

UNIT TITLE: PREPARE AND STORE FOODS		NOMINAL HOURS: 70
UNIT NUMBER: D1.HCC.CL2.11		
UNIT DESCRIPTOR: This unit deals with skills and knowledge required by cooks and chefs to organise and prepare a variety of foods for the kitchen. It focuses on general food preparation and storage techniques in commercial food production environments		
ELEMENTS AND PERFORMANCE CRITERIA	UNIT VARIABLE AND ASSESSMENT GUIDE	
Element 1: Identify and collect food items required for preparations 1.1 <i>Identify a range of food items</i> correctly 1.2 <i>Collect food items</i> as required for standard recipes 1.3 <i>Measure and assemble</i> food items correctly for standard recipes 1.4 Maintain food items at <i>correct temperature</i> during preparation 1.5 Apply correct <i>food handling techniques</i> Element 2: Prepare eggs and dairy 2.1 Use eggs and dairy products efficiently to <i>minimise wastage</i> 2.2 Maintain food items at correct temperature during preparation 2.3 Apply correct food handling techniques Element 3: Prepare dry goods 3.1 Use dry goods efficiently to minimise wastage	Unit Variables The Unit Variables provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. It relates to the unit as a whole and facilitates holistic assessment. This unit applies to all industry sectors that prepare and store food products within the labour divisions of the hotel and travel industries and may include: 1 Food Production. Identify a range of food items may be related to: • Vegetables and fruits • Meat, poultry and seafood • Nuts and grains • Starch products, such as rice, pasta, cous cous and potato • Eggs and dairy • Dry goods • Cultural items. Collect food items will include: • Quality and quantity • Sourcing items • Select appropriateness.	

3.2 Maintain food items at correct temperature during preparation 3.3 Apply correct food handling techniques Element 4: Prepare fruit and vegetables 4.1 <i>Clean</i> fruit and vegetable items correctly 4.2 <i>Prepare</i> fruit and vegetable items using standard techniques 4.3 Use fruit and vegetable efficiently to minimise wastage 4.4 Maintain food items at correct temperature during preparation 4.5 Apply correct food handling techniques Element 5: Prepare meat, poultry and seafood 5.1 Clean meat, poultry and seafood items correctly 5.2 Prepare meat, poultry and game items using standard techniques 5.3 Use meat, poultry and seafood efficiently to minimise wastage 5.4 Maintain food items at correct temperature during preparation 5.5 Apply correct food handling techniques Element 6: Assemble and use equipment 6.1 Select appropriate <i>equipment</i> 6.2 Use equipment <i>correctly and safely</i> to enterprise and manufacturer's instructions	Measure and assemble may be related to: • <i>Mise en place</i>, to prepare for standard recipes • Weighing, weights and measures • Sifting, flour and cocoa • Measuring, oil, milk, water and vinegar • Cutting, dicing, trimming, mince and slice. Correct temperature will include: • Temperature time lines • Legislative requirements • Quantities of items • Quality retaining. Food handling techniques should relate to: • Cross-contamination • Personal hygiene • Storage and temperature control • Sanitation. Minimise wastage will include: • Menu and variety preplanning • Quantities calculated for production • Use and storage of leftovers • Efficient preparation time to minimise spoilage • Trimming, dicing and mincing
--	---

6.3 <i>Dismantle</i> and clean equipment after use 6.4 Report <i>equipment faults</i> to appropriate personal Element 7: Store prepared foods 7.1 Store foods under appropriate <i>conditions</i> and locations to ensure freshness and quality 7.2 Select <i>appropriate containers</i> 7.3 <i>Label</i> appropriately 7.4 Ensure freshness and quality through <i>first in, first out</i>	• Itemised cuts/muscle groups • Identifying wastage • Suitable dishes/products. <i>Clean</i> should relate to: • Peeling • Trimming • Top and tail • Washing • Skinning • De-seeding. <i>Prepare</i> may relate to: • Vegetable cuts, including dice, slice, segment and other classical cuts and preparations • Cultural cuts and shapes • Enterprise safety. <i>Equipment</i> may relate to: • Correct for task • Assembled correctly • Alternative available. <i>Correctly and safely</i> will include: • Manufacturer's cleaning and operating recommendations • Demonstrating sanitisation of equipment • Power regulations • Following enterprise safety and hygiene procedures.
---	--

	<i>Dismantle</i> may be related to: • Dismantling equipment safely • Re-assembling equipment safely • Identifying routine maintenance schedules • Safe occupational health and safety requirements • Correct storage location. <i>Equipment faults</i> may be related to: • Enterprise policies and procedures • Recording fault • Reporting fault • Labelling faulty equipment. <i>Conditions</i> may include: • Cool room temperature • Cool room placement • Time in cool storage • Freezer temperature • Time in freezer storage • Kitchen menu placement, such as larder, mains and banqueting • Dry store conditions and placement • Humidity. <i>Appropriate containers</i> may include: • Size to enable safe handling
--	--

	• Type to suite product, including stainless steel, plastic and glass • Separating ingredients, such as herbs, garnishes and dressings • Position in cool storage • Enterprise and local authorities' requirements. <i>Label</i> should relate to: • Date of production • Item being stored • Date defrosted, if applicable • Reheated and cooled dates. <i>First In First Out (FIFO)</i> should relate to: • Receiving stock • Rotating stock • Labelling stock. Assessment Guide The following skills and knowledge must be assessed as part of this unit: • Knowledge of which technique for preparation and storage of food is correct • Ability to demonstrate a range of cutting techniques • Ability to identify food products by sight, taste and consistency • Ability to match ingredient quality to intended final product/use • Ability to clean and maintain food working and storage areas • General occupational health and safety procedures in the workplace
--	---

	• Overview of the relevant legislation in relation to food handling, food storage, chemical storage and general premises food safety • Ability to demonstrate safe equipment/utensils practical skills • Ability to prepare a range of food products. Linkages To Other Units • Implement occupational health and safety procedures • Work effectively with colleagues and customers • Comply with workplace hygiene procedures • Maintain strategies for safe food • Present food. Critical Aspects of Assessment Evidence of the following is essential: • Knowledge of the classifications and terminology used in the preparation and storage of foods • Demonstrate safe and hygienic handling of products • Appropriate portion control and wastage • Demonstrate complimentary presentation, garnishing and techniques • Demonstrate safe knife skills and other associated equipment • Demonstration of commodity knowledge including quality aspects • Demonstrated ability to prepare various foods from at least six different recipes and cultural backgrounds • Demonstrated ability to store various foods to industry and enterprise standards • Knowledge of appropriate portion control and wastage.
--	--

	Context of Assessment This unit may be assessed on or off the job • Assessment should include practical demonstration either in the workplace or through a simulation activity, supported by a range of methods to assess underpinning knowledge • Assessment must relate to the individual's work area or area of responsibility • Demonstration of skills on more than one occasion • Preparation and storage of a variety food items within typical workplace conditions and timeframes. Resource Implications Training and assessment must include access and use of a fully equipped commercial kitchen, real ingredients and service equipment; and access to workplace standards, procedures, policies, guidelines, tools and equipment. Assessment Methods The following methods may be used to assess competency for this unit: • Case studies • Observation of practical candidate performance • Oral and written questions • Portfolio evidence • Problem solving • Role plays • Third party reports completed by a supervisor • Project and assignment work.
--	---

	Key Competencies in this Unit <i>Level 1 = competence to undertake tasks effectively</i> <i>Level 2 = competence to manage tasks</i> <i>Level 3 = competence to use concepts for evaluating</i>		
	Key Competencies	Level	Examples
	Collecting, organising and analysing information	2	Determine requirements of standard recipes and/or menu requirements; collect equipment, commodities and ingredients; select and obtain commodities, organise ingredients and task sheets, read recipes and prepare task sheets
	Communicating ideas and information	1	Share information with other kitchen and floor service staff; read recipes and instructions
	Planning and organising activities	2	Work within time constraints in a logical sequence; plan logical and efficient sequence and timing of tasks
	Working with others and in teams	1	Work cooperatively with other team members
	Using mathematical ideas and techniques	1	Calculate portions, weigh and measure quantities against standard recipes
	Solving problems	1	Identify and correct problems in the preparation and production of products such as ingredient quality and equipment failure
	Using technology	1	Use mechanical kitchen equipment including weighing equipment
