of specified knowledge, skills and attitudes relevant to effective participation, consistently over time and in the workplace environment.

The essential skills and knowledge are either identified separately or combined.

Knowledge identifies what a person needs to know to perform the work in an informed and effective manner.

Skills describe the application of knowledge to situations where understanding is converted into a workplace outcome.

Attitude describes the founding reasons behind the need for certain knowledge or why skills are performed in a specified manner.

Competency covers all aspects of workplace performance and involves:

- Performing individual tasks
- Managing a range of different tasks
- Responding to contingencies or breakdowns
- Dealing with the responsibilities of the workplace
- Working with others.

Unit of competency

Like with any training qualification or program, a range of subject topics are identified that focus on the ability in a certain work area, responsibility or function.

Each manual focuses on a specific unit of competency that applies in the hospitality workplace.

In this manual a unit of competency is identified as a 'unit'.

Each unit of competency identifies a discrete workplace requirement and includes:

- Knowledge and skills that underpin competency
- Language, literacy and numeracy
- Occupational safety and health requirements.

Each unit of competency must be adhered to in training and assessment to ensure consistency of outcomes.

Element of competency

An element of competency describes the essential outcomes within a unit of competency.

The elements of competency are the basic building blocks of the unit of competency. They describe in terms of outcomes the significant functions and tasks that make up the competency.

In this manual elements of competency are identified as an 'element'.

Performance criteria

Performance criteria indicate the standard of performance that is required to demonstrate achievement within an element of competency. The standards reflect identified industry skill needs.

Performance criteria will be made up of certain specified skills, knowledge and attitudes.

Learning

For the purpose of this manual learning incorporates two key activities:

- Training
- Assessment.

Both of these activities will be discussed in detail in this introduction.

Today training and assessment can be delivered in a variety of ways. It may be provided to participants:

- On-the-job – in the workplace
- Off-the-job – at an educational institution or dedicated training environment
- As a combination of these two options.

No longer is it necessary for learners to be absent from the workplace for long periods of time in order to obtain recognised and accredited qualifications.

Learning approaches

This manual will identify two avenues to facilitate learning:

Competency Based Training (CBT)

This is the strategy of developing a participant's competency.

Educational institutions utilise a range of training strategies to ensure that participants are able to gain the knowledge and skills required for successful:

- Completion of the training program or qualification
- Implementation in the workplace.

The strategies selected should be chosen based on suitability and the learning styles of participants.

Competency Based Assessment (CBA)

This is the strategy of assessing competency of a participant.

Educational institutions utilise a range of assessment strategies to ensure that participants are assessed in a manner that demonstrates validity, fairness, reliability, flexibility and fairness of assessment processes.

Flexibility in learning

It is important to note that flexibility in training and assessment strategies is required to meet the needs of participants who may have learning difficulties. The strategies used will vary, taking into account the needs of individual participants with learning difficulties. However they will be applied in a manner which does not discriminate against the participant or the participant body as a whole.

Catering for participant diversity

Participants have diverse backgrounds, needs and interests. When planning training and assessment activities to cater for individual differences, trainers and assessors should:

- Consider individuals' experiences, learning styles and interests
- Develop questions and activities that are aimed at different levels of ability
- Modify the expectations for some participants
- Provide opportunities for a variety of forms of participation, such as individual, pair and small group activities
- Assess participants based on individual progress and outcomes.

The diversity among participants also provides a good reason for building up a learning community in which participants support each other's learning.

Participant centred learning

This involves taking into account structuring training and assessment that:

- *Builds on strengths* – Training environments need to demonstrate the many positive features of local participants (such as the attribution of academic success to effort, and the social nature of achievement motivation) and of their trainers (such as a strong emphasis on subject disciplines and moral responsibility). These strengths and uniqueness of local participants and trainers should be acknowledged and treasured
- *Acknowledges prior knowledge and experience* – The learning activities should be planned with participants' prior knowledge and experience in mind
- *Understands learning objectives* – Each learning activity should have clear learning objectives and participants should be informed of them at the outset. Trainers should also be clear about the purpose of assignments and explain their significance to participants
- *Teaches for understanding* – The pedagogies chosen should aim at enabling participants to act and think flexibly with what they know
- *Teaches for independent learning* – Generic skills and reflection should be nurtured through learning activities in appropriate contexts of the curriculum. Participants should be encouraged to take responsibility for their own learning

- *Enhances motivation* – Learning is most effective when participants are motivated. Various strategies should be used to arouse the interest of participants
- *Makes effective use of resources* – A variety of teaching resources can be employed as tools for learning
- *Maximises engagement* – In conducting learning activities, it is important for the minds of participants to be actively engaged
- *Aligns assessment with learning and teaching* – Feedback and assessment should be an integral part of learning and teaching
- *Caters for learner diversity* – Trainers should be aware that participants have different characteristics and strengths and try to nurture these rather than impose a standard set of expectations.

Active learning

The goal of nurturing independent learning in participants does not imply that they always have to work in isolation or solely in a classroom. On the contrary, the construction of knowledge in tourism and hospitality studies can often best be carried out in collaboration with others in the field. Sharing experiences, insights and views on issues of common concern, and working together to collect information through conducting investigative studies in the field (active learning) can contribute a lot to their eventual success.

Active learning has an important part to play in fostering a sense of community in the class. First, to operate successfully, a learning community requires an ethos of acceptance and a sense of trust among participants, and between them and their trainers. Trainers can help to foster acceptance and trust through encouragement and personal example, and by allowing participants to take risks as they explore and articulate their views, however immature these may appear to be. Participants also come to realise that their classmates (and their trainers) are partners in learning and solving.

Trainers can also encourage cooperative learning by designing appropriate group learning tasks, which include, for example, collecting background information, conducting small-scale surveys, or producing media presentations on certain issues and themes. Participants need to be reminded that, while they should work towards successful completion of the field tasks, developing positive peer relationships in the process is an important objective of all group work.

Competency Based Training (CBT)

Principle of Competency Based Training

Competency based training is aimed at developing the knowledge, skills and attitudes of participants, through a variety of training tools.

Training strategies

The aims of this curriculum are to enable participants to:

- Undertake a variety of subject courses that are relevant to industry in the current environment
- Learn current industry skills, information and trends relevant to industry
- Learn through a range of practical and theoretical approaches
- Be able to identify, explore and solve issues in a productive manner

- Be able to become confident, equipped and flexible managers of the future
- Be 'job ready' and a valuable employee in the industry upon graduation of any qualification level.

To ensure participants are able to gain the knowledge and skills required to meet competency in each unit of competency in the qualification, a range of training delivery modes are used.

Types of training

In choosing learning and teaching strategies, trainers should take into account the practical, complex and multi-disciplinary nature of the subject area, as well as their participant's prior knowledge, learning styles and abilities.

Training outcomes can be attained by utilising one or more delivery methods:

Lecture/tutorial

This is a common method of training involving transfer of information from the trainer to the participants. It is an effective approach to introduce new concepts or information to the learners and also to build upon the existing knowledge. The listener is expected to reflect on the subject and seek clarifications on the doubts.

Demonstration

Demonstration is a very effective training method that involves a trainer showing a participant how to perform a task or activity. Through a visual demonstration, trainers may also explain reasoning behind certain actions or provide supplementary information to help facilitate understanding.

Group discussions

Brainstorming in which all the members in a group express their ideas, views and opinions on a given topic. It is a free flow and exchange of knowledge among the participants and the trainer. The discussion is carried out by the group on the basis of their own experience, perceptions and values. This will facilitate acquiring new knowledge. When everybody is expected to participate in the group discussion, even the introverted persons will also get stimulated and try to articulate their feelings.

The ideas that emerge in the discussions should be noted down and presentations are to be made by the groups. Sometimes consensus needs to be arrived at on a given topic. Group discussions are to be held under the moderation of a leader guided by the trainer. Group discussion technique triggers thinking process, encourages interactions and enhances communication skills.

Role play

This is a common and very effective method of bringing into the classroom real life situations, which may not otherwise be possible. Participants are made to enact a particular role so as to give a real feel of the roles they may be called upon to play. This enables participants to understand the behaviour of others as well as their own emotions and feelings. The instructor must brief the role players on what is expected of them. The role player may either be given a ready-made script, which they can memorize and enact, or they may be required to develop their own scripts around a given situation. This technique is extremely useful in understanding creative selling techniques and human relations. It can be entertaining and energizing and it helps the reserved and less literate to express their feelings.

Simulation games

When trainees need to become aware of something that they have not been conscious of, simulations can be a useful mechanism. Simulation games are a method based on "here and now" experience shared by all the participants. The games focus on the participation of the trainees and their willingness to share their ideas with others. A "near real life" situation is created providing an opportunity to which they apply themselves by adopting certain behaviour. They then experience the impact of their behaviour on the situation. It is carried out to generate responses and reactions based on the real feelings of the participants, which are subsequently analysed by the trainer.

While use of simulation games can result in very effective learning, it needs considerable trainer competence to analyse the situations.

Individual /group exercises

Exercises are often introduced to find out how much the participant has assimilated. This method involves imparting instructions to participants on a particular subject through use of written exercises. In the group exercises, the entire class is divided into small groups, and members are asked to collaborate to arrive at a consensus or solution to a problem.

Case study

This is a training method that enables the trainer and the participant to experience a real life situation. It may be on account of events in the past or situations in the present, in which there may be one or more problems to be solved and decisions to be taken. The basic objective of a case study is to help participants diagnose, analyse and/or solve a particular problem and to make them internalize the critical inputs delivered in the training. Questions are generally given at the end of the case study to direct the participants and to stimulate their thinking towards possible solutions. Studies may be presented in written or verbal form.

Field visit

This involves a carefully planned visit or tour to a place of learning or interest. The idea is to give first-hand knowledge by personal observation of field situations, and to relate theory with practice. The emphasis is on observing, exploring, asking questions and understanding. The trainer should remember to brief the participants about what they should observe and about the customs and norms that need to be respected.

Group presentation

The participants are asked to work in groups and produce the results and findings of their group work to the members of another sub-group. By this method participants get a good picture of each other's views and perceptions on the topic and they are able to compare them with their own point of view. The pooling and sharing of findings enriches the discussion and learning process.

Practice sessions

This method is of paramount importance for skills training. Participants are provided with an opportunity to practice in a controlled situation what they have learnt. It could be real life or through a make-believe situation.

Games

This is a group process and includes those methods that involve usually fun-based activity, aimed at conveying feelings and experiences, which are everyday in nature, and applying them within the game being played. A game has set rules and regulations, and may or may not include a competitive element. After the game is played, it is essential that the participants be debriefed and their lessons and experiences consolidated by the trainer.

Research

Trainers may require learners to undertake research activities, including online research, to gather information or further understanding about a specific subject area.

Competency Based Assessment (CBA)

Principle of Competency Based Assessment

Competency based assessment is aimed at compiling a list of evidence that shows that a person is competent in a particular unit of competency.

Competencies are gained through a multitude of ways including:

- Training and development programs
- Formal education
- Life experience
- Apprenticeships
- On-the-job experience
- Self-help programs.

All of these together contribute to job competence in a person. Ultimately, assessors and participants work together, through the 'collection of evidence' in determining overall competence.

This evidence can be collected:

- Using different formats
- Using different people
- Collected over a period of time.

The assessor who is ideally someone with considerable experience in the area being assessed, reviews the evidence and verifies the person as being competent or not.

Flexibility in assessment

Whilst allocated assessment tools have been identified for this subject, all attempts are made to determine competency and suitable alternate assessment tools may be used, according to the requirements of the participant.

The assessment needs to be equitable for all participants, taking into account their cultural and linguistic needs.

Competency must be proven regardless of:

- Language
- Delivery Method
- Assessment Method.

Assessment objectives

The assessment tools used for subjects are designed to determine competency against the 'elements of competency' and their associated 'performance criteria'.

The assessment tools are used to identify sufficient:

- a) Knowledge, including underpinning knowledge
- b) Skills
- c) Attitudes

Assessment tools are activities that trainees are required to undertake to prove participant competency in this subject.

All assessments must be completed satisfactorily for participants to obtain competence in this subject. There are no exceptions to this requirement, however, it is possible that in some cases several assessment items may be combined and assessed together.

Types of assessment

Allocated Assessment Tools

There are a number of assessment tools that are used to determine competency in this subject:

- Work projects
- Written questions
- Oral questions
- Third Party Report
- Observation Checklist.

Instructions on how assessors should conduct these assessment methods are explained in the Assessment Manuals.

Alternative assessment tools

Whilst this subject has identified assessment tools, as indicated above, this does not restrict the assessor from using different assessment methods to measure the competency of a participant.

Evidence is simply proof that the assessor gathers to show participants can actually do what they are required to do.

Whilst there is a distinct requirement for participants to demonstrate competency, there are many and diverse sources of evidence available to the assessor.

Ongoing performance at work, as verified by a supervisor or physical evidence, can count towards assessment. Additionally, the assessor can talk to customers or work colleagues to gather evidence about performance.

A range of assessment methods to assess competency include:

- Practical demonstrations
- Practical demonstrations in simulated work conditions
- Problem solving
- Portfolios of evidence
- Critical incident reports
- Journals
- Oral presentations
- Interviews
- Videos
- Visuals: slides, audio tapes
- Case studies
- Log books
- Projects
- Role plays
- Group projects
- Group discussions
- Examinations.

Recognition of Prior Learning

Recognition of Prior Learning is the process that gives current industry professionals who do not have a formal qualification, the opportunity to benchmark their extensive skills and experience against the standards set out in each unit of competency/subject.

Also known as a Skills Recognition Audit (SRA), this process is a learning and assessment pathway which encompasses:

- Recognition of Current Competencies (RCC)
- Skills auditing
- Gap analysis and training
- Credit transfer.

Assessing competency

As mentioned, assessment is the process of identifying a participant's current knowledge, skills and attitudes sets against all elements of competency within a unit of competency. Traditionally in education, grades or marks were given to participants, dependent on how many questions the participant successfully answered in an assessment tool.

Competency based assessment does not award grades, but simply identifies if the participant has the knowledge, skills and attitudes to undertake the required task to the specified standard.

Therefore, when assessing competency, an assessor has two possible results that can be awarded:

- Pass Competent (PC)
- Not Yet Competent (NYC).

Pass Competent (PC)

If the participant is able to successfully answer or demonstrate what is required, to the expected standards of the performance criteria, they will be deemed as 'Pass Competent' (PC).

The assessor will award a 'Pass Competent' (PC) if they feel the participant has the necessary knowledge, skills and attitudes in all assessment tasks for a unit.

Not Yet Competent' (NYC)

If the participant is unable to answer or demonstrate competency to the desired standard, they will be deemed to be 'Not Yet Competent' (NYC).

This does not mean the participant will need to complete all the assessment tasks again. The focus will be on the specific assessment tasks that were not performed to the expected standards.

The participant may be required to:

- a) Undertake further training or instruction
- b) Undertake the assessment task again until they are deemed to be 'Pass Competent'.

Competency standard

UNIT TITLE: DRIVE VARIOUS TYPES OF SERVICE VEHICLES		NOMINAL HOURS: 120
UNIT NUMBER: D2.TTG.CL3.09		
UNIT DESCRIPTOR: This unit deals with skills and knowledge required to drive tour support vehicles, such as light commercial vehicles and cars, safely monitoring road and traffic conditions and monitoring the safety and reliability of the vehicles. This unit requires participants to sit and pass the necessary driver's license test(s) as prescribed by the host country to allow them to drive designated vehicles as required.		
ELEMENTS AND PERFORMANCE CRITERIA		UNIT VARIABLE AND ASSESSMENT GUIDE
Element 1: Obtain driver's license(s) 1.1 Identify the <i>vehicles</i> that have to be driven 1.2 <i>Identify the driver's license(s)</i> that need to be obtained 1.3 Undertake <i>training</i> to obtain the necessary license(s) 1.4 <i>Undertake driver license assessment</i> successfully Element 2: Monitor service vehicles 2.1 <i>Perform regular preventative maintenance and operational checks</i> of designated small vehicles 2.2 Complete and retain service reports as required		Unit Variables The Unit Variables provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. It relates to the unit as a whole and facilitates holistic assessment. This unit applies to driving various types of service vehicles within the labour divisions of the hotel and travel industries and may include: 1. Travel Agencies 2. Tour Operation <i>Vehicles</i> will include any vehicles (excluding buses/coaches) used by the employer to support the delivery of tours and/or transfers and may include: • Cars • Four-wheel drives • Utilities • Light commercial vehicles, including those capable of carrying up to 12 people/passengers and/or up to 2 tons in weight and in line with the host countries rules and regulations.

2.3 Adhere to scheduled maintenance and service requirements as set out by the vehicle manufacturer 2.4 Conduct <i>special checks and service</i> after designated trips 2.5 Check <i>performance and efficiency</i> of vehicle during operation 2.6 Undertake <i>minor routine repairs</i> Element 3: Monitor road conditions 3.1 Assess <i>road conditions</i> 3.2 Assess <i>traffic conditions</i> 3.3 Feedback information to head office about road and traffic conditions 3.4 Identify <i>factors that may cause delays or route deviations</i> 3.5 Factor <i>conditions into choice of route</i> to be taken 3.6 Read a map Element 4: Drive vehicles 4.1 Demonstrate <i>basic operational driving practices</i> 4.2 Demonstrate <i>practices related to the towing of a trailer</i> 4.3 Demonstrate <i>reversing practices</i> 4.4 Demonstrate <i>parking and shutting down procedures</i>	<i>Identify the driver's license(s)</i> will include: • Contacting the relevant traffic authority in the host country to determine what driver's licenses are required for different classifications of vehicles • Identifying the pre-requisites for obtaining necessary driver's licenses, including age, previous experience, supplementary licenses • Identifying the requirements necessary to pass the required license(s), including practical and theoretical assessments and the nature and scope of these assessments. <i>Training</i> may be related to: • Formal training conducted by the authorities • Formal training conducted by private companies, including driver training establishments • In-house training provided on-the-job • Practice required to reinforce training and enhance practice • Obtaining experience with conditions that can be expected to be encountered while on tours and/or undertaking transfers which may include: ▪ Day and night driving ▪ On-road and off-road conditions ▪ Within employer premises ▪ Manual and automatic transmission ▪ Various weather conditions. <i>Undertake driver license assessment</i> may include: • Successfully completing the theory component of the driver's license assessment • Successfully completing the practical component of the driver's license assessment • Being issued with appropriate license(s) • Meeting legislative requirements of the relevant country.
--	---

4.5 Identify and modify driving techniques to accommodate <i>driving hazards</i> 4.6 Modify driving style to accommodate identified vehicle problems and faults 4.7 Follow <i>emergency procedures</i>	<i>Perform regular preventative maintenance and operational checks</i> should relate to conducting visual inspections of vehicles that may include: • General vehicle inspection, including verifying required equipment, checking for leaks • Checking and topping up fluid levels: oil, transmission fluids, gearbox, radiator, windscreen washer, brake fluid • Checking tires, including tire pressures and spare tires, tread, damage inspection • Checking operation of all lights, including turning lights, brake lights, low beam and high beam headlights, driving lights, interior lights, internal safety lights, reversing lights • Checking cleanliness of glass, including windscreen, rear window(s), side windows, mirrors • Checking seat belts, including operational efficiency • Checking brakes, including brake pedal and slow-roll braking test • Checking communication facilities • Checking security features, including locks, latches and other equipment designed to securely store luggage, equipment and supplies • Running the engine and checking for noise, smoke, leaks and other indicators of the need for service • Checking maintenance reports from previous trips to identify issues recorded by other drivers. <i>Special checks and service</i> may relate to: • Providing extra service and maintenance following severe conditions, including extended periods in dust, dirt, mud and sand, water crossings, long periods in low gears, long periods where four-wheel drive was engaged, or significant time in mountainous terrain • Regular periodic checks on tool kit and on-board spare parts carried by each vehicle to ensure all items are present as required.
--	--

	<i>Check performance and efficiency</i> may include: • Monitoring vehicle operation, including noise, vibrations, smells, smoke, malfunctioning equipment/items, and intermittent faults • Checking fuel consumption and comparing it against distance travelled, including consideration of the terrain covered, passengers and cargo carried • Recording issues that require attention • Reporting issues to the appropriate person • Obtaining scheduled maintenance, as required, while on tour. <i>Minor routine repairs</i> may include: • Replacement of blown globes, including turning lights, brake lights, low beam and high beam headlights, driving lights, interior lights, internal safety lights, reversing lights • Replacement of broken fan belts • Replacement of top and bottom radiator hose • Changing spark or glow plugs • Replacing air and fuel filter • Replacement of blown fuse • Replacement and re-alignment of external mirrors • Replacement of tail light glass/cover and reflectors • Changing a tire, including the repairing of a tire using an emergency patching kit and the re-inflation of the tire. <i>Assess road conditions</i> may relate to: • Checking the route to be taken before commencing journey, including identification of potential hazards such as weather-related, terrain, changing conditions, road conditions
--	---

	• Obtaining details in regard to road conditions from road authorities, motoring bodies, or emergency authorities • Factoring in potential support and emergency services that could be called on for assistance in the event of an accident or breakdown. <i>Assess traffic conditions</i> may relate to: • Determining expected levels of traffic • Considering expected type of traffic • Considering the direction of movement of traffic. <i>Factors that may cause delays or route deviations</i> may include: • Traffic accidents • Floods • Road damage and landslides • Bridge and/or tunnel damage • Road works, including those occasioned by repairs to utilities such as gas/water • Building construction • Emergency situations impacting on road use, including bush and building fires • Road closures due to special events, including festivals, marches, parades • Holiday traffic. <i>Factor conditions into choice of route</i> may include: • Amending the itinerary to optimise safety • Changing route to ensure non-negotiable deadlines and destinations are met • Revising inclusions to ensure destination is reached.
--	---

	<i>Basic operational driving practices</i> must include compliance with host country driving rules and regulations as well as demonstrated competency under normal driving conditions and touring conditions. Where off-road driving is required, it must be demonstrated which may include: • Driving in sand • Driving in mud • Driving across rough terrain • Driving up and down steep inclines • Drive through water. <i>Basic operational driving practices</i> must include: • Starting the vehicle, including key start and application of choke and hand controls to govern speed/engine revolutions • Steering the vehicle and manoeuvring the vehicle, including up hill, down hill and on level ground • Managing engine performance • Using all vehicle controls, instruments and indicators, including foot and hand operated controls • Positioning and parking the vehicle • Stopping the vehicle, including up hill, down hill and on level ground • Defensive driving techniques, including speed control, safe lane changing, indicating intentions to other drivers, anticipating conditions, reading the traffic, 'need help' notifications, seat belts, safe braking distances. <i>Practices related to the towing of a trailer</i> may include: • Stowing/loading of the trailer • Attaching the trailer and securing it to the vehicle
--	--

- Detaching the trailer from the towing vehicle
- Towing the trailer up hill, down hill and across level ground, including across/through water
- Demonstrating performance with additional length to vehicle.

Reversing practices may include:

- Reversing a trailer, including up hill, down hill, on level ground and into confined spaces
- Maintaining safety
- Maintaining visibility
- Achieving accurate positioning.

Parking and shutting down procedures may include:

- Bringing the vehicle to a complete stop
- Stopping the engine
- Applying park brake
- Securing the vehicle on level ground and on an incline
- Securing the vehicle to protect it from theft
- Complying with manufacturer's instructions and host enterprise standard operating procedures.

Driving hazards may include:

- Wet and iced roads
- Oil on road
- Animals and objects on road
- Parked vehicles on road
- Pedestrians on and crossing road

- Flooded road
- Windy sections of road
- Reduced visibility.

Emergency procedures may include:

- Vehicle accident/collision
- Fire on board the vehicle
- Leaking fuel
- Faulty brakes
- Faulty steering
- Breakdown, including specific procedures where the breakdown occurs in a dangerous location.

Assessment Guide

The following skills and knowledge must be assessed as part of this unit:

- Enterprise policies and procedures in regard to the use and driving of vehicles, excluding buses/coaches
- Principles of safe, defensive and off-road driving
- Knowledge of local road conditions
- General mechanical ability
- Evidence of holding current and appropriate driver's license for the vehicle that is being driven
- Ability to read a map.

	Linkages To Other Units • Establish and maintain safe touring conditions • Drive large tour buses or coaches • Manage operational risk • Maintain tourism vehicles in safe and clean operational condition • Operate and maintain a 4-WD vehicle in safe working condition • Operate tours in remote areas. Critical Aspects of Assessment Evidence of the following is essential: • Understanding of the road rules and regulations of the host country and/or the road rules and regulations in which the service vehicles are being driven • Proof of holding a current and valid driver's license to suit the vehicle and local legal requirements of the vehicle(s) being driven • Demonstrated ability to perform required preventative maintenance and operational checks, as indicated on a supplied checklist, on a designated vehicle/s and provide written or verbal report on the condition of that vehicle • Demonstrated ability to perform nominated and effective minor routine repairs to a designated vehicle in order to return the vehicle to a safe and effective operating condition • Demonstrated ability to accurately determine and describe the road and traffic conditions that are likely to apply to a nominated route at a given time for a certain vehicle • Demonstrated ability to use a map to identify a safe and efficient route from a nominated starting point through two designated way-points to a nominated finishing point • Demonstrated ability to drive a nominated vehicle in prescribed conditions so as to display at least seven of the following skill sets: ▪ Driving in sand
--	---

	▪ Driving in mud ▪ Driving across rough terrain ▪ Driving up and down steep inclines ▪ Starting the vehicle, including key start and application of choke and hand controls to govern speed/engine revolutions ▪ Steering the vehicle and manoeuvring the vehicle, including up hill, down hill and on level ground ▪ Managing engine performance ▪ Using all vehicle controls, instruments and indicators, including foot and hand operated controls ▪ Positioning and parking the vehicle ▪ Stopping the vehicle, including up hill, down hill and on level ground ▪ Defensive driving techniques, including speed control, safe lane changing, indicating intention, anticipating conditions, reading the traffic, 'need help' notifications, seat belts, safe braking distances. Context of Assessment Assessment must ensure: • Actual workplace application of driving skills using a variety of vehicles and under various actual or simulated road conditions. Resource Implications • Training and assessment must include the use of real vehicles in real or simulated driving conditions, situations and environments. Assessment Methods The following methods may be used to assess competency for this unit: • Observation of candidate practical performance
--	---

- Oral and written questions
- Third party reports completed by a supervisor
- Project and assignment work.

Key Competencies in this Unit

Level 1 = competence to undertake tasks effectively

Level 2 = competence to manage tasks

Level 3 = competence to use concepts for evaluating

Key Competencies	Level	Examples
Collecting, organising and analysing information	1	Gathering information to assist in determining road and traffic conditions
Communicating ideas and information	1	Explaining vehicle faults and problems to management or service technicians
Planning and organising activities	1	Planning the best route to take given conditions that apply at the time
Working with others and in teams	1	Driving safely and courteously with other road users
Using mathematical ideas and techniques	1	Calculating distances and fuel consumption
Solving problems	1	Overcoming delays, breakdown and other road and vehicle related difficulties
Using technology	2	Driving vehicles; using the instruments within a vehicle

1.	Trainer introduces the unit.

Slide

Subject elements

This unit comprises four Elements:

Slide 2

Slide No	Trainer Notes
2.	Trainer advises this Unit comprises four Elements, as listed on the slide explaining: • Each Element comprises a number of Performance Criteria which will be identified throughout the class and explained in detail • Trainees can obtain more detail from their Trainee Manual(TM) • At times the course presents advice and information about various protocols but where their workplace requirements differ to what is presented, the workplace practices and standards, as well as policies and procedures must be observed: ▪ Discuss housekeeping issues such as times of attendance, expected classroom behaviour, contact details, any resources required such as a calculator ▪ Explain that the trainees will be assessed and the requirements of those assessments.

Slide

Assessment

Assessment for this unit may include:

- Oral questions
- Written questions
- Work projects
- Workplace observation of practical skills
- Practical exercises
- Formal report from supervisor

3.	Trainer advises that assessment for this Unit may take several forms all of which are aimed at verifying they have achieved competency for the Unit as required. Trainer indicates the methods of assessment that will be applied to them for this Unit.

Slide

Element 1: Obtain driver's licence(s)

- 1.1 Identify the vehicles that have to be driven
- 1.2 Identify the driver's licence(s) that need to be obtained
- 1.3 Undertake training to obtain the necessary licence(s)
- 1.4 Undertake driver licence assessment successfully

Slide 4

Slide No

Trainer Notes

4.

Trainer introduces the performance criteria for Element.

Slide

1.1 Identify the vehicles that have to be driven

Service vehicles

Service vehicles may be seen as any vehicle:

- the tour operator/travel agency uses to conduct its day-to-day business
- driven by tour guides while on tour
- used to transfer passengers – for example, from hotels to a tour mustering point
- that provides support to a tour – such as transportation of gear and/or catering

Slide 5

Slide No	Trainer Notes
5.	Discuss the types of vehicles that may be included for these tasks. Why would you need to be familiar with the vehicle – brainstorm this for example: • Manual • Auto • Professionalism • Safety • Vehicle features.

Slide

1.1 Identify the vehicles that have to be driven

List of possible service vehicles

- Different businesses will have different vehicles:
 - Cars
 - Four-wheel drives
 - Utilities
 - Light and heavy commercial vehicles – such as vans

Slide 6

Slide No	Trainer Notes
6.	● Use the internet connection to display images of any vehicle trainees are not familiar with ● Check previous knowledge or experience with listed vehicles: ▪ Size, length and weight of vehicle can have an impact on ease of driving ● Encourage time for familiarisation of vehicle and test drive. Before using in an operational situation.

Slide

1.2 Identify the driver's licence(s) that need to be obtained

- Under a 1985 ASEAN agreement the drivers' licences of:

- Brunei Darussalam
- Republic of Indonesia
- Malaysia
- Republic of the Philippines
- Republic of Singapore
- Kingdom of Thailand

are recognised by all those ASEAN Member States

(Source: http://treaty.kemlu.go.id/uploads-pub/5121_ASEAN-1985-0051.pdf - Agreement on the recognition of domestic driving licences issued by ASEAN countries).

Slide 7

Slide No	Trainer Notes
7.	Discuss as needed and review table (license grades) on next slide.

Slide

1.2 Identify the driver's licence(s) that need to be obtained

- Some ASEAN countries will accept and recognise driver's licences issued from *any* other ASEAN country
- A new ASEAN driving licence issued by Thailand has been approved for use in all 10 ASEAN Member States
- Standard 4WD vehicles do not require a separate licence
- A special licence is required to drive buses, coaches, light and heavy vehicles
- People seeking a driving licence may be required to obtain a Learner's Driving Licence – meaning: ...see TM

Slide 8

Slide No	Trainer Notes
8.	• Animation has been applied to each point to allow for emphasis or further discussion as needed • Some ASEAN countries will accept and recognise driver's licences issued from <i>any</i> other ASEAN country • A new ASEAN driving licence issued by Thailand has been approved for use in all 10 ASEAN Member States • Standard 4WD vehicles do not require a separate licence • A special licence is required to drive buses, coaches. Light and heavy vehicles • People seeking a driving licence may be required to obtain a Learner's Driving Licence – meaning: ▪ They need to pass a Theory Test ▪ They can drive a vehicle to gain experience and expertise only under the guidance and supervision of a fully licensed driver ▪ This licence is only valid in the country of issue.

Slide

1.2 Identify the driver's licence(s) that need to be obtained

- When the initial driving licence is granted it may take the form of a Probationary licence – meaning the holder is subject to special obligations for a given period of 1 – 3 years
- Manual and automatic transmission vehicles are treated differently – in that:...see TM
- A 'full' driving licence will/may only be issued when the requirements of the Probationary licence have been met

Slide 9

Slide No	Trainer Notes
9.	• Animation has been applied to each point to allow for emphasis or further discussion as needed • When the initial driving licence is granted it may take the form of a Probationary licence – meaning the holder is subject to special obligations for a given period of 1 – 3 years • Manual and automatic transmission vehicles are treated differently – in that: ▪ A person who holds an 'automatic only' licence cannot drive a manual vehicle ▪ A person holding a manual licence is allowed to drive a manual vehicle • A 'full' driving licence will/may only be issued when the requirements of the Probationary licence have been met • Licences are not 'permanent' – they are issued for a limited period of time (say, 5 years) and must be renewed following host country re-application protocols/renewal procedures.

Slide

1.2 Identify the driver's licence(s) that need to be obtained

- Licences are not 'permanent' – they are issued for a limited period of time (say, 5 years) and must be renewed following host country re-application protocols/renewal procedures
- People of a certain age (say, 70+ years) may be required to obtain a medical certificate stating their fitness to drive
- Driving is a privilege not a right – the law has penalties for failure to comply with host country road legislation, such as:...see TM

Slide 10

Slide No	Trainer Notes
10.	• Animation has been applied to each point to allow for emphasis or further discussion as needed • Licences are not 'permanent' – they are issued for a limited period of time (say, 5 years) and must be renewed following host country re-application protocols/renewal procedures • People of a certain age (say, 70+ years) may be required to obtain a medical certificate stating their fitness to drive • Driving is a privilege not a right – the law has penalties for failure to comply with host country road legislation, such as: ▪ Demerit points – such that when a maximum number of points has been given to the driver for driving offence their licence will be suspended or cancelled ▪ Monetary fines for failing to comply with road laws.

Slide

1.2 Identify the driver's licence(s) that need to be obtained

Licence classifications	
Motor cycle	different licence types for bikes of varying engine capacities
Private motor cars/vehicles	- with possible variations, restrictions/limitations centred on: - Vehicle weight when un-laden – for example, 2,500kg - Maximum number of vehicle passengers – such as 7 passengers excluding the driver - Whether vehicle is a manual or automatic vehicle
Commercial car	for operation of a taxi
Buses and coaches	
Light vehicles	- being: - Vans - Lorries under a certain weight
Medium vehicles	- which may include: - Non-reticulated lorries below a nominated length and/or weight
Heavy vehicles	- which apply to, for example: - The largest trucks - Reticulated vehicles.

Slide 11

Slide No	Trainer Notes
11.	- Discuss any relevant knowledge or experience in the room - Web addresses available for viewing on next slide.

Slide

1.2 Identify the driver's licence(s) that need to be obtained

Websites

- It is interesting to visit:
 - http://treaty.kemlu.go.id/uploads-pub/5121_ASEAN-1985-0051.pdf - Agreement on the recognition of domestic driving licences issued by ASEAN countries
 - <http://www.thaivisa.com/forum/topic/833756-new-driver-license-is-valid-in-asean-member-countries/>

Slide 12

Slide No	Trainer Notes
12.	Visit these websites and discuss as necessary.

Slide

1.2 Identify the driver's licence(s) that need to be obtained

Licence identification

- To fully identify the specific driving licence requirements for individual countries it is necessary to:
 - Contact the relevant Land Transportation Office or similar
 - Determine if the country requires:
 - A Public Service Vehicle Licence – for example, see <http://driving-school.com.my/driving-license/how-to-secure-a-malaysian-public-service-vehicle-license/>
 - A special licence or permit – such as a Bus Driver's Vocational Licence, see <http://www.lta.gov.sg/content/ltaweb/en/industry-matters/vocational-licences.html>

Slide 13

Slide No	Trainer Notes
13.	View the website for the Land Transport Office or similar in your country to view license requirements. View application pre-requisites on next slide.

Slide

1.2 Identify the driver's licence(s) that need to be obtained

Application pre-requisites

- Always check with local Authorities when applying for any driving licence as requirements may:
 - Change over time
 - Vary between countries
- Indicative pre-requisites when applying for a driving licence may be:
 - To make application on a nominated form
 - To pay a stated fee
 - ...continued in TM

Slide 14

Slide No	Trainer Notes
14.	Discuss application requirements in your country. View a website or have a copy of an application form for viewing. Review the points in the TM.

Slide

1.3 Undertake training to obtain the necessary licence(s)

- Training is generally:

- Arranged at a time to suit the individual
- Paid for on a per session basis
- Conducted in the local area
- Tailored to suit the individual needs and experience
- Organised to cover a range of different driving conditions....
- Courses are generally conducted at scheduled and regular dates....

Slide 15

Slide No	Trainer Notes
15.	• Inform trainees on context of gaining a driver's license. Obtained through: ▪ Private companies operating as licensed Driving schools or Driving Centres ▪ Licensed individuals operating as private driving instructors • Dual-control cars may be used • Review the points on the slide and discuss further based on what is provided in your local area if known.

Slide

1.3 Undertake training to obtain the necessary licence(s)

● Learner drivers

When holding a Learner's permit/licence there **may** be a need for the driver to:

- Display 'L' plates ...
- Be accompanied at all times by a fully qualified driver...
- Observe restrictions...
- Not tow a trailer
- Have zero blood alcohol

Slide 16

Slide No	Trainer Notes
16.	• Working from TM review points listed here and discuss further as they apply to your country • What drink driving laws apply?

Slide

1.3 Undertake training to obtain the necessary licence(s)

- Driver training theory:
 - Basic rules and responsibilities
 - Alcohol, drugs, medicine and driving
 - Need for and use of seat belts
 - Meaning of road signs
 - ...continued in TM

Slide 17

Slide No	Trainer Notes
17.	• Elaborate on these points as needed • The theory component may address topics such as: ▪ Basic rules and responsibilities ▪ Alcohol, drugs, medicine and driving ▪ Need for and use of seat belts ▪ Meaning of road signs ▪ Speed limits ▪ Give way rules ▪ Road marking ▪ Traffic control/traffic lights ▪ Road courtesy ▪ Safe and/or defensive driving ▪ Parking ▪ Offences and penalties ▪ Legal responsibilities.

Slide

1.3 Undertake training to obtain the necessary licence(s)

Driver training practical:

- Pre-drive checks
- Basic level tasks
- Advanced level tasks
- Using manual and automatic transmission vehicles
- It can also be a requirement the Learner attains a minimum of prescribed experience...

Slide 18

Slide No	Trainer Notes
18.	• Have trainees highlight or add any notes in their TM as discussed • Pre-drive checks – where the controls of the vehicle are identified, set and/or checked/verified • Basic level tasks – such as driving in light traffic and: ▪ Starting and travelling at an appropriate speed relative to the conditions and the posted speed limit ▪ Stopping as and when required maintaining an appropriate distance between vehicles ▪ Observing traffic, pedestrians and other road users ▪ Turning left and right using indicators as required ▪ Changing lanes and staying in the correct lane ▪ Reverse parking ▪ Executing a three-point turn ▪ Demonstrating overall control of vehicle

- | | |
|--|--|
| | <ul style="list-style-type: none">• Advanced level tasks – such as driving in heavy traffic and:<ul style="list-style-type: none">▪ All the above▪ Merging with other traffic▪ Refer to TM for remaining notes. Discuss if there is any requirement for a learner logbook or prescribed experience in your country or neighbouring countries should you cross any borders whilst driving as a learner. |
|--|--|

Slide

1.4 Undertake driver licence assessment successfully

Possible pre-requisites

- Properly and fully completed application form
- Payment of a fee
- Evidence of successful completion of a nominated driver training course
- Proof of identity or age
- Evidence of having held a nominated other/lower classification of licence for a stated period

Slide 19

Slide No	Trainer Notes
19.	• Review additional material in TM and discuss as relevant to your location • Confirm requirements for Work Project 1.1.

Slide

1.4 Undertake driver licence assessment successfully

● Standard requirements

- Medical report
- Copy of passport and/or work or other visa
- Satisfactory completion of both a Theory test
- Satisfactory completion of a Practical test

● Failure

Slide 20

Slide No	Trainer Notes
20.	• Continue from previous slide • Failure retest/re-sits may have particular requirements you should discuss for your location • Confirm requirements for Work Project 1.1 • Ensure all work projects have been completed • Review the summary page for Element 1 to confirm what has been completed for this element.

Slide

Element 2: Monitor service vehicles

- 2.1 Perform regular preventative maintenance and operational checks of designated vehicles
- 2.2 Complete and retain service reports as required
- 2.3 Adhere to scheduled maintenance and service requirements as set out by the vehicle manufacturer
- 2.4 Conduct special checks and service after designated trips
- 2.5 Check performance and efficiency of vehicle during operation
- 2.6 Undertake minor routine repairs

Slide 21

Slide No	Trainer Notes
----------	---------------

21.	Trainer introduces the performance criteria for Element 2.
-----	--

Slide

2.1 Perform regular preventative maintenance & operational checks of designated vehicles

This section examines the practice of conducting visual inspections and describes a range of checks which are commonly made.

● Important points

- This unit is not intended to provide the training needed for becoming a fully-qualified/A-grade mechanic
- The manual and the notes cannot address the requirements for all types, makes and models of service vehicles
- Cleaning is an important element
- Inspections/checks

Slide 22

Slide No	Trainer Notes
22.	Following the TM, clarify what this manual is and is not aiming to achieve.

Slide

2.1 Perform regular preventative maintenance & operational checks of designated vehicles

Vehicle inspection checklist

- Checking and topping up fluid levels
- Checking vehicle tyres
- Checking vehicle lights
- Checking all vehicle glass, inside and out
- Checking seatbelts fitted to the vehicle:
 - www.transport.tas.gov.au/standards/

Slide 23

Slide No	Trainer Notes
23.	Take time to work through all of the points listed in the TM and ensure trainees understand each check and its relevance or importance. (You may be able to arrange access to a vehicle for this section of training and have trainees demonstrate the points to check). View the website and discuss as relevant.

Slide

2.1 Perform regular preventative maintenance & operational checks of designated vehicles

In addition

- Conducting a physical test of the brakes:
 - http://smartdriving.co.uk/Driving/Driving_emergencies/Brakes_fail.htm
- Check and test communication facilities
- Check security features
- Starting the vehicle and running the motor
- Check maintenance reports from previous trips

Slide 24

Slide No	Trainer Notes
24.	Follows on from previous slide. Discuss each point and its relevance or importance in the check. If you do not have a vehicle to physically go through a check, display appropriate images to the group so they are able to associate the steps with visual images or diagrams. View the website and discuss as relevant.

Slide

2.2 Complete and retain service reports as required

Tour Operators who operate their own vehicles will require their drivers to complete and retain paperwork:

- **Completing the internal documents**

- 'Service Report' form/log
- 'Defect Report'
- 'Request for Service/Maintenance'.

- **Websites**

- download.microsoft.com/download/9/d/c/.../Vehicle_Repair_Log.xls – Vehicle repair log
- <http://www.vertex42.com/ExcelTemplates/vehicle-maintenance-log.html> - Vehicle maintenance log

Slide 25

Slide No	Trainer Notes
25.	Have samples of paperwork available for viewing and discussion. Good and bad examples where possible. Follow TM and ensure understanding of each step. A sample maintenance log is available on the website.

Slide

2.3 Adhere to scheduled maintenance and service requirements as set out by the vehicle manufacturer

- Generic requirements:
 - Vehicles must be serviced at nominated times – as appropriate, designated by either:
 - Distance travelled, or
 - Operating hours
- Sample requirements

Slide 26

Slide No	Trainer Notes
26.	Have discussion regarding associated points listed in TM. Check any trainee knowledge or experience in these areas. There are several more links that may be worth viewing within the attached link on this slide. Have available any sample documentation to show trainees.

Slide

2.4 Conduct special checks and service after designated trips

This section details activities involved in the inspection process.

Post-trip checks

Internal checks

- <https://www.youtube.com/watch?v=m2B57fxQSP4> – RainX windshield rain repellent test and review
- Polishing chrome and fittings
- Applying tyre black

Slide 30

Slide No	Trainer Notes
30.	<i>Continues from previous slide</i> Discuss the points as listed in the TM and view the associated web link as appropriate. Take time to review and run quiz questions at the end of each task to ensure trainees are retaining key points and steps. If possible arrange for a vehicle to demonstrate actual tasks.

Slide

2.5 Check performance and efficiency of vehicle during operation

A standard requirement for vehicle drivers is the need for them to monitor the performance and efficiency of the vehicles they drive:

- Ways to monitor vehicle performance and efficiency

Slide 31

Slide No	Trainer Notes
31.	Discuss the topics and associated points listed in the TM. Have trainees share their knowledge and experience for each point.

Slide

2.5 Check performance and efficiency of vehicle during operation

Calculating fuel consumption

- To calculate fuel consumption (in terms of kilometres per litre) simply divide distance travelled by fuel used.

For example:

- Distance travelled = 875 kilometres
- Fuel used = 294 litres
- $875 \div 294 = 2.98 \text{ km/L}$
- <https://motormouth.com.au/myvehicle/consumptioncalculator.aspx>
- http://calculator-converter.com/l_100km_calculate_l_100_km_fuel_efficiency_consumption_economy_calculator.php

Slide 32

Slide No	Trainer Notes
32.	Provide some sample calculations for trainees to complete. View websites for further discussion points.

Slide

2.6 Undertake minor routine repairs

Important notes

- Performing repairs to vehicles which are still under warranty can void the warranty
- The actual work required may differ between makes and models of vehicles
- Always read Owner's manual or Workshop manual
- Obtain the right parts before starting the job
- ...continued in TM

Slide 33

Slide No	Trainer Notes
33.	Discuss each point detailing why it needs to be remembered. Important notes In relation to this section it is vital those undertaking repairs note: ● Performing repairs to vehicles which are still under warranty can void the warranty – so there is a need to check this before proceeding any further ● The actual work required may differ between makes and models of vehicles – the procedures listed in the notes are indicative only ● Always read Owner's manual or Workshop manual to determine exact specifications for individual vehicles ● Obtain the right parts before starting the job ● Obtain and use the right tool/s for the job ● Work steadily – never rush a job ● Check the surrounding areas/sections for debris and/or damage at the same time – and respond as indicated ● Never be afraid of asking for help, advice or direction from a more qualified or experienced person or head office.

Slide

2.6 Undertake minor routine repairs

Replacing blown globes

Slide

2.6 Undertake minor routine repairs

Tyre inflation

- When punctures have been repaired the tyre may need to be inflated
- This may be achieved using:
 - An external pump powered by the electrics of the vehicle
 - An on-board tyre inflation system – as shown at https://www.youtube.com/watch?v=xTTbt2IDh_I
 - Tyre inflator at a garage/service station

Slide 44

Slide No	Trainer Notes
44.	The procedure for this task is listed in the TM for discussion. It would be appropriate to demonstrate this task on a vehicle if possible. Web links are attached for inclusion according to trainers preference: • Ensure all work projects have been completed • Review the summary page for Element 2 to confirm what has been completed for this element.

Slide

Element 3: Monitor road conditions

- 3.1 Assess road conditions
- 3.2 Assess traffic conditions
- 3.3 Feedback information about road and traffic conditions to head office
- 3.4 Identify factors that may cause delays or route deviations
- 3.5 Factor conditions into choice of route to be taken
- 3.6 Read a map

Slide 45

Slide No	Trainer Notes
45.	Trainer introduces the performance criteria for Element 3.

Slide

3.1 Assess road conditions

All drivers need to assess road and traffic conditions on an ongoing basis.

- **Need to monitor and assess**

- An idea of the conditions to be expected can be obtained
- The optimum route can be selected
- An alternate route can be chosen if necessary
- Driving times can be calculated
- The driver can decide which vehicle type needs to be taken

Slide 46

Slide No	Trainer Notes
46.	Have trainees close their manuals. In small groups have them brainstorm aspects of road conditions and traffic. Provide a time limit to see which group can develop the most in-depth list (WITHOUT referring to the TM). Once completed have the groups present to the class and cross check against their own list. Once completed refer to TM for any details missed.

Slide

3.2 Assess traffic conditions

Evaluating traffic conditions

- Be aware of the volume of traffic on the road
- Judge need to slow average travel speed
- Note the proximity of other vehicles
- Assess the speed of other road users
- Be familiar with the type of other vehicles using the road
- Use the extra height of the vehicle to look above cars/other traffic to 'see ahead'

Slide 47

Slide No	Trainer Notes
47.	Discuss safety issues and assessing traffic conditions. Call on trainee knowledge and experience. Have trainees explain their understanding of the bullet points and how they would consider these issue and adjust driving accordingly to maintain safety.

Slide

3.3 Feedback information about road and traffic conditions to head office

Standard practice in the industry is for drivers to provide information back to head office and other drivers regarding actual road and traffic conditions they are experiencing.

Ways to provide feedback

- Feedback about road and traffic conditions is usually provided:
 - Using the two-way radio on board the vehicle
 - Using driver cell phone – in compliance with local laws regarding use of these when driving a vehicle

Slide 48

Slide No	Trainer Notes
48.	Discuss the importance of staying in communication with relevant parties. Discuss points from TM in further detail and as needed.

Slide

3.3 Feedback information about road and traffic conditions to head office

Need to feedback information

- Keep head office up-to-date regarding their progress
- Provide up-to-date advice for other drivers
- Give road and weather reports

Slide 49

Slide No	Trainer Notes
49.	• Discuss points from TM in further detail and as needed • Have trainees close manuals for next task (3.4).

Slide

3.4 Identify factors that may cause delays or route deviations

There is always the potential for vehicles to be delayed for some reason or to have to take an alternate route:

- Factors with the potential to cause delays

Slide 50

Slide No	Trainer Notes
50.	• Brainstorm what factors may cause delays. Aim to do this without using the TM at this point • Refer to this once suggestions have been exhausted • Activity – In small groups, allocate an origin destination (have several pre-selected to allocate from) your tour vehicle is returning from. Identify a head office location for a tour company which is to be your return location • Have the groups identify the most direct and efficient route to the head office. Once complete have them indicate an alternative route they may be required to use due to traffic or some other problem • Is it likely to add any additional time to the journey?

Slide

3.5 Factor conditions into choice of route to be taken

● Actions and considerations

- Safety of the passengers is always the primary consideration
- Taking a shorter way than the road identified on the itinerary
- Safety of the vehicle – night driving
- Keeping passengers informed about what is happening
- Revising scheduled/advertised inclusions

Slide 51

Slide No	Trainer Notes
51.	• This performance criteria links with the previous two (road and traffic conditions) • Consider the factors discussed so far and determine if there are additional factors identified here that also need to be considered • Review the bullet points in the TM.

Slide

3.6 Read a map

- Basic requirements
 - Use a dedicated road map
 - Obtain the latest version of the map for the area
 - Never read the map when driving
 - Check out the map and learn its features
- Using the map to determine a route

Slide 52

Slide No	Trainer Notes
52.	● Discuss the points as listed in the TM. Have a variety of road maps available for trainees to check their map reading skills. Ensure they can interpret the legend and scale on the map and locate the compass image for overall direction? ● Ensure all work projects have been completed ● Review the summary page for Element 3 to confirm what has been completed for this element.

Slide

Element 4: Drive vehicles

- 4.1 Demonstrate basic operational driving practices
- 4.2 Demonstrate practices related to the towing of a trailer
- 4.3 Demonstrate reversing practices
- 4.4 Demonstrate parking and shutting down procedures
- 4.5 Identify and modify driving techniques to accommodate driving hazards
- 4.6 Modify driving style to accommodate identified vehicle problems and faults
- 4.7 Follow emergency procedures

Slide 53

Slide No	Trainer Notes
53.	Trainer introduces the performance criteria for Element 4.

Slide

4.1 Demonstrate basic operational driving practices

Standard driving

- Basic operational driving practices must include:
 - Compliance with host country driving rules and regulations
 - Demonstrated competency under normal driving conditions and touring conditions
 - Realisation a licence to drive a car does not entitle the holder to drive a bus/coach
 - ...See further points in TM

Slide 54

Slide No	Trainer Notes
54.	• The following section requires the use of a vehicle for demonstration purposes and practice tasks • Review the above listed points and proceed to identify and discuss further associated points in TM ensuring questioning and inclusion of trainees to confirm understanding • This topic requires demonstration by trainees so access to a suitable vehicle for training is required.

Slide

4.1 Demonstrate basic operational driving practices

Websites

- <https://www.youtube.com/watch?v=K6fT1D2-YYI> – Driving safely: defensive driving in a dangerous world
- <https://www.youtube.com/watch?v=tBlm4AV4ovw> – Car driving safety tips: Auto Care Series
- <http://www.qld.gov.au/transport/licensing/getting/education/videos/> – Safe driving videos, including:
 - Pre-drive vehicle safety check
 - Getting comfortable in the car
 - Basic driving techniques
 - Safe driving skills
 - Looking out for hazards
 - Getting through roundabouts
 - Safe stopping distances

Slide 55

Slide No	Trainer Notes
55.	• Take time to view websites. Substitute for suitable local versions as available • This topic requires demonstration by trainees so access to a suitable vehicle for demonstration and training is required.

Slide

4.1 Demonstrate basic operational driving practices

Off-road driving

- Ensure the vehicle has been properly prepared for the conditions
- Undertake basic checks
- Inspect or consider the way ahead
- Always be prepared
- Consider passenger safety
- Engage four-wheel drive

Slide 56

Slide No	Trainer Notes
56.	Talk through what is involved with each of these points. Have an appropriate vehicle to demonstrate with or alternatively have suitable film clips to support discussion.

Slide

4.1 Demonstrate basic operational driving practices

Driving on sand

- Preparing for sand

When preparing for soft sand:

- Lower tyre pressure of 4WD vehicle
- Lower tyre pressure of trailer
- <http://www.offroadaussie.com/2013/02/4wd-tips-and-tricks-tyre-pressure/> - 4WD tricks and tips: tyre pressure

Slide 57

Slide No	Trainer Notes
57.	Discuss the effect of lowering tyre pressure. Use a pressure gauge and demonstrate how to do this. View the website and discuss further.

Slide

4.1 Demonstrate basic operational driving practices

Driving on hard sand

- Techniques for driving a 4WD on hard sand include:
 - Reduce tyre pressure slightly
 - Engage 4WD – which may require locking in hubs
 - Select High range
 - Drive off choosing gear/s appropriate to conditions,
 - Travel at a reduced speed
 - Avoid contact with salt water wherever possible
 - Re-inflate tyres when sand driving is completed

Slide 58

Slide No	Trainer Notes
58.	Explain hazards and difficulties that may be encountered when driving on sand (hard and soft). Enquire about any experience within the room.

Slide

4.1 Demonstrate basic operational driving practices

Driving on soft sand

- Deflate tyres – to around 16 psi/110kPa or lower depending on sand depth/condition
- Attach sand/warning flags to the vehicle if driving in areas where there are hills/dunes – to help indicate location of the vehicle to others in the area
- Check recovery gear is available – to use should the vehicle become stuck
-additional points in TM

Slide 59

Slide No	Trainer Notes
59.	Review all key points listed in TM. Emphasise safety aspects. Vehicle rollover/getting stuck. A number of websites are listed on the next slide. View these in between discussing key points to maintain trainee interest and highlight key information.

Slide

4.1 Demonstrate basic operational driving practices

Websites

Slide 60

Slide No	Trainer Notes
60.	Use links to present “how to” video clips to class.

Slide

4.1 Demonstrate basic operational driving practices

Driving on very soft ground or through mud

Techniques/indicative action includes:

- Inspecting the route
- Dropping tyre pressure
- Engaging 4WD
- Locking diffs
- Selecting low range

Slide 61

Slide No

Trainer Notes

61.

Ask any drivers in the class to describe their experiences driving in soft ground or mud.

Slide

4.1 Demonstrate basic operational driving practices

Driving on very soft ground or through mud

- Entering the mud at a slow to moderate speed
- Using or not using ruts as appropriate
- Maintaining momentum
- Spinning tyres
- Being prepare to stop, reverse and re-try a route if progress is halted
- Moving the steering wheel left-to-right

Slide 62

Slide No	Trainer Notes
62.	Discuss techniques and skill required in controlling and driving the vehicle. Seek any experience within the room to share relevant experience. View the following web links intermittently to support discussion and provide visual example.

Slide

4.1 Demonstrate basic operational driving practices

Websites

- <http://4xoverland.com/how-do-4x4s-work/4x4-driving/> – How to drive a 4x4 off road [Mud driving]

- <http://www.iventureclub.com.au/4x4-tips/article.html?k=hmcpHxSX7pc> – 4x4 Tip: mud driving
- <http://www.tough toys.com.au/how-to-4x4/mud-driving-techniques/> – Mud driving techniques

Slide 63

Slide No

Trainer Notes

63.

Use “how to” video clips for class group.

Slide

4.1 Demonstrate basic operational driving practices

Driving across rocky terrain

- In general, rocky terrain should be avoided wherever possible as it poses lots of risks in terms of:
 - Uncomfortable ride for passengers
 - Slow travel times
 - Punctures
 - Damage to the vehicle

Slide 64

Slide No	Trainer Notes
64.	● Discuss all points listed in teacher notes here as presented in TM. Emphasise things to remember and practise as well as safety points. Break up discussion by viewing the web links on the next slide ● Uncomfortable ride for passengers ● Slow travel times – which may negatively impact itinerary ● Punctures ● Damage to the vehicle especially the chassis and sub-structure/under-side parts of the vehicle such as diffs and fuel tanks ● When driving rocky terrain: ▪ Inspect the path – as described above ▪ Reduce pressures in tyres ▪ Engage 4WD – which may require locking in hubs ▪ Engage diff locks – if fitted and if necessary ▪ Turn off air conditioner – to avoid inconsistent engine acceleration

	▪ Begin in a manner that reflects the findings of observation – which may require, as appropriate: – Selecting Low range first or second gear – Driving slowly ('crawling') and smoothly to avoid wheel spin – Intelligently choosing the path to take to avoid traps, rocks and beaching of the vehicle ▪ Be prepared to ask passengers to get out of the vehicle – if patches of the route are dangerous ▪ Be prepared to ask passengers to act as spotters – to assist with providing directions on where to position wheels ▪ Try to stay on the high parts – straddling any ruts which may be present ▪ Re-inflate tyres when the rocky terrain has been negotiated.
--	--

Slide

4.1 Demonstrate basic operational driving practices

Websites

- <http://www.4-wheeling-in-western-australia.com/rock-crawling.html> – Rock crawling and rocky obstacles (including viewing of all videos linked to this site)
- <http://www.iventureclub.com.au/4x4-tips/article.html?k=1ImWwpAqbd0> – 4x4 tip: Rocks and ruts
- <http://www.toughtoys.com.au/how-to-4x4/driving-rocky-terrain/> – Driving rocky terrain

Slide 65

Slide No	Trainer Notes
65.	Discuss in relation to information on previous slide.

Slide

4.1 Demonstrate basic operational driving practices

Driving inclines

- Ascending steep inclines
 - Inspect the path
 - Engage 4WD
 - Engage diff locks
 - Turn off air conditioner
 -continued in TM
- Stall recovery

Slide 66

Slide No	Trainer Notes
66.	Discuss each of the points listed in TM. Some points will now start to repeat and can be used as a revision point with the group.

Slide

4.1 Demonstrate basic operational driving practices

Driving inclines

- Descending steep inclines
 - Inspect the path
 - Engage 4WD
 - Engage diff locks
 - Turn off air conditioner
 -continued in TM
- Stall recovery

Slide 67

Slide No	Trainer Notes
67.	Use the web links (on next slide) to assist with explanations and visuals as the many bullet points in the TM are reviewed. Explain the following as key details. ● Inspect the path – looking for: ▪ A suitable route through/across the track which presents itself – taking into account, for example, ruts, holes, fallen trees, rocks ▪ Surface condition – in relation to whether the ground is wet or dry and whether it is hard underfoot or soft ▪ Departure angle at the end of the incline – to ensure the vehicle can leave the incline and make it to level ground instead of being stuck half-way between the incline and the flat ground ▪ Length of the descent – in terms of the distance to be covered to complete the descent ▪ General angle/severity of the descent ▪ Possible run-off points (into banks, bushes, trees) – in case the descent becomes out-of-control ▪ The following points have been included with other sections and should now be revision points

- Engage 4WD – which may require locking in hubs
- Engage diff lock
- Turn off air conditioner – to avoid inconsistent engine acceleration.

Continue through the list of points taking time to quiz trainees at the end to ensure engagement and understanding.

Have trainees explain Stall Recovery as this was also done in previous topic.

Slide

4.1 Demonstrate basic operational driving practices

Websites

- <http://www.4x4australia.com.au/gear/1004/4x4-steep-slopes-tips/> – 4x4 steep slope tips
- <http://4xoverland.com/how-do-4x4s-work/4x4-driving/> – How to drive a 4x4 off road [Steep slopes]
- <https://www.youtube.com/watch?v=uTW3H4WBxnY> – 4WD Hill Climb Comparo
- <http://www.iventureclub.com.au/4x4-tips/article.html?k=Jem4UGra2DY> – 4x4: Tip- Steep terrain

Slide 68

Slide No	Trainer Notes
68.	Use these video clips for class presentation.

Slide

4.1 Demonstrate basic operational driving practices

Driving through water

- Know the vehicle and how deep the water can be before the vehicle begins to float
- Know how fast the water is flowing
- Know the surface to be travelled
- Know where the air intake is
- Check-out the crossing
- If in doubt, avoid the crossing

Slide 69

Slide No	Trainer Notes
69.	Many safety issues to emphasise throughout these points. Work through notes in TM having trainees add any other notes discussed. Use web links to demonstrate visually and reinforce discussion points.

Slide

4.1 Demonstrate basic operational driving practices

Standard cautions

- Be prepared to avoid the crossing if:
 - The current is too fast
 - The water is too deep
 - The approach or departure angles are too steep
 - The approach or departure is too soft or otherwise too difficult
 - The vehicle is not/cannot be adequately prepared

Slide 70

Slide No	Trainer Notes
70.	Engage trainees by asking what is likely to happen in each of these points.

Slide

4.1 Demonstrate basic operational driving practices

Driving techniques

- When driving through water there can be a need to:
 - Let the engine cool down first
 - Tie a tarpaulin across the front of the vehicle
 - Loosen the fan belt
 - Spray the motor with water repellent (WD-40) to help preserve the electrics
 -continued in TM

Slide 71

Slide No	Trainer Notes
71.	Discuss each point having trainees take notes as needed. Check for any knowledge or experience in this area. Again some points will repeat from previous topics. Use the web links (on next slide) to help break up discussion and provide visual explanations and examples.

Slide

4.1 Demonstrate basic operational driving practices

Websites

- <http://www.iventureclub.com.au/4x4-tips/article.html?k=zFA1eN-qEzg>
– 4x4 Tip: Water crossing
- <http://www.toughtoys.com.au/how-to-4x4/water-crossings/>
– Water crossings
- <https://www.youtube.com/watch?v=wNtJNuhlf4I>

- <http://www.4wdonline.com/A/Water.html> – Water crossing
- <http://www.pps.net.au/4wdencounter/4wdtech/water.html>
– 4WD Encounter Australia: River crossings

Slide 72

Slide No	Trainer Notes
72.	Web links to use with previous slides on 'water crossings'.

Slide

4.2 Demonstrate practices related to the towing of a trailer

Drivers of service vehicles are often required to tow a trailer to carry camping gear, luggage and so on:

- Loading of the trailer
- Attaching the trailer
- Towing a trailer
- Detaching the trailer from the towing vehicle
- Practical driving

Slide 73

Slide No	Trainer Notes
73.	Discuss situations when a trailer may be necessary. Discuss types of trailers that may be used for such purposes as camping gear, luggage, food supplies. Work through the steps for each topic verbally explaining any equipment or terminology. This criteria requires a demonstration so a vehicle, trailer and associated equipment will need to be sourced.

Slide

4.3 Demonstrate reversing practices

Standard road and travel conditions will mean there can be a need to reverse the vehicle:

● Key points when reversing:

- <http://www.qld.gov.au/transport/licensing/getting/education/videos/> - Safe driving videos: 'The reverse park'
- <https://www.youtube.com/watch?v=FzNRQFhSSk>
– How to reverse your car correctly
- https://www.youtube.com/watch?v=orDT9Sm_Y1I
– Driving 101: how to reverse into a parking space
- <https://www.youtube.com/watch?v=TOMUo7LXE68>
– How to drive a car in reverse gear easily

Slide 74

Slide No	Trainer Notes
74.	● Share knowledge and experience within the group. Discuss finer details of reversing and safety points working with points listed in TM ● View web links as appropriate ● Demonstrate in a vehicle ● This criteria requires a demonstration so a vehicle will need to be sourced.

Slide

4.3 Demonstrate reversing practices

- Reversing a trailer
- Practical driving
- Websites:

- <https://www.youtube.com/watch?v=cqW73F8CbXM>
– How to reverse a trailer
- <https://www.youtube.com/watch?v=jo0MLjY8ppU>
– Towing: how to back-up and park a trailer

Slide 75

Slide No	Trainer Notes
75.	● Demonstrate the correct procedure for reversing ● Ensure trainees are able to verbalise each step and demonstrate ● View web links to support training ● Complete practical aspects with each trainee.

Slide

4.4 Demonstrate parking and shutting down procedures

All vehicles need to be shut down and parked when they arrive at destinations and/or return back to base:

- Parking and shutting down

Slide 76

Slide No	Trainer Notes
76.	• Demonstrate the correct procedure for parking and shutting down the vehicle at the end of a shift. Use notes in TM as a guide • Remind trainees while some steps are general others may be specific to the company you are working for • Ensure trainees are able to verbalise each step and demonstrate • View web links to support training.

Slide

4.4 Demonstrate parking and shutting down procedures

Websites

- <https://www.youtube.com/watch?v=PtygeD4t6ig>
– How to park a car
- <https://www.youtube.com/watch?v=199QsWyBhpo>
– Parallel parking lesson
- <https://www.youtube.com/watch?v=-8AAciq3wqo>

- <https://www.youtube.com/watch?v=BF44oWTY47M>
– Bay parking on driving lessons

Slide 77

Slide No	Trainer Notes
77.	Web links to use in conjunction with notes.

Slide

4.5 Identify and modify driving techniques to accommodate driving hazards

Identification of hazards

- Wet and iced roads
- Oil on the road
- Animals and objects on the road
- Parked vehicles on the road
- Pedestrians on and crossing the road
- Flooded roads
- Windy sections of a road
- Reduced visibility

Slide 78

Slide No	Trainer Notes
78.	• Each topic has multiple associated points to review in the TM. Discuss with trainees and have them highlight points and make notes as needed • Seek input from trainees regarding knowledge and experience.

Slide

4.6 Modify driving style to accommodate identified vehicle problems and faults

Standard responses

The basic responses to driving a vehicle with an identified fault include:

- Adherence to company policies as they apply to various situations
- Never put the safety of passengers or other road users at risk
- Use common sense
- Remember the Duty of Care owed by drivers to others
- Notify the Tour Operator and advise of the problem

Slide 79

Slide No	Trainer Notes
79.	• Ensure trainees understand what is 'Duty of Care'. (In detail on next slide) • Discuss each of the Important notes in detail as needed.

Slide

4.6 Modify driving style to accommodate identified vehicle problems and faults

- Duty of Care:
 - Consequences of failing to meet Duty of Care obligations
- Important notes

Slide 80

Slide No	Trainer Notes
80.	Emphasise the responsibility involved with duty of care. Duty of Care Common law imposes an obligation on all vehicle drivers to: ● Create and maintain a touring environment that does not pose a risk to people (staff, members of the public, customers) ● Take action to avoid causing foreseeable harm to people/customers/tour group members or their property/belongings while they are on tour ● Avoid engaging in risky behaviour or actions which will pose a threat to anyone. In practice this means the driver needs to/has responsibility for ensuring: ● The vehicle is safe/roadworthy when it departs ● The safety/roadworthiness of the vehicle is maintained through the trip ● All road rules and speed limits are obeyed ● The vehicle is driven in a safe and responsible manner ● Obvious risks are avoided or controlled ● Passengers are informed about potential risks/hazards ● Passengers comply with safety rules

- Cargo is stored/stowed appropriately – which may require:
 - Re-packing/re-locating items for off-road 4-wheel drive travel to attain a lower centre of gravity for the vehicle
 - Placing items behind physical protection barriers – or otherwise securing them to prevent injuring people or causing vehicle damage.

Consequences of failing to meet Duty of Care obligations

If drivers fail to meet their Duty of Care obligations:

- They may be sued by passengers/those they injure or who lose property for negligence
- The Tour Operator they work may be sued for not discharging their Due Diligence obligations by properly training their drivers.

The outcomes of successful civil claims for negligence are commonly the awarding of money ('damages') to the person who has been injured or suffered loss.

Review notes for Important Points. Check for any questions or queries from trainees.

Slide

4.7 Follow emergency procedures

Dangerous vehicle emergencies

- There are three vehicle emergencies that can be very dangerous:
 - Brake failure
 - Tyre failure
 - Fires

Slide 82

Slide No	Trainer Notes
81.	Emphasise the following points and discuss in greater detail as needed.

Slide

4.7 Follow emergency procedures

Dangerous vehicle emergencies

- There are three vehicle emergencies that can be very dangerous:
 - Brake failure
 - Tyre failure
 - Fires

Slide 82

Slide No	Trainer Notes
82.	• Take time to have adequate discussion on these dangerous situations. Review the TM notes as you go • Again encourage trainees to share any relevant knowledge or experience • After discussion is completed quiz trainees on their knowledge by asking questions regarding various procedures or strategies.

Slide

4.7 Follow emergency procedures

- Vehicle breakdown
- In the event of a collision:

<https://www.vicroads.vic.gov.au/searchresultpage?q=bus%20inspection>

- What you must do at a crash
- Protect the area
- Notify authorities

Slide 83

Slide No	Trainer Notes
83.	• Discuss the procedure currently known within the group for dealing with these situations • Correct any knowledge or procedures that may be incorrect • Review each of the points within the TM and confirm all trainees are familiar with correct general procedures as listed. Company policy would also be incorporated • Ensure all work projects have been completed • Review the summary page for Element 4 to confirm what has been completed for this element.

Slide

The End

This unit comprised four Elements:

Element 1: Obtain driver's licence(s)

Element 2: Monitor vehicle

Element 3: Monitor road conditions

Element 4: Drive vehicles

You have now completed this unit and the trainer will provide details on assessment.

Slide 84

Slide No	Trainer Notes
84.	Trainer advises learners on what assessment is required and how it is to be conducted.

Recommended training equipment

- Vehicles on which to practice/demonstrate maintenance and minor repairs – selection should embrace:
 - Two-wheel drives
 - Four-wheel drives
 - Coaches
 - Trailers – complete with draw bar, lights, electrical fittings, jockey wheel, chains
 - Petrol engines
 - Diesel motors
- Range of large and small hand and electrical tools and specialist equipment/tools required to perform maintenance and undertake repairs:
 - Wrenches – various sizes, imperial and metric
 - Torque wrench
 - Adjustable, open end, box end (6 and 12 sided) wrenches
 - Combination wrenches
 - Ratchets – various sizes, imperial and metric
 - Standard sockets – various sizes, imperial and metric
 - Spark plug sockets
 - Impact sockets
 - Pliers
 - Slip joint pliers
 - Locking pliers
 - Groove joint pliers
 - Needle nose pliers
 - Diagonal cutting pliers
 - Screwdrivers – range of sizes and lengths, flat-head and Phillips head
 - Hammers – ball peen, rubber
 - Pry bars – different sizes/lengths
 - Slide hammer bars
 - Vehicle hoist
 - Wheel jacks – different types: scissor, bottle, pneumatic; trolley
 - Vehicle ramps
 - Wheel chocks
 - Jack stands
 - Tyre pressure gauge

- Tread depth gauge
- Four-way tyre tool
- Measuring rulers and tapes – metric and imperial
- Coolant tester
- Sparkplug gauge
- Feeler gauge
- Calipers
- Micrometers
- Dial indicators
- Multi-meters
- Fuse pullers
- Wire strippers
- Battery load tester
- Jumper cables
- Battery terminal puller
- Battery brush
- Battery terminal spreader
- Oil drain pan
- Oil filter wrench
- Funnel – different sizes/shapes
- Grease guns
- Hacksaw
- Grinder
- Chisels
- Punches
- Files
- Hex keys/Allen keys
- Compressors – for driving pneumatic equipment and for tyre inflation
- Vice
- Range of replacement parts/spare parts:
 - Spark plugs
 - Glow plugs
 - Range of nuts, bolts, screws, connectors, electrical wire, fuses
 - HT leads
 - Fan belts and other engine drive belts
 - Radiator hoses – top and bottom

- Oil filters
- Fuel filters
- Tyres and tubes
- Tyre cores and caps
- Tyre repair kits
- Range of globes
- Mirrors
- Reflectors
- Windscreen wiper blades
- Fuel – petrol, diesel, LPG
- Range of grease, engine oils, brake fluids, transmission fluids, power steering fluid, coolant, anti-freeze
- EPIRB (Emergency Position Indicating Radio Beacon)
- GPS (Global Positioning System)
- Two-way radios
- Public address systems
- Vehicle fire extinguishers
- Baggage and cargo restraints – different types and sizes for a range of vehicles
- Samples/examples of:
 - Warranties and guarantees
 - Service manuals
 - Owner manuals
 - Workshop manuals
 - Repair manuals
 - Documentation completed when a vehicle has been serviced, repaired and/or maintained
 - Inspection checklists
 - Service reports/logs/forms
 - Material Safety Data Sheets
 - Workplace safety signs and GHS pictograms
 - SOPs and SWPs
- Safety clothing and equipment (PPE) required for undertaking vehicle repairs/service
- Copies of host country legislation that applies to the maintenance of commercial vehicles used for passenger transport.

It can be useful to watch <https://www.youtube.com/watch?v=0b7XfJJ6Kcl> – Tools of the small engine mechanic.

Instructions for Trainers for using PowerPoint – Presenter View

Connect your laptop or computer to your projector equipment as per manufacturers' instructions.

In PowerPoint, on the **Slide Show** menu, click **Set up Show**.

Under Multiple monitors, select the Show Presenter View check box.

In the **Display slide show** on list, click the monitor you want the slide show presentation to appear on.

Source: <http://office.microsoft.com>

Note:

In Presenter View:

You see your notes and have full control of the presentation

Your trainees only see the slide projected on to the screen

More Information

You can obtain more information on how to use PowerPoint from the Microsoft Online Help Centre, available at:

<http://office.microsoft.com/training/training.aspx?AssetID=RC011298761033>

Note Regarding Currency of URLs

Please note that where references have been made to URLs in these training resources trainers will need to verify that the resource or document referred to is still current on the internet. Trainers should endeavour, where possible, to source similar alternative examples of material where it is found that either the website or the document in question is no longer available online.
