Competency Based Training (CBT) and assessment – An introduction for trainers

Competency

Competency refers to the ability to perform particular tasks and duties to the standard of performance expected in the workplace.

Competency requires the application of specified knowledge, skills and attitudes relevant to effective participation, consistently over time and in the workplace environment.

The essential skills and knowledge are either identified separately or combined.

Knowledge identifies what a person needs to know to perform the work in an informed and effective manner.

Skills describe the application of knowledge to situations where understanding is converted into a workplace outcome.

Attitude describes the founding reasons behind the need for certain knowledge or why skills are performed in a specified manner.

Competency covers all aspects of workplace performance and involves:

- Performing individual tasks
- Managing a range of different tasks
- Responding to contingencies or breakdowns
- Dealing with the responsibilities of the workplace
- Working with others.

Unit of competency

Like with any training qualification or program, a range of subject topics are identified that focus on the ability in a certain work area, responsibility or function.

Each manual focuses on a specific unit of competency that applies in the hospitality workplace.

In this manual a unit of competency is identified as a 'unit'.

Each unit of competency identifies a discrete workplace requirement and includes:

- Knowledge and skills that underpin competency
- Language, literacy and numeracy
- Occupational safety and health requirements.

Each unit of competency must be adhered to in training and assessment to ensure consistency of outcomes.

Element of competency

An element of competency describes the essential outcomes within a unit of competency.

The elements of competency are the basic building blocks of the unit of competency. They describe in terms of outcomes the significant functions and tasks that make up the competency.

In this manual elements of competency are identified as an 'element'.

Performance criteria

Performance criteria indicate the standard of performance that is required to demonstrate achievement within an element of competency. The standards reflect identified industry skill needs.

Performance criteria will be made up of certain specified skills, knowledge and attitudes.

Learning

For the purpose of this manual learning incorporates two key activities:

- Training
- Assessment.

Both of these activities will be discussed in detail in this introduction.

Today training and assessment can be delivered in a variety of ways. It may be provided to participants:

- On-the-job – in the workplace
- Off-the-job – at an educational institution or dedicated training environment
- As a combination of these two options.

No longer is it necessary for learners to be absent from the workplace for long periods of time in order to obtain recognised and accredited qualifications.

Learning approaches

This manual will identify two avenues to facilitate learning:

Competency Based Training (CBT)

This is the strategy of developing a participant's competency.

Educational institutions utilise a range of training strategies to ensure that participants are able to gain the knowledge and skills required for successful:

- Completion of the training program or qualification
- Implementation in the workplace.

The strategies selected should be chosen based on suitability and the learning styles of participants.

Competency Based Assessment (CBA)

This is the strategy of assessing competency of a participant.

Educational institutions utilise a range of assessment strategies to ensure that participants are assessed in a manner that demonstrates validity, fairness, reliability, flexibility and fairness of assessment processes.

Flexibility in learning

It is important to note that flexibility in training and assessment strategies is required to meet the needs of participants who may have learning difficulties. The strategies used will vary, taking into account the needs of individual participants with learning difficulties. However they will be applied in a manner which does not discriminate against the participant or the participant body as a whole.

Catering for participant diversity

Participants have diverse backgrounds, needs and interests. When planning training and assessment activities to cater for individual differences, trainers and assessors should:

- Consider individuals' experiences, learning styles and interests
- Develop questions and activities that are aimed at different levels of ability
- Modify the expectations for some participants
- Provide opportunities for a variety of forms of participation, such as individual, pair and small group activities
- Assess participants based on individual progress and outcomes.

The diversity among participants also provides a good reason for building up a learning community in which participants support each other's learning.

Participant centred learning

This involves taking into account structuring training and assessment that:

- *Builds on strengths* – Training environments need to demonstrate the many positive features of local participants (such as the attribution of academic success to effort, and the social nature of achievement motivation) and of their trainers (such as a strong emphasis on subject disciplines and moral responsibility). These strengths and uniqueness of local participants and trainers should be acknowledged and treasured
- *Acknowledges prior knowledge and experience* – The learning activities should be planned with participants' prior knowledge and experience in mind
- *Understands learning objectives* – Each learning activity should have clear learning objectives and participants should be informed of them at the outset. Trainers should also be clear about the purpose of assignments and explain their significance to participants
- *Teaches for understanding* – The pedagogies chosen should aim at enabling participants to act and think flexibly with what they know
- *Teaches for independent learning* – Generic skills and reflection should be nurtured through learning activities in appropriate contexts of the curriculum. Participants should be encouraged to take responsibility for their own learning

- *Enhances motivation* – Learning is most effective when participants are motivated. Various strategies should be used to arouse the interest of participants
- *Makes effective use of resources* – A variety of teaching resources can be employed as tools for learning
- *Maximises engagement* – In conducting learning activities, it is important for the minds of participants to be actively engaged
- *Aligns assessment with learning and teaching* – Feedback and assessment should be an integral part of learning and teaching
- *Caters for learner diversity* – Trainers should be aware that participants have different characteristics and strengths and try to nurture these rather than impose a standard set of expectations.

Active learning

The goal of nurturing independent learning in participants does not imply that they always have to work in isolation or solely in a classroom. On the contrary, the construction of knowledge in tourism and hospitality studies can often best be carried out in collaboration with others in the field. Sharing experiences, insights and views on issues of common concern, and working together to collect information through conducting investigative studies in the field (active learning) can contribute a lot to their eventual success.

Active learning has an important part to play in fostering a sense of community in the class. First, to operate successfully, a learning community requires an ethos of acceptance and a sense of trust among participants, and between them and their trainers. Trainers can help to foster acceptance and trust through encouragement and personal example, and by allowing participants to take risks as they explore and articulate their views, however immature these may appear to be. Participants also come to realise that their classmates (and their trainers) are partners in learning and solving.

Trainers can also encourage cooperative learning by designing appropriate group learning tasks, which include, for example, collecting background information, conducting small-scale surveys, or producing media presentations on certain issues and themes. Participants need to be reminded that, while they should work towards successful completion of the field tasks, developing positive peer relationships in the process is an important objective of all group work.

Competency Based Training (CBT)

Principle of Competency Based Training

Competency based training is aimed at developing the knowledge, skills and attitudes of participants, through a variety of training tools.

Training strategies

The aims of this curriculum are to enable participants to:

- Undertake a variety of subject courses that are relevant to industry in the current environment
- Learn current industry skills, information and trends relevant to industry
- Learn through a range of practical and theoretical approaches
- Be able to identify, explore and solve issues in a productive manner

- Be able to become confident, equipped and flexible managers of the future
- Be 'job ready' and a valuable employee in the industry upon graduation of any qualification level.

To ensure participants are able to gain the knowledge and skills required to meet competency in each unit of competency in the qualification, a range of training delivery modes are used.

Types of training

In choosing learning and teaching strategies, trainers should take into account the practical, complex and multi-disciplinary nature of the subject area, as well as their participant's prior knowledge, learning styles and abilities.

Training outcomes can be attained by utilising one or more delivery methods:

Lecture/tutorial

This is a common method of training involving transfer of information from the trainer to the participants. It is an effective approach to introduce new concepts or information to the learners and also to build upon the existing knowledge. The listener is expected to reflect on the subject and seek clarifications on the doubts.

Demonstration

Demonstration is a very effective training method that involves a trainer showing a participant how to perform a task or activity. Through a visual demonstration, trainers may also explain reasoning behind certain actions or provide supplementary information to help facilitate understanding.

Group discussions

Brainstorming in which all the members in a group express their ideas, views and opinions on a given topic. It is a free flow and exchange of knowledge among the participants and the trainer. The discussion is carried out by the group on the basis of their own experience, perceptions and values. This will facilitate acquiring new knowledge. When everybody is expected to participate in the group discussion, even the introverted persons will also get stimulated and try to articulate their feelings.

The ideas that emerge in the discussions should be noted down and presentations are to be made by the groups. Sometimes consensus needs to be arrived at on a given topic. Group discussions are to be held under the moderation of a leader guided by the trainer. Group discussion technique triggers thinking process, encourages interactions and enhances communication skills.

Role play

This is a common and very effective method of bringing into the classroom real life situations, which may not otherwise be possible. Participants are made to enact a particular role so as to give a real feel of the roles they may be called upon to play. This enables participants to understand the behaviour of others as well as their own emotions and feelings. The instructor must brief the role players on what is expected of them. The role player may either be given a ready-made script, which they can memorize and enact, or they may be required to develop their own scripts around a given situation. This technique is extremely useful in understanding creative selling techniques and human relations. It can be entertaining and energizing and it helps the reserved and less literate to express their feelings.

Simulation games

When trainees need to become aware of something that they have not been conscious of, simulations can be a useful mechanism. Simulation games are a method based on "here and now" experience shared by all the participants. The games focus on the participation of the trainees and their willingness to share their ideas with others. A "near real life" situation is created providing an opportunity to which they apply themselves by adopting certain behaviour. They then experience the impact of their behaviour on the situation. It is carried out to generate responses and reactions based on the real feelings of the participants, which are subsequently analysed by the trainer.

While use of simulation games can result in very effective learning, it needs considerable trainer competence to analyse the situations.

Individual /group exercises

Exercises are often introduced to find out how much the participant has assimilated. This method involves imparting instructions to participants on a particular subject through use of written exercises. In the group exercises, the entire class is divided into small groups, and members are asked to collaborate to arrive at a consensus or solution to a problem.

Case study

This is a training method that enables the trainer and the participant to experience a real life situation. It may be on account of events in the past or situations in the present, in which there may be one or more problems to be solved and decisions to be taken. The basic objective of a case study is to help participants diagnose, analyse and/or solve a particular problem and to make them internalize the critical inputs delivered in the training. Questions are generally given at the end of the case study to direct the participants and to stimulate their thinking towards possible solutions. Studies may be presented in written or verbal form.

Field visit

This involves a carefully planned visit or tour to a place of learning or interest. The idea is to give first-hand knowledge by personal observation of field situations, and to relate theory with practice. The emphasis is on observing, exploring, asking questions and understanding. The trainer should remember to brief the participants about what they should observe and about the customs and norms that need to be respected.

Group presentation

The participants are asked to work in groups and produce the results and findings of their group work to the members of another sub-group. By this method participants get a good picture of each other's views and perceptions on the topic and they are able to compare them with their own point of view. The pooling and sharing of findings enriches the discussion and learning process.

Practice sessions

This method is of paramount importance for skills training. Participants are provided with an opportunity to practice in a controlled situation what they have learnt. It could be real life or through a make-believe situation.

Games

This is a group process and includes those methods that involve usually fun-based activity, aimed at conveying feelings and experiences, which are everyday in nature, and applying them within the game being played. A game has set rules and regulations, and may or may not include a competitive element. After the game is played, it is essential that the participants be debriefed and their lessons and experiences consolidated by the trainer.

Research

Trainers may require learners to undertake research activities, including online research, to gather information or further understanding about a specific subject area.

Competency Based Assessment (CBA)

Principle of Competency Based Assessment

Competency based assessment is aimed at compiling a list of evidence that shows that a person is competent in a particular unit of competency.

Competencies are gained through a multitude of ways including:

- Training and development programs
- Formal education
- Life experience
- Apprenticeships
- On-the-job experience
- Self-help programs.

All of these together contribute to job competence in a person. Ultimately, assessors and participants work together, through the 'collection of evidence' in determining overall competence.

This evidence can be collected:

- Using different formats
- Using different people
- Collected over a period of time.

The assessor who is ideally someone with considerable experience in the area being assessed, reviews the evidence and verifies the person as being competent or not.

Flexibility in assessment

Whilst allocated assessment tools have been identified for this subject, all attempts are made to determine competency and suitable alternate assessment tools may be used, according to the requirements of the participant.

The assessment needs to be equitable for all participants, taking into account their cultural and linguistic needs.

Competency must be proven regardless of:

- Language
- Delivery Method
- Assessment Method.

Assessment objectives

The assessment tools used for subjects are designed to determine competency against the 'elements of competency' and their associated 'performance criteria'.

The assessment tools are used to identify sufficient:

- a) Knowledge, including underpinning knowledge
- b) Skills
- c) Attitudes

Assessment tools are activities that trainees are required to undertake to prove participant competency in this subject.

All assessments must be completed satisfactorily for participants to obtain competence in this subject. There are no exceptions to this requirement, however, it is possible that in some cases several assessment items may be combined and assessed together.

Types of assessment

Allocated Assessment Tools

There are a number of assessment tools that are used to determine competency in this subject:

- Work projects
- Written questions
- Oral questions
- Third Party Report
- Observation Checklist.

Instructions on how assessors should conduct these assessment methods are explained in the Assessment Manuals.

Alternative assessment tools

Whilst this subject has identified assessment tools, as indicated above, this does not restrict the assessor from using different assessment methods to measure the competency of a participant.

Evidence is simply proof that the assessor gathers to show participants can actually do what they are required to do.

Whilst there is a distinct requirement for participants to demonstrate competency, there are many and diverse sources of evidence available to the assessor.

Ongoing performance at work, as verified by a supervisor or physical evidence, can count towards assessment. Additionally, the assessor can talk to customers or work colleagues to gather evidence about performance.

A range of assessment methods to assess competency include:

- Practical demonstrations
- Practical demonstrations in simulated work conditions
- Problem solving
- Portfolios of evidence
- Critical incident reports
- Journals
- Oral presentations
- Interviews
- Videos
- Visuals: slides, audio tapes
- Case studies
- Log books
- Projects
- Role plays
- Group projects
- Group discussions
- Examinations.

Recognition of Prior Learning

Recognition of Prior Learning is the process that gives current industry professionals who do not have a formal qualification, the opportunity to benchmark their extensive skills and experience against the standards set out in each unit of competency/subject.

Also known as a Skills Recognition Audit (SRA), this process is a learning and assessment pathway which encompasses:

- Recognition of Current Competencies (RCC)
- Skills auditing
- Gap analysis and training
- Credit transfer.

Assessing competency

As mentioned, assessment is the process of identifying a participant's current knowledge, skills and attitudes sets against all elements of competency within a unit of competency. Traditionally in education, grades or marks were given to participants, dependent on how many questions the participant successfully answered in an assessment tool.

Competency based assessment does not award grades, but simply identifies if the participant has the knowledge, skills and attitudes to undertake the required task to the specified standard.

Therefore, when assessing competency, an assessor has two possible results that can be awarded:

- Pass Competent (PC)
- Not Yet Competent (NYC).

Pass Competent (PC)

If the participant is able to successfully answer or demonstrate what is required, to the expected standards of the performance criteria, they will be deemed as 'Pass Competent' (PC).

The assessor will award a 'Pass Competent' (PC) if they feel the participant has the necessary knowledge, skills and attitudes in all assessment tasks for a unit.

Not Yet Competent' (NYC)

If the participant is unable to answer or demonstrate competency to the desired standard, they will be deemed to be 'Not Yet Competent' (NYC).

This does not mean the participant will need to complete all the assessment tasks again. The focus will be on the specific assessment tasks that were not performed to the expected standards.

The participant may be required to:

- a) Undertake further training or instruction
- b) Undertake the assessment task again until they are deemed to be 'Pass Competent'.

Competency standard

UNIT TITLE: OPERATE AN AUTOMATED INFORMATION SYSTEM		NOMINAL HOURS: 50
UNIT NUMBER: D2.TTA.CL2.14 D2.TGA.CL6.06		
UNIT DESCRIPTOR: This unit deals with skills and knowledge required to process information within an automated information system to support the effective operation of a travel and tourism business		
ELEMENTS AND PERFORMANCE CRITERIA	UNIT VARIABLE AND ASSESSMENT GUIDE	
Element 1: Identify the context for use of an automated information system 1.1 Identify a range of <i>information systems and sources in use</i> within the industry 1.2 Describe <i>policies and procedures</i> for operating an automated information system 1.3 List <i>information</i> that may be available through an automated information system 1.4 Identify the <i>functions</i> of an automated information system Element 2: Access information using an automated information system 2.1 Identify <i>information requirements</i> 2.2 Identify and select appropriate sources of information 2.3 Apply <i>search techniques</i> to locate identified information	Unit Variables The Unit Variables provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. It relates to the unit as a whole and facilitates holistic assessment. This unit applies to all industry sectors that operate an automated information system within the labour divisions of the hotel and travel industries and may include: 1. Tour Operation 2. Travel Agencies Information systems and sources in use may include: • Internet • Enterprise-specific systems designed by the host enterprise • Government travel and tourism authority and agency information systems • Industry-based systems, including local, regional, domestic and international information systems • Free-of-charge and fee-for-services information systems and databases • Computerised reservation systems.	

2.4 <i>Interrogate the system</i> to secure full range of information available on the system 2.5 <i>Verify captured information</i> meets identified need Element 3: Obtain information using an automated information system 3.1 <i>Enable access</i> to required system and/or information 3.2 <i>Select required information</i> 3.3 <i>Download information</i> 3.4 <i>Print information</i> Element 4: Use information from information an automated information system 4.1 <i>Forward information</i> as required 4.2 <i>Save identified information</i> 4.3 <i>Manipulate accessed information</i> 4.4 <i>Report on findings</i> Element 5: Up-date and maintain information on an automated information system 5.1 <i>Enter data</i> onto automated information system 5.2 <i>Save and back-up data</i>	<i>Policies and procedures</i> may relate to legal, financial and host enterprise requirements which may include: • System access protocols, including levels of access, log-on and log-off protocols • Program and data change controls • Authentication of customers and users • Validation of on-line information sources • Electronic transactions legislation of the host country, where applicable • Confidentiality of customer and business data, including privacy concerns • Security and integrity of information, including building/office and premises/building security • Type and level of encryption, including use of private key infrastructure • Intellectual property rights, including security of same and guidelines regarding use • Validity of contacts and contracts initiated or established via the automated information system, including non-repudiation • Legal jurisdiction issues • International trade issues • Archiving requirements. <i>Information</i> may relate to a wide and diverse range of topics and may include: • Travel, including air, cruise, train, bus and car • Destinations, including statistical information and details relating to climate, currency, maps, travel guides, events, languages, history, safety, government information, time zones, culture and communications • Tourist activities and attractions, including natural and man-made • Tours, trips, sight-seeing and excursions • Accommodation facilities ranging from five-star to back-packer venues and including, blocked dates, seasons and times, minimum purchase, use, booking and stay requirements, where applicable
--	--

	• Services, including medical, personal, entertainment, sporting, shopping • Travel requirements, including requirements relating to entry, passport, visas, warnings and advisory bulletins, customs information • Finance and travel insurance • Allotments of any type of tourism product, including accommodation, seats, entry passes • Rates, costs and tariffs, including details relating to specials, packages, discounts, peak and low season rates, premiums, commissions and group rates • Terms and conditions of sale, including details that apply to the business and to clients and purchasers • Booking requirements, including details required and timeline pre-requisites for advanced bookings. <i>Functions</i> should relate to: • Individual system options and functions • Data entry and retrieval • Data storage and processing • Production of hard copy information • System flags and triggers for attention and action • Basic operational system back-up procedures • Interface with other systems and operational requirements. Information requirements may relate to: • Requests from colleagues and other associated agencies/businesses • Requests from clients, including responses to on-line requests • Clarification of existing information on the system • Specification of data that is required.
--	---

	<i>Apply search techniques</i> and interrogating the system may include: • Using search engines, including advanced search features and search engines specific to identified fields of information/knowledge • Using appropriate key words • Investigating indices, catalogues and directories provided by search engines • Using confidence and relevancy ranking, where appropriate • Querying and/or refining searches • Using internal website search engines • Using boolean search techniques • Using multiple or meta search tools within a range of key words • Using domain name searches • Using database search functions • Following relevant links • Retrieving required information • Complying with system and host enterprise requirements. Interrogate the system may include: • Accessing necessary screens and fields related to the search topic • Using designated access protocols at differing levels of authorisation, including passwords and access codes • Searching fields • Opening screen options, including links, drop-down menus and related files and folders • Conducting searches • Referring to the operations manual to identify advanced interrogation techniques.
--	--

	Verify captured information may include: • Checking with person who made the request for information • Comparing request criteria with information that has been sourced and obtained • Checking currency of the data • Verifying the source of the data, including assessing reputation and credibility of information provider • Conducting follow-up searches and research as necessary • Complying with host enterprise requirements. <i>Enable access may include:</i> • Obtaining internal authority to register with, or access, a site or system • Making payment or placing order, where required, to access a user-pays system • Registering host enterprise details with information provider • Submitting access codes, information and data to enable access by others, including details relating to various access levels, where applicable • Issuing authorities for staff to access sites and files, including details relating to various access levels, where applicable • Book-marking relevant sites • Complying with host enterprise requirements. Select required information relates to: • Considering available sources of potential information • Determining and interrogating appropriate sources • Choosing best option data to meet identified need. Download information may include: • Saving data to files and folders • Producing hard copy material
--	--

	• Enabling on-screen visual access without saving data • Complying with system and host enterprise requirements. Print information refers to: • The production of information in hard copy form. Forward information may include: • Sending files to linked computers and/or systems • Distributing hard copy information, including distribution to internal colleagues and external businesses and clients • Complying with system and host enterprise requirements. Save identified information may include: • Saving electronic files to nominated folders and files • Saving hard copy data to paper-based files • Maintaining version control • Recording data source. Manipulate accessed information may include: • Performing calculations to determine options • Processing data to generate optimal solutions • Integrating data into databases • Complying with system and host enterprise requirements.
--	--

	Report on findings may include: • Supplying electronic, verbal or hard copy suggestions, recommendations and findings to: ▪ Management ▪ Colleagues ▪ Businesses ▪ Clients. <i>Enter data</i> refers to uploading information to the host enterprise system and must include: • Entering data in a timely manner • Ensuring accuracy and completeness of data within files and fields • Ensuring all files and fields are completed as required • Integrating data with other information, as required • Complying with system and host enterprise requirements. Save and back-up data may include: • Complying with relevant schedules • Archiving material • Storing data off-site • Completing documentation to support data saving and back-up • Complying with system and host enterprise requirements.
--	--

	Assessment Guide The following skills and knowledge must be assessed as part of this unit: • Enterprise policies and procedures in regard to generation, manipulation, sharing, and protection of and access to data on an internal automated information system • Principles of operation of automated information systems • Principles governing copyright, use of intellectual property, privacy and confidentiality legislation of the host country • Ability to use internet search and database interrogation techniques • Ability to demonstrate basic keyboarding skills • Ability to demonstrate electronic file handling capabilities, including file creation, file naming and re-naming, saving, copying, editing and printing. Linkages To Other Units • Access and interpret product information • Access and retrieve computer-based data • Use common business tools and technology • Operate a computerised reservation system • Source and provide destination information and advice • Maintain product information inventory. Critical Aspects of Assessment Evidence of the following is essential: • Understanding of the role of the automated information system within the host enterprise • Demonstrated ability to create files and folders for nominated new information on a designated automated information system • Demonstrated ability to access and retrieve nominated information from a designated automated information system and present that information in nominated electronic and hard copy format
--	--

	• Demonstrated ability to save electronic versions of nominated information from a designated automated information system and forward that information to a selected in-house computer • Demonstrated ability to input nominated data into appropriate electronic files, fields and/or folders on a designated automated information system • Demonstrated ability to perform basic daily/weekly back-up procedures for a designated automated information system. Context of Assessment Assessment must ensure: • Actual or simulated workplace to be able to demonstrate the application of techniques to operate an automated information system. Resource Implications Training and assessment must include the use of real equipment, databases, facilities, product information and systems in real or simulated workplace conditions. Assessment Methods The following methods may be used to assess competency for this unit: • Observation of practical candidate performance • Portfolio of hard copy documentation generated as a result of the operation of an automated information system • Simulated practical exercises • Role plays • Oral and written questions • Third party reports completed by a supervisor • Project and assignment work.
--	--

	Key Competencies in this Unit Level 1 = competence to undertake tasks effectively Level 2 = competence to manage tasks Level 3 = competence to use concepts for evaluating		
	Key Competencies	Level	Examples
	Collecting, organising and analysing information	1	Determining information to be captured; evaluating and verifying system data from outside sources
	Communicating ideas and information	1	Preparing retrieved information for presentation to those who requested it
	Planning and organising activities	1	Scheduling system back-ups; determining files, folders and locations for system information
	Working with others and in teams	1	Cooperating with other in the retrieving and loading of system information
	Using mathematical ideas and techniques	1	Calculating costs to enable best match of data to meet identified client need
	Solving problems	1	Conductive alternative on-line searches to secure missing and/or follow-up information
	Using technology	1	Using the internet and the host enterprise automated information system

Notes and PowerPoint slides

Slide

OPERATE AN AUTOMATED INFORMATION SYSTEM

D2.TTA.CL2.14
D2.TGA.CL6.06

Slide 1

Slide No	Trainer Notes
1.	Trainer introduces themselves and the unit.

Slide

Subject elements

This unit comprises five Elements:

Slide 2

Slide No	Trainer Notes
2.	Trainer advises this Unit comprises five Elements, as listed on the slide explaining: - Each Element comprises a number of Performance Criteria which will be identified throughout the class and explained in detail - Trainees can obtain more detail from their Trainee Manual(TM) - At times the course presents advice and information about various protocols but where their workplace requirements differ to what is presented, the workplace practices and standards, as well as policies and procedures must be observed: - Discuss housekeeping issues such as times of attendance, expected classroom behaviour, contact details, any resources required such as a calculator - Explain that the trainees will be assessed and the requirements of those assessments.

Slide

Assessment

Assessment for this unit may include:

Oral questions

Written questions

Work projects

Workplace observation of practical skills

Practical exercises

Formal report from supervisor

Slide 3

Slide No	Trainer Notes
3.	Trainer advises that assessment for this Unit may take several forms all of which are aimed at verifying they have achieved competency for the Unit as required. Trainer indicates the methods of assessment that will be applied to them for this Unit.

Slide

Element 1: Identify the context for use of an automated information system

- 1.1 Identify a range of information systems and sources in use within the industry
- 1.2 Describe policies and procedures for operating an automated information system
- 1.3 List information that may be available through an automated information system
- 1.4 Identify the functions of an automated information system

Slide 4

Slide No

Trainer Notes

4.

Trainer introduces the four performance criteria which make up Element 1.

Slide

1.1 Identify a range of information systems and sources in use within the industry

Identify different types of automated information systems

- CRS (GDS)
- Specific company designed systems:
 - Intranet
- Internet
- Government tourism bodies

Slide 5

Slide No	Trainer Notes
5.	Working through the associated pages in the Trainee Manual (TM) have discussion about each topic; types of information sourced. Regularity of use: • (CRS image on next slide) • You may choose for trainees to conduct searches from various systems if they are available to you • Complete Activity 1.

Slide

1.1 Identify a range of information systems and sources in use within the industry

Slide 6

Slide No	Trainer Notes
----------	---------------

6.

Trainer to lead a class discussion to compile a list of systems and sources.

Slide

1.2 Describe policies and procedures for operating an automated information system

Policy and procedure manuals determine the basis for achieving consistent standards of behaviour, operating procedures, quality of products and services provided:

- System access protocols
- Password controls
- Licences
- Software Licensing
- Intellectual property
- Confidentiality

Slide 7

Slide No	Trainer Notes
7.	• Obtain a copy of your IT policy and procedures for comparison • Work through each of the points in the TM. Compare these notes against what is listed in your IT policy • Check trainee knowledge and experience in this area – from current/previous workplace • Ensure trainees are aware of the following: ▪ Licenses ▪ Software licensing ▪ Intellectual property (IP) ▪ Confidentially laws/requirements.

Slide

1.2 Describe policies and procedures for operating an automated information system

- Security and integrity of information
- Storing of Files
- Prohibited Activities
- Legal considerations

Slide 8

Slide No	Trainer Notes
8.	• From previous slide • Ensure trainees are aware of the following: ▪ Licenses ▪ Software licensing ▪ Intellectual property (IP) ▪ Confidentially laws/requirements • Complete Activity 2.

Slide

1.3 List information that may be available through an automated information system

2.2 Identify and select appropriate sources of information

What information can be obtained through an automated system?

- Pricing
- Availability
- Destination information
- Visa information
- Product information

Slide 9

Slide No	Trainer Notes
9.	Brainstorm what other information can be obtained. Will one system provide information that another cannot?

Slide

1.3 List information that may be available through an automated information system

2.2 Identify and select appropriate sources of information

Information from third parties

- Tour operators
- Wholesalers

For an extensive list of tour wholesalers search the following:

- <http://www.cato.asn.au/members>
- <http://websitetravel.com/>
- http://www.ttgasia.com/article.php?article_id=4817
- <http://www.asiaescapeholidays.com.au/>

Slide 10

Slide No	Trainer Notes
10.	• Provide information to trainees about the role of tour operators and wholesalers and the services they provide • Log onto the websites listed in the TM to demonstrate services and offers available.

Slide

1.3 List information that may be available through an automated information system

2.2 Identify and select appropriate sources of information

- Intranet (company designed information system)
- Employee information
- Company information
- Computer Reservation System (CRS)

Slide 11

Slide No	Trainer Notes
11.	• Have discussion about company intranets and any trainee knowledge or experience in this area • Use the internet to demonstrate your own company intranet page and key information areas. (Trainees will need to access the student page for Activity 3.) • Discuss the many types of information available from a CRS or have trainees brainstorm this on the board. (This is covered in detail on next slide) • Complete activity 3 • Discuss Activity 4 to ensure trainees understand what is required • Have trainees present this back to the group.

Slide

1.4 Identify the functions of an automated information system

A central reservation system (CRS) is the most common system used today by travel agents as it is the most reliable for ensuring information is always current:

- Central Reservation System

Slide 12

Slide No	Trainer Notes
12.	• Take time to review the index of the Galileo training handbook as this indicates the functions of the system • Ensure trainees understand all terminology used • Review the pages in the TM which indicate how information is displayed including hotel and car reservations • Discuss these pages as necessary.

Slide

1.4 Identify the functions of an automated information system

A central reservation system (CRS) is the most common system used today by travel agents as it is the most reliable for ensuring information is always current:

- Central Reservation System

Slide 13

Slide No	Trainer Notes
13.	- Take time to review the index of the Galileo training handbook as this indicates the functions of the system - Ensure trainees understand all terminology used - Review the pages in the TM which indicate how information is displayed including hotel and car reservations - Discuss these pages as necessary.

Slide 16

Slide No

Trainer Notes

16.

Image from TM. Discuss as necessary.

Slide

1.4 Identify the functions of an automated information system

Internet

- The **World Wide Web** is a collection of electronic documents that are linked together like a spider web
- These documents are stored on computers called **servers** located around the world

Slide 17

Slide No	Trainer Notes
17.	• Take time to review the index of the Galileo training handbook as this indicates the functions of the system • Ensure trainees understand all terminology used • Review the pages in the TM which indicate how information is displayed including hotel and car reservations • Discuss these pages as necessary.

Slide

1.4 Identify the functions of an automated information system

Slide 18

Slide No	Trainer Notes
----------	---------------

18.	A simple visual image of how it all works.
-----	--

Slide

1.4 Identify the functions of an automated information system

The Web consists of:

- Your **personal computer**
- **Web browser software** to access the Web
- A connection to the **Internet Service provider (ISP)**
- **Servers** to host the data
- **Routers and switches** to direct the flow of data

Slide 19

Slide No	Trainer Notes
19.	Ensure trainees are familiar with terminology.

Slide

1.4 Identify the functions of an automated information system

A **website** is one or more web pages that relate to a common theme, such as a person, business, organization, or a subject, such as sports.

The first page is called the **home page**, which acts like an index, indicating the content on the site.

Slide 20

Slide No	Trainer Notes
----------	---------------

20.

Ensure trainees are familiar with terminology.

Slide

1.4 Identify the functions of an automated information system

A **web page** is an electronic document written in a computer language called **HTML** (Hypertext Markup Language).

Web pages can contain text, graphics, video and sound, as well as interactive features, such as data entry forms.

Each page has a unique address known as a **URL** (Uniform Resource Locator), which identifies its location on the server.

Slide 21

Slide No	Trainer Notes
21.	Discuss as necessary. Bring attention to terminology.

Slide

1.4 Identify the functions of an automated information system

Web pages are stored on **web servers** located around the globe

Entering the (Uniform Resource Locator) **URL** address of a web page in your web browser or clicking a link sends a request to the server which hosts the page.

The server sends the web page to your computer and your **web browser** displays it on your screen

Slide 22

Slide No	Trainer Notes
----------	---------------

22.	Discuss as necessary.
-----	-----------------------

Slide

1.4 Identify the functions of an automated information system

Internet allows users to:

- Connect easily through personal computers and other devices
- Exchange electronic mail (E-mail) worldwide, nearly instantaneously
- Access, review and create information
- Access multimedia information that includes sound, photos & video
- Access diverse perspectives from around the world

Slide 23

Slide No	Trainer Notes
23.	Lead a class discussion on student's use of the internet in their personal lives; then take the discussion to their professional lives.

Slide

1.4 Identify the functions of an automated information system

Internet explorer

Slide 24

Slide No	Trainer Notes
24.	- It is likely most trainees will be familiar with this content. If so, use this opportunity to have them explain their understanding - Ensure everyone understands these functions as computer skills can vary greatly.

Slide

1.4 Identify the functions of an automated information system

Google Chrome bookmarks

Slide 25

Slide No	Trainer Notes
----------	---------------

25.

Discuss as needed. Compare against program in use in your workplace or study area.

Slide

1.4 Identify the functions of an automated information system

Internet explorer bookmarks

Slide 26

Slide No	Trainer Notes
----------	---------------

26.

Discuss as needed. Compare against program in use in your workplace or study area.

Slide

1.4 Identify the functions of an automated information system

- Search engines
- Hyperlinks

<http://www.angliss.edu.au/>

Slide 27

Slide No	Trainer Notes
27.	• Access this web page will take you to the image displayed in the TM in order to demonstrate the hyperlinks. Many trainees will already be familiar with this function • Complete Activity 5.

Slide

1.4 Identify the functions of an automated information system

- My computer
- File folders
- Files
- File naming
- Minimise, restore and close windows
- Typing tips

Slide 28

Slide No	Trainer Notes
28.	Again, it is likely trainees will be familiar with this content however take time to ensure no one is left behind. After reviewing the information ask trainees (even if they thought they knew it all) if they were able to learn one new thing they didn't know before, no matter how small: • Ensure all work projects have been completed and handed into trainer ensuring cover page details are attached for assessment tracking • Review the summary page for Element 1 to confirm what has been completed for this element.

Slide

Element 2: Access information using an automated information system

- 2.1 Identify information requirements
- 2.2 Identify and select appropriate sources of information
- 2.3 Apply search techniques to locate identified information
- 2.4 Interrogate the system to secure full range of information
available on the system
- 2.5 Verify captured information meets identified need

Slide 29

Slide No	Trainer Notes
29.	Introduce the five performance criteria which make up Element 2.

Slide

2.1 Identify information requirements

The information requirements of your customer will depend on a range of different factors

The types of information you may need to investigate may include:

- Pricing of products and services
- Availability
- General destination information
- Product information:
 - Accommodation
 - Transport
 - Attractions
 - Amenities
 - Events and festivals

Slide 30

Slide No	Trainer Notes
30.	• Can trainees add anything more to this list? • Refer to the example in the TM of differing client needs.

Slide

2.1 Identify information requirements

Asking questions and taking notes helps you to get a clear picture of what your client needs:

- Ask questions
- Qualifying customer wants
- Sales skills
- Types of questions
- Continue qualifying

Slide 31

Slide No	Trainer Notes
31.	• Take time to discuss customer service skills • Refer to the example for consideration in TM • Each client is different • Discuss sales skills required when dealing with initial enquiries and clarifying wants and needs. Types of questions to use • Provide examples of how to phrase questions to obtain more in-depth answers • Importance of continuing to qualify client wants and needs to gain their satisfaction • Role play in pairs or small groups a client enquiry and practice asking suitable questions to qualify client preference and offer suitable recommendation • Complete Activity 6.

Slide

2.3 Apply search techniques to locate identified information

you will need to make a decision on where to start looking:

- Computer Reservation System
- A 'preferred' supplier
- A search engine – Google, Yahoo

Slide 32

Slide No	Trainer Notes
32.	• Share your experience with trainees on how to best approach enquiries and which search methods might be a best first approach. Ask trainees to share any experience they may have • Enquire if trainees have a preferred search engine and why it is so • Review the 5 most popular search engines in TM • Review making an enquiry in a search engine and the results presented. If you have access to the internet conduct a different enquiry for the group and interpret the results page for them • Answer any questions trainees may have about this before asking them to • Complete Activity 7.

Slide

2.3 Apply search techniques to locate identified information

Search engine - Google

Slide No	Trainer Notes
33.	Discuss as needed. Select images as needed.

Slide

2.3 Apply search techniques to locate identified information

Search engine - Yahoo

The screenshot shows the Yahoo! homepage with a search bar at the top. The main content area features several news headlines, including 'World's favourite amusement and water parks', 'New damning MH17 video released', and 'Salma Hayek Poses Topless in 'Allure' Magazine'. There are also links to 'Today's Headlines', 'Sports Scores LIVE', and a weather forecast for Melbourne. The page is cluttered with various advertisements and sponsored content.

Slide 34

Slide No

Trainer Notes

34.

If access to internet is available, enter a search topic to demonstrate how to access web pages and images.

Slide

2.3 Apply search techniques to locate identified information

Key words and phrases

- Use the words likely to appear on the pages you want; i.e.—
Singapore Car Hire; Brunei cheap hotels
- Avoid using a question as a query. For example, the query '**Does Hanoi have a Hilton Hotel**' instructs the search engine to find all these words. Such a query won't necessarily find pages answering your question. A better, or more effective, query may be '**Hanoi Hilton Hotel**'
- When a search engine registers common words such as 'where', 'do', 'I', 'for' and 'a' it ignores them so that the engine can return more targeted results

Slide 35

Slide No	Trainer Notes
35.	Share your experience with trainees on phrasing enquiries and discuss further as needed.

Slide

2.3 Apply search techniques to locate identified information

Key words and phrases continued

- Does your query have enough specific terms; i.e. **'Hanoi'**, **'Hanoi Hotels'**, or **'Hanoi Cheap Hotels'**
- If you are searching for something that returns many different types of results, you should add a word that distinguishes them
- For best results, use a few specific words. For example, **'Cheap Hanoi Hotels'** will return a better result than **'List of Cheapest Hanoi Hotels with Swimming Pools'**
- Search engines will usually recognise any spelling mistakes and suggest a more common spelling quickly

Slide 36

Slide No	Trainer Notes
36.	• Continued from previous slide • Ask trainees to consider their search enquiry phrase or key words for Activity 8. Provide a time allowance for completion • Complete Activity 8. Once completed randomly ask for answers to each question. Did anyone approach the question differently? Which search engine was used?

Slide

2.3 Apply search techniques to locate identified information

Refining a query

- You are looking for information on car hire in Thailand for a corporate client who needs a limousine service. You could enter '**Thailand Car Hire**', but many results will come back referring to general Thailand car hire
- You would need to refine your entry by putting in '**Thailand Car Hire Limousine Service**' as the search description in order to get the level of detail you want

Slide 37

Slide No	Trainer Notes
37.	• Discuss the example from the TM listed here • Brainstorm suggestions for Activity 9. You may choose to provide more examples to highlight how you can refine queries to be time efficient • Have trainees complete Activity 9.

Slide

2.3 Apply search techniques to locate identified information

Social media platforms

Slide 38

Slide No	Trainer Notes
38.	• Enquire how many trademarks are recognised, how many used by trainee • Work through each of the social media platforms discussing pro's and cons of each • Trainees will be able to offer personal opinion and experience here • Complete Activity 10.

Slide

2.4 Interrogate the system to secure full range of information available on the system

The internet

- The internet is a valuable automated information tool
- The internet will return a great deal of information to you
- From all the information you find or purchase, you can then select, download and organise what is most relevant to the customer's query and requirements

Slide 39

Slide No	Trainer Notes
39.	Discuss as necessary, focusing on how to find your way through the maze of information to what is most suitable to you for your client.

Slide

2.4 Interrogate the system to secure full range of information available on the system

Slide 40

Slide No	Trainer Notes
40.	- This slide demonstrates search tools. Use the next slide to show drop boxes within Search Tools options - Discuss further as necessary - If access to the internet conduct a different search and discuss as a group how to organise the returned content before asking trainees to complete Activity 11 - Complete Activity 11.

Slide

2.4 Interrogate the system to secure full range of information available on the system

The screenshot shows a Google search for "Golf Tours Peneng malaysia". The search bar is at the top, and the results are displayed below. The "Web" tab is selected. The search filters are visible, with "Any country" and "Any time" circled in red. The search results include links to "Penang Golf Courses", "Malaysia Golf", and "Golf in Malaysia".

Slide 41

Slide No	Trainer Notes
41.	• Links to previous slide • Now discuss 'conducting further search' • If access to internet a search can be conducted to demonstrate these tools for the group • Follow TM and discuss and explain the advanced search functions • Complete Activity 12.

Slide

2.4 Interrogate the system to secure full range of information available on the system

- Available information
- Displaying information:
 - By star rating
 - By price
 - By location (distance)
 - By deal

Slide 42

Slide No	Trainer Notes
42.	- Working from the TM discuss the information displayed on this web page (which is from the TM) - If access to internet, bring up the site and navigate it for the group showing the different information able to be sourced - Demonstrate the 'Back' and 'refresh' buttons, hyperlinks and opening additional tabs - Answer any questions trainees have - Complete Activity 13 – provide a time allowance and have trainees present back to the group. Discuss search methods and findings.

Slide

2.5 Verify captured information meets identified need

Once you have decided what information you need to provide to your customer, you need to ensure the scope and depth are appropriate:

- It is up to your discretion to decide how much information you need to provide
- You need to consider your customer needs but also it will depend on what your job role is

Slide 43

Slide No	Trainer Notes
43.	• Discuss varying job roles from travel agencies to visitor information centres – small and large. How much would you need to know in a particular role? • Discuss Activity 14: ▪ Wealthy couple/on a budget ▪ Retired/on holiday ▪ Easy going/very particular on preference ▪ Experienced golfers? ▪ Complete Activity 14 • Ensure all work projects have been completed and handed into trainer ensuring cover page details are attached for assessment tracking • Review the summary page for Element 2 to confirm what has been completed for this element.

Slide

Element 3: Obtain information using an automated information system

- 3.1 Enable access to required system and/or information
- 3.2 Select required information
- 3.3 Download information
- 3.4 Print information

Slide 44

Slide No	Trainer Notes
44.	Trainer introduces the performance criteria which make up Element 3.

Slide

3.1 Enable access to required system and/or information

- Information purchased for your organisation
- Making purchases for your clients
 - purchasing online varies depending on a number of factors including:
 - The system you are using
 - The product or service you are purchasing
 - The availability of the product or service
- Security and automated purchasing

Slide 45

Slide No	Trainer Notes
45.	• Share your experience on the most common purchases made • Discuss purchasing processes and protocols: ▪ Using a CRS ▪ Using a wholesaler ▪ Booking tours and cruises ▪ Hotel booking ▪ Car hire booking • Quote or receipts for payment • Discuss security when purchasing online • If access to the internet search a hotel or airline website and demonstrate the various screens to the payment page.

Slide

3.1 Enable access to required system and/or information

- Points to remember when purchasing online:
 - Double check pricing
 - Find and read the privacy policy.
 - Review the return, refund, and shipping and handling policies as well as the other legal terms
 - Print the terms
 - Make sure the internet connection is secure
 - Use the safest on-line payment method

Slide 46

Slide No	Trainer Notes
46.	● Discuss as necessary adding any personal knowledge or experience of things that may have gone wrong ● Ensure all trainees are familiar with the security icons to look for when making payment online.

Slide

3.1 Enable access to required system and/or information

- Type of information sites:
 - Bookmarking sites
 - Social news
 - Media sharing
 - Micro-blogging
 - Blog comments and forums

Slide 47

Slide No	Trainer Notes
47.	• Work through each of the types of information sites seeking any knowledge or experience trainees have in these fields • Include the CRS as one of the information systems • Complete Activity 15.

Slide

3.2 Select required information

- Consider the reliability and reputation of the information source
- Preferred suppliers
- Best option data

Slide 48

Slide No	Trainer Notes
48.	• This performance criteria revisits material already covered and the opportunity can be taken to have trainees share their new knowledge on what process they would follow • Complete Activity 16 – (you may wish to indicate different ages for the children in the scenario to different trainees in order to vary the information returned).

Slide

3.3 Download information

- What is your company policy on this?
- When downloading, you should always check the size of the files and estimate the time required to download them
- Does your enterprise have broadband or wireless access - relatively fast downloading?
- or dial up access - relatively slow downloading
- Are there any copyright issues?

Slide 49

Slide No	Trainer Notes
49.	Break class into smaller groups and have groups work through these questions from their knowledge of their workplaces. Each group then to present on their responses.

Slide

3.4 Print information

- Selected the correct printer
- Black and white or colour copy
- Which page numbers
- Portrait or landscape printing
- Single or double sided

Slide 50

Slide No

Trainer Notes

50.

- Explain the printing page and emphasise the areas where people generally make silly mistakes:
 - Too many copies
 - Wrong page numbers
 - Not printing a sample copy
 - Printing in colour when not necessary
 - Not doing a print preview.

Slide

3.4 Print information

Printer properties

Slide 51

Slide No	Trainer Notes
51.	- Explain various basic uses from this page - Always review you have selected all the correct choices before activating large print jobs - Have samples available for trainees to view: - Double sided - Two pages on one page (2in1) - Stapled – top corner, two on left side - Hole punched and stapled - Water marking - Complete Activity 17 - Ensure all work projects have been completed and handed into trainer ensuring cover page details are attached for assessment tracking - Review the summary page for Element 3 to confirm what has been completed for this element.

Slide

Element 4: Use information from information an automated information system

- 4.1 Forward information as required
- 4.2 Save identified information
- 4.3 Manipulate accessed information
- 4.4 Report on findings

Slide 52

Slide No	Trainer Notes
----------	---------------

52.

Trainer to introduce the performance criteria which make up Element 4.

Slide

4.1 Forward information as required

- There may be times where you decide to send information to your client via email
- Include a clear explanation of why you are forwarding the information
- If forwarding information to several people, use the Bcc function
- Keep notes of the information you are giving to clients so that it can be easily retrieved in the future

Slide 53

Slide No	Trainer Notes
53.	• Discuss as needed taking into consideration requirements required for Activity 18 • Complete Activity 18.

Slide

4.2 Save identified information

- Information you have conducted searches for
- Documents you have created or altered
- Consider company policies, IP and copyright

- Downloading and saving software

Slide 54

Slide No	Trainer Notes
54.	- Explain why you need to consider company policy, Intellectual property and copyright - Discuss as needed paying attention to the importance of clicking 'save' on software that is downloaded (and approved by management to do so). It is important to save material to suitable locations so maintain order to your filing systems.

Slide

4.2 Save identified information

Saving files in Word

Slide 55

Slide No	Trainer Notes
55.	- It is likely trainees will be familiar with these procedures however take time to explain correct procedures to anyone who may be new to the information - In this example 'my passport' is an external hard drive and the removable disk is of course a USB stick (thumb drive) - Auto save is useful as a backup but don't rely on it! - Again emphasise the importance of labelling and saving files to correct locations. It doesn't take long for your computer to become a filing mess because you thought you would fix it later - Complete Activity 19.

Slide

4.3 Manipulate accessed information

Body Copy:

- Customer databases:
 - Organising Data

A field is a single column

	A	B	C	D	E
1	MBI Computer Corporation				
2					
3	Lname	Fname	Age	Salary	Position
4	Bastow	Wendy	41	34000	Programmer
5	Porter	Rozzi	45	56000	Engineer
6	Rydberg	Hayden	34	45000	Systems Analyst
7	Keating	Prue	54	45000	Manager
8	Grieser	Adam	23	32000	Programmer
9	Hawking	Tara	35	34000	Assistant Manager
10	Yee	Ron	26	34000	Programmer

Column labels are field names

A record is a single row in the list

Slide 56

Slide No

Trainer Notes

56.

- Ideally this training should be conducted in a computer room or an area where trainees can work into a computer or personal laptop
- Some trainees may be familiar with Excel already. If this is the case ask them to assist someone who is new to the program.

Slide

4.3 Manipulate accessed information

To open a data form:

- Click A3 to select it
- Choose the Data menu, then the Form command.
- Remember if the Form command is not visible, you may have to click ..., to display all the commands under this menu.

Slide 57

Slide No	Trainer Notes
57.	Trainer to lead students through the process, or ask an experienced student to do so.

Slide

4.3 Manipulate accessed information

A data form appears displaying the first record in the database.

Lname	Fname	Age
Bastow	Wendy	41
Porter	Rozzi	45
Rydberg	Hayden	34
Keating	Prue	54
Grieser	Adam	23
Hawking	Tara	35
Yee	Ron	26

Slide 58

Slide No Trainer Notes

58.

- Record Number Indicator
- A data form can display up to 32 fields
- The record number indicator is displayed in the upper right-hand corner of the data form. This indicates which record is being displayed and how many records are in the database
- Explain the command tabs as listed in the TM.

Slide

4.3 Manipulate accessed information

- Using a data form to edit records
- To change the Age field of the displayed record from 41 to 42:

Double inside the Age field edit box: Age:

- Click: worksheet
- Type: 42 to alter the Age
- Using a data form to add records
- You may add records to the database by clicking the button in the data form

Slide 59

Slide No	Trainer Notes
59.	Follow the exercise in the TM explaining each step to trainees.

Slide

4.3 Manipulate accessed information

- Using a data form to find records
- Sorting on one field
- Sorting on multiple fields

Slide 60

Slide No	Trainer Notes
60.	Using your laptop and data projector display an excel spread sheet for the group and demonstrate each of the above listed steps. If trainees have access to computers or laptops have them work through each step with you.

Slide

4.3 Manipulate accessed information

Automatic subtotals

3	Lname	Fname	Age	Salary	Position
4	Hawking	Tara	35	34000	Assistant Manager
5	Porter	Rozzi	45	56000	Engineer
6	Keating	Prue	54	45000	Manager
7	Morrison	Lynne	41	40000	Manager
8	Bastow	Wendy	42	34000	Programmer
9	Grieser	Adam	23	32000	Programmer

Automatic Total would be placed here

Automatic Total would be placed here

Slide 61

Slide No Trainer Notes

- | | |
|-----|--|
| 61. | <ul style="list-style-type: none"> • Work through automatic subtotals and subsequent steps as listed in TM. Allow trainees to follow each step on the computer screen having time for questions along the way. Ensure everyone is at the same point of progression • Have trainees save their work to a USB • Complete Activity 20. |
|-----|--|

Slide

4.4 Report on findings

Making recommendations:

- To colleagues
- To management
- To clients

Slide 62

Slide No	Trainer Notes
62.	• Have discussion on the various types of reporting that may be required in the workplace • Most common is likely to be to clients • Explain how to create sequence and structure so the client is not lost along the way • Have a copy of the report for the client to follow and make any notes on as explanation is conducted • Complete Activity 21 • Ensure all work projects have been completed and handed into trainer ensuring cover page details are attached for assessment tracking • Review the summary page for Element 4 to confirm what has been completed for this element.

Slide

Element 5: Up-date and maintain information on an automated information system

5.1 Enter data onto automated information system

5.2 Save and back-up data

Slide 63

Slide No	Trainer Notes
63.	Trainer to introduce the performance criteria which make up Element 5.

Slide

5.1 Enter data onto automated information system

You will be required to open, generate and amend data, according to task and organisational requirements:

- Update and maintain information:
 - Retrieve, view and close a word document;
 - Create, save and print a word processing document
 - Retrieve, amend, save and print a word document

Slide 64

Slide No	Trainer Notes
64.	It is likely trainees will know how to complete these tasks. Confirm this as fact before moving on.

Slide

5.1 Enter data onto automated information system

- Directories, sub directories and folders
- Records and fields
- Log-in/log-out protocols
- Proofreading
- Spellcheck and thesaurus
- Accessing recent records
- Deleting files
- Menus and prompts
- Default settings
- Error correction
- Keying techniques
- Screen sizing
- Copying to thumbdrive / pendrive / USB
- Fonts and font size

Slide 65

Slide No	Trainer Notes
65.	• The previous slide contained relatively basic skills there is likely to be one or more skill identified here that not all trainees are familiar with • Take time to identify where each of these tools are located on the tool bar and how to use them.

Slide

5.1 Enter data onto automated information system

Locating data

Slide 66

Slide No	Trainer Notes
66.	- Demonstrate how to conduct a 'Find' search - Click on "Find" and enter a phrase or key words in the search bar to demonstrate that it will take you to a particular part of a document.

Slide

5.1 Enter data onto automated information system

Locating data

Slide 67

Slide No	Trainer Notes
67.	• Demonstrate searching for documents • Have something prepared that you can suitably demonstrate on your own folders or computer • Activity 22 should have been completed already.

Slide

5.1 Enter data onto automated information system

- Save, close and backup data
- Storing reference information:
 - on hard drives
 - on USB/thumb drives
 - on networked computers
- Archiving

Slide 68

Slide No	Trainer Notes
68.	Have discussion on where trainees save files to: ● Any trainees who have work experience? – What is or was the company policy in this area? ● Who backs up their work? ● Does anyone keep a hard copy as backup? ● Who has lost files due to computer crashing, virus, fire or other problem? ● Have discussion on archiving and the importance of this being conducted to company standards ● Discuss the common ways of archiving and associated business/tax law for your country ● Complete Activity 23 – ensure trainees understand requirements. Demonstrate how to do a screen shot if needed ● Ensure all work projects have been completed and handed into trainer ensuring cover page details are attached for assessment tracking ● Review the summary page for Element 5 to confirm what has been completed for this element.

Slide

The End

This unit comprised five Elements:

1. Identify the context for use of an automated information system
2. Access information using an automated information system
3. Obtain information using an automated information system
4. Use information from information an automated information system
5. Up-date and maintain information on an automated information system

You have now completed this unit and the trainer will provide details on assessment.

Good Luck

Slide 69

69.	Trainer advises learners on what assessment is required and how it is to be conducted.

Activities for work projects

Name: _____

Date: _____

Activity 1 – Information sources

1. List five possible sources of information which you may use to capture knowledge to give to visitors.

2. Answer 'True' or 'False' to the following statement: "Most festivals and events vary in their exact date from year-to-year".

3. List five websites you believe can be important to you for obtaining visitor information.

4. List five ways you can access required visitor information.

Name: _____

Date: _____

Activity 2 – Policy and procedure

NOTE: It is a requirement of this unit that you attempt this Training Activity.

1. A new staff member (trainee) commences work at your travel agency. You are responsible for ensuring that this trainee is familiar with the purposes for which the automated information system in the office may be used. Explain to this staff member the circumstances in which they might need to use the system and the types of information that may be accessed.

Explain the basic do's and don't's that relate to use of the system. Remember you are dealing with a trainee so don't overload them with too much to begin with.

In bullet point form, what will you say to the trainee?

2. Match each term to its definition:

a) Privacy policy		The right of an author to decide how their original work is published, distributed and adapted.
b) Copyright		Refers to creations of the mind, such as ideas or inventions that have commercial value.
c) Intellectual property		A legal document that discloses what personal information is collected from customers and how it is used.

3. Access the privacy policy from the following website:

www.wotif.com.au

4. Cut and past the two paragraphs under the heading 'Our privacy policy' into this box:

Name: _____

Date: _____

Activity 3 – Types of information

1. List four different types of information you are able to access from your CRS.

2. Access your organisation's intranet home page to see what information is available for you.

- a) List three examples of information for employees of the organisation.

- b) List four examples of information provided for clients of the organisation.

Name: _____

Date: _____

Activity 4 – source information

NOTE: It is a requirement of this unit that you attempt this Training Activity.

“I want to find out which domestic tour wholesalers are promoting their products on the web and what they are promoting” says your Manager. He/she needs the information in an hour for an important internal meeting. Source and print the information, with a very brief summary of what you have found.

Name: _____

Date: _____

Activity 5 – Internet search

Try to answer these questions by using a search engine (e.g. www.google.com.au). Try practicing using shorter key word searches, instead of typing the whole question into the search engine. Place your answer & the website you found it on in the spaces provided.

TIP: Copy & paste the website address directly off the webpage (found in the "address bar") straight into your document!

No.	Questions	Answers	Website
1	What is the capital city of Vietnam?		
2	What is the national sport of Thailand?		
3	When is the Water Festival in Cambodia and what is it about?		
4	I want to go to the Great Lantern festival in the Philippines. Can you tell me about it?		
5	Which SE Asian countries conduct a marathon?		
6	When is the Dragon Boat Festival in Penang?		
7	I am a Grand Prix fan. Where and when are they held in SE Asia?		
8	Name the three largest countries in SE Asia?		
9	Is it possible to travel by train from Johor Bahru to Mandalay?		
10	I have a one night stopover in Brunei. What could I do?		

Name: _____

Date: _____

Activity 6 – Access information

1. What general information may a client require about a destination?

2. What kind of information do you think a client may need about the following products?

Accommodation:

A cruise:

A flight:

Name: _____

Date: _____

Activity 7 – Search engines

Use three different search engine and compare results

Search engine used _____

Search for 'budget beach accommodation Thailand'. List the below details, for the first result you get.

Page title:

What page extract is listed?

Web address:

Search engine used _____

Search for 'budget beach accommodation Thailand'. List the below details, for the first result you get.

Page title:

Web address:

Search engine used _____

Search for 'budget beach accommodation Thailand'. List the below details, for the first result you get.

Page title:

What page extract is listed?

Web address:

Name: _____

Date: _____

Activity 8 – Find the answers

Using **key words** in a search engine, find answers to the following questions:

1. What is the address for the palace of the Sultan of Brunei?

2. What are the opening hours of Singapore zoo?

3. What is the name of the main international airport in Kuala Lumpur?

4. What is the exchange rate for 1 Philippine peso to the Singapore dollar?

5. What is the main form of transport between Myanmar and Malaysia?

Name: _____

Date: _____

Activity 9 – Refining a query

Scenario – Refining a query

A customer requests information on beach accommodation in Thailand. She is travelling in a party of eight people and they can only travel in April.

Show in the space below a basic query to start the search for information for this customer, and then show one way in which you could refine the query.

Basic query

	SEARCH
--	---------------

Refined query

	SEARCH
--	---------------

Print screen the final results and attach it to this activity and hand in to your trainer.

Name: _____

Date: _____

Activity 10 – Determine social media platforms for information

NOTE: It is a requirement of this unit that you attempt this Training Activity.

Please identify:

- Which social media platforms that you will use as a preferred source of information
- Identify what type of information each platform would be useful for.

SOCIAL MEDIA PLATFORM	Type of information

Name: _____

Date: _____

Activity 11– Determine most suitable search query results

From the list of results below, place in order the most suitable to the least suitable result for the query.

Golf Tours Penang Malaysia

SEARCH

Malaysia Golf Holidays - GolfAsian.com

www.golfasian.com/golf-holidays/malaysia/ ▼

Malaysia Golf Holiday Packages & Tours | Golf in Malaysia ... golf courses located throughout Peninsular Malaysia, the nearby islands of Penang and Langkawi ...

Name: _____

Date: _____

Activity 12 – Determine most suitable search query result

Give two examples of queries using the +, or and numrange options.

Attach your answers to this activity and hand in to your trainer

+

OR

Numrange

Find pages on surfing that are not about 'surfing the World Wide Web'. Write down how you would phrase your search query.

Find a studio apartment to rent in Singapore and list the web address.

Fine tune the above query to a studio apartment located near the Singapore Botanical Gardens and list the web address.

Name: _____

Date: _____

Activity 13– Search information

1. Imagine that you are working in a travel agency specialising in booking transport around South-east Asia. Make a list of ten websites you would include as 'Favourites'. The list must include three airlines and three car hire companies, two coach companies and one train service

2. When searching for accommodation on a wholesaler website, list three different ways that the information could be filtered to narrow your search.

3. Use a search engine to complete the following activity.

Scenario

You have a client tell you that they heard about a place in Indonesia where they can go whale watching but they don't know the name of the place and neither do you! You use Google to help you. You type in the words 'whale watching Indonesia' which helps you to discover that Komodo is the name of the place.

Look at the client questions below, list three words you could put into Google to help you find information and then list the correct answer.

a) I heard you can do elephant trekking in SE Asia.

Three search words:

Answer:

b) I heard there is a great theme park in SE Asia for kids. Where is it?

Three search words:

Answer:

4. Go to www.expedia.com.

a) What is the minimum amount of information you need to input in order to get a price for a hotel?

b) There are a number of ways that you can make your information search more specific. List six hotel facilities that you are able to select to refine your search?

c) List four other products or services that can be booked for clients through Expedia.

Name: _____

Date: _____

Activity 14 – Verify captured information meets identified criteria

Complete the example; Golf Tours in Malaysia

Mature age couple in their 50's. On holiday for 6 nights. Require hotel accommodation in 4-5 star hotel. Would like to play 2 different golf courses but open to suggestion. Would like to meet or compete against others.

What information would you return to the couple to verify you are meeting their requirements?

Name: _____

Date: _____

Activity 15 – Information sites

Using a different source each time copy a sample of tourism based information that you may use for clients from each of the following sites:

- Social news
- Bookmarking sites
- Media sharing
- Microblogging
- Blog comments and forums.

Name: _____

Date: _____

Activity 16 – Select information

A family holidaying in the local region enters your visitor information centre. They have arrived by car earlier in the day and at this stage have not chosen any accommodation in which to stay. They request information from you about the major attractions of the town and immediate surrounding area and indicate that they are particularly interested in outdoor activities which may be suitable for their young children. In a couple of days they will travel north, and would also like information on the area into which they are travelling. Access and print information for this family regarding:

- Suitable accommodation options
- Major attractions
- Outdoor activities.

[illegible]

Name: _____

Date: _____

Activity 17 – Download and print information

Scenario

You have booked your clients on an Air Asia flight from Bali to Cebu. They have requested some additional information from you.

Use the Air Asia website to answer their questions and to find the information they require.

1. What is the name of the Air Asia frequent flyer program?

2. Is there a cost to join this program?

3. Access the application form. Either print the application form and attach it to this page or write down the web address to access this page.

4. Search 'Cebu city guide'. Identify two sites you would source information from and indicate how reliable you think the information is.

5. List two other ways of presenting this information to your client.

Name: _____

Date: _____

Activity 18 – Forward information

You have been researching information on children's activities in Singapore for a couple with three children aged 8, 12 and 14 who will be travelling in January.

Provide a copy of your research and detail how you will forward this information to the family and check its suitability.

Name: _____

Date: _____

Activity 19 – Downloading information

Download from an automated information system, and print out, a list of conferences being held in Singapore in September 2016. Attach your list to this Learner Guide for assessment.

Name: _____

Date: _____

Activity 20 – Manipulating information

Create a database using Excel, with the following 15 column headings:

1. Title
2. Given Name
3. Last Name
4. Position
5. Company
6. Address1
7. Address2
8. Suburb/City
9. State
10. Country
11. Postcode
12. Phone Bus
13. Phone Mobile
14. Email
15. Work Address

Input Data.

Save to your USB as Singapore 2016 delegate list.

Adjust the column width so that all data is displayed in the cells, change the page set-up to Landscape and Print a copy to submit .

Create a simple database query

Create a copy of the above file and save it using a different name e.g. delegate list 2.

Condense the database by keeping only the following 6 column headings and data:

- Title, Given Name, Last Name, Position, Company, Email.

Add in 2 more column headings titled Registration type, Value: and input the data from the attached sheet.

Run a query that sorts the data by Registration type, then Organisation, then Last name. Print this document.

Title	Given Name	Last Name	Registration Type	Value
Mr	George	Tran	Early Bird	\$275.00
Dr	Christopher	Short	Full Registration	\$300.00
Ms	Julia	Marriott	Early Bird	\$275.00
Dr	Michelle	Jenkins	Tuesday Day	\$143.00
Mrs	Julie	Mitchell	Full Registration	\$300.00
Ms	Emma	Brown	Early Bird	\$275.00
Dr	Patrick	Chan	Full Registration	\$300.00
Dr	Tony	Wong	Full Registration	\$300.00
Ms	Rosalie	Nguyen	Tuesday Day	\$143.00

Name: _____

Date: _____

Activity 21 – Report to clients

You have a group of ten people who are attending the Green Energy Asia exhibition in Kuala Lumpur in June 2016. They will be travelling to the city and staying 5 nights. You are requested to put together a calendar of events to entertain the group whilst they are there. They enjoy dining out, playing golf, some wish to see a few sights. They are all in their forties and fifties. They don't wish to be extravagant but reasonable pricing will not be an issue. Four star accommodation is preferred. They are travelling from Jakarta.

Report back to the group via email on your findings.

Recommended training equipment

- Galileo Training Handbook
- Computer access
- Stationary items.

Instructions for Trainers for using PowerPoint – Presenter View

Connect your laptop or computer to your projector equipment as per manufacturers' instructions.

In PowerPoint, on the **Slide Show** menu, click **Set up Show**.

Under Multiple monitors, select the Show Presenter View check box.

In the **Display slide show** on list, click the monitor you want the slide show presentation to appear on.

Source: <http://office.microsoft.com>

Note:

In Presenter View:

You see your notes and have full control of the presentation

Your trainees only see the slide projected on to the screen

More Information

You can obtain more information on how to use PowerPoint from the Microsoft Online Help Centre, available at:

<http://office.microsoft.com/training/training.aspx?AssetID=RC011298761033>

Note Regarding Currency of URLs

Please note that where references have been made to URLs in these training resources trainers will need to verify that the resource or document referred to is still current on the internet. Trainers should endeavour, where possible, to source similar alternative examples of material where it is found that either the website or the document in question is no longer available online.
