Competency Based Assessment (CBA) – An Introduction for Assessors

Assessment is the process of identifying a participant's current knowledge, skills and attitudes sets against all elements of competency within a unit of competency.

Suggested Assessment Methods

For each unit of competency a number of assessment tools have been identified including:

- Work Projects
- Oral Questions
- Written Questions
- Third Party Statements
- Observation Checklists.

Instructions and Evidence Recording Sheets have been identified in this Assessment Manual for use by Assessors.

Alternative Assessment Methods

Whilst the above mentioned assessment methods are suggested assessment methods, the assessor may use an alternate method of assessment taking into account:

- a) The nature of the unit
- b) The strengths of participants
- c) The number of participants in the class
- d) Time required to complete assessments
- e) Time dedicated to assessment
- f) Equipment and resources required.

Alternate assessment methods include:

- Practical demonstrations
- Practical demonstrations in simulated work conditions
- Problem solving
- Portfolios of evidence
- Critical incident reports
- Journals
- Oral presentations
- Interviews
- Videos
- Visuals/slides/audiotapes

- Case studies
- Log books
- Projects and Role plays
- Group projects
- Recognition of Prior Learning.

Whilst there is no specific instruction or evidence collection documents for all the alternative assessment methods, assessors can record competency in the 'Other' section within the 'Competency Recording Sheet'.

Selection of Assessment Methods

Each assessor will determine the combination of Assessment Methods to be used to determine Competency for each Competency Unit on a student by student basis.

'Sufficient' evidence to support the 'Pass Competent'/'Not Yet Competent' decision must be captured.

In practice this means a minimum of 2 – 3 Assessment Methods for each candidate for each Competency Element is suggested.

At least one method should provide evidence of practical demonstration of competence.

The following assessment methods deemed to provide evidence of practical demonstration of competence include:

- Practical Work Projects
- Third Party Statement
- Observation Checklist.

Assessing Competency

Competency based assessment does not award grades, but simply identifies if the participant has the knowledge, skills and attitudes to undertake the required task to the specified standard.

Therefore, when assessing competency, an assessor has two possible results that can be awarded:

- 'Pass Competent' (PC)
- 'Not Yet Competent' (NYC).

Pass Competent (PC)

If the participant is able to successfully answer or demonstrate what is required, to the expected standards of the performance criteria, they will be deemed as 'Pass Competent' (PC).

The assessor will award a 'Pass Competent' (PC) if they feel the participant has the necessary knowledge, skills and attitudes in all assessment tasks for a unit.

Not Yet Competent' (NYC)

If the participant is unable to answer or demonstrate competency to the desired standard, they will be deemed to be 'Not Yet Competent' (NYC).

This does not mean the participant will need to complete all the assessment tasks again. The focus will be on the specific assessment tasks that were not performed to the expected standards.

The participant may be required to:

- a) Undertake further training or instruction
- b) Undertake the assessment task again until they are deemed to be 'Pass Competent'.

Regional Qualifications Framework and Skills Recognition System

The 'Regional Qualifications Framework and Skills Recognition System', also known as the 'RQFSRS' is the overriding educational framework for the ASEAN region.

The purpose of this framework is to provide:

- A standardised teaching and assessment framework
- Mutual recognition of participant achievement across the ASEAN region. This includes achievement in individual Units of Competency or qualifications as a whole.

The role of the 'RQFSRS' is to provide, ensure and maintain 'quality assurance' across all countries and educational providers across the ASEAN region.

Recognition of Prior Learning (RPL)

Recognition of Prior Learning is the process that gives current industry professionals who do not have a formal qualification, the opportunity to benchmark their extensive skills and experience against the standards set out in each unit of competency/subject.

This process is a learning and assessment pathway which encompasses:

- Recognition of Current Competencies (RCC)
- Skills auditing
- Gap analysis and training
- Credit transfer.

Code of Practice for Assessors

This Code of Practice provides:

- Assessors with direction on the standard of practice expected of them
- Candidates with assurance of the standards of practice expected of assessors
- Employers with assurance of the standards maintained in the conduct of assessment.

The Code detailed below is based on the International Code of Ethics and Practice (The National Council for Measurement in Education [NCME]):

- The differing needs and requirements of the person being assessed, the local enterprise and/or industry are identified and handled with sensitivity
- Potential forms of conflict of interest in the assessment process and/or outcomes are identified and appropriate referrals are made, if necessary
- All forms of harassment are avoided throughout the planning, conducting, reviewing and reporting of the assessment outcomes

- The rights of the candidate are protected during and after the assessment
- Personal and interpersonal factors that are not relevant to the assessment of competency must not influence the assessment outcomes
- The candidate is made aware of rights and process of appeal
- Evidence that is gathered during the assessment is verified for validity, reliability, authenticity, sufficiency and currency
- Assessment decisions are based on available evidence that can be produced and verified by another assessor
- Assessments are conducted within the boundaries of the assessment system policies and procedures
- Formal agreement is obtained from both the candidate and the assessor that the assessment was carried out in accordance with agreed procedures
- The candidate is informed of all assessment reporting processes prior to the assessment
- The candidate is informed of all known potential consequences of decisions arising from an assessment, prior to the assessment
- Confidentiality is maintained regarding assessment results
- The assessment results are used consistently with the purposes explained to the candidate
- Opportunities are created for technical assistance in planning, conducting and reviewing assessment procedures and outcomes.

Instructions and Checklist for Assessors

Instructions

General instructions for the assessment:

- Assessment should be conducted at a scheduled time that has been notified to the candidate
- Facilitators must ensure participants are made aware of the need to complete assessments and attend assessment sessions
- If a participant is unable to attend a scheduled session, they must make arrangements with the Assessor to undertake the assessment at an alternative time
- At the end of the assessment the Assessor must give feedback and advise the participant on their PC/NYC status
- Complete the relevant documentation and submit to the appropriate department.

Preparation

- Gain familiarity with the Unit of Competency, Elements of Competency and the Performance Criteria expected
- Study details assessment documentation and requirements
- Brief candidate regarding all assessment criteria and requirements.

Briefing Checklist

- Begin the assessment by implementing the following checklist and then invite the candidate to proceed with assessment.

Checklist for Assessors

Prior to the assessment I have:	Tick (✓)	Remarks
Ensured the candidate is informed about the venue and schedule of assessment.		
Received current copies of the performance criteria to be assessed, assessment plan, evidence gathering plan, assessment checklist, appeal form and the company's standard operating procedures (SOP).		
Reviewed the performance criteria and evidence plan to ensure I clearly understood the instructions and the requirements of the assessment process.		
Identified and accommodated any special needs of the candidate.		
Checked the set-up and resources for the assessment.		
During the assessment I have:		
Introduced myself and confirmed identities of candidates.		
Put candidates at ease by being friendly and helpful.		
Explained to candidates the purpose, context and benefits of the assessment.		
Ensured candidates understood the assessment process and all attendant procedures.		
Provided candidates with an overview of performance criteria to be assessed.		
Explained the results reporting procedure.		
Encouraged candidates to seek clarifications if in doubt.		
Asked candidates for feedback on the assessment.		
Explained legal, safety and ethical issues, if applicable.		
After the assessment I have:		
Ensured candidate is given constructive feedback.		
Completed and signed the assessment record.		
Thanked candidate for participating in the assessment.		

Instructions for Recording Competency

Specifications for Recording Competency

The following specifications apply to the preparation of Evidence Gathering Plans:

- A Competency Recording Sheet must be prepared for each candidate to ensure and demonstrate all Performance Criteria and Competency Elements are appropriately assessed. This Sheet indicates how the Assessor will gather evidence during their assessment of each candidate
- This Competency Recording Sheet is located at the end of the Assessment Plan
- It is the overriding document to record competency
- The Assessor may vary the Competency Recording Sheet to accommodate practical and individual candidate and/or workplace needs
- Assessor must place a tick (✓) in the 'Assessment Method' columns to identify the methods of assessment to be used for each candidate
- Multiple Competency Elements/Performance Criteria may be assessed at the one time, where appropriate
- The assessor and participant should sign and date the Competency Recording Sheet, when all forms of evidence and assessment have been completed
- The assessor may provide and feedback or clarify questions which the participant may have in regards to the assessment grade or findings
- All documents used to capture evidence must be retained, and attached to the Competency Recording Sheet for each candidate for each Competency Unit.

Instructions for Different Assessment Methods

Specifications for Work Project Assessment

These guidelines concern the use of work projects.

The work projects identified in the Training Manuals involve a range of tasks, to be performed at the discretion of the Assessor.

Work project tasks can be completed through any form of assessment as identified in the Trainer and Trainee Manuals and stated at the start of this section.

Assessors should follow these guidelines:

- Review the Work Projects at the end of each 'Element of Competency' in the Trainee Manual to ensure you understand the content and what is expected
- Prepare sufficient resources for the completion of work activities including:
 - Time – whether in scheduled delivery hours or suggested time participants to spend outside of class hours
 - Resources – this may involve technical equipment, computer, internet access, stationery and other supplementary materials and documents
- Prepare assessment location (if done in class) making it conducive to assessment
- Explain Work Projects assessment to candidate, at the start of each Element of Competency. This ensures that participants are aware of what is expected and can collate information as delivery takes place

- Assessors can use the following phrase as a guide (where an 'X' is identified, please input appropriate information):
 "At the end of each Element of Competency there are Work Projects which must be completed. These projects require different tasks that must be completed.
 These work projects are part of the formal assessment for the unit of competency titled X:
- You are required to complete these activities:
 - Using the 'X' method of assessment*
 - At 'X' location*
 - You will have 'X time period' for this assessment*
 - You are required to compile information in a format that you feel is appropriate to the assessment
 - Do you have any questions about this assessment?"
- Commence Work Project assessment:
 - The assessor may give time for participants to review the questions at this time to ensure they understand the nature of the questions. The assessor may need to clarify questions
 - Participants complete work projects in the most appropriate format
 - Participants must submit Work Project evidence to the assessor before the scheduled due date
- Assessor must assess the participant's evidence against the competency standards specified in each Element of Competency and their own understanding. The assessor can determine if the participant has provided evidence to a 'competent' standard
- Transcribe results/details to Competency Recording Sheet
- Forward/file assessment record.

Specifications for Oral Question Assessment

These guidelines concern the use of oral questioning.

Assessors should follow these guidelines.

- Prepare Assessment Record for Oral Questioning. One record for each candidate:
 - Enter Student name
 - Enter Assessor name
 - Enter Location
- Familiarise self with Questions to be asked
- Prepare assessment location (table and chairs) making it conducive to assessment
- Explain Oral Questioning assessment to candidate, using the following phrase as a guide (where a 'X' is identified, please input appropriate information):
"These oral questions are part of the formal assessment for the unit of competency titled X.

There are X questions and you are required to answer all of them to the best of your ability and I will record whether or not you have answered correctly.

We have 60 minutes for this assessment.

- I will give you feedback at the end of the assessment
- Do you have any questions about this assessment?”
- Commence Oral Questioning assessment:
 - Complete Assessment Record for the Oral Questioning by:
 - a) Ticking PC or NYC, as appropriate
 - b) Entering ‘Remarks’ as required
 - c) Completing Oral Questioning within 60 minutes
- Complete Oral Questioning and provide feedback to candidate
- Transcribe results/details to Competency Recording Sheet
- Forward/file assessment record.

Specifications for Written Question Assessment

These guidelines concern the use of written questioning.

Assessors should follow these guidelines:

- Familiarise self with Questions and Answers provided
- Print and distribute copies of ‘Written Questions’ for participants. Ideally this should take place with adequate time for participants to answer all questions before the expected due date
- Explain Written Questioning assessment to candidate, using the following phrase as a guide (where a ‘X’ is identified, please input appropriate information):

“These written questions are part of the formal assessment for the unit of competency titled X.

There are X questions and you are required to answer all of them to the best of your ability.

You may refer to your subject materials, however where possible try to utilise your existing knowledge when answering questions.

Where you are unsure of questions, please ask the Assessor for further instruction. This may be answering the question orally or asking the assessor to redefine the question.

We have X time for this assessment:

- The due date for completion of this assessment is X
- On this date you must forward the completed questions to the assessor by X time on the date of X
- Do you have any questions about this assessment?”
- The assessor may give time for participants to review the questions at this time to ensure they understand the nature of the questions. The assessor may need to clarify questions
- Participants may record written answers (where possible)
- Participants must submit the written answers to the assessor before the scheduled due date

- Assessor must assess the participant's written answers against the model answers provided as a guide, or their own understanding. The assessor can determine if the participant has answered the questions to a 'competent' standard
- Transcribe results/details to Competency Recording Sheet
- Forward/file assessment record.

Specifications for Observation Checklist

These specifications apply to the use of the Observation Checklist in determining competency for candidates.

Only an approved assessor is authorised to complete the Observation Checklist.

The assessor is required to observe the participant, ideally in a simulated environment or their practical workplace setting and record their performance (or otherwise) of the competencies listed on the Observation Checklist for the Competency Unit.

To complete the Observation Checklist the Assessor must:

- Insert name of candidate
- Insert assessor name
- Insert identify of location where observations are being undertaken
- Insert date/s of observations – may be single date or multiple dates
- Place a tick in either the 'Yes' or 'No' box for each listed Performance Criteria to indicate the candidate has demonstrated/not demonstrated that skill
- Provide written (and verbal) feedback to candidate – as/if appropriate
- Sign and date the form
- Present form to candidate for them to sign and date
- Transcribe results/details to Competency Recording Sheet for candidate
- Forward/file Observation Checklist.

This source of evidence combines with other forms of assessment to assist in determining the 'Pass Competent' or 'Not Yet Competent' decision for the participant.

Specifications for Third Party Statement

These specifications relate to the use of a relevant workplace person to assist in determining competency for candidates.

The Third Party Statement is to be supplied by the assessor to a person in the workplace who supervises and/or works closely with the participant.

This may be their Supervisor, the venue manager, the Department Manager or similar.

The Third Party Statement asks the Supervisor to record what they believe to be the competencies of the participant based on their workplace experience of the participant. This experience may be gained through observation of their workplace performance, feedback from others, inspection of candidate's work etc.

A meeting must take place between the Assessor and the Third Party to explain and demonstrate the use of the Third Party Statement.

To complete the Third Party Verification Statement the Assessor must:

- Insert candidate name
- Insert name and contact details of the Third Party
- Tick the box to indicate the relationship of the Third Party to the candidate
- Present the partially completed form to the Third Party for them to finalise
- Collect the completed form from the Third Party
- Transcribe results/details to Competency Recording Sheet for candidate
- Forward/file Third Party Statement.

The Third Party must:

- Record their belief regarding candidate ability/competency as either:
 - Pass Competent = Yes
 - Not Yet Competent = No
 - Unsure about whether candidate is competent or not = Not Sure
- Meet briefly with the assessor to discuss and/or clarify the form.

This source of evidence combines with other forms of assessment to assist in determining the 'Pass Competent' or 'Not Yet Competent' decision for the candidate.

A separate Third Party Statement is required for each Competency Unit undertaken by the candidate.

Competency standard

UNIT TITLE: LEAD AND MANAGE A DEVELOPMENT TEAM		NOMINAL HOURS: 50
UNIT NUMBER: D2.TRM.CL9.05		
UNIT DESCRIPTOR: This unit deals with skills and knowledge required to assemble, guide and manage the operation of a work team created to address an identified development project.		
ELEMENTS AND PERFORMANCE CRITERIA		UNIT VARIABLE AND ASSESSMENT GUIDE
Element 1: Establish development team 1.1 Select suitable <i>team members</i> for the <i>development project</i> 1.2 Obtain permission from appropriate persons for the release of selected team members 1.3 Determine <i>time allocation</i> for team members to suit the development project 1.4 Describe the <i>objectives</i> for the development team 1.5 Define <i>team and individual responsibilities</i> 1.6 Define how <i>team performance will be measured</i> 1.7 Assist the members to develop plans to guide <i>the work of the team</i> 1.8 Motivate <i>team members</i>		Unit Variables The Unit Variables provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. It relates to the unit as a whole and facilitates holistic assessment. This unit applies to all industry sectors that apply in-house innovation and development activities to their organisation, products or services within the labour divisions of the hotel and travel industries and may include: 1. Travel Agencies 2. Tour Operation <i>Team members</i> may include: • Peers • Supervisors • Personnel from other areas/departments with specific skills and previously demonstrated abilities in regard to development and innovation • Subject specialists • People from outside the organisation, including consultants and subject specialists.

Element 2: Provide a model of innovative practice 2.1 <i>Explain the value placed on development activities by the organisation</i> 2.2 <i>Provide examples of previous effective and successful development activities</i> 2.3 <i>Demonstrate development activities within a relevant context</i> 2.4 <i>Lead the team by example</i> Element 3: Organise an appropriate environment for the development team 3.1 <i>Provide facilities and resources to support the development team</i> 3.2 <i>Confirm work plans with the team</i> 3.3 <i>Facilitate the generation of ideas within the development team</i> 3.4 <i>Facilitate access to organisational knowledge</i> 3.5 <i>Provide external information required by the development team</i> 3.6 <i>Provide ongoing guidance to team members</i> 3.7 <i>Protect team members from external pressures</i>	<i>Development project</i> may include any workplace issue that would benefit from change, such as: • Customer and staff complaints • Procedures that do not work properly • Policies that do not address situations that arise • Practices that are dangerous, including near-miss situations • Failure to meet set performance and other targets, including sales, costs, market share, building, training, power management and wastage • Downturn in trade • Amending an existing practice, product or service • Developing a new idea, concept, package, theme, direction, product or service • High levels of staff turnover • Increase in trade • New direction taken by the business, including issues such as entering a new market, developing new products, creating new retail strategies, planning new premises, developing plans for expansion, contraction or business takeover • Response to external threats and/or opportunities, such as new/increased competition, changes to legislation, change in the economy, loss of a supplier, entry of a new supplier into the market, new technology • In response to a directive from head office to achieve a set goal. <i>Time allocation</i> may include: • Full-time secondments, including organisation of alternative staff to back-fill positions left vacant • Identified and/or negotiated time release for a set number of hours per day, week(s) or month(s)
---	--

Element 4: Monitor the development team 4.1 <i>Encourage team members to reflect on activities and opportunities for change</i> 4.2 <i>Evaluate contributions and suggestions from the development team</i> 4.3 <i>Monitor the internal dynamics of the team</i> 4.4 <i>Act on viable suggestions made by the development team</i> 4.5 <i>Record the activities of the development team</i> 4.6 <i>Record the resources used by the development team</i> 4.7 <i>Evaluate team outcomes</i>	• Paid overtime for work performed as part of the development team • Accrual of time off in exchange for work performed. <i>Objectives should relate to:</i> • Realistic goals for the team • The identified issues(s) that gave rise to team formation • Available budget • Available time • Supporting resources to assist the team. <i>Define team and individual responsibilities should relate to:</i>
Element 5: Provide feedback on development team performance 5.1 <i>Debrief team members as appropriate</i> 5.2 <i>Discuss feedback received</i> 5.3 <i>Celebrate success</i> 5.4 <i>Resolve problems and issues related to the development project</i> 5.5 <i>Report on development team progress</i>	• Capitalising on the strengths of team members • Matching team requirements with individual team member capabilities • Integrating activities into a unified direction for achieving the identified goals and objectives • Negotiating responsibilities with team members being prepared to delegate authority and responsibility to others • Changing team structure in response to issues arising as part of the allocation of roles and responsibilities • Recording responsibilities in hard copy and sharing them with all team members • Identifying resources available to support team and individual responsibilities.

	<i>Define how team performance will be measured</i> should be results/outcome-based and may include: • Service levels • Products • Procedures • Satisfaction level statistical analysis of quantifiable issues • Statement of frequency of evaluation • Level of attainment of identified goals and objectives. <i>Work of the team</i> refers to identified development activities and goals and may include: • Interpreting and understanding activities • Activities to generate new ideas, including creative thinking activities, challenging assumptions, challenging commonly held beliefs and practices • Interacting with others, such as including high level people, for personal interaction, collaboration, negotiation, communication, questioning, investigative and research skills • Representation of situations and events within a variety of contexts • Reflective activities, looking backwards, plus activities designed to look into the future, forecast and make predictions • Evaluation and analytical activities • Information sharing activities. <i>Motivate team members</i> may include: • Explaining the need for the development being undertaken • Creating a positive team and general working environment • Providing verbal encouragement in times of doubt and fear
--	---

- Staying focused on the goals
- Thanking team members for effort and not just success/results
- Celebrating, recognising and/or rewarding achievement
- Notifying others regarding the work and success of the team
- Ensuring credit goes to those who deserve it
- Providing a general and individual support base for team members
- Protecting the team from adverse criticism and negative impacts
- Sharing disappointments
- Empathising with team members
- Encouraging team members to work collaboratively.

Explain the value placed on development activities by the organisation may include:

- Highlighting the benefits to the organisation from previous developments that have been achieved
- Illustrating management commitment to innovation and development
- Indicating how the current and future market and competitive position of the organisation relies on development activities
- Making references to the vision statement, mission statement and organisational values of the business
- Demonstrating the career advancements that can flow from effective participation in a development team.

	<i>Examples of previous effective and successful development activities</i> may include: • Items developed by the host enterprise and/or items developed by other organisations within the same or similar industry sector • Samples of new and re-developed policies and procedures • Samples of new and re-developed products and packages • Samples of new and re-developed goals, plans and strategic directions for the business • Samples of new and re-developed documentation to support operations • Samples of new and re-developed marketing strategies and activities • Samples of new and re-developed communication strategies • Illustrating the positive impact of all the new and re-developed items that have been generated by previous development teams. <i>Demonstrate development activities</i> may include: • Showing team members how the identified development activities, see <i>Work of the team</i>, have been applied in the past to situations similar to the objectives and goals facing the current development team • Providing suggestions as to how the identified development activities may be applied to the current situation • Highlighting benefits and disadvantages of each of the identified development activities • Providing training in the use of the identified development activities • Encouraging the use of new thinking and lateral thinking techniques. <i>Lead the team by example</i> may include: • Applying innovative techniques to the leadership and management of the team • Highlighting previous examples of creative thinking that has been applied in practice • Fostering cross-fertilisation of ideas
--	--

	• Supporting the attempts by team members to apply identified development activities • Assisting team members to persevere with developmental initiatives in the face of initial problems and/or perceived failure • Working within the development team. <i>Facilities and resources</i> may include: • Place(s) to undertake development activities • Support staff • Physical resources • Funding. <i>Generation of ideas</i> may include: • Brainstorming • Visualising • Making associations • Telling stories • Creative writing • Mind mapping • Six hats thinking • What if thinking. <i>Organisational knowledge</i> may include: • Plans and statistics • Material that gave rise to the need to form the development group • Market research data
--	---

	• Product and service rankings/popularity • Policies and procedures • Internal records and registers. <i>External information</i> may include: • Information from other organisations • Internet access and research material • Input from technical and subject area professionals • Local, regional, national and/or international data • Examples of innovations developed elsewhere • Inviting development teams from other bodies to visit. <i>Ongoing guidance</i> may include: • Coaching • Mentoring • Counselling • Skills development and training • Modelling. <i>External pressures</i> may include: • Pressure to return to normal work duties • Pressure to divide efforts between operational duties and developmental activities • Time-related pressures from management • Comments from staff and customers.
--	---

	<i>Activities and opportunities for change</i> may include: • Current workplace practices and procedures within the organisation • Current products and services offered by the organisation • Ideas generated by team members • Ideas suggested by others • Existing practices and procedures used by other organisations • Existing products and services offered by other organisations. <i>Evaluate contributions and suggestions</i> may include: • Assessing the contributions against the identified goals for the team • Determining if the contribution and/or suggestion has applicability elsewhere within the organisation and/or in a different context • Costing the implementation of the contribution and/or suggestion • Testing the ethical and legal issues involved • Evaluating the practicality of the contribution and/or suggestion • Using sensitivity and empathy in discussions and appraisals • Analysing different, proposed courses of action • Selecting preferred and/or viable options for further work • Evaluating non-viable options for opportunities to convert them into viable options • Amending non-viable options • Seeking a different frame of reference for non-viable options • Subjecting the proposals and initiatives to peer review processes • Compromising and negotiating.
--	---

	<i>Monitor the internal dynamics of the team</i> may include: • Revising team structure and formation • Revising team member roles and responsibilities • Seeking feedback from team members • Addressing issues arising • Using constructive approaches to resolving issues and problems • Supporting and re-assuring team members • Being available for consultation. <i>Act on viable suggestions</i> may include: • Documenting approaches, revisions and proposals • Preparing test and trial briefs • Presenting suggestions to management • Involving other appropriate personnel in the initiative • Arranging for trials and tests to be conducted • Producing drafts and prototypes • Conducting actual trials and tests in accordance with briefs • Monitoring and recording test and trial results • Keeping the development team informed of progress, feedback and impacts of trials, tests and implementations • Revising initial proposal and suggestions on the basis of practical workplace observation and feedback.
--	---

	<i>Record the activities of the development team</i> may include: • Keeping documentation to reflect the work undertaken by the team, including viable and non-viable proposals • Maintaining time sheets • Updating budgets • Taking minutes of meetings • Recording trials and tests. <i>Record the resources used</i> may include: • Physical resources • Time • Human resources, including hours spent on the project and involvement of third parties external to the dedicated development team • Financial resources • Describing the use to which resources were put. <i>Evaluate team outcomes</i> may include: • Assessing the progress of the team towards achievement of identified goals • Monitoring the outcomes of initiatives that have been trialled • Monitoring the outcomes of initiatives that have been implemented • Comparing outcomes produced by the development team against similar projects elsewhere • Evaluating the contribution and effort made by individual team members • Evaluating the support and resources that have been provided to the development team • Identifying whether or not team development has created the need or opportunity for further and/or different development to occur • Sharing evaluations with team members and management.
--	---

	<i>Debrief team members</i> may include: • Meeting with team members to discuss progress • Holding sessions to identify reasons or causes • Valuing and encouraging contributions • Maintaining group cohesion • Providing a supportive and secure environment. <i>Feedback received</i> may be from: • Review processes • Trials and tests • Options that have been investigated • Management • End-users • Authorities and industry bodies • Development team members. <i>Resolve problems and issues</i> may include: • Planning future action on the basis of experience and newly acquired information • Determining and analysing options • Proposing solutions • Identifying additional or different resources needed • Identifying factors restricting team progress • Re-framing the development goal • Adjusting the required outcomes.
--	--

Report on development team progress may include:

- Making a verbal and/or written report to management
- Presenting an update to relevant personnel
- Illustrating progress made and challenges encountered
- Highlighting possible future problems emerging as part of the development process
- Indicating necessary revisions required for timelines and resource allocations
- Justifying and explaining the rationale for decisions made and actions taken
- Identifying future projects that can be addressed using a development team
- Highlighting benefits produced as a result of applying a development team approach to the identified issue
- Suggesting future projects that may be able to be addressed using the development team approach.

Assessment Guide

The following skills and knowledge must be assessed as part of this unit:

- Enterprise policies and procedures in regard to research and development with special attention to policies and procedures related to the objective(s) identified for the development team
- Principles of establishing and maintaining a work team
- Ability to use research techniques and innovative practices
- Ability to use leadership, management, communication, analytical, negotiation, influencing, counselling, coaching, conflict resolution and evaluation skills
- Knowledge of host country legislated and other requirements that apply to the topic under development
- Knowledge of industry practice, where applicable, to the topic under development
- Ability to use networking and liaison skills with industry bodies, organisations and authorities.

	Linkages To Other Units • Access and retrieve computer-based data • Develop and update local knowledge • Maintain hospitality industry knowledge • Manage and resolve conflict situations • Maintain quality customer/guest service • Develop new products and services • Gather and present product information • Maintain a paper-based filing and retrieval system • Manage and implement small projects • Plan and establish systems and procedures • Plan, manage and conduct meetings • Use common business tools and technology • Develop and implement operational policies • Manage financial performance within a budget • Develop and supervise operational approaches • Lead and manage people • Manage legal requirements for business compliance • Manage the effective use of human resources • Monitor staff performance • Provide professional support to business colleagues • Recruit and select staff
--	---

- Roster staff
- Manage and control operational costs
- Manage workplace diversity
- Manage and maintain workplace relations
- Monitor workplace operations
- Design, prepare and present various types of reports.

Critical Aspects of Assessment

Evidence of the following is essential:

- Understanding of host enterprise policies and procedures in regard to research and development with special attention to policies and procedures related to the objective(s) identified for the development team
- Demonstrated ability to lead and manage the performance of a development team in a real or simulated industry context to develop viable response(s) to a nominated operational problem, including:
 - Full description of the issue at the centre of the need for development
 - Identification of the members of the development team, including rationale for their inclusion
 - Identification of all the resources necessary to support the team in its activities
 - Allocation of roles and responsibilities to team members
 - Identification of potential motivational strategies to encourage commitment
 - Identification of how team performance will be measured
 - Identification of the plans prepared to guide the development process
 - Activities involved in leading and managing the development of solutions to address the identified problem
 - Monitoring activities undertaken to oversee the activities of the development team

	▪ Guidance and support needed to encourage and maintain team commitment to the project ▪ Reporting procedures that would be undertaken to share outcomes with management and relevant others. Context of Assessment This unit may be assessed on or off the job: • Assessment should include practical demonstration either in the workplace or through a simulation activity, supported by a range of methods to assess underpinning knowledge • Assessment must relate to the individual's work area or area of responsibility. Resource Implications Training and assessment to include access to a real or simulated workplace; and access to workplace standards, procedures, policies, guidelines, tools and equipment. Assessment Methods The following methods may be used to assess competency for this unit: • Observation of practical candidate performance • Analysis of the activities undertaken by the candidate in assembling, leading and managing the development team • Analysis of a portfolio of documents produced as part of the management process, including plans, reports and minutes of meetings • Case studies • Project work • Oral and written questions • Third party reports completed by a supervisor.
--	--

	Key Competencies in this Unit <i>Level 1 = competence to undertake tasks effectively</i> <i>Level 2 = competence to manage tasks</i> <i>Level 3 = competence to use concepts for evaluating</i>		
	Key Competencies	Level	Examples
	Collecting, organising and analysing information	3	Determine the actions to take with the team on the basis of information and feedback received
	Communicating ideas and information	3	Share goals, objectives, outcomes and feedback with the team members
	Planning and organising activities	3	Prepare plans regarding team roles and responsibilities, action plans, trialling and implementation activities
	Working with others and in teams	3	Support the team in its endeavours
	Using mathematical ideas and techniques	2	Determine budgetary and other resource requirements to enable effective team operation
	Solving problems	2	Address team dynamic issues and internal conflict
	Using technology	3	Use software to assist in planning, recording, information storage and dissemination

Oral questions

Student name	
Assessor name	
Location/venue	
Unit of competency	Lead and manage a development team D2.TRM.CL9.05
Instructions	1. Ask student questions from the attached list to confirm knowledge, as necessary 2. Place tick in boxes to reflect student achievement (Pass Competent 'PC' or Not Yet Competent 'NYC') 3. Write short-form student answer in the space provided for each question.

Questions	Response	
	PC	NYC
1. Tell me about a situation where you selected team members for a development project: what was the project? How did you determine suitable team members?	☐	☐
2. Explain how you obtain permission from appropriate persons for the release of selected personnel so they can join a development team.	☐	☐

Questions	Response	
	PC	NYC
3. How do you determine the appropriate time allocations for team members to suit the development project? What factors do you take into account?	☐	☐
4. Identify a development team you have managed and describe the objectives they were required to achieve: how were these objectives decided?	☐	☐
5. For the team identified in your answer to the previous question explain team and individual responsibilities.	☐	☐

Questions	Response	
	PC	NYC
6. For the team you have just described how did you monitor and measure performance?	☐	☐
7. Give me an example of how you have assisted development team members to develop plans to guide their work.	☐	☐
8. Describe how you have motivated development teams to achieve their assigned objectives.	☐	☐

Questions	Response	
	PC	NYC
9. Explain in your own words the value to an organisation of development activities/innovative workplace practice.	☐	☐
10. Give me three examples of effective and successful development activities you have been associated with: what were they and what benefits did they bring?	☐	☐
11. Describe two examples where you have demonstrated development activities within a relevant context: what were the initiatives? What was the context? What did you do?	☐	☐

Questions	Response	
	PC	NYC
12. Tell me how you lead your development teams by example.	☐	☐
13. Identify a situation and describe the resources you needed to provide to your development team to enable them to function effectively.	☐	☐
14. What do you do in order to communicate/confirm work plans with development teams?	☐	☐

Questions	Response	
	PC	NYC
15. What action have you taken with development teams to facilitate the generation of ideas?	☐	☐
16. Give me two examples where you have needed to facilitate development team access to organisational knowledge as part of the leadership and management of the team/s.	☐	☐
17. Use examples to provide examples of two occasions where you have needed to provide external information to development teams to support their activities.	☐	☐

Questions	Response	
	PC	NYC
18. What are your standard procedures/practices for providing ongoing guidance to members in a development team?	☐	☐
19. What have you done in the past to protect development team members from external pressure from within the organisation and from outside stakeholders?	☐	☐
20. How do you encourage development team members to reflect on activities and opportunities for change?	☐	☐

Questions	Response	
	PC	NYC
21. When a development team member makes a contribution/suggestion, what process/es do you follow to evaluate the input they make?	☐	☐
22. How do you monitor the internal dynamics of teams you have lead and managed? Why is this important?	☐	☐
23. How do you recognise/acknowledge a viable suggestion to a project made by a development team member?	☐	☐

Questions	Response	
	PC	NYC
24. What strategies/practices have you used to record activities of the development team and why/how has this proved to be a useful thing to do?	☐	☐
25. Describe the resources a development team might use and explain how and why there is a need to record/document them.	☐	☐
26. Tell me about a situation where you formally evaluated the outcomes achieved by a development team: what was the project? When did evaluation occur? What did you do? What did the evaluation reveal?	☐	☐

Questions	Response	
	PC	NYC
27. Describe how you debrief development team members when a project has been completed.	☐	☐
28. Give me an example of discussing feedback received at the conclusion of a project: how was it discussed? What were the findings? What lessons were learned?	☐	☐
29. Tell me about a situation where you celebrated success of a project on its completion.	☐	☐

Questions	Response	
	PC	NYC
30. Identify a situation where you encountered a problem/issue with a project and explain how you effectively addressed it.	☐	☐
31. What organisational requirements applied to you in terms of needing to report on development team progress?	☐	☐

Written questions

Lead and manage a development team – D2.TRM.CL9.05

Student Name: _____

Answer all the following questions and submit to your Trainer.

1. In your own words, define what is meant by 'a team' in a workplace context.

2. When selecting individuals for a development team, identify and differentiate between the two options commonly used.

3. Identify the generic mix of members who may be selected to participate in a development team.

4. Provide five generic examples of reasons an organisation may decide to establish a development team.

5. Give three reasons why there is a need to obtain permission from appropriate persons for the release of selected employees from their normal tasks/work in order to join a development team.

6. List four issues to consider when seeking permission from appropriate persons for the release of selected employees from their normal tasks/work in order to join a development team.

7. Identify three factors to consider when determining individual time allocations for employees to participate in a development project team.

8. Name three reasons to develop objectives for the project development team to achieve.

9. List four standard requirements when describing objectives for the project development team to achieve.

10. Describe four factors to consider when defining and allocating responsibilities to development team members.

11. Give four reasons it is important development team members know how their performance/activities will be judged.

12. Name three generic examples of criteria commonly used to judge or evaluate measurements relating to work done by project development teams.

13. List four reasons it is important for team leaders to provide help to team members when they are developing plans.

14. Describe four examples of content that could/should be included in work plans for development team members.

15. Provide four examples of skills/knowledge development team leaders need to have in order to effectively and practically help team members generate work plans.

16. List six ways development team leaders can motivate team members.

17. Innovation has the potential to bring numerous benefits to a business: list four of these.

18. List four practices/considerations which are useful when meeting with development teams and highlighting/explaining the value placed on innovation by the organisation.

19. Give four reasons development team leaders need to provide examples of previously effective and successful development activities to team members.

20. Give four examples of previous development activities which may be presented to the development team.

21. What are the two primary priorities for a team leader?

22. What are the four specific leadership roles?

23. Identify four ways to model leadership and demonstrate required behaviours.

24. Name four ways development team leaders can assist team members to persevere.

25. List six essential requirements for building trust between team leaders and team members.

26. Identify four generic examples of resources which (may) need to be provided to development team members.

27. List four practices which development team leaders should/could apply when confirming the work plans which have been prepared for the project development team

28. Describe the creative thinking technique of 'Brainstorming'.

29. Identify and briefly describe one creative thinking technique other than 'Brainstorming'.

30. Identify three ways a development team leader may facilitate team access to organisational knowledge.

31. Describe three ways development team leaders can provide external information to their project development teams.

32. List four generic examples of ways development team leaders can provide ongoing guidance to team members.

33. Provide four examples of external pressures which may adversely impact members of a development team.

34. Describe three ways a development team leader might protect team members from external pressures.

35. Give four examples of topics for change, development or improvement which might provide the basis for reflection for development team members.

36. What are the three objectives when evaluating contributions and suggestions from development team members?

37. Describe four practices the development team leader may undertake when evaluating contributions and suggestions from development team members.

38. Identify four generic actions development team leaders may take to maintain an effective development team.

39. What two criteria must a suggestion from the development team meet in order to be termed a 'viable suggestion'?

40. Give four examples of action a development team leader might take on viable suggestions presented by the development team.

41. List four reasons development team leaders need to record the activities of the development team.

42. Describe four activities which may be involved when a development team leader records the activities of a project development team.

43. Explain four reasons development team leaders need to record resources used by the development team.

44. Describe four activities a development team leader may need to undertake when detailing actions relating to use of physical resources by the development team.

45. Give four activities a development team leader may need to undertake when accounting for time/HR used by the development team.

46. Provide four activities a development team leader may need to engage in when recording the use of financial resources by the development team.

47. Give four reasons evaluation of team outcomes needs to be undertaken.

48. List four activities (possibly) involved in evaluating development team outcomes.

49. Present four basic requirements relating to development team de-briefing sessions.

50. List six possible objectives that may be addressed when conducting de-briefing sessions for development teams.

51. Name four sources of feedback which may be used as the basis for discussion with a development team.

52. Describe six tips which might be applied by a development team leader when discussing feedback received with development team members.

53. Give four options a development team leader might use when celebrating development team successes.

54. Describe four ways a development team leader might identify problems and issues with/impacting the development team.

55. Describe four practices/options for a team leader when responding to resolve identified problems and issues in a development team.

56. Provide four examples of the generic content which may be included when preparing a report on the progress of a development team.

Answers to written questions

Lead and manage a development team – D2.TRM.CL9.05

The following are model answers only – Trainers/Assessors must use discretion when determining whether or not an answer provided by a Student is acceptable or not.

1. In your own words, define what is meant by ‘a team’ in a workplace context.

Answer should address:

- A group is defined as two or more interacting and interdependent individuals coming together to achieve particular objectives
- A team, or work team/unit, is a formal group made up of interdependent individuals, responsible for the attainment of a goal
- All work teams are groups, but only formal groups can be work teams.

2. When selecting individuals for a development team, identify and differentiate between the two options commonly used.

- Determined by a workplace document
- Selected by management to participate in a nominated project.

3. Identify the generic mix of members who may be selected to participate in a development team.

- Peers
- Supervisors
- Personnel from other areas/departments
- People from outside the organisation – consultants and specialists.

4. Provide five generic examples of reasons an organisation may decide to establish a development team.

To address:

- Complaints
- SOPs that do not work properly
- Policies that do not address situations that arise
- Practices that are dangerous
- Failure to meet targets as set by the organisation
- Downturn in trade
- Need to amend an existing practice, product or service
- Development of a new idea, concept, package, theme, direction, product or service
- Address high levels of staff turnover
- Respond positively to an increase in trade
- Respond effectively to new direction/s being taken by the business
- Respond to external threats and/or opportunities.

5. Give three reasons why there is a need to obtain permission from appropriate persons for the release of selected employees from their normal tasks/work in order to join a development team.

- Occurs especially where cross-functional teams are being established – and permission needs to be obtained from another manager/supervisor to use one of their staff
- Is a standard industry requirement and ‘common courtesy’ when seeking to use employees from other areas
- Should be sought from the relevant manager/supervisor before speaking to the staff members who are being sought to join the team – to respect internal ‘chain of command’ protocols
- Is often expressed in an internal policy – which prohibits the use of workers in other roles without the express permission of their immediate manager/supervisor.

6. List four issues to consider when seeking permission from appropriate persons for the release of selected employees from their normal tasks/work in order to join a development team.

- Give the manager/supervisor sufficient ‘advance notice’ of the need for their employees to participate – so they can think and plan to accommodate the request
- There may be a prescribed way to make the request – such as ‘in writing’, using a specified form or through a simple verbal request
- Nominate the duration of the project – by giving start and finish dates and providing any dates for key stages of the project
- Identify the individuals by name – so there is clarity about the request and surety about exactly who and how many people are being asked to join the team
- Provide a rationale for the request – explaining what the development project is and why the requested staff are needed to assist with it
- Address the issue of back-filling for the worker/s who are going to join the team – so the remaining workers are not placed under extra/unreasonable pressure
- Consider whether there is a need to increase remuneration for those who are joining the team – to reflect any added work they may be asked/expected to do
- Work collaboratively to determine the time/s and/or days or other periods selected team members can be made available – with reference to work rosters, known levels of trade, bookings and known other projects and work commitments: see more on this in the following section.

7. Identify three factors to consider when determining individual time allocations for employees to participate in a development project team.

- Identification of dates of the participation – prescribing start and finish dates to give overall parameters of the development project
- Nomination of required days and times – specifying required/preferred days of the week and times of the day each person is needed.
- Secondments to the development team
- Identification and/or negotiation of time release for individuals – this is a lesser version of secondments and generally occurs for a shorter time period and for fewer hours in terms of, for example:
 - A set number of hours per day, week(s) or month(s)
 - One period for a specified number of hours or days
- Satisfactory and mutually acceptable reimbursement for all work performed by employees as being part of the development project team – this may mean:
 - Payment of agreed overtime for work performed as part of the development team – where the hours worked by the staff member exceed their agreed normal working hours.
 - Granting or accrual of time off in exchange for work performed – on an agreed basis.

8. Name three reasons to develop objectives for the project development team to achieve.

- They form the focus of all the work the team will do – and give them guidance in relation to the direction their work should take
- They assist in ensuring there is a common understanding of what is expected – so all team members have the same information and everyone is on the same page
- They help prevent ‘project creep’ – where the work of a team slowly moves into areas and issues they were not originally intended to be involved in
- They demonstrate management/the team leader has researched and identified a viable reason for the establishment of the team – and there is a genuine/legitimate reason for the team to exist.

9. List four standard requirements when describing objectives for the project development team to achieve.

- Objectives (or goals) should be SMART
- The identified issues(s) that gave rise to team formation must be communicated – this is the ‘rationale’ for the creation of the development project/team
- The objective/s for the development project must flow from, support and/or integrate with higher level plans of the organisation
- Known problems or difficulties should be included as part of the objectives
- Inclusions in the objectives must address basic operational and functions matters relevant to the nature of the topic/s – such as:
 - Details of budget available for the project
 - Time issues
 - Resources available to support the work of the team
 - Authorities provided for team members.

10. Describe four factors to consider when defining and allocating responsibilities to development team members.

- Give each role a name – so it can be readily identified by others within the team and the total team structure can be readily communicated to others
- Match responsibilities to the known abilities of the person – so they are able to perform the tasks set for them and the team benefits from capitalising on the strengths of team members
- Fully explain the role – so there is total understanding about what the role is all about
- Negotiate the allocation of responsibilities to some (so they are comfortable with what has been allocated to them) while delegating to others
- Be honest – in terms of exactly what the allocated work will entail and require them to do
- Be fair – such that team members share the load evenly
- Provide resources, authorities and discretionary power to each individual as required – to enable them to do the work they have been allocated
- Explain how identified team objectives fit with the work of individual roles – so there is clarity about the way in which individuals will contribute to addressing the requirements of the development project
- Explain how each role fits with the other roles – so their understanding of how the team comes together as a cohesive whole and their activities are integrated into a unified direction for achieving identified goals and objectives
- Gain agreement from each person – they are prepared to perform the allocated role and happy to do the job asked of them
- Record individual team member responsibilities in hard copy – and share them with all team members so there is full awareness and transparency of the roles of others in the team
- Be prepared to change team structure in response to issues arising – to optimise efficiency and effectiveness of the team.

11. Give four reasons it is important development team members know how their performance/activities will be judged.

Team members need to know how their performance/activities will be judged so:

- They know what is important to the team, the organisation and other members of the team
- They can prioritise their effort and work to align with the identified performance measurements – meaning more/most time will be spent addressing the things which are going to be measured
- They know how their success or failure will be determined – and they know this in advance in definite and objective terms
- They understand the monitoring activities which will be applied throughout the project – and can comprehend why such monitoring is being applied
- They have a definite basis for self-reflection and analysis of their work – to determine for themselves the extent to which they believe they are achieving the tasks set for them and discharging the responsibilities allocated to them
- They can decide whether or not they are ‘on the right track’ – which is commonly the biggest question team members have when they are working in a team.

12. Name three generic examples of criteria commonly used to judge or evaluate measurements relating to work done by project development teams.

- Service levels
- Products
- Procedures
- Level of attainment of identified goals and objectives for the development project.

13. List four reasons it is important for team leaders to provide help to team members when they are developing plans.

To:

- Prove the value and importance placed on plans by the leader and the organisation
- Demonstrate support for individual team members
- Optimise the likelihood of effective operational plans being created
- Ensure integration of individual team member plans with other team plans and with higher-level organisational plans
- Give direction and purpose to the work of individuals and the team
- Encourage engagement with activities listed/contained in the plans
- Promote buy-in to and ownership of work to be done
- Support the concepts of workplace democracy and self-direction/autonomy of workers by including team members in the formulation of the plans
- Allow contributions and feedback in relation to issues being discussed, work to be done and targets/goals – so the plan accepts and embraces contributions by team members rather than simply being a management directive/document
- Increase team member productivity by giving them a clear direction to take and clearly spelling out work to be done.

14. Describe four examples of content that could/should be included in work plans for development team members.

- Identification of what needs to be done, achieved or completed for the time period in question – in terms of outcomes, outputs, goals and/or KPIs
- Details and prioritisation of action to be taken – to enable achievement of desired outcomes/objectives
- Description of timelines which need to apply to work that needs to be done – in order that the work of one individual integrates with the work of another and so as to ensure the project is completed by 'due dates' which might apply
- Integration of work with other work – as performed by other team members working on the project in order to optimise results, minimise expense and effort
- Specification of the resources required/available – to achieve the result required.

15. Provide four examples of skills/knowledge development team leaders need to have in order to effectively and practically help team members generate work plans.

- Have a total appreciation of the work to be done and be able to properly interpret the overall objectives of the project and individual role/responsibilities of each team member and understanding activities
- Involve the team members in development of their individual plans
- Have a sound working knowledge of activities which can be used to progress the project – such as those relating to:
 - Generation of new ideas including creative thinking activities
 - Challenging assumptions and challenging commonly held beliefs and practices
- Demonstrate high-level interpersonal and communication skills
- Develop the ability to represent the situations and events which are central to the project within a variety of contexts so there is a clear and total appreciation of exactly how the issue at the centre of the project relates to all the relevant factors.
- Consider not only the *present* situation which has given rise to the development project – but also:
 - Be reflective – that is, engage in activities which look backwards to determine how the current situation emerged/was arrived at
 - Look forward – into the future to forecast and make predictions
- Have high-level evaluation and analytical activities
- Possess excellent ability to share Information
- Commit the plans to writing.

16. List six ways development team leaders can motivate team members.

- Providing good/effective leadership
- Preparing a plan for each person
- Explaining the need for the development being undertaken
- Generating a good general working atmosphere – through:
 - Creating a positive team environment
 - Providing a genuine (general and individual) support base for team members
 - Empowering team members to be self-directing and autonomous
 - Respecting and recognising individuals, equity and diversity
 - Supplying necessary supporting resources
- Providing verbal encouragement
- Staying focused on the goals – and:
 - Protecting team members from management requests to undertake other activities
 - Not allowing additional/extraneous matters to encroach on the project being addressed
- Thanking team members for input and effort
- Highlighting and celebrating team achievements and successes
- Notifying others regarding the work and success of the team
- Offering incentives which have value/worth in the eye of the person receiving them
- Protecting the team from adverse external criticism and/or negative impacts of others
- Empathising with team members
- Encouraging team members to work collaboratively.

17. Innovation has the potential to bring numerous benefits to a business: list four of these.

- Identification of new business and market opportunities
- Encouragement of new and free thinking which creates a better culture in the business
- Support for cross-fertilisation of ideas
- Higher levels of productivity
- Increased sales and better profits
- Enhanced levels and standards of service and service delivery
- Improved quality, type and diversity of products
- Reduction in operating costs
- A more competitive business 'edge'
- Greater business sustainability and viability.

18. List four practices/considerations which are useful when meeting with development teams and highlighting/explaining the value placed on innovation by the organisation.

- Highlight the benefits to the organisation from previous developments that have been achieved – so team members understand how innovation has been effective in the past and has brought tangible/relevant advantages to the business
- Illustrate management commitment to innovation and development in the past – with reference to – these references should relate to:
 - Statements made by management
 - Resources committed by the organisation to the development and innovation processes
- Indicate how the current and future market and competitive position of the organisation relies on development activities – with reference to, as applicable:
 - Action being taken by opposition businesses which is threatening the organisation
 - The ever-changing nature of the marketplace
 - Products being sold by the organisation which are reaching the end of their product life-cycle
- Make references to the public statements the organisation is making about itself – such as its:
 - Vision statement
 - Mission statement
 - Core values statement
- Demonstrate the career advancements that can flow from effective participation in a development team – by:
 - Referring to those who have gone before and have been promoted as a result of their engagement with innovative practice/organisational development
 - Arranging for those who have gained advancement as a result of their participation in innovative practice to talk to the development team members
- Commence the activities of the project development team with a face-to-face meeting that covers/addresses the issues showing the value placed on innovation by the organisation.

19. Give four reasons development team leaders need to provide examples of previously effective and successful development activities to team members.

To:

- Motivate the team
- Give actual models of 'fixes' which have been achieved so the team can begin to appreciate the size, nature and simplicity or complexity of previous solutions which have been generated
- Kick-start the creative process
- Show the creative process which was followed
- Illustrate the positive impact of all the new and re-developed items that have been generated by previous development teams to demonstrate the validity of the development and innovative processes
- Show the team members how the identified development activities have been applied in the past to situations similar to the objectives and goals facing the current development team so there is clarity about the applicability of a method/creative thinking technique
- Provide suggestions as to how the identified development activities may be applied to the current situation
- Highlight benefits and disadvantages of each of the identified development activities.

20. Give four examples of previous development activities which may be presented to the development team.

- Samples of new and re-developed organisational operating protocols – in terms of:
 - Policies
 - Procedures
- Samples of new and re-developed items – such as:
 - Products
 - Services
 - Packages
- Samples of new and re-developed initiatives – such as:
 - Organisational plans
 - Operating goals, objectives and targets
 - Strategic directions for the business
- Samples of new and re-developed documentation to support operations – such as:
 - Schedules
 - Databases
 - Checklists
 - Document templates
- Samples of new and re-developed marketing activities – such as:
 - Strategies and initiatives
 - Advertisements and promotions
 - Market research techniques
- Samples of new and re-developed communication strategies – with reference to
 - Objectives
 - Audiences
 - Messages
 - Methods of communication/s to be used.

21. What are the two primary priorities for a team leader?

- Managing the team's external boundaries
- Facilitating team activities.

22. What are the four specific leadership roles?

- Liaising with external constituencies
- Troubleshooting
- Conflict management
- Coaching.

23. Identify four ways to model leadership and demonstrate required behaviours.

- Defining frameworks and processes for decision making
- Consulting line managers in decision making so the process is consultative and collaborative and the team leader is recognised as being inclusive
- Empowering employees
- Cascading objectives to employees linking team objectives with possible 'up-stream' and 'down-stream' factors influencing and/or affecting a decision
- Creating opportunities for regular exchanges of ideas and information
- Showing loyalty to, and a willingness to assist, team members
- Understanding and communicating/sharing the need for cooperation to achieve larger organisation objectives.

24. Name four ways development team leaders can assist team members to persevere.

- Share disappointments – but maintain an optimistic demeanour
- See the light at the end of every tunnel
- Find the positive in every negative outcome
- Demonstrate genuine belief in individuals in the team
- Show their own resilience in the face of failures and disappointments.

25. List six essential requirements for building trust between team leaders and team members.

- Practice openness – be transparent in dealings with the team
- Be fair – never victimise anyone and ensure workloads, opportunities and challenges are shared around
- Include personal feelings in communications – let the team know what is felt about situations in addition to the facts of a situation
- Tell the truth – honesty with teams is essential
- Show consistency in actions and emotions – teams need to be able to predict how the team leader will react and they will base these predictions on past performance
- Fulfil promises – deliver what is promised
- Maintain confidences – do not get a reputation for telling others what was shared ‘in confidence’ by team members
- Demonstrate personal competence – prove personal capacity within the work (and development project) context.

26. Identify four generic examples of resources which (may) need to be provided to development team members.

- Place(s) to undertake team/development activities
- Support staff from within the organisation
- Training
- Physical resources
- Financial resources (funding)
- Information resources.

27. List four practices which development team leaders should/could apply when confirming the work plans which have been prepared for the project development team

- Providing the rationale for the project and the development of the team so the group understands the need for what they are doing
- Physically distributing a copy of the plans
- Reading through the plans with the team and explaining each aspect of the plan in detail, encouraging them to ask questions and making sure honest and open responses are provided.
- Demonstrating how the teams plans integrate with higher-levels plans of the organisation
- Explaining any team building and team development plans which have been prepared by the leader for the team.

28. Describe the creative thinking technique of 'Brainstorming'.

- Brainstorming is a useful tool to get as many ideas as possible in the given time available. It requires a group of people (three people minimum, but more is better).
- The general topic is presented and then people are asked to contribute their ideas in a free-flowing manner.
- One person acts as the recorder and writes down all the ideas shouted out – no judgement, criticism or comment is made (at this stage) about the potential, possible use or applicability of any of the contributions: they are simply quickly written down for later consideration.
- After all suggestions have been made and recorded and no more suggestions are forthcoming, each suggestion is then further expanded on (initially by the person contributing the initial suggestion) and then discussed, considered and evaluated by all.
- Suggestions may be voted on and prioritised – some will be deleted from the list. The suggestions that emerge as the ones with the most support will be further evaluated and worked on.

29. Identify and briefly describe one creative thinking technique other than 'Brainstorming'.

No model answer – answer will depend on the technique chosen by the student.

30. Identify three ways a development team leader may facilitate team access to organisational knowledge.

- Arranging for them to have access to organisational databases
- Authorising access to restricted 'commercial-in-confidence' internal documentation, facts and figures
- Obtaining permission for them to attend meetings normally restricted to management or other designated personnel
- Organising for team members to meet with and talk to relevant persons
- Making plans for team members to attend externally as required.

31. Describe three ways development team leaders can provide external information to their project development teams.

- Providing verbal information and advice to teams at team briefings and meetings
- Sharing handouts of relevant material
- Viewing material in a team environment – which may involve group viewing of;
 - Web sites; Promotional DVDs; TV programs
- Inviting people to visit and talk to the development team
- Facilitating the attendance of team members at relevant events and meetings so they can gather their own information.

32. List four generic examples of ways development team leaders can provide ongoing guidance to team members.

- Coaching
- Mentoring
- Counselling
- Skills development and training
- Modelling.

33. Provide four examples of external pressures which may adversely impact members of a development team.

- Questions, queries and requests from customers – who do not know/understand the team member has been allocated other duties
- Pressure to return to normal work duties – applied by managers/supervisors who want the level of customer service to remain normal/not suffer as a result of the person participating in development team activities
- Pressure from co-workers – to divide efforts between operational duties and developmental activities
- Pressure from management – to give 'normal' work duties and responsibilities a higher priority than the developmental activities
- Comments from staff and customers – which may:
 - Criticise the individual for not being available when required
 - Complain about reduced levels of service.

34. Describe three ways a development team leader might protect team members from external pressures.

- Requesting those in the management structure of the organisation to direct comments to the team leader – as opposed to making comments direct to individual team members
- Not passing on unnecessary negative comments heard/received by the team leader – but keeping those comments to themselves
- Standing up for team members when their performance is criticised – as opposed to simply accepting and not refuting such comment/s
- Being proactive – and providing external stakeholders with regular updates on the team's progress coupled with continued requests for them to be granted the freedom to engage with the development responsibilities they have been allocated
- Lobbying on behalf of team members – so they do not have to become involved in responding to additional (non-team related) demands made on their time
- Personally taking on board criticism aimed at members of the team – instead of reflecting it to the team
- Personally doing extra work – which was being demanded of individual team members.

35. Give four examples of topics for change, development or improvement which might provide the basis for reflection for development team members.

- Current workplace practices and procedures within the organisation which have raised issues/caused problems or concerns
- Current products and services offered by the organisation which may be becoming dated, are sub-standard, have caused complaints and/or provide an opportunity for leveraging extra sales
- Ideas generated by team members as a result of their experience and/or research
- Ideas, complaints, compliments, feedback and suggestions from 'others'
- Offerings (products, packages, services, policies and procedures) available from other organisations
- Analysis of relevant information.

36. What are the three objectives when evaluating contributions and suggestions from development team members?

To:

- Determine which suggestions are viable – that is, which contributions for development are workable and practicable
- Work out the ideas which should not be further pursued – and have no more time, money or effort expended on them
- Identify whether an idea can be modified in some way and/or transplanted to another location or point in time.

37. Describe four practices the development team leader may undertake when evaluating contributions and suggestions from development team members.

- Assess and analyse the contributions made against the identified goals for the team/the project being considered
- Determine if the contribution and/or suggestion has other applicability
- Conduct a realistic costing for the implementation of the contribution and/or suggestion
- Test all relevant issues involved with attention paid to Ethical concerns and Legal matters
- Evaluate the practicality of the contribution and/or suggestion
- Use appropriate interpersonal skills in discussions with team members about their suggestions and when appraising suggestions
- Analyse different, proposed courses of action
- Select preferred and/or viable options from all those which are submitted
- Look at non-viable options with a secondary view to identify if, how and/or when they might be used
- Subject the proposals and initiatives to peer review processes.

38. Identify four generic actions development team leaders may take to maintain an effective development team.

- Revising team formation
- Revising team member structure
- Seeking feedback from team members
- Addressing issues arising
- Supporting team members
- Being available for consultation.

39. What two criteria must a suggestion from the development team meet in order to be termed a 'viable suggestion'?

'Viable suggestions' are those which earlier analysis has found to be:

- Practicable
- Workable.

40. Give four examples of action a development team leader might take on viable suggestions presented by the development team.

- Documenting details of the idea
- Preparing protocols for conducting valid experimentations
- Presenting suggestions to management
- Involving other appropriate personnel in the initiative
- Arranging for trials and tests to be conducted
- Producing drafts and prototypes
- Keeping the development team informed
- Revising initial proposal and suggestions.

41. List four reasons development team leaders need to record the activities of the development team.

- Demonstrate their professionalism – in the way they manage their team
- Provide facts which can be used as the basis for describing/reporting on team activities and progress
- Show team members their efforts are being noted and taken seriously
- Prove the worth of the development team and their achievements
- Provide the basis for justifying and explaining resources used
- Create a file/reference point for other development team leaders
- Facilitate sharing and distribution of relevant information
- Provide a 'genuine' (as opposed to memory-base recollections which may be flawed) sound basis for future decision-making.

42. Describe four activities which may be involved when a development team leader records the activities of a project development team.

- Keeping documentation to reflect the work undertaken by the team
- Maintaining time sheets and attendance records
- Updating financial budgets
- Recording resources used
- Taking minutes of meetings
- Recording trials and tests.

43. Explain four reasons development team leaders need to record resources used by the development team.

To:

- Assist with record keeping
- Introduce or maintain transparency and accountability
- Demonstrate how, when, where and why resources were used
- Provide a database for reference purposes when future development projects are being considered/planned
- Give data required for evaluation and comparison (business performance) purposes.

44. Describe four activities a development team leader may need to undertake when detailing actions relating to use of physical resources by the development team.

- Obtaining quotations for resources which are purchased from sources outside the organisation
- Completing purchase orders when buying products/services from outside the business
- Filling out internal requisitions and/or inter-departmental transfer sheets when sourcing items from within the enterprise
- Allocating resources to pre-determined persons and tasks
- Actively managing resources allocated to the team to protect it from use by others, misuse, theft or loss
- Ensuring details of resources used in the development phase can be used to guide/predict resource use when the initiative is applied universally across the organisation.

45. Give four activities a development team leader may need to undertake when accounting for time/HR used by the development team.

Recording:

- Names of individual employees with responsibilities in the team
- A brief overview of the roles and responsibilities of each team member
- Hours worked on the development team
- Time and dates when team members were required to work in other than team-related tasks
- Break-down of generic activities being undertaken by team members – for example: Researching, Idea generation, Trialling, Evaluation, Promotion and demonstration of initiatives.

46. Provide four activities a development team leader may need to engage in when recording the use of financial resources by the development team.

- Checking and up-dating of budgets – as prepared for the team by administration/management of the organisation
- Ensuring a suitable paper-trail of supporting documentation is available to prove how and where funds have been expended
- Identification of the different categories in which monies were spent – quantifying the amounts in each section
- Clear indication of where and how any tagged funds were spent
- Clear indication of repayment of any unspent funds
- Detailing of any income generated as a result of development team activities.

47. Give four reasons evaluation of team outcomes needs to be undertaken.

Evaluation of team outcomes is generally undertaken to decide whether or not to:

- Continue with the original project, question or topic
- Quit/abandon the project
- Expand the original project, question or topic
- Alter the timelines/deadlines for completion
- Amend resources allocated to the initiative
- Re-form the development team.

48. List four activities (possibly) involved in evaluating development team outcomes.

- Assess the progress of the team towards achievement of identified goals
- Monitor the outcomes of initiatives that have been trialled
- Monitor the outcomes of initiatives that have been implemented
- Compare outcomes produced by the development team against similar projects elsewhere
- Evaluate the contribution and effort made by team members
- Evaluate the support and resources that have been provided to the development team
- Identify whether or not team development has created more need or opportunity
- Share evaluations, results, findings and suggestions.

49. Present four basic requirements relating to development team de-briefing sessions.

Debriefing sessions:

- Should be held on a regular basis
- Need to be convened and led by the team leader who functions as the Chairperson for the meeting.
- Must be mandatory for team members – it needs to be compulsory for team members to actively contribute and participate
- Must be conducted in a secure environment – which is supportive of the team and their efforts and maintains confidences/private conversations
- Need to be time limited rather than be an open-ended meeting
- Must be characterised by openness and honesty.

50. List six possible objectives that may be addressed when conducting debriefing sessions for development teams.

- Discuss and advise of progress by recapping what has taken place
- Identify problems and issues arising
- Value and encourage contributions of individual team members
- Maintain group cohesion and resolve team issues/conflict
- Help the team make sense of the day/previous session and what they have done, found or generated/created
- Determine need to hold additional sessions to further explore problems or issues
- Set future directions for the team and plan actions which need to be taken
- Share experiences and information
- Review use of resources and determine if more/other are needed
- Reflect on findings, research or test/trial results
- Reinforce the objectives for the development project
- Provide a platform to allow/encourage two-way communication – between team members and the team leader, and vice versa
- Record details of progress.

51. Name four sources of feedback which may be used as the basis for discussion with a development team.

- Formal review processes which are part of standard development team activities undertaken by development team members
- Trials and tests which have been conducted
- Options that have been investigated and evaluated
- Management
- End-users
- Authorities and/or industry bodies.

52. Describe six tips which might be applied by a development team leader when discussing feedback received with development team members.

- Concentrate on the objectives for the project
- Make the discussions face-to-face
- Let those present know what the goal of the discussion is
- Keep an open mind
- Base decisions on fact/actual evidence to the best extent possible
- Share information
- Seek 360° feedback
- Manage the discussion
- Be prepared to accept and acknowledge the validity of negative feedback
- Schedule the discussion
- Record the discussion process
- Avoid criticism of people and their contributions
- Ask questions
- Be prepared to listen to what others say/contribute
- Use a range of communication and interpersonal skills
- Strive to eliminate personal bias
- Make sure the discussion/s are conducted during paid work time
- Use the discussions to guide future action.

53. Give four options a development team leader might use when celebrating development team successes.

- Writing a report and forwarding and presenting it to management
- Notifying others within the organisation through meetings and/or written communications
- Giving a report to stakeholders
- Developing a press release for distribution to newspapers and the media
- Inviting members of the media to the organisation/office (holding a 'media event')
- Paying for media exposure to promote the development to the general public
- Posting notices in the customer section/area of the business to advise them of the change/initiative
- Holding a small celebration (meal and drinks, perhaps) for team members
- Doing something else which has value or meaning to the team.

54. Describe four ways a development team leader might identify problems and issues with/impacting the development team.

- Talking with and listening to team members
- Observing the body language of team members
- Watching the practice/activities of the team
- Reading the reports/written feedback generated by team members
- Observing physical reactions to implementation and/or integration of initiatives
- Asking 'relevant persons' to raise issues whenever they are encountered and providing the mechanism through which they can do so
- Monitoring comments and body language made by others who are being impacted by the work of the development team
- Creating 'Problems and issues' as a standing topic for every team meeting so there is a constant opportunity for team members to raise concerns.

55. Describe four practices/options for a team leader when responding to resolve identified problems and issues in a development team.

- Demonstrate a willingness to address problems/issues
- Involve relevant persons in the resolution process
- Apply standard 'Issue resolution' procedures
- Integrate the identified problem/issue into the planning future action
- Consider options for solving problems, issues and factors which are restricting team progress
- Propose solutions
- Re-consider role of resources
- Re-frame the development goal
- Counsel individuals
- Alter composition of the development team.

56. Provide four examples of the generic content which may be included when preparing a report on the progress of a development team.

- Details of the development project which was undertaken – including:
 - Rationale for same
 - Names and details of those on the development team
 - Copies of business/company plans relevant to the topic
 - Copies of development team plans
 - Copies of research undertaken and findings of same
 - Overview of methodology used
 - Sample monitoring data
 - Findings of tests, trials and prototypes
 - Recommendations and suggestions
 - Illustration of progress made and challenges encountered – as appropriate:
 - ‘To date’
 - Throughout the life of the project
 - Details of how challenges encountered were addressed
 - Specification of possible future problems emerging as part of the development process
 - An indication of necessary revisions required for timelines and resource allocations
 - Justification and explanation of the rationale for decisions made during the project – and for actions taken
 - Identification of and rationale for future projects – that:
 - Can be addressed using the same development team
 - May be the focus of another development project for a different project development team
 - Description and quantification of benefits produced as a result of applying a development team approach to the topic – with reference to stated criteria (such as) improvements to service, enhanced products, increased safety/security and/or better positioning and/or viability of the business.

Observation checklist

Student name	
Assessor name	
Location/venue	
Unit of competency	Lead and manage a development team D2.TRM.CL9.05
Dates of observation	
Instructions	- Over a period of time observe the student completing each of the following tasks: - Establish development team - Provide a model of innovative practice - Organise an appropriate environment for the development team - Monitor the development team - Provide feedback on development team performance - Enter the date on which the tasks were undertaken - Place a tick in the box to show they completed each aspect of the task to the standard expected in the enterprise - Complete the feedback sections of the form, if required.

Did the candidate	Yes	No
Element 1: Establish development team		
Select suitable team members for the development project	☐	☐
Obtain permission from appropriate persons for the release of selected team members	☐	☐
Determine time allocation for team members to suit the development project	☐	☐
Describe the objectives for the development team	☐	☐
Define team and individual responsibilities	☐	☐
Define how team performance will be measured	☐	☐
Assist the members to develop plans to guide the work of the team	☐	☐
Motivate team members	☐	☐

Did the candidate	Yes	No
Element 2: Provide a model of innovative practice		
Explain the value placed on development activities by the organisation	☐	☐
Provide examples of previous effective and successful development activities	☐	☐
Demonstrate development activities within a relevant context	☐	☐
Lead the team by example	☐	☐
Element 3: Organise an appropriate environment for the development team		
Provide facilities and resources to support the development team	☐	☐
Confirm work plans with the team	☐	☐
Facilitate the generation of ideas within the development team	☐	☐
Facilitate access to organisational knowledge	☐	☐
Provide external information required by the development team	☐	☐
Provide ongoing guidance to team members	☐	☐
Protect team members from external pressures	☐	☐
Element 4: Monitor the development team		
Encourage team members to reflect on activities and opportunities for change	☐	☐
Evaluate contributions and suggestions from the development team	☐	☐
Monitor the internal dynamics of the team	☐	☐
Act on viable suggestions made by the development team	☐	☐
Record the activities of the development team	☐	☐
Record the resources used by the development team	☐	☐
Evaluate team outcomes	☐	☐

Did the candidate	Yes	No
Element 5: Provide feedback on development team performance		
Debrief team members as appropriate	☐	☐
Discuss feedback received	☐	☐
Celebrate success	☐	☐
Resolve problems and issues related to the development project	☐	☐
Report on development team progress	☐	☐
Did the student's overall performance meet the standard?	☐	☐

Third Party Statement

Student name:			
Name of third party:		Contact no:	
Relationship to student:	☐ Employer ☐ Supervisor ☐ Colleague ☐ Other Please specify: _____ Please do not complete the form if you are a relative, close friend or have a conflict of interest]		
Unit of competency:	Lead and manage a development team D2.TRM.CL9.05		
The student is being assessed against industry competency standards and we are seeking your support in the judgement of their competence. Please answer these questions as a record of their performance while working with you. Thank you for your time.			
Do you believe the trainee has demonstrated the following skills? <i>(tick the correct response)</i>	Yes	No	Not sure
Establishes, communicates with, directs and manages teams to effectively address identified innovation/development needs	☐	☐	☐
Develops, assists and motivates established development teams	☐	☐	☐
Promotes benefits of innovation in the workplace using examples of previous developments as models and incentives	☐	☐	☐
Champions the cause of development and innovation through leading by example	☐	☐	☐
Provides necessary resources and support to development teams to optimise their efforts at innovation	☐	☐	☐
Encourages and monitors development team activities	☐	☐	☐
Records and evaluates development team activities and use of resources	☐	☐	☐
Debriefs projects on completion with teams encouraging and evaluating feedback and celebrating success	☐	☐	☐
Resolves problems and issues related to development projects	☐	☐	☐

Competency recording sheet

Name of Student		
Name of Assessor/s		
Unit of Competency	Lead and manage a development team	D2.TRM.CL9.05
Date assessment commenced		
Date assessment finalised		
Assessment decision	Pass Competent / Not Yet Competent (Circle one)	
Follow up action required (Insert additional work and assessment required to achieve competency)		
Comments/observations by assessor/s		

Place a tick (✓) in the column to reflect evidence obtained to determine Competency of the student for each Performance Criteria.

Element & Performance Criteria	Observation of skills	3rd Party Statement	Oral Questions	Written Questions	Work Projects	Other
Element 1: Establish development team						
Select suitable team members for the development project						
Obtain permission from appropriate persons for the release of selected team members						
Determine time allocation for team members to suit the development project						
Describe the objectives for the development team						
Define team and individual responsibilities						
Define how team performance will be measured						
Assist the members to develop plans to guide the work of the team						
Motivate team members						
Element 2: Provide a model of innovative practice						
Explain the value placed on development activities by the organisation						
Provide examples of previous effective and successful development activities						

Place a tick (✓) in the column to reflect evidence obtained to determine Competency of the student for each Performance Criteria.

Element & Performance Criteria	Observation of skills	3rd Party Statement	Oral Questions	Written Questions	Work Projects	Other
Demonstrate development activities within a relevant context						
Lead the team by example						
Element 3: Organise an appropriate environment for the development team						
Provide facilities and resources to support the development team						
Confirm work plans with the team						
Facilitate the generation of ideas within the development team						
Facilitate access to organisational knowledge						
Provide external information required by the development team						
Provide ongoing guidance to team members						
Protect team members from external pressures						
Element 4: Monitor the development team						
Encourage team members to reflect on activities and opportunities for change						

Place a tick (✓) in the column to reflect evidence obtained to determine Competency of the student for each Performance Criteria.

Element & Performance Criteria	Observation of skills	3rd Party Statement	Oral Questions	Written Questions	Work Projects	Other
Evaluate contributions and suggestions from the development team						
Monitor the internal dynamics of the team						
Act on viable suggestions made by the development team						
Record the activities of the development team						
Record the resources used by the development team						
Evaluate team outcomes						
Element 5: Provide feedback on development team performance						
Debrief team members as appropriate						
Discuss feedback received						
Celebrate success						
Resolve problems and issues related to the development project						
Report on development team progress
