

COMMISSION ON HIGHER EDUCATION (CHED)

Ladderized Education Program(LEP)

- Republic Act (RA) 10647
 - ▣ “An Act Strengthening The Ladderized Interface Between Technical-Vocational Education And Training And Higher Education”
 - ▣ signed on July 28, 2014
- <http://www.gov.ph/2014/11/21/republic-act-no-10647>

LEP, Section 2

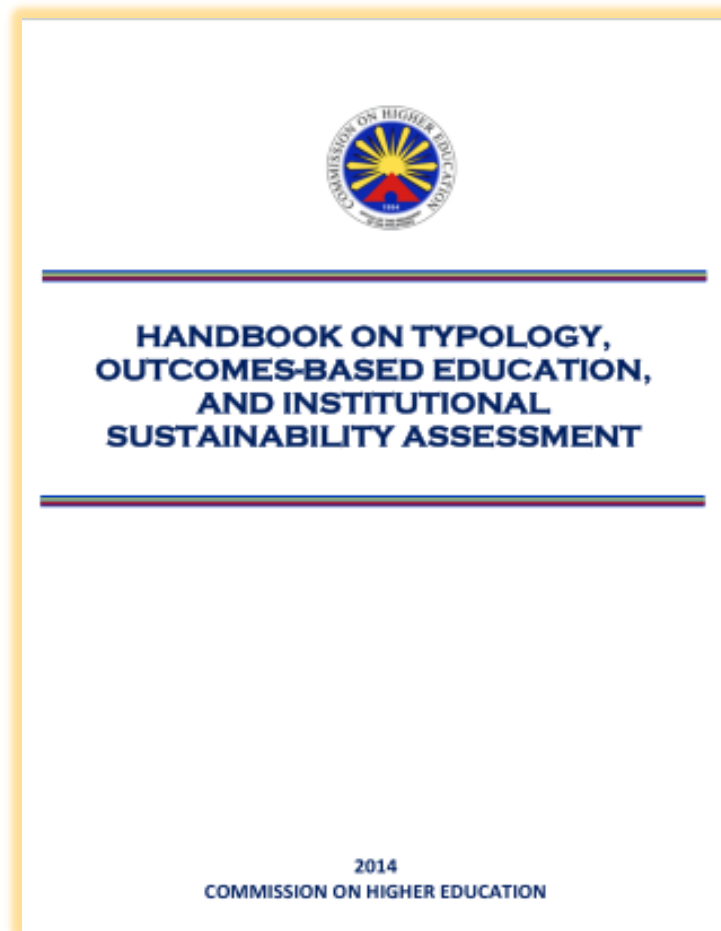

- “it is hereby declared the policy of the State to institutionalize the **ladderized interface between technical-vocational education and training (TVET) and higher education** to open the pathways of opportunities for career and educational progression of students and workers, **create a seamless and borderless system of education**, empower students and workers to exercise options or to **choose when to enter and exit** in the educational ladder, and **provide job platforms at every exit as well as the opportunity to earn income.**”

Outcomes Based Education (OBE)

- <http://www.ched.gov.ph/wp-content/uploads/2014/06/Handbook%20on%20Typology%20Outcomes.pdf>

OBE

- ❑ Defined “as an approach that focuses and organizes the educational system around what is essential for all learners to know, value, and be able to do to achieve a desired level of competence”
- ❑ this means describing the attributes of their ideal graduates based on their visions and missions as part of their institutional goals or outcomes, and using these as bases for developing specific program outcomes.

Outcomes

- Program outcomes are the sets of competencies (related knowledge, skills, and attitudes) that all learners are expected to demonstrate.
- Institutional or program outcomes may also emphasize lifelong learning
- Course outcomes refer to the knowledge, values, and skills all learners are expected to demonstrate at the end of a course.
- Learning outcomes may result from a specific lesson, although it is sometimes used interchangeably with course outcomes.

OBE**

It's more fun in the
Philippines

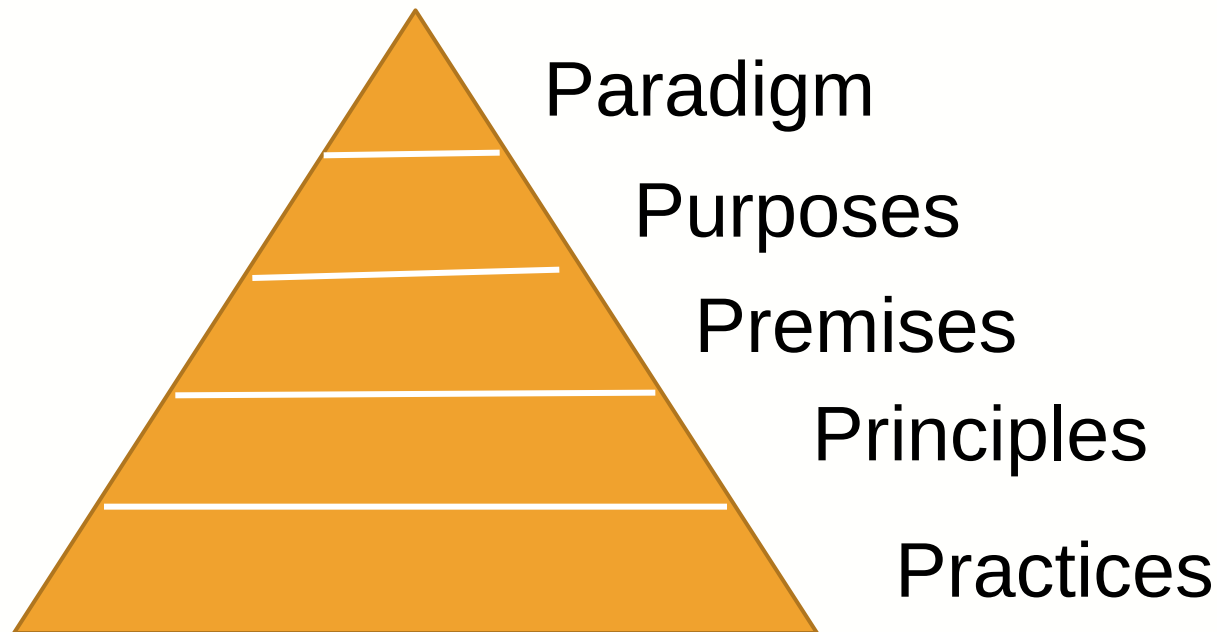

Why OBE?

- ❑ **High information availability**
 - ❑ Technologically dominated, multicultural diversity, changing word demands
- ❑ **Current educational system is outdated**
 - ❑ Focused on WHEN and HOW rather on the WHAT and WHETHER a student learns
- ❑ **Organizational improvement approaches**
 - ❑ Status quo is not acceptable; continuous improvement is needed
- ❑ **Evidenced based learning**
 - ❑ Credentialing, portfolio building

OBE Pyramid

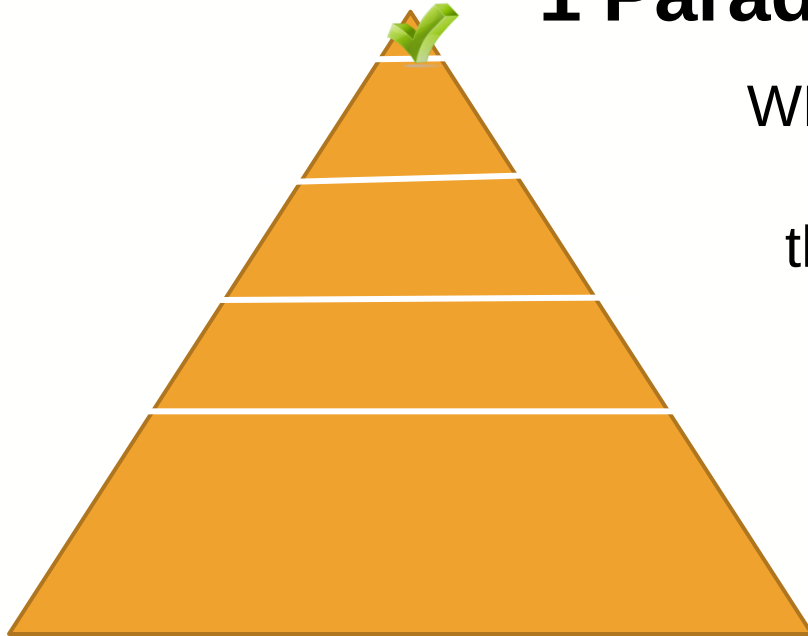

OBE Pyramid

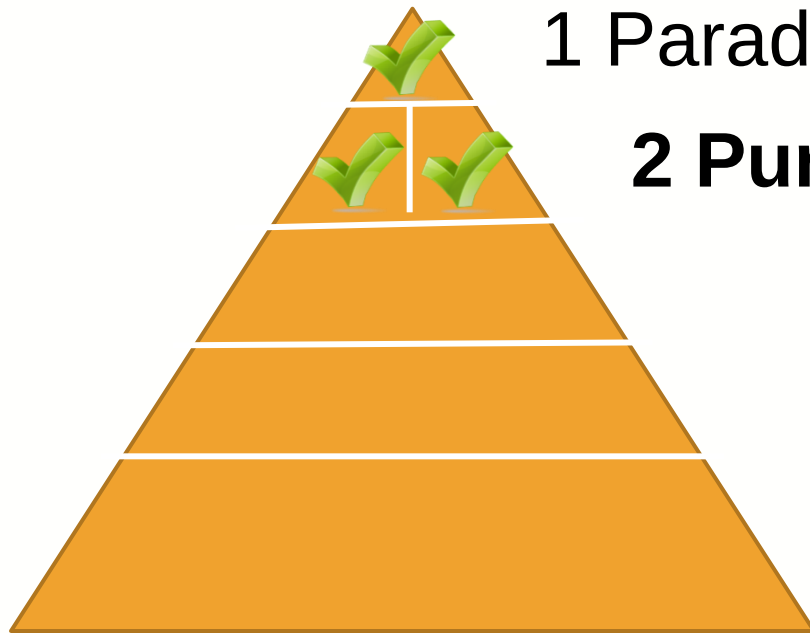

1 Paradigm

WHAT and WHETHER students learn well is more important than WHEN and HOW they learn it

- Clearly define framework of exit outcomes
- Time is an alterable resource
- “criterion-based”
- Increasing student’s learning and ultimate performance abilities

OBE Pyramid

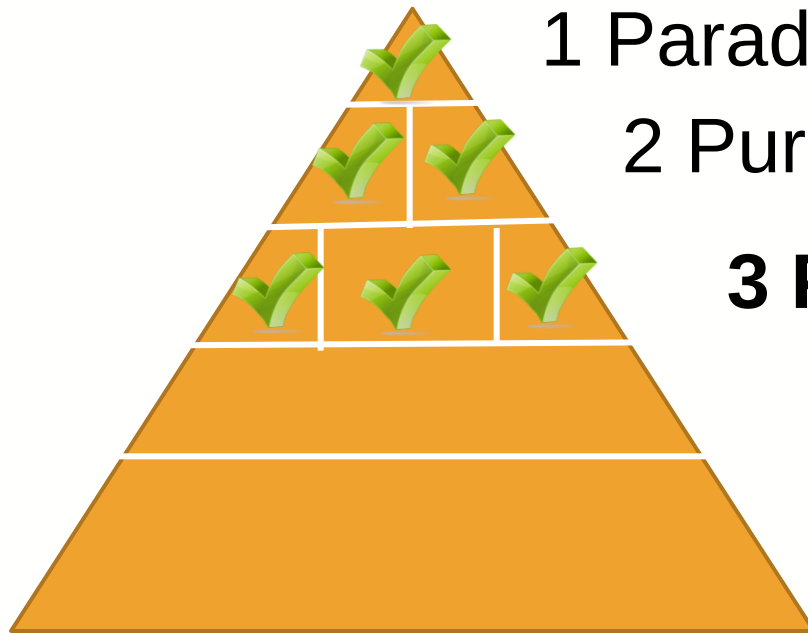

1 Paradigm

2 Purposes

Equip all students with knowledge, competencies and orientations needed for future success

Implement programs and conditions that maximize learning success for ALL students

OBE Pyramid

1 Paradigm

2 Purposes

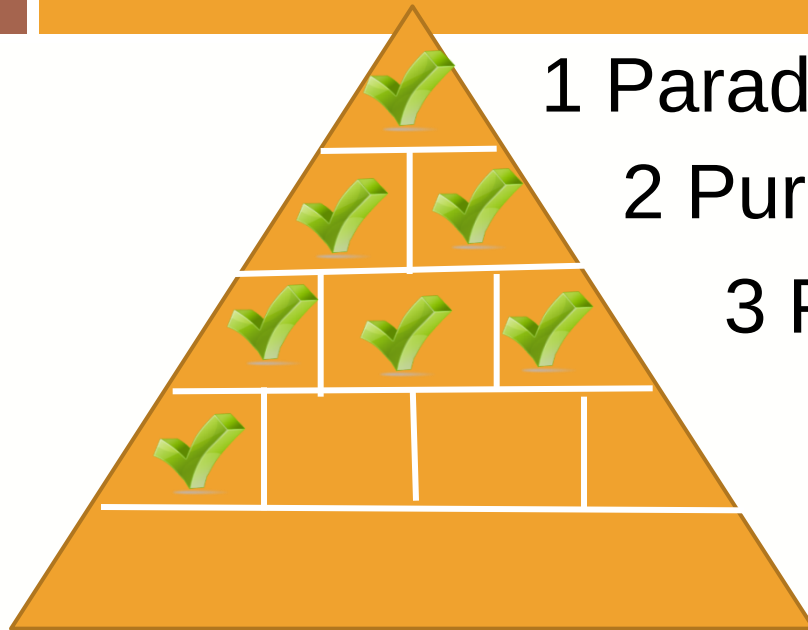

3 Premises

ALL students can learn and succeed, *but not on the same day in the same way*

Success breeds success

Schools control the conditions of success

OBE Pyramid

1 Paradigm

2 Purposes

3 Premises

4 Principles

Clarity of Focus on culminating exit outcomes

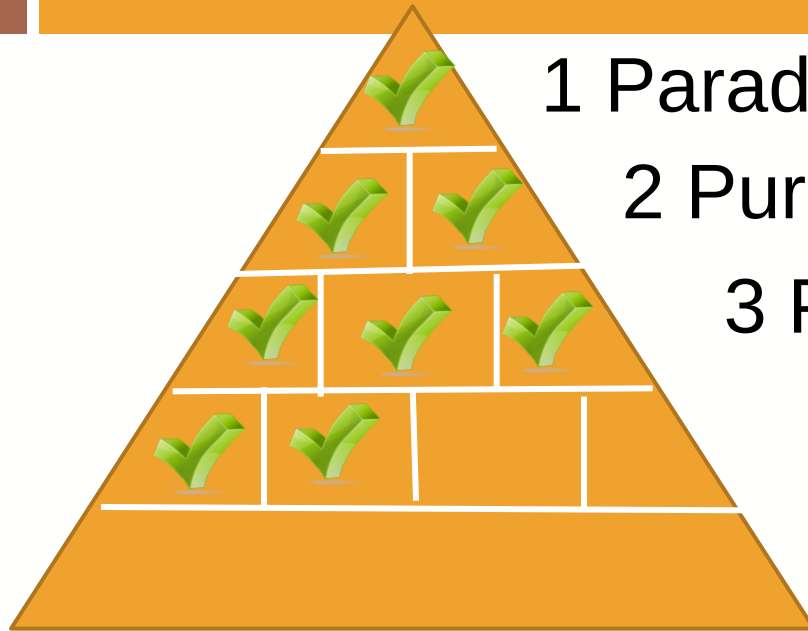

Expanded Opportunity and support for learning success

High Expectations for all to succeed

Design Down from your ultimate culminating outcomes

- Clear picture of student learning
- Performance demonstration
- Clear intent for curriculum, instruction, assessment
- Begins with teacher demonstration, sharing and explaining

OBE Pyramid

1 Paradigm

2 Purposes

3 Premises

4 Principles

Clarity of Focus on culminating exit outcomes

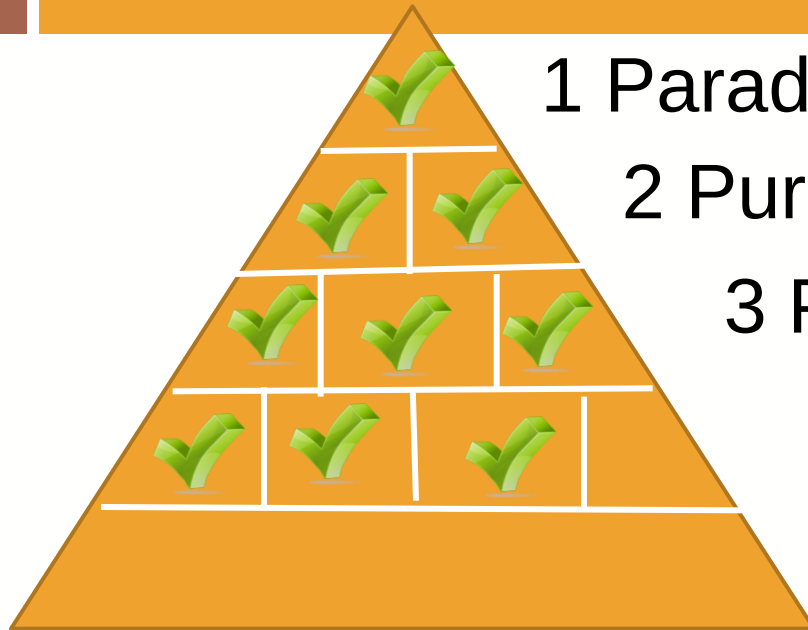

Expanded Opportunity and support for learning success

High Expectations for all to succeed

Design Down from your ultimate culminating outcomes

- Time – teaching, learning, eligibility
- Methods and modalities
- Operational principles
- Performance standards
- Curriculum access and restructuring

OBE Pyramid

1 Paradigm

2 Purposes

3 Premises

4 Principles

Clarity of Focus on culminating exit outcomes

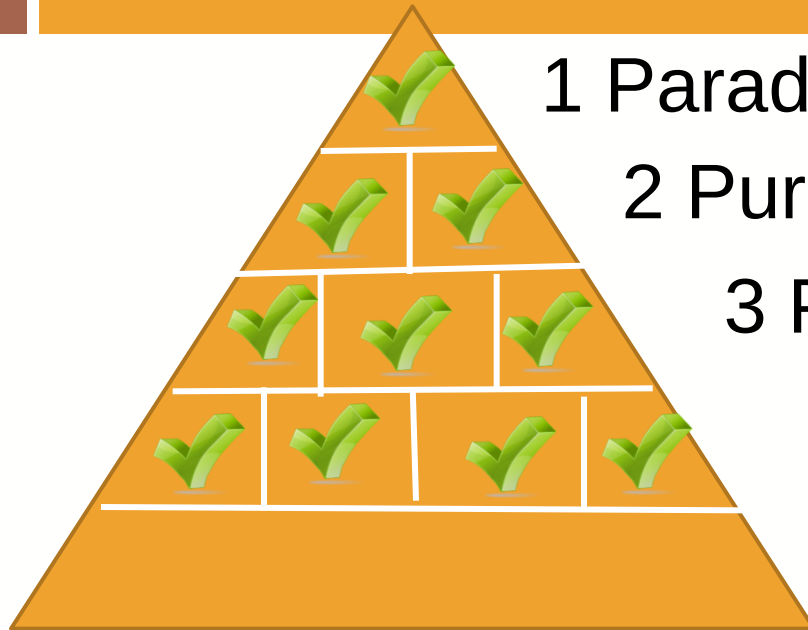

Expanded Opportunity and support for learning success

High Expectations for all to succeed

Design Down from your ultimate culminating outcomes

- Raising standards of acceptable practice
- Eliminating success quotas
- Increasing access to high-level curriculum

OBE Pyramid

1 Paradigm

2 Purposes

3 Premises

4 Principles

Clarity of Focus on culminating exit outcomes

Expanded Opportunity and support for learning success

High Expectations for all to succeed

Design Down from your ultimate culminating outcomes

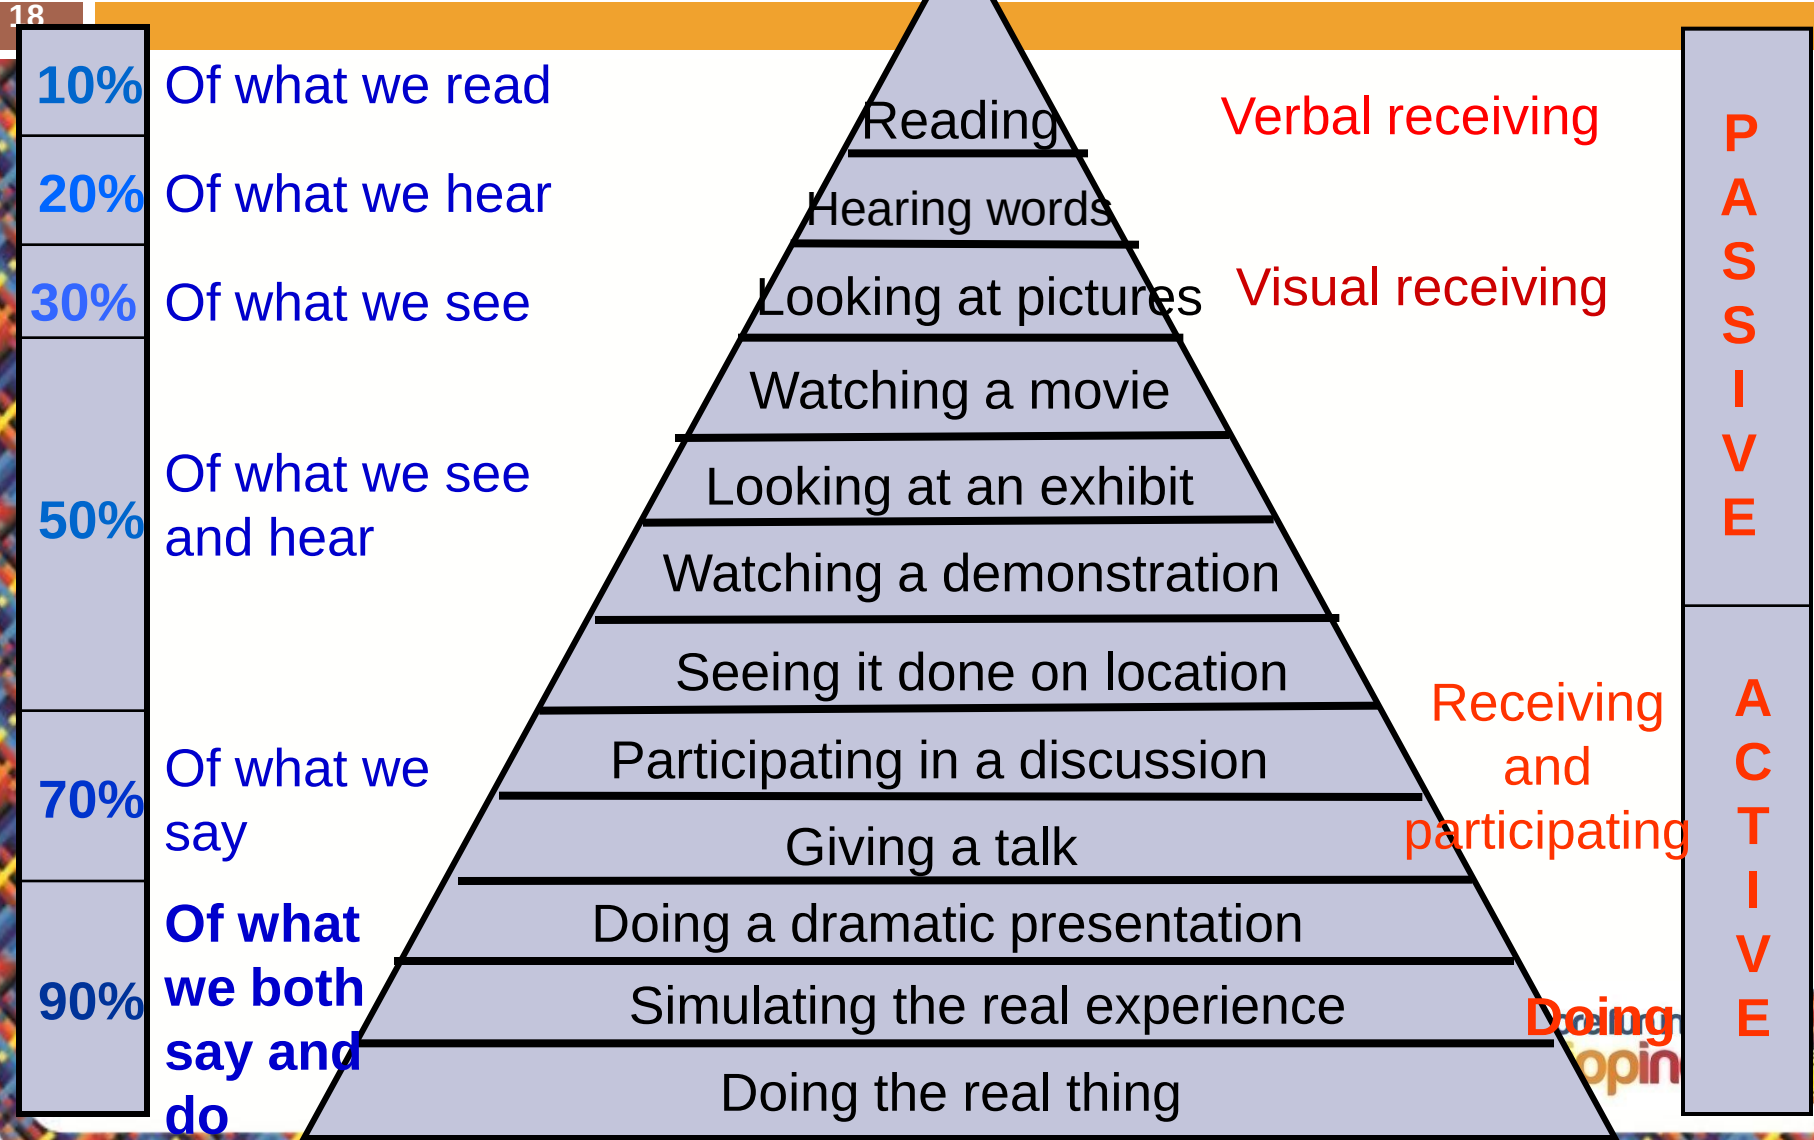

- Culminating
- Enabling
- discrete

OBE Levels

Used to describe educational planning and implementation

- Traditional OBE Disciplinary
 - Based on subject matter categories and organizational arrangements that have characterized education systems for the past century
- Transitional OBE Interdisciplinary
 - focuses on higher order competencies and their role in connecting and potentially integrating unconnected, content-focused curriculum areas
- Transformational OBE
 - Emanating from careful examination of life's dimensions and conditions
 - Redefines and restructures traditional education structures and processes that are incompatible with those conditions

Curriculum Mapping

□ Option 1

- L – learned in the course;
- P – practiced in the course;
- O – opportunity to learn or practice in the course, not yet learned or practiced

□ Option 2

- I – Introduce,
- P – Practice skills with supervision,
- D – Demonstrate skills, without supervision.

Implications

- ensure that there is seamless integration between technical vocational programs and HEI programs
- use “competencies” to define certain qualifications, program outcomes
- Admit and credit qualifications earned in technical vocational programs
- embed assessment and certifications
- Align competencies
