Introduction to trainee manual

To the Trainee

Congratulations on joining this course. This Trainee Manual is one part of a 'toolbox' which is a resource provided to trainees, trainers and assessors to help you become competent in various areas of your work.

The 'toolbox' consists of three elements:

- A Trainee Manual for you to read and study at home or in class
- A Trainer Guide with Power Point slides to help your Trainer explain the content of the training material and provide class activities to help with practice
- An Assessment Manual which provides your Assessor with oral and written questions and other assessment tasks to establish whether or not you have achieved competency.

The first thing you may notice is that this training program and the information you find in the Trainee Manual seems different to the textbooks you have used previously. This is because the method of instruction and examination is different. The method used is called Competency based training (CBT) and Competency based assessment (CBA). CBT and CBA is the training and assessment system chosen by ASEAN (Association of South-East Asian Nations) to train people to work in the tourism and hospitality industry throughout all the ASEAN member states.

What is the CBT and CBA system and why has it been adopted by ASEAN?

CBT is a way of training that concentrates on what a worker can do or is required to do at work. The aim of the training is to enable trainees to perform tasks and duties at a standard expected by employers. CBT seeks to develop the skills, knowledge and attitudes (or recognise the ones the trainee already possesses) to achieve the required competency standard. ASEAN has adopted the CBT/CBA training system as it is able to produce the type of worker that industry is looking for and this therefore increases trainees' chances of obtaining employment.

CBA involves collecting evidence and making a judgement of the extent to which a worker can perform his/her duties at the required competency standard. Where a trainee can already demonstrate a degree of competency, either due to prior training or work experience, a process of 'Recognition of Prior Learning' (RPL) is available to trainees to recognise this. Please speak to your trainer about RPL if you think this applies to you.

What is a competency standard?

Competency standards are descriptions of the skills and knowledge required to perform a task or activity at the level of a required standard.

242 competency standards for the tourism and hospitality industries throughout the ASEAN region have been developed to cover all the knowledge, skills and attitudes required to work in the following occupational areas:

- Housekeeping
- Food Production
- Food and Beverage Service

- Front Office
- Travel Agencies
- Tour Operations.

All of these competency standards are available for you to look at. In fact you will find a summary of each one at the beginning of each Trainee Manual under the heading 'Unit Descriptor'. The unit descriptor describes the content of the unit you will be studying in the Trainee Manual and provides a table of contents which are divided up into 'Elements' and 'Performance Criteria'. An element is a description of one aspect of what has to be achieved in the workplace. The 'Performance Criteria' below each element details the level of performance that needs to be demonstrated to be declared competent.

There are other components of the competency standard:

- *Unit Title*: statement about what is to be done in the workplace
- *Unit Number*: unique number identifying the particular competency
- *Nominal hours*: number of classroom or practical hours usually needed to complete the competency. We call them 'nominal' hours because they can vary e.g. sometimes it will take an individual less time to complete a unit of competency because he/she has prior knowledge or work experience in that area.

The final heading you will see before you start reading the Trainee Manual is the 'Assessment Matrix'. Competency based assessment requires trainees to be assessed in at least 2 – 3 different ways, one of which must be practical. This section outlines three ways assessment can be carried out and includes work projects, written questions and oral questions. The matrix is designed to show you which performance criteria will be assessed and how they will be assessed. Your trainer and/or assessor may also use other assessment methods including 'Observation Checklist' and 'Third Party Statement'. An observation checklist is a way of recording how you perform at work and a third party statement is a statement by a supervisor or employer about the degree of competence they believe you have achieved. This can be based on observing your workplace performance, inspecting your work or gaining feedback from fellow workers.

Your trainer and/or assessor may use other methods to assess you such as:

- Journals
- Oral presentations
- Role plays
- Log books
- Group projects
- Practical demonstrations.

Remember your trainer is there to help you succeed and become competent. Please feel free to ask him or her for more explanation of what you have just read and of what is expected from you and best wishes for your future studies and future career in tourism and hospitality.

Unit descriptor

Prepare appetisers and salads

This unit deals with the skills and knowledge required to Prepare appetisers and salads in a range of settings within the hotel and travel industries workplace context.

Unit Code:

D1.HCC.CL2.12

Nominal Hours:

30

Element 1: Prepare and present a selection of hot and cold salads

Performance Criteria

- 1.1 Select ingredients to meet requirements of hot and cold salad menu items
- 1.2 Prepare salads to enterprise standards including nutritional and eating qualities
- 1.3 Prepare garnishes and accompaniments
- 1.4 Present salads including garnishes and accompaniments according to enterprise standards

Element 2: Prepare and present a selection of hot and cold appetisers

Performance Criteria

- 2.1 Select ingredients to meet requirements of hot and cold appetisers menu items
- 2.2 Prepare appetisers to enterprise standards including nutritional and eating qualities
- 2.3 Prepare garnishes, and accompaniments
- 2.4 Present hot and cold appetisers including garnishes and accompaniments according to enterprise standards

Element 3: Store appetisers and salads including garnishes and accompaniments

Performance Criteria

- 3.1 Store under appropriate conditions and locations to ensure freshness and quality
- 3.2 Store in appropriate containers
- 3.3 Labelling, storage containers
- 3.4 Ensure economic viability of preparation and holding quantities

Assessment matrix

Showing mapping of Performance Criteria against Work Projects, Written Questions and Oral Questions

The Assessment Matrix indicates three of the most common assessment activities your Assessor may use to assess your understanding of the content of this manual and your performance – Work Projects, Written Questions and Oral Questions. It also indicates where you can find the subject content related to these assessment activities in the Trainee Manual (i.e. under which element or performance criteria). As explained in the Introduction, however, the assessors are free to choose which assessment activities are most suitable to best capture evidence of competency as they deem appropriate for individual students.

		Work Projects	Written Questions	Oral Questions
Element 1: Prepare and present a selection of hot and cold salads				
1.1	Select ingredients to meet requirements of hot and cold salad menu items	1.1	1, 2, 3,	1
1.2	Prepare salads to enterprise standards including nutritional and eating qualities	1.2	4	2
1.3	Prepare garnishes and accompaniments	1.3	5, 6	3
1.4	Present salads including garnishes and accompaniments according to enterprise standards	1.4	7	4
Element 2: Prepare and present a selection of hot and cold appetisers				
2.1	Select ingredients to meet requirements of hot and cold appetisers menu items	2.1	8, 9	5
2.2	Prepare appetisers to enterprise standards including nutritional and eating qualities	2.2	10, 11	6
2.3	Prepare garnishes, and accompaniments	2.3	12, 13	7
2.4	Present hot and cold appetisers including garnishes and accompaniments according to enterprise standards	2.4	14	8
Element 3: Store appetisers and salads including garnishes and accompaniments				
3.1	Store under appropriate conditions and locations to ensure freshness and quality	3.1	15	9
3.2	Store in appropriate containers	3.1	16	10
3.3	Labelling, storage containers	3.1	17	11

		Work Projects	Written Questions	Oral Questions
3.4	Ensure economic viability of preparation and holding quantities	3.2	18	12

Glossary

Term	Explanation
Acidulated	Acidic in nature, Vinegar is acidic
Appetisers	Small snack served before the main meal, 'amuse gueule', finger food, cocktail party food
Aramrath	Mild tasting herb: Chinese Spinach
Barquette	Small boat shaped pastry to hold soft filling and garnishes
Bouchee	Small vol au vent pastry case, 4 cm, in diameter, savoury in taste
Canapés	Small one or two bite snack, savoury in taste, firm base-topping-garnish
Complex	Ingredients might need to be cooked before incorporating into salad
Coriander	Cilantro or Chinese parsley, native of Central America, essential in Thai cuisine
Croutons	Fried bread, adds textural diversity to dishes
Dim Sum	Chinese snack food
Dressing	Moisture added salads to lubricate the dish, will have seasoning, will be acidic in nature, vinegar based normally
Emulsifier	Ingredient that will bind two otherwise non-binding ingredients. In making mayonnaise, the egg yolk contains LECTHIN. Lecithin is an emulsifying agent. Lecithin is also found in soya beans
Emulsion	Binding of two product that would not normally bind
Fold	technique to incorporate ingredients slowly and aimed at not causing too much damage to ingredients
Fritter	Fried batter, can be flavoured or can be something encased inside. Fried in deep fat or on grill plate
Gyoza	Small Asian style dumpling, will be steamed in small amount of liquid and as liquid evaporates the outside pastry will begin to fry, leaving a crispy edge to dumpling

Term	Explanation
Lemon Grass	Grass like herb, essential in South East Asian Cuisine; commonly in Thai cuisine
Lettuce	Native to Mediterranean, known in Egypt for 2500 years, known in Asia Minor (Persia), member of the sunflower or thistle family
Mayonnaise	Emulsion of egg yolk and oil with vinegar. Used as a salad dressing. Many variations
Meze	Greek snack food
Pandanus	Spear shaped leaf, versatile in cooking, nutty like flavour, savoury or sweet dishes, Available fresh, frozen, canned or dried
Parsley	A green herb related to carrots, parsnip and dill. Large flat leave, Continental parsley, stronger in flavour than English parsley
Salad	Mixture of leafy vegetables, normally served cold, can incorporate meats and cooked root vegetables
Samosas	Indian snack pastry, small version make excellent finger food
Savouries	Small finger food that does not contain sugar, is savoury, not sweet
Simple	Simple, one or two ingredients
Sushi	Japanese snack food associated with vinegared rice
Tapas	Spanish style snack, mainly served in bars, Tapas bars are very popular in Spain and Spanish influenced countries
Tapas	Spanish snack food
Toss	Technique to cover leaves with dressing so even coating is acquired
Turmeric	A member of the Ginger family. Used in many dishes for both its colour and flavour
Vinaigrette	Mixture of oil and vinegars, used to add flavour to salads as dressing

Introduction

Salads

Definition

‘Salad’ is a broadly used term to describe a dish (or series of dishes) which are prepared with one ingredient as the feature, or a combination of ingredients and flavours.

What foods can be in a salad? Any foods can be in a salad.

In the warm climate countries like Australia, salads have played, and will continue to play, an important role in culinary tastes.

‘Salads’ offer a refreshing cool and alternative method of consuming food

It is also an area where a chef can create highly original work.

A salad can be served in the following ways:

- Cold or warm
- Raw, cooked, or a combination of raw and cooked
- Fruit only, vegetables only, or a combination
- As a starter, main course, meal accompaniment (in place of vegetables) or in its own right on a buffet table.

Salads, as they are understood and perceived by western cultures, are usually vegetable based, and feature leafy greens.

This definition, whilst clear to those who have established knowledge, does not, however, provide a comprehensive classification of salads.

Classifying salads

The easiest way to establish where salads fit in the scheme of things is to classify them in the following ways:

Simple

A salad where one ingredient is the main feature: it is usually a vegetable or leafy green or tomato based and may have dressing added.

Examples include:

- Tomato salad
- Lettuce salad
- Cucumber salad.

Mixed/Compound

A salad that has two or more main ingredients as well as dressing

Examples include:

- Coleslaw (shredded cabbage, onion, carrot and capsicum with mayonnaise or simple vinaigrette dressing)
- Tabouli salad (parsley, onion, tomato and buckwheat)
- Greek salad. (tomato, cucumber, onion, black olive, fetta cheese, dressing, herbs)

Classical Salads

Based on French cuisine:

- This term refers to all traditional salads which are based on French-influenced cuisine and tradition
- Examples include:
 - Salade Nicoise (French beans, potatoes, tomatoes, anchovy, olives, capers and French dressing)
 - Salade Waldorf. (celery, apple, chopped walnuts, mayonnaise and cream).

Modern Salads

A term used to classify any contemporary developments in salads, which may use previously unavailable ingredients or adopted international cuisines, particularly Asian and Italian or Mediterranean.

Examples of 'modern' styles of salads include:

- **Thai Beef Salad** (thin sliced strips of cooked beef, crushed peanuts, mint, coriander, bamboo shoots, vegetable strips such as , palm sugar, soy, ginger, garlic, chilli and lemon juice)
- **Mesclun** (array of leafy greens, i.e. radicchio, rocket, mâche, mignonette, butter, endive, cos and oak leaf)

Element 1:

Prepare and present a selection of hot and cold salads

1.1 Select ingredients to meet requirements of hot and cold salad menu items

Salad greens

The expression 'leafy green' is usually used to describe leafy lettuce. The variety of lettuces in Australia has increased quite markedly from the mid-1980s onwards. Some of the more commonly available 'leafy greens' in Australia include:

Iceberg	Cos	Radicchio
Mignonette	Butter	Curly endive
Witlof (Belgian endive)	Rocket	Mâche (lambs lettuce)
Oak leaf	Mustard cress	Watercress
Bean shoots	English spinach	Silverbeet
Snow pea sprouts	Alfalfa sprouts	

Asian salad greens

Amaranth

English: Chinese Spinach

Chinese: Een Choi

Bahasa: Bayam

Thai: Phak Khom Suan

Pennywort

English: Indian Pennywort

Thai: Bua Bok

Asian Basil

English: Malabar Spinach

Chinese: Kai Lan

Bahasa: Selaseh

Thai: Horapa

Ceylon Spinach

English: Malabar Spinach

Chinese: Saan Choi

Bahasa: Remayong

Thai: Phak Plang

La pot

English: Wild Betel

Bahasa: Duan Kadok

Thai: Bai Chaplu

Coriander

English: Coriander, Cilantro

Chinese: Uen Sai

Thai: Pak Chee

Pea shoots

English: Pea Shoots

Chinese: Dau Miu

Thai: Pak Tua Lan Tao

Perilla

English: Beefsteak Plant

Chinese: Gee So, Jen

Japanese: Shiso

To increase your own knowledge you must start to acquire a library of personal resource list of ingredient names:

- What is available at your local supplier?

Market fresh website

www.marketfresh.com.au

Find it; use it, valuable source of information.

Salad Herbs

A 'herb' is a flowering plant with a stem that does not become wooden, but decays and regenerates annually.

Herbs have a variety of uses, including medicinal, taste and smell.

Food service professionals are more concerned with taste and smell, and in this context, the herb must be suitable for eating by humans without adverse side effects.

Herbs are used in salads to provide flavour, aroma and texture, but care must be taken (due to strength and overpowering flavour) not to add excessive amounts.

Some herbs that are popular in salads include the following:

Curly parsley	Italian parsley	Mint
Thyme	Coriander	Marjoram
Oregano	Basil	Purple basil
Ornamental basil	Rosemary	Dill
Fennel	Spearmint	Tarragon
Vietnamese mint (spicy)		

Salad Vegetables

Any vegetable can be used in salads. Some root vegetables will need to be cooked before they are edible in a salad. **Example:** potato, pumpkin, sweet potato.

Swedes and turnips tend not to make good salad vegetables.

Vegetables are broken into 2 main categories.

Root Vegetables include vegetables derived from roots, bulbs and tubers of plants.

Green Vegetables Include vegetables derived from leaves, stems, flowers, fruits, legumes and seeds of plants

Root vegetables suitable for salads

Carrot	Can be raw, shredded, sliced or cut to size, roasted to add extra flavour then chilled for salad
Parsnip	For salad is best roasted then chilled
Radish	Served raw, sliced or quartered
Onion	Can be used raw, thinly sliced or roasted. Many varieties
Potato	Needs to be cooked boiled or oven roasted
Sweet Potato	Needs to be cooked boiled or oven roasted
Beetroot	Can be shredded and eaten raw but is best served separate as it will stain everything. Normally boiled allowed to cool

Leaf vegetables suitable for salads

Cabbage	Can be raw, shredded, sliced or cut to size, addition of vinegars break down leaf structure
Lettuce	Always a base with other vegetables to add interest: Refer salad greens previous pages
Spinach	Served raw, baby spinach best for salads
Witlof	Used raw, thinly sliced or roasted.

Stem Vegetables suitable for salads

Asparagus	Can be blanched quickly then refreshed, grilled and then chilled
Celery	Slice thinly
Fennel	Shaved thinly
Bamboo shoots	Canned, thinly sliced

Flower Vegetables for salads

Broccoli	Blanched then chilled
Cauliflower	Blanched or roasted, then chilled

Fruit vegetables for salads

Avocado	Many varieties, diced and tossed with dressing
Capsicum	Many varieties, can be raw or roasted
Cucumber	Raw, sliced thinly or cubed
Eggplant	Thinly sliced then grilled, chilled
Tomato	Many varieties, sliced and chopped
Zucchini	Thinly sliced then grilled, chilled

Legumes for salads

Beans, Green	Blanched then chilled
Chick peas	Soaked then poach until tender, chilled
Sweet corn	Boiled then chilled
Peas	Blanched then chilled

Salad Fruits

Everything You Need To Know About Fruits

Fruits are classified into the following groups:

Soft fruits	Strawberries, raspberries, blackberries, boysenberries, blueberries, gooseberries, grapes and currants (red, black & white).
Stone fruits	Apricots, peaches, nectarines, plums, mangoes, cherries.
Hard fruits	Apples, pears and quinces
Citrus	Lemons, oranges, grapefruit, mandarins, cumquats, limes, pomelo, tangelo
Tropical	Bananas, pineapple, lychee, rambutan, jackfruit, dragon fruit, guava, tamarillo, pawpaw, custard apple
Miscellaneous	Rhubarb, kiwifruit, persimmon, passionfruit, pomegranate, fig, watermelon, cantaloupe, honeydew

The following fruit categories have other quality points such as:

Soft fruits	• Mould free • Dirt free
Stone fruits	• Mould free • Not bruised
Hard fruits	• No bruising
Citrus	• Mould free • Skin to be firm, not soft
Tropical	• No bruising
Miscellaneous	• Good colour • Firm to touch • Melons should be heavier than they look

Salad farinaceous ingredients

Pasta, lentils, beans, cous cous,

Salads have always been a good way of using left over pasta.

Pasta does not have a flavour of its own.

The texture of pasta or noodles is what is important. Give it a well rounded sauce and it will bulk salad very well.

Pasta needs to be cooked al dente, but some people like to cook it more when used in salad.

Cold pasta is nutritionally very good for the human gut.

Cooked lentils and beans are nutritious and are excellent additions to salads. They offer textural diversity.

Meats for salads

- Cooked, cold
- Meats cured, cold or warm.

Salad meats

- Bacon, crisped in fry pan then chilled
- Chicken, poached, roasted
- Beef
- Lamb
- Sausages.

These meats would be cooked then chilled.

Cured meats

- Prosciutto
- Bresaola
- Salami
- Ham.

Cured vegetables

- Olives, black and green
- Pickled cucumber, savoury and sweet
- Onions
- Cauliflower.

Many vegetables can be preserved in vinegar solution and then used in salad dishes.

Oils

Definition

Edible oils group all fats which are liquid at room (or near room) temperature. They are used in salads for flavour, overall texture and balance.

Types

The number of oils that can be used to make salads is only limited by imagination, practicality and availability. The following list highlights some of the more commonly used oils:

Neutral flavour and aroma

Sunflower	Safflower	Grape seed	Canola
-----------	-----------	------------	--------

Strong or noticeable flavour and aroma

Olive	Walnut	Rose (strong and expensive)	Chilli (very strong)
Virgin olive	Hazelnut	Truffle (expensive)	Sesame

Vinegars

Definition

Vinegar is an acidic liquid made by fermenting wine, cider, sherry, etc. Due to its acidity, it is used for preserving food, as an accompaniment, or as part of a dressing in a salad. The actual sourness of the vinegar accentuates the flavour of the ingredients used in salads.

Types

Whilst there may be a wide range of flavoured vinegars available, i.e. herbed, and spiced, etc., most vinegars have been made from a wine, sherry or cider base. Some of the more common vinegars available for salad making include:

- White wine
- Red wine
- Cider
- Balsamic (unfermented white wine base)
- Malt
- White
- Flavoured (e.g. Tarragon).

Dressings/sauces

Definition

Dressings are prepared liquids (sometimes thickened) that make a salad more appetising in appearance and flavour.

To establish the most appropriate dressing for a particular salad, the following areas need to be considered:

- What type of salad is being prepared?
- Is the purpose of the dressing to add flavour only (vinaigrette) or to bind (mayonnaise)?
- Will dressing be served in or next to the salad?
- Is the dressing compatible with the flavour of the salad?

Types: Vinaigrette

Also known as French dressing, a traditional vinaigrette is a combination of vinegar, oil and seasoning. These ingredients are mixed together vigorously just before use.

Vinaigrette also accentuates flavour and gives moisture to a salad. The recommended proportions of a basic vinaigrette are three parts oil to one part vinegar.

Types: Mayonnaise

Mayonnaise is actually considered a cold sauce and its main ingredients include oil, vinegar, mustard, egg yolks and seasoning.

It is also known as an emulsion sauce because two incompatible ingredients, oil and acid (vinegar), are combined through an emulsifying agent (egg yolk).

Flavours, herbs and garnishes can be added to form the basis of a derivative sauce (a sauce that has been made using the mayonnaise as the main part).

Some examples of derivative sauces using mayonnaise as a base include:

- Tartare sauce: mayonnaise, capers, gherkins, dill, parsley and lemon juice
- Cocktail sauce: mayonnaise flavoured with tomato sauce, Worcestershire sauce and lemon.

Flavour variations: tips

- Try different flavoured oils in a dressing and notice the difference
- Lemon juice can be added in place of vinegar
- Add finely chopped parsley or chives to dressing or mayonnaise for added colour and flavour.

Reasons for Dressings

Dressings are used to

- Lubricate
- Flavour
- Add food value
- To bind together
- Adds shine and gives pleasing appearance.

Portion control and storage

Portion control

It is important to know how much dressings or cold sauces have to be made for a given situation.

This can be maintained in two ways.

- Manufacturing dressings and sauces on a litre basis 'as required', daily or weekly
- Making dressing/sauces on a per person basis.
 - This is particularly useful when making unusual or uncommon sauces.
Approximately 30ml finished dressing/sauce per person should be allowed.

Storage

Dressings

Vinaigrette has no ingredients requiring refrigeration.

To ensure that there is absolutely no threat of food spoilage, however, it is advisable to keep this dressing in a refrigerated area and covered in an airtight container (glass or stainless steel).

Do not freeze. Shake vigorously before use.

Mayonnaise

Mayonnaise or its derivatives should be kept in a refrigerated area and covered in an airtight container; preferably glass or stainless steel.

Do not freeze.

1.2 Prepare salads to enterprise standards including nutritional and eating qualities

Introduction

Salads should be made as close as possible to the required time of service. Some salads, however, will require storage to allow flavour absorption, e.g. marinated red pepper salad.

These types of salads should be stored in an airtight container with lid in a refrigerated area.

If salads do not require soaking or marinating, they should be stored in airtight containers with lids in a refrigerated area.

Dressing or sauce should be kept separate.

Salads should not be frozen.

The majority of salads are served cold. Some ingredients are served raw while others are cooked and then cooled before using in the salads.

The variety of salad ingredients is unlimited.

Traditionally a salad should be light and refreshing to cleanse the palate. But as eating habits change so does the role of the salad.

Today salad can be the meal, with or without meat.

Salads can also be warm.

Example: Hot chicken livers with hot sherry dressing tossed over cold salad leaves.

Modern salad dishes tend to have cultural influences as well as countries become influenced by other cultures.

Preparing salads

Salad preparation is no different to any other dish

- Mise en place. 'Everything in place' before you start.

1.3 Prepare garnishes and accompaniments

Introduction

Garnishes are prepared as part of your normal mise en place:

- Herbs can be chopped to sprinkle over top of finished salad for flavour and eye appeal
- Herb sprigs can be used to decorate top of salads
- Thin slices of vegetables: julienne of carrot, slivers of spring onion
- Nuts, roasted and chopped to add flavour
- Fried bread pieces or Oven roasted
- Deep fried shaving of vegetables.

Accompaniments

Sauces and/or dressings

Dressings can be classified into two types:

- Vinegar based
- Mayonnaise based.

Vinaigrette based sauces can be value added:

- French
- Roquefort, blue cheese added to vinaigrette or
- Other flavour added to base dressing.

Mayonnaise based dressing:

- Caesar.

Holding and storage conditions

Salads with leaves and herbs will not hold well after the dressing has been applied.

Vinegar will cause the leaves to wilt. Do not dress the salads too soon.

Salads can be mixed then stored. Do not dress then store.

Salads leaves will have a comparatively short lifespan.

Cutting techniques, size and shape

As cultural diversity comes into the menu so will the expectation of preparation styles.

Many Asian styles will incorporate intricate styles of cutting.

Some special tools are available to replicate this in the modern world but when it comes to pay higher wage costs outside of the Asian region it become unviable to do this elaborate vegetable carving.

Modern machines will now to do the bulk of large scale dicing and slicing.

1.4 Present salads including garnishes and accompaniments according to enterprise standards

Introduction

A well presented salad will have the following characteristics.

Leaf Salads

- It will have a shine
- Lots of colour
- It will have **height** before width
- It should be appealing to the eyes
- Textural diversity adds to the eating experience.

All this before the customer has even tasted the salad.

When presenting the salad certain points need to be considered.

Type of service

Formal

- Served in restaurant as a side dish to the main meal.

Casual

- Served as part of the buffet.

Modern

- Served in café as a meal that will stand alone.

Stand up or sit down

- Some salads are now being served in wraps, type of sandwich.

Salads traditionally have been served as a palate refresher.

Modern interpretations make it:

- A meal on its own
- An alternative to hot vegetables
- A side dish.

It is good to have a refreshing salad after eating grilled steak to cleanse the palate.

Work Projects

It is a requirement of this Unit you complete Work Projects as advised by your Trainer. You must submit documentation, suitable evidence or other relevant proof of completion of the project to your Trainer by the agreed date.

Gather the following information from your local supplier

- 1.1 What salad ingredients are available from your local supplier?
- 1.2. Select a recipe from the appendices in the back of this book.
- 1.3. Prepare suitable garnish for this recipe.
- 1.4. Present this salad to your instructor for evaluation.

Websites for ideas:

Kraft foods –

<http://www.kraft.com.au/recipecollections/international/asiansnacksandappetisers.aspx>

Wheel and Barrow, Australia – <http://www.wheelandbarrow.com.au/recipes/appetisers/>

Summary

Prepare and present a selection of hot and cold salads

Select *ingredients* to meet requirements of hot and cold salad menu items

It is important to be able to use the correct ingredients that the recipe says. In this modern age of mass transportation people come from all over the world.

If you are going to make a salad that is from German cuisine then you need to make sure that you are able to get ALL the ingredients in the recipe. Trying to serve something similar can be disastrous.

Understand what you are going to make and select ingredients accordingly.

Buy ingredients fresh and of a quality expected by your clients.

Prepare salads to enterprise standards including nutritional and eating qualities

- Prepare salads fresh
- Apply dressing in a timely manner, not too soon on leafy ingredients.

Prepare garnishes and accompaniments

- Garnishes should be prepared fresh
- They should complement the main component of the dish
- Accompaniments can offer textual diversity to the dish.

Accompaniments like pickled vegetables, sauces and chutneys can be prepared in advanced as long as storage requirements are in place.

Present salads including garnishes and accompaniments according to enterprise standards

Salad presentation should have look of freshness. The WOW factor. Salads should look inviting to eat and be presented on good quality service ware.

Element 2:

Prepare and present a selection of hot and cold appetisers

2.1 Select ingredients to meet requirements of hot and cold appetisers menu items

Introduction

Classic interpretation:

Classically Appetisers are known as *hors d'oeuvres*, which literally means 'outside the work'.

They are small dishes comprising of one to three bites.

Originally Appetisers were the responsibility of the stills room, hence outside of the kitchen.

Appetisers were both hot and cold and served before a meal to give the guest an idea of the standard of food to follow and to also start the gastric juices flowing.

The main difference between a canapé and an appetiser is an appetiser is eaten sitting down at the table with a knife and fork.

Modern interpretation:

In Australia today Chefs view appetisers very differently.

Appetisers are strictly now prepared in the kitchen and range from basic to complex.

An appetiser (sometimes referred to as “amuse gueule” or “amuse bouché”) is still served at the beginning of a meal before the entree but after the order for the meal is taken.

“**Amuse gueule**” are not ordered and are seen as a ‘gift’ from the kitchen in the same vein as petit fours.

They are a chance for the kitchen to be creative and experiment with flavour combinations for future use on menus.

Sometimes they can be mini versions of a dish that a chef wish to test for a future menu, or items that the chef needs to get rid of.

They can be served hot or cold and can be served using a variety of crockery, ranging from side plates to small espresso cups.

Today’s chef still factors in the idea of an appetiser whetting the appetite and starting the gastric juices.

‘**Finger Food**’ is the name a lot of people use for stand up ‘**cocktail party food**’.

Savouries

Definition

Savouries are small portions of hot food served with pre-dinner drinks or stand up function, served at the table as a hot appetiser.

They are served hot and are usually served with a dipping sauce.

The following are some examples of savouries:

Mini quiche	Shot glasses filled with soups
Satay	Mini dim sim
Wontons	Mini spring rolls
Meatballs	Goujons
Spinach and Fetta triangles	Samosas

Canapés

Definition

Small, Savoury, Bite Sized Finger Food:

- Are served with pre-dinner drinks or at cocktail functions
- May be used to create a good first impression of food and should indicate the standard of the meal to follow
- Are meant to stimulate the appetite, not fill it up
- Should be only one or two bites.

Canapés:

- Are served cold
- Should have a base, body and garnish
- May be glazed with aspic to give gloss and to prevent the product from drying out
- Glazes are best applied with a spray though a brush could be used.

This practice is not used much today.

The **BASE** must be sufficiently solid so as to support the toppings and allow the diner to pick the canapé up without their fingers becoming messy.

The base may be covered with a **spread** (flavoured butter or cream cheese) so as to prevent it from absorbing moisture from the topping or garnish and becoming soggy.

Suggested bases: savoury biscuits, croutons, short pastry cups or boats, puff pastry, rice crackers, crispbread, slice of firm vegetables or fruit, pumpernickel bread etc.

The **BODY** is the topping or main ingredient. Its colour and flavour must compliment the base and garnish.

Expensive ingredients should be used in moderation, as the canapé should not cost the establishment too much.

Ingredients such as:

- Cheese
- Hard-boiled eggs
- Pate
- Salami
- Prosciutto
- Ham
- Smoked salmon
- Smoked trout
- Smoked oysters
- Sardines
- Fruits (melon, strawberry, kiwifruit, pineapple)
- Vegetables (avocado, tomato, mushroom).

A spread of cream cheese flavoured with a fruit or vegetable, cheese or egg can also be used. It is piped onto the base using a small star nozzle.

The ***garnish*** may be added for colour, e.g. herbs, capers, gherkins, olives, fish roe, fruit, vegetables cheese or toasted bread. E.g. Melba toast or croutons

Alternatively it may be added to moisten the body, e.g. mayonnaise, sour cream.

The size or amount of garnish must be in keeping with the size of the canapé, and not over dominate the canapé.

No matter what the garnish looks like its flavour must compliment the base and body of the canapé.

- **Spanish Tapas**
- **Chinese Dim Sum**
- **Greek Meze.**

These can all be classified as appetisers, or small snacks, smaller than an entree.

2.2 Prepare appetisers to enterprise standards including nutritional and eating qualities

Introduction

Many appetisers can be pre made and stored frozen for long periods of time.

Appetisers on wrapped in pastry will freeze well. Appetisers that have salad leaves in them will not freeze.

Appetisers can be cooked then frozen, thawed and re-heated as needed or they can be made then frozen, thawed and then cooked before being served.

When producing meats that are to be used as appetisers such as a satay, it is best to make them then freeze in thin layers that can easily be thawed and cooked to order.

When meats are cooked they tend to dry: so they are best cooked to order.

There can be confusion regarding exactly what is an appetiser.

An appetiser is something that is served before the meal starts. Spanish tapas are an excellent example of this style of eating - one or two bites.

- Meat or main component of dish
- Salad, if desired
- Sauce, acidic is normal.

Develop a logical sequence to the preparation

- Do you have the storage capacity for required ingredients?
- Collect all required ingredients
- Prepare all ingredients as required
- Cook what needs to be cooked.

Not all components will need to be cooked.

- Prepare garnishes that are required.

Remember: When preparing for large number of customers, allow for:

- Meat and non-meat dishes
- Ease of serving
- Finger food is one or two bites
- Toothpick and skewers need to be discarded when the food is eaten
- A balanced selection is required
- What is your customer demographic?

2.3 Prepare garnishes, and accompaniments

Introduction

Garnishes for appetisers tend to be kept to a minimum.

Garnishes should be prepared on a daily basis as they lose their crispness as they age.

Absorbing moisture from the air, even if you store them in a special container, they will absorb moisture from the air every time you open the container.

The inside of the container also needs to be washed regularly, after each batch, to keep flavours fresh.

Hot meat or fish there will be a sauce:

- A grilled sausage (chorizo). 3 slices, served with warmed marinated black olives (3), then maybe a small piece of toasted or grilled sourdough.

Cold might have a salad and dressing or a cold sauce:

- Classic cured oily fish, Salmon or Tuna; Ocean trout gravalax served with lightly dressed salad with slivers of thinly sliced onion dusted with cracked black pepper and pink salt.

Garnishes

Examples:

- Croutons
- Fresh or fried herb leaves
- Roasted rice, ground to powder
- Roasted nuts.

Accompaniments

Example:

- Sauces
- Chutneys
- Toasted sourdough
- Pickled vegetables
- Marinated vegetables.

Do not spend too long preparing the garnish as most people will not eat the decoration.

2.4 Present hot and cold appetisers including garnishes and accompaniments according to enterprise standards

Introduction

Presentation should be simple and uncomplicated or innovative and complex.

Modern interpretation means that some innovative ways can be very complex and these are expensive to produce.

All this will depend on the enterprise and the point they situate themselves in the marketplace.

No matter what your marketplace your product should look appetising or 'pleasing to the eye'.

If it does not look appetising but it taste 'out of this world', WOW, then the customer will enjoy the experience.

BUT if it fails on both points:

- Looks terrible
- Tastes average.

Then you will lose the customers return business.

Things to consider when presenting food:

- Cultural theme
- Colour
- Height
- Neat and attractive
- What is it served on:
 - Ceramics plates: easy to clean, easy to replace if broken
 - Pieces of wood: very trendy but hard to keep clean
 - Glass: looks good but can be fragile
 - Crystal: delicate and expensive to replace
 - Mirrors; look spectacular, but heavy and looks messy when half the food is gone
 - Trays: durable and forgiving if dropped
- How easy is it to prepare and serve?
- What equipment do staff need to serve:
 - Tongs and lifters for ease of service
 - Trolley to move large mirrors
 - Where will all these extra things be stored?

Work Projects

It is a requirement of this Unit you complete Work Projects as advised by your Trainer. You must submit documentation, suitable evidence or other relevant proof of completion of the project to your Trainer by the agreed date.

2.1 Write a menu for 6 hot appetisers and 6 cold appetisers.

You will need to present a list of all the ingredients required to be purchased to meet his menu you have developed.

You may choose from the recipes in back of training manual if you wish or you may choose to select your own:

- Be sure to make allowances for variety of tastes
- Do not have all meat flavours
- Do not have all vegetarian.

2.2. Prepare 3 from each section (hot and cold).

2.3. Prepare suitable garnishes and accompaniments to compliment what you have produced.

2.4. Present you selection to your trainer for evaluation:

- Is the presentation in keeping with the expectation of your client base
- Is the quality of presentation consistent across all dishes.

Summary

Prepare and present a selection of hot and cold appetisers

Select ingredients to meet requirements of hot and cold appetisers menu items

- Select the quality of the ingredients you need to produce to meet the expectation of your clients
- Purchase only what you need to fulfil production requirements
- Time purchases to meet production requirements and storage capacity.

Prepare appetisers to enterprise standards including nutritional and eating qualities

- Prepare only what you need to meet customer expectations.
- Variety of preparation techniques need to be undertaken to meet customer demands
 - Fried
 - Steamed
 - Grilled
 - Baked
 - Marinated and cured.

Prepare garnishes, and accompaniments

- Garnishes need to be fresh. Garnishes need to compliment the food with what they are being used
- Accompaniments need to relate to the main element in the dish. They must not dominate but must compliment.

Present hot and cold appetizers including garnishes and accompaniments according to enterprise standards

Present in professional manner to meet customer expectations:

- Large platters need to be laid out in symmetrical patterns
- Do not put all of one variety on one side:
 - Makes it hard for people to reach across
- Start in centre and fan to outside.

Element 3:

Store appetisers and salads including garnishes and accompaniments

3.1 Store under appropriate conditions and locations to ensure freshness and quality

Introduction

When the appetisers have been prepared then they need to be stored.

At what point the preparation is at is also very important:

- It is still raw?
- Is it cooked?

If it is raw then it needs to be kept separated from cooked. Never let the 2 of them mix.

All prepared foods must be kept chilled until you are ready to serve:

- Cool room should be 4°C or less
- Fresh foods should not be kept for longer than 3 – 5 days.

Some have a longer life than others. 3 days is preferable.

If prepared raw food is to be stored for longer than 3 days it is best to freeze the product on day 1:

- Freezing should be done when the product is wrapped in single layers and then frozen:
 - This makes it easier to thaw when required
- Always freeze in batches of 10:
 - Easier to counts when doing stock take
- Freezer should be operating at below -15°C or less (-18°C preferable):
 - Never freeze for more than 3 months.

Salads cannot be frozen

Freezing only apply to pastry based items and meats.

Appetisers are always best if made fresh but this is not always possible when doing large numbers:

- Small samosas and mini shashliks can be prepared and frozen, cooked on the day.

Easy to store flat and thin, easy to thaw and cook.

Salad leaf should be washed and spun dry before being stored in plastic bag and held firmly in clean plastic containers and kept chilled until needed:

- 4 days maximum to maintain optimum quality.

Cooked root vegetables should be prepared as close to the date of use as possible:

- On the day or the day before best:
 - Short life span.

Storage of Garnishes and Accompaniments

Like any other foods their storage requirements need to be considered. High risk foods need to be kept chilled below 4°C for no more than 3 days or frozen below -15°C (-18°C better) for longer time.

Garnishes like 'crisped breads' that do not require cold storage, can be stored in sealed containers at room temperature.

Care needs to be taken with the time being stored as flavour and texture can be altered due to absorption of moisture from the air.

Fruits that are being used for garnish need to be produce on the day.

Herbs picked are best used on the day or possibly the next. These need to be stored in containers with absorbent paper to keep moist.

3.2 Store in appropriate containers

Introduction

Keeping prepared products stored safely cannot be achieved if the containers in which they are contained are not suitable for the job.

Storage containers must be clean and durable, impervious to liquids and must be in good condition:

- Storage container must be washable
- You must be able to sanitise them for future use
- They must be stackable for easier storage when not in use.

Stainless steel is the BEST containers for fresh meat storage:

- Cost is the biggest deterrent to using stainless steel.

Food grade plastic is second best storage containers, but they get scratched and need to be changed when the scratching is too bad as scratches can harbour bacteria.

Single plastic use items can be cost effective but must not be washed and re-used.

All storage containers must be able to be covered, either with a fitted lid or be small enough to be covered with plastic wrap to securely hold in product:

- Reduces spillage
- Reduces cross contamination
- Easier to affix labelling.

Best containers for storing large quantities of prepared product is large shallow containers that will take 1 or 2 layers:

- Too many layers will cause the uncooked product to squash when stacked. If they are frozen before they are stacked then that will be acceptable.

Follow FIFO rule. Stock rotation.

3.3 Labelling, storage containers

Introduction

When producing any product in a large establishment it is important to label correctly.

Labels should include the following.

Name of the product:

- Many people can be working in larger establishments and the person takes the product to the place of service may not be the person who prepared the product.

Date of Manufacture:

- This helps with keeping the flow of produce in correct order. First In First Out, Freshness.

Handler name

- Name of the person who was responsible for making the product. If any issues arise regarding quality then management knows whom to refer.

Time

- What time the product was stored

Temperature

- To maximise lifespan and quality it is important to guide others in the requirements in keeping optimum quality.

Storage

- How long this product should be stored before quality falls below enterprise standards.

Labelling of Spreads and Fillings

When product comes into the premises from outside suppliers they may be in boxes that have the name of the product on the box and not the package in which the food is contained inside that box.

These boxes are referred to as '**outers**' and the inside packaging is referred to as '**innners**'.

When removing **innners** from the **outers** it is important that the information on the outers is not lost so there may be a need to relabel the inner packaging.

Any 'in house' produced sauces and fillings will need to be labelled names, production dates and use by date.

Storage containers

Storage containers must be of a quality that can easily be washed, dried, stacked and stored securely.

They must be impervious to liquids and odours so as to not contaminate other foods that might be placed inside these containers.

Single use containers must not be re-used; example: Pizza boxes, drinking bottles, seafood delivery containers.

3.4 Ensure economic viability of preparation and holding quantities

Introduction

Economic viability determines all that is produced in the kitchen.

Food and labour costs are the biggest issues in the kitchen.

Some dishes will have food cost that are 40% of total selling price, some will be 15%. The accepted average in Australia is 28%-30% overall.

Some dishes sell well so they tend to have lower costs. Specials where the Chef is trying new dishes can carry higher cost.

Several questions need to be answered before you start producing food.

If I am going to produce 500 portions:

- Do I have the room to store them?
- How long will it take the business to use this many portions?
- Is it better to produce in smaller quantities?
- Is it cost effective to do this with the staff employed?
- Is it better than what I can purchase from outside?

Many questions can be asked when looking at producing food. Is it economically viable for the business to produce their own or is it cheaper to purchase from outside.

When the product is purchased from the outside, is there sufficient space to store the product until it is needed.

- Is it chilled?
- Frozen?
- Hot?

Work Projects

It is a requirement of this Unit you complete Work Projects as advised by your Trainer. You must submit documentation, suitable evidence or other relevant proof of completion of the project to your Trainer by the agreed date.

You need to write a report.

3.1 How are the appetisers that are produced going to be stored?

- What type of containers will be required?
- What information needs to go on the label?

3.2 What is your opinion on the economic viability of one of the appetisers you have chosen?

- Will this product sell in sufficient numbers to be worthwhile to be on menu?
 - Does it suit the needs of the majority of your clients?
 - Will it suit the image of your establishment?
 - Can you produce these in numbers required?
 - Do you have facilities to produce the numbers required?
-

Summary

Store appetisers and salads including garnishes and accompaniments

Store under appropriate conditions and locations to ensure freshness and quality

All perishable food is to be stored at 4°C or below. Stored food is to be protected from contamination, labelled and stored securely.

Frozen foods need to be kept frozen until required and then thawed in cool room. Some small prepared foods can be cooked from frozen.

Dry goods need to be stored in a secure environment so as to eliminate possibility of contamination until required.

Store in appropriate containers

Containers need to be clean and must be suitable to for the product that is being stored.

Containers should be impervious to liquids and easy to stack without compromising the integrity of the food inside.

Labelling, storage containers

All stored food needs to be labelled with the following information.

- Name of the product being stored
- Date of manufacture
- Use by or best before date
- Name of person who made the product
- Special requirements for the food being stored.

Ensure economic viability of preparation and holding quantities

- Do not produce more than you can store securely
- Do not produce what you cannot sell within a specified period
- If you have no freezer space then only produce what you can sell within 2 days, then produce more as required.

Appendix A: Salads

Tomato, Basil, and Bocconcini Salad

Caprese Salad

Ingredients

1	Roma tomato
6	basil leaves
2	Bocconcini balls
40 ml	Extra virgin olive oil
20 ml	Balsamic vinegar

Method

- Slice the tomato into 5mm slices
- Slice the Bocconcini into the same number of slices as the tomato
- Chiffonade the basil leaves
- Arrange the tomato slices and Bocconcini slices on a cold plate, so they are alternating and slightly overlapping
- Sprinkle the basil over the top of the tomato and Bocconcini
- Drizzle the olive oil and vinegar over the salad and finish with cracked black pepper and sea salt.

Salad Nicoise

Ingredients

1	Kipfler potato
50 gm	Blanched Green beans
4	Cherry Tomatoes
55 ml	Olive oil
20 ml	Lemon juice
1	Egg
50 gm	Pitted Black olives
80 gm	Tuna, grilled

Method

- Cook Kipfler in boiling salted water until tender, but still holding its shape
- Refresh Kipfler under cold water
- Once cool enough to handle, peel skin & and slice into bite size pieces (refer to demo)
- Blanched and refresh clean Green Beans
- Halve Cherry tomatoes
- Soft boil egg. (place in boiling water for 5 minutes, then refresh)
- Place all ingredients in a bowl (Tuna, Egg, Kipfler, Olives, Tomato, and Beans)
- Prepare vinaigrette (Olive Oil & Lemon Juice)
- Pour dressing into bowl, season salad and lightly toss
- Arrange neatly on a clean, cool plate.

Wombok Salad

Ingredients

Dressing

10 gm	Castor Sugar
20 ml	Oil
10 ml	Light Soy Sauce
10 ml	White Vinegar
Few drops	Sesame Oil

Salad

100 gm	Wombok Cabbage (shredded)
20 gm	Red Onion
15 gm	Pumpkin Seeds
20 gm	Slivered Almonds (roasted)
20 gm	Fried Noodles
8 -10	Coriander leaves (picked & washed)

Method

- Mix dressing ingredients together and leave for at least 15 minutes, ensuring sugar is completely dissolved prior to use
- Wash and drain Wombok cabbage well. Shred Wombok & finely slice red onion
- Mix Wombok, onion, pumpkin seeds & almonds in a bowl
- Just prior to serving add dressing and some of the fried noodle, combine well
- Arrange neatly on a clean plate & garnish with coriander leaves and remaining noodles.

Caesar Salad

Ingredients

75 ml	Clarified butter
1 slice	White bread, 1 cm thick
75 ml	Olive oil
40 ml	Lemon juice
1	Egg
trace	Salt and pepper, mustard and sugar
4-6	Cos lettuce leaves
1 rasher	Bacon
2	Anchovy fillets
25 gm	Parmesan cheese

Method

- Heat garlic and butter very gently in a frying pan. Add the bread and cook, turning until croutons are crisp and golden
- Cut bacon into lardons. Add to a hot pan and fry until crisp, drain well
- Boil egg for 2 minutes, break into a bowl add olive oil, lemon juice, mustard, sugar and seasoning and mix well
- Wash and dry the cos lettuce, tear into pieces
- Cut anchovies into small pieces
- Shave parmesan cheese
- Place lettuce, anchovy and cheese in a bowl pour over the dressing and mix well
- Serve in a bowl and scatter croutons, bacon and cheese on top.

Appendix B: Appetisers

Bruschetta with Tomato, Basil and Red Onion

Ingredients

1 slice	Pasta Dura
2 – 3	Roma Tomato
15 gm	Red Onion (finely diced)
4	Kalamata Olives (Sliced into cheeks)
pinch	Cracked Pepper
pinch	Maldon Sea Salt
3	Medium Sized Basil Leaves
25 ml	Olive Oil
5 – 10 ml	Balsamic Vinegar
½	Clove of Garlic (crushed)

Method

- Slice the bread, brush with olive oil & then grill both sides on a French grill
- Finely dice tomatoes and red onion & mix in a bowl
- Slice olives and add to tomato & onion
- Add garlic, salt, pepper, oil and vinegar
- Leave aside for at least 15 minutes
- Deep fry one basil leaf for garnish
- Just prior to serving, add torn basil leaves and mix well, taste and adjust seasoning
- On a clean plate place the grilled bread
- Top with the tomato mix and garnish.

Vietnamese Rice Paper Rolls with BBQ Pork

2 portions

Ingredients

6	Rice Paper Wrappers
60 gm	Rice Vermicelli (soaked in boiling water)
60 gm	BBQ Pork
60 gm	Bean Shoots
6	Mint Leaves
6	Holy Basil Leaves
6	Garlic Chive Spears
30 gm	Cashews

Method

- To soften rice paper wrappers, dunk into warm water briefly and drain well
- Cover with a damp cloth or glad wrap
- To assemble the rolls, place 1 piece of rice paper flat on the bench
- Arrange some strands of vermicelli, bean shoots, a mint leaf, a basil leaf, cashews, BBQ pork
- Fold the rice paper over forming a semi-circle & place a garlic chive on rice paper and roll up firmly
- Keep rolls covered to avoid drying out
- Serve on a clean plate with Nam Prik and garnish.

Pandan Chicken

Ingredients

3	Pandan leaves
1 tsp	Red curry paste
2	Coriander root chopped very fine
1	Chicken thigh fillet

Method

- Cut Pandan leaves in half, reserve one leaf to make ties
- Cut the chicken fillet into approximately four portions
- Mix curry paste and coriander root
- Marinate chicken in spice mix for approximately 30 minutes
- Wrap as shown in the demonstration
- Deep fry until cooked, drain well
- Serve with sweet chilly lemon sauce.

Wontons

Ingredients

70 gm	Pork mince
2 tsp	Coriander, chopped
1 slice	Ginger, grated
1 clove	Garlic, crushed
2	Spring onion, finely sliced
Pinch	Chinese 5 spice powder
5 ml	Soy sauce
1	Water chestnut, chopped fine
6	Wonton wrappers

Method

- Mix together the pork mince, coriander, ginger, garlic, spring onion, 5 spice, soy and water chestnut
- Place the wonton wrappers on the bench
- Shape the pork mix approx 1 tsp each to a round ball and place in the centre of the wonton wrapper
- Dampen edges with water
- Fold the edges over the top and press together firmly
- Steam for 10 – 15 minutes
- Serve hot, with a soy sauce for dipping.

Chicken Satay

Ingredients

60 gm Chicken breast or thigh meat

Marinade

1 clove Garlic, chopped

1 tsp Coriander

1 tsp Brown sugar

¼ tsp Black pepper

½ tsp Salt

1 tsp Soya sauce

1 tsp Ginger, chopped

2 tsp Lime juice

½ tsp Oil

Fresh coriander, chopped (for garnish)

Method

- Mix marinade ingredients. Cut chicken into 1-2 cm cubes.
- Add to marinade mixture and marinate at least two hours

Chicken Satay

- Thread chicken pieces onto one end of satay sticks
- Grill or broil, baste with marinade
- Serve with satay sauce for dipping in a side bowl.

Spinach and Feta Cheese Triangles

Ingredients

30 gm	Spinach
20 gm	Feta cheese
15 gm	Bacon
15 g	Onion
Pinch	Nutmeg
1 sheet	Filo pastry
20 ml	Clarified butter

Method

- Remove stalks, wash and roughly chop the spinach
- Wilt the spinach in a hot sauté pan and cool
- Squeeze out the excess moisture
- Finely dice the onion and chop bacon finely
- Sweat the onion and bacon, leave to cool
- Mix spinach, feta, onion, and bacon together in a bowl, add seasoning and nutmeg
- Brush the filo sheet with clarified butter
- Cut the sheet across into 6 equal strips
- Fold the triangle parcels as shown in the demo & brush with a little clarified butter
- Place on a baking tray & bake in a hot oven until golden brown.

Lime leaf chicken

Ingredients

100 gm	Minced chicken
20 ml	Lime juice
20 ml	Peanut oil
2	Kaffir lime leaf (1 left whole, 1 finely julienne)
½	Chilli birds eye (finely chopped)
½	Spring onion (finely sliced)
1 tsp	Mint (shredded)
10 ml	Thai fish sauce

Method

- Sauté chicken mince in half peanut oil with 1 whole lime leaf until the mince is cooked through
- Add half lime juice and cook for a further 5 minutes on a medium heat
- Allow to cool & stir in the remainder of ingredients.

To serve:

Place into prepared pastry cup or into a spoon for individual serves.

Presentation of written work

1. Introduction

It is important for students to present carefully prepared written work. Written presentation in industry must be professional in appearance and accurate in content. If students develop good writing skills whilst studying, they are able to easily transfer those skills to the workplace.

2. Style

Students should write in a style that is simple and concise. Short sentences and paragraphs are easier to read and understand. It helps to write a plan and at least one draft of the written work so that the final product will be well organised. The points presented will then follow a logical sequence and be relevant. Students should frequently refer to the question asked, to keep 'on track'. Teachers recognise and are critical of work that does not answer the question, or is 'padded' with irrelevant material. In summary, remember to:

- Plan ahead
- Be clear and concise
- Answer the question
- Proofread the final draft.

3. Presenting Written Work

Types of written work

Students may be asked to write:

- Short and long reports
- Essays
- Records of interviews
- Questionnaires
- Business letters
- Resumes.

Format

All written work should be presented on A4 paper, single-sided with a left-hand margin. If work is word-processed, one-and-a-half or double spacing should be used. Handwritten work must be legible and should also be well spaced to allow for ease of reading. New paragraphs should not be indented but should be separated by a space. Pages must be numbered. If headings are also to be numbered, students should use a logical and sequential system of numbering.

Cover Sheet

All written work should be submitted with a cover sheet stapled to the front that contains:

- The student's name and student number
- The name of the class/unit
- The due date of the work
- The title of the work
- The teacher's name
- A signed declaration that the work does not involve plagiarism.

Keeping a Copy

Students must keep a copy of the written work in case it is lost. This rarely happens but it can be disastrous if a copy has not been kept.

Inclusive language

This means language that includes every section of the population. For instance, if a student were to write 'A nurse is responsible for the patients in her care at all times' it would be implying that all nurses are female and would be excluding male nurses.

Examples of appropriate language are shown on the right:

Mankind	<i>Humankind</i>
Barman/maid	<i>Bar attendant</i>
Host/hostess	<i>Host</i>
Waiter/waitress	<i>Waiter or waiting staff</i>
