Competency Based Training (CBT) and assessment - An introduction for trainers

Competency

Competency refers to the ability to perform particular tasks and duties to the standard of performance expected in the workplace.

Competency requires the application of specified knowledge, skills and attitudes relevant to effective participation, consistently over time and in the workplace environment.

The essential skills and knowledge are either identified separately or combined.

Knowledge identifies what a person needs to know to perform the work in an informed and effective manner.

Skills describe the application of knowledge to situations where understanding is converted into a workplace outcome.

Attitude describes the founding reasons behind the need for certain knowledge or why skills are performed in a specified manner.

Competency covers all aspects of workplace performance and involves:

- Performing individual tasks
- Managing a range of different tasks
- Responding to contingencies or breakdowns
- Dealing with the responsibilities of the workplace
- Working with others.

Unit of Competency

Like with any training qualification or program, a range of subject topics are identified that focus on the ability in a certain work area, responsibility or function.

Each manual focuses on a specific unit of competency that applies in the hospitality workplace.

In this manual a unit of competency is identified as a 'unit'.

Each unit of competency identifies a discrete workplace requirement and includes:

- Knowledge and skills that underpin competency
- Language, literacy and numeracy
- Occupational health and safety requirements.

Each unit of competency must be adhered to in training and assessment to ensure consistency of outcomes.

Element of Competency

An element of competency describes the essential outcomes within a unit of competency.

The elements of competency are the basic building blocks of the unit of competency. They describe in terms of outcomes the significant functions and tasks that make up the competency.

In this manual elements of competency are identified as an 'element'.

Performance criteria

Performance criteria indicate the standard of performance that is required to demonstrate achievement within an element of competency. The standards reflect identified industry skill needs.

Performance criteria will be made up of certain specified skills, knowledge and attitudes.

Learning

For the purpose of this manual learning incorporates two key activities:

- Training
- Assessment.

Both of these activities will be discussed in detail in this introduction.

Today training and assessment can be delivered in a variety of ways. It may be provided to participants:

- On-the-job – in the workplace
- Off-the-job – at an educational institution or dedicated training environment
- As a combination of these two options.

No longer is it necessary for learners to be absent from the workplace for long periods of time in order to obtain recognised and accredited qualifications.

Learning Approaches

This manual will identify two avenues to facilitate learning:

Competency Based Training (CBT)

This is the strategy of developing a participant's competency.

Educational institutions utilise a range of training strategies to ensure that participants are able to gain the knowledge and skills required for successful:

- Completion of the training program or qualification
- Implementation in the workplace.

The strategies selected should be chosen based on suitability and the learning styles of participants.

Competency Based Assessment (CBA)

This is the strategy of assessing competency of a participant.

Educational institutions utilise a range of assessment strategies to ensure that participants are assessed in a manner that demonstrates validity, fairness, reliability, flexibility and fairness of assessment processes.

Flexibility in Learning

It is important to note that flexibility in training and assessment strategies is required to meet the needs of participants who may have learning difficulties. The strategies used will vary, taking into account the needs of individual participants with learning difficulties. However they will be applied in a manner which does not discriminate against the participant or the participant body as a whole.

Catering for Participant Diversity

Participants have diverse backgrounds, needs and interests. When planning training and assessment activities to cater for individual differences, trainers and assessors should:

- Consider individuals' experiences, learning styles and interests
- Develop questions and activities that are aimed at different levels of ability
- Modify the expectations for some participants
- Provide opportunities for a variety of forms of participation, such as individual, pair and small group activities
- Assess participants based on individual progress and outcomes.

The diversity among participants also provides a good reason for building up a learning community in which participants support each other's learning.

Participant Centred Learning

This involves taking into account structuring training and assessment that:

- *Builds on strengths* – Training environments need to demonstrate the many positive features of local participants (such as the attribution of academic success to effort, and the social nature of achievement motivation) and of their trainers (such as a strong emphasis on subject disciplines and moral responsibility). These strengths and uniqueness of local participants and trainers should be acknowledged and treasured
- *Acknowledges prior knowledge and experience* – The learning activities should be planned with participants' prior knowledge and experience in mind
- *Understands learning objectives* – Each learning activity should have clear learning objectives and participants should be informed of them at the outset. Trainers should also be clear about the purpose of assignments and explain their significance to participants
- *Teaches for understanding* – The pedagogies chosen should aim at enabling participants to act and think flexibly with what they know
- *Teaches for independent learning* – Generic skills and reflection should be nurtured through learning activities in appropriate contexts of the curriculum. Participants should be encouraged to take responsibility for their own learning
- *Enhances motivation* – Learning is most effective when participants are motivated. Various strategies should be used to arouse the interest of participants

- *Makes effective use of resources* – A variety of teaching resources can be employed as tools for learning
- *Maximises engagement* – In conducting learning activities, it is important for the minds of participants to be actively engaged
- *Aligns assessment with learning and teaching* – Feedback and assessment should be an integral part of learning and teaching
- *Caters for learner diversity* – Trainers should be aware that participants have different characteristics and strengths and try to nurture these rather than impose a standard set of expectations.

Active Learning

The goal of nurturing independent learning in participants does not imply that they always have to work in isolation or solely in a classroom. On the contrary, the construction of knowledge in tourism and hospitality studies can often best be carried out in collaboration with others in the field. Sharing experiences, insights and views on issues of common concern, and working together to collect information through conducting investigative studies in the field (active learning) can contribute a lot to their eventual success.

Active learning has an important part to play in fostering a sense of community in the class. First, to operate successfully, a learning community requires an ethos of acceptance and a sense of trust among participants, and between them and their trainers. Trainers can help to foster acceptance and trust through encouragement and personal example, and by allowing participants to take risks as they explore and articulate their views, however immature these may appear to be. Participants also come to realise that their classmates (and their trainers) are partners in learning and solving.

Trainers can also encourage cooperative learning by designing appropriate group learning tasks, which include, for example, collecting background information, conducting small-scale surveys, or producing media presentations on certain issues and themes. Participants need to be reminded that, while they should work towards successful completion of the field tasks, developing positive peer relationships in the process is an important objective of all group work.

Competency Based Training (CBT)

Principle of Competency Based Training

Competency based training is aimed at developing the knowledge, skills and attitudes of participants, through a variety of training tools.

Training Strategies

The aims of this curriculum are to enable participants to:

- Undertake a variety of subject courses that are relevant to industry in the current environment
- Learn current industry skills, information and trends relevant to industry
- Learn through a range of practical and theoretical approaches
- Be able to identify, explore and solve issues in a productive manner

- Be able to become confident, equipped and flexible managers of the future
- Be 'job ready' and a valuable employee in the industry upon graduation of any qualification level.

To ensure participants are able to gain the knowledge and skills required to meet competency in each unit of competency in the qualification, a range of training delivery modes are used.

Types of Training

In choosing learning and teaching strategies, trainers should take into account the practical, complex and multi-disciplinary nature of the subject area, as well as their participant's prior knowledge, learning styles and abilities.

Training outcomes can be attained by utilising one or more delivery methods:

Lecture/Tutorial

This is a common method of training involving transfer of information from the trainer to the participants. It is an effective approach to introduce new concepts or information to the learners and also to build upon the existing knowledge. The listener is expected to reflect on the subject and seek clarifications on the doubts.

Demonstration

Demonstration is a very effective training method that involves a trainer showing a participant how to perform a task or activity. Through a visual demonstration, trainers may also explain reasoning behind certain actions or provide supplementary information to help facilitate understanding.

Group Discussions

Brainstorming in which all the members in a group express their ideas, views and opinions on a given topic. It is a free flow and exchange of knowledge among the participants and the trainer. The discussion is carried out by the group on the basis of their own experience, perceptions and values. This will facilitate acquiring new knowledge. When everybody is expected to participate in the group discussion, even the introverted persons will also get stimulated and try to articulate their feelings.

The ideas that emerge in the discussions should be noted down and presentations are to be made by the groups. Sometimes consensus needs to be arrived at on a given topic. Group discussions are to be held under the moderation of a leader guided by the trainer. Group discussion technique triggers thinking process, encourages interactions and enhances communication skills.

Role Play

This is a common and very effective method of bringing into the classroom real life situations, which may not otherwise be possible. Participants are made to enact a particular role so as to give a real feel of the roles they may be called upon to play. This enables participants to understand the behaviour of others as well as their own emotions and feelings. The instructor must brief the role players on what is expected of them. The role player may either be given a ready-made script, which they can memorise and enact, or they may be required to develop their own scripts around a given situation. This technique is extremely useful in understanding creative selling techniques and human relations. It can be entertaining and energising and it helps the reserved and less literate to express their feelings.

Simulation Games

When trainees need to become aware of something that they have not been conscious of, simulations can be a useful mechanism. Simulation games are a method based on "here and now" experience shared by all the participants. The games focus on the participation of the trainees and their willingness to share their ideas with others. A "near real life" situation is created providing an opportunity to which they apply themselves by adopting certain behaviour. They then experience the impact of their behaviour on the situation. It is carried out to generate responses and reactions based on the real feelings of the participants, which are subsequently analysed by the trainer.

While use of simulation games can result in very effective learning, it needs considerable trainer competence to analyse the situations.

Individual /Group Exercises

Exercises are often introduced to find out how much the participant has assimilated. This method involves imparting instructions to participants on a particular subject through use of written exercises. In the group exercises, the entire class is divided into small groups, and members are asked to collaborate to arrive at a consensus or solution to a problem.

Case Study

This is a training method that enables the trainer and the participant to experience a real life situation. It may be on account of events in the past or situations in the present, in which there may be one or more problems to be solved and decisions to be taken. The basic objective of a case study is to help participants diagnose, analyse and/or solve a particular problem and to make them internalise the critical inputs delivered in the training. Questions are generally given at the end of the case study to direct the participants and to stimulate their thinking towards possible solutions. Studies may be presented in written or verbal form.

Field Visit

This involves a carefully planned visit or tour to a place of learning or interest. The idea is to give first-hand knowledge by personal observation of field situations, and to relate theory with practice. The emphasis is on observing, exploring, asking questions and understanding. The trainer should remember to brief the participants about what they should observe and about the customs and norms that need to be respected.

Group Presentation

The participants are asked to work in groups and produce the results and findings of their group work to the members of another sub-group. By this method participants get a good picture of each other's views and perceptions on the topic and they are able to compare them with their own point of view. The pooling and sharing of findings enriches the discussion and learning process.

Practice Sessions

This method is of paramount importance for skills training. Participants are provided with an opportunity to practice in a controlled situation what they have learnt. It could be real life or through a make-believe situation.

Games

This is a group process and includes those methods that involve usually fun-based activity, aimed at conveying feelings and experiences, which are everyday in nature, and applying them within the game being played. A game has set rules and regulations, and may or may not include a competitive element. After the game is played, it is essential that the participants be debriefed and their lessons and experiences consolidated by the trainer.

Research

Trainers may require learners to undertake research activities, including online research, to gather information or further understanding about a specific subject area.

Competency Based Assessment (CBA)

Principle of Competency Based Assessment

Competency based assessment is aimed at compiling a list of evidence that shows that a person is competent in a particular unit of competency.

Competencies are gained through a multitude of ways including:

- Training and development programs
- Formal education
- Life experience
- Apprenticeships
- On-the-job experience
- Self-help programs.

All of these together contribute to job competence in a person. Ultimately, assessors and participants work together, through the 'collection of evidence' in determining overall competence.

This evidence can be collected:

- Using different formats
- Using different people
- Collected over a period of time.

The assessor, who is ideally someone with considerable experience in the area being assessed, reviews the evidence and verifies the person as being competent or not.

Flexibility in Assessment

Whilst allocated assessment tools have been identified for this subject, all attempts are made to determine competency and suitable alternate assessment tools may be used, according to the requirements of the participant.

The assessment needs to be equitable for all participants, taking into account their cultural and linguistic needs.

Competency must be proven regardless of:

- Language
- Delivery Method
- Assessment Method.

Assessment Objectives

The assessment tools used for subjects are designed to determine competency against the 'elements of competency' and their associated 'performance criteria'.

The assessment tools are used to identify sufficient:

- a) Knowledge, including underpinning knowledge
- b) Skills
- c) Attitudes

Assessment tools are activities that trainees are required to undertake to prove participant competency in this subject.

All assessments must be completed satisfactorily for participants to obtain competence in this subject. There are no exceptions to this requirement, however, it is possible that in some cases several assessment items may be combined and assessed together.

Types of Assessment

Allocated Assessment Tools

There are a number of assessment tools that are used to determine competency in this subject:

- Work projects
- Written questions
- Oral questions
- Third Party Report
- Observation Checklist.

Instructions on how assessors should conduct these assessment methods are explained in the Assessment Manuals.

Alternative Assessment Tools

Whilst this subject has identified assessment tools, as indicated above, this does not restrict the assessor from using different assessment methods to measure the competency of a participant.

Evidence is simply proof that the assessor gathers to show participants can actually do what they are required to do.

Whilst there is a distinct requirement for participants to demonstrate competency, there are many and diverse sources of evidence available to the assessor.

Ongoing performance at work, as verified by a supervisor or physical evidence, can count towards assessment. Additionally, the assessor can talk to customers or work colleagues to gather evidence about performance.

A range of assessment methods to assess competency include:

- Practical demonstrations
- Practical demonstrations in simulated work conditions
- Problem solving
- Portfolios of evidence
- Critical incident reports
- Journals
- Oral presentations
- Interviews
- Videos
- Visuals: slides, audio tapes
- Case studies
- Log books
- Projects
- Role plays
- Group projects
- Group discussions
- Examinations.

Recognition of Prior Learning

Recognition of Prior Learning is the process that gives current industry professionals who do not have a formal qualification, the opportunity to benchmark their extensive skills and experience against the standards set out in each unit of competency/subject.

Also known as a Skills Recognition Audit (SRA), this process is a learning and assessment pathway which encompasses:

- Recognition of Current Competencies (RCC)
- Skills auditing
- Gap analysis and training
- Credit transfer.

Assessing competency

As mentioned, assessment is the process of identifying a participant's current knowledge, skills and attitudes sets against all elements of competency within a unit of competency. Traditionally in education, grades or marks were given to participants, dependent on how many questions the participant successfully answered in an assessment tool.

Competency based assessment does not award grades, but simply identifies if the participant has the knowledge, skills and attitudes to undertake the required task to the specified standard.

Therefore, when assessing competency, an assessor has two possible results that can be awarded:

- Pass Competent (PC)
- Not Yet Competent (NYC).

Pass Competent (PC)

If the participant is able to successfully answer or demonstrate what is required, to the expected standards of the performance criteria, they will be deemed as 'Pass Competent' (PC).

The assessor will award a 'Pass Competent' (PC) if they feel the participant has the necessary knowledge, skills and attitudes in all assessment tasks for a unit.

Not Yet Competent' (NYC)

If the participant is unable to answer or demonstrate competency to the desired standard, they will be deemed to be 'Not Yet Competent' (NYC).

This does not mean the participant will need to complete all the assessment tasks again. The focus will be on the specific assessment tasks that were not performed to the expected standards.

The participant may be required to:

- a) Undertake further training or instruction
- b) Undertake the assessment task again until they are deemed to be 'Pass Competent'.

Competency standard

UNIT TITLE: PREPARE CHOCOLATE AND PRODUCE CHOCOLATE PRODUCTS		NOMINAL HOURS: 65
UNIT NUMBER: D1.HCC.CL2.13; D1.HPA.CL4.05		
UNIT DESCRIPTOR: This unit deals with skills and knowledge required by cooks, chefs and patissiers to prepare, produce, display and store a range of high quality chocolate products in commercial food production environments		
ELEMENTS AND PERFORMANCE CRITERIA		UNIT VARIABLE AND ASSESSMENT GUIDE
Element 1: Temper couverture 1.1 <i>Melt and temper</i> couverture using correct techniques and temperatures 1.2 <i>Maintain tempered couverture</i> for use Element 2: Prepare chocolate based fillings, coatings and decorations 2.1 Select required <i>commodities</i> according to recipe and production requirements 2.2 Use appropriate <i>equipment</i> to prepare chocolate based fillings, coatings and decorations 2.3 Use correct <i>techniques</i> to produce chocolate based fillings, coatings and decorations to enterprise standards 2.4 Produce chocolate based <i>fillings/centres, coatings and decorations</i> to enterprise requirements and standards		Unit Variables The Unit Variables provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. It relates to the unit as a whole and facilitates holistic assessment This unit applies to all industry sectors that are responsible for preparing, producing, displaying and storing chocolate and chocolate products within the labour divisions of the hotel and travel industries and may include: 1 Food Production. <i>Melt and temper</i> should relate to: • Type of couverture, such as dark, milk, or white • Temperature control • Avoiding contact with moisture • Vaccination/addition method • Tabling method • Heated water method • Microwaving

Element 3: Prepare chocolate moulds 3.1 Ensure moulds are <i>clean</i> 3.2 <i>Polish moulds</i> ready for use 3.3 Keep moulds at <i>correct temperature</i> for production Element 4: Make moulded chocolates 4.1 Select and prepare <i>combinations</i> to be produced 4.2 Use tempered couverture and <i>set in moulds</i> correctly 4.3 <i>Fill moulded chocolates</i> correctly 4.4 Set, release and <i>handle</i> moulded chocolates appropriately Element 5: Coat and decorate with chocolate 5.1 Prepare a variety of chocolate <i>coating, icing, glazes and decorations</i> 5.2 Decorate using coating, icing, glazes and decorations according to standard recipes and/or enterprise standards and/or customer requests Element 6: Store chocolate and chocolate products 6.1 <i>Store at correct temperature and conditions</i> 6.2 Maintain maximum eating quality, appearance and freshness	Maintain tempered couverture may relate to: • Temperature control • Holding time of tempered couverture. <i>Commodities</i> may include: • Dried fruits or nuts • Flavourings or essences • Alcohol-based products • Cream. <i>Equipment</i> may include: • Trays • Racks • Bowls • Mixing machine • Scales • Rolling pins • Moulds • Rings • Tins • Dipping tools and racks. <i>Techniques</i> may relate to: • Rubbing • Beating • Whisking
--	--

- Folding
- Piping
- Flooding
- Stencilling.

Fillings/centres, coatings and decorations may relate to:

- Nougat
- Ganache
- Flavoured fondants
- Nuts
- Fruits
- Caramels
- Liqueurs
- Marzipan
- Croquant
- Jellies.

Enterprise requirements and standards may relate to:

- Scale to correct weight
- Colour
- Consistency
- Texture
- Moisture
- Mouth feel
- Appearance

	• Sale ability • Shape. <i>Clean</i> should include: • Free of grease • Free of water • Free of chocolate • Free of other ingredients. <i>Polish moulds</i> should include • Free of finger prints • Free of scratches. Correct temperature relates to: • Cool • Moisture free. <i>Combinations</i> relates to: • Type of couverture • Flavour of filling • Size • Shape. <i>Set in moulds</i> should include: • Thickness • Free of bubbles • Free of marks • Free of blemishes.
--	--

	Fill moulded chocolates relates to: • Quantity of filling • Level of filling • Sealing in filling. <i>Handle</i> relates to: • Free from finger marks • Free from bloom • Free from scratches. Coating, icing, glazes and decorations may relate to: • Jams • Creams • Chocolate • Fondant • Ganache • Food lacquer • Cocoa butter • Chocolate • Fondant icing • Non-parrels • Glace fruits • Fresh fruits.
--	--

	<i>Store must include:</i> • Storage containers • Labelled • Temperature and humidity. <i>Correct temperature and conditions relates to:</i> • Cool • Humidly level • Moisture free • Protection from light and odours. Assessment Guide The following skills and knowledge must be assessed as part of this unit: • Knowledge of the quality characteristics of chocolate and chocolate products, such as classical, modern/contemporary and culturally specific • Knowledge of the appropriate quality indicators, such as taste, texture, structure, shape and size made to industry and/or enterprise standards • Knowledge of the principles of the preparation of chocolate and chocolate products • Ability to maintain hygiene and food safety requirements • Knowledge of commodities • Knowledge of the historical and cultural aspects of chocolate and chocolate products and their role on the menu and in the industry. Linkages To Other Units • Comply with workplace hygiene procedures • Implement occupational health and safety procedures
--	--

- Prepare and store food
- Work effectively with colleagues and customers
- Maintain strategies for safe food
- Present and display food products
- Apply basic techniques of commercial cookery
- Other food units as appropriate, such as pastry, cakes, yeast goods, desserts, buffet, food service operation.

Critical Aspects of Assessment

Evidence of the following is essential:

- Knowledge of the varieties and characteristics of chocolate and chocolate product classifications, such as classical and modern, size, shape, structure and assembly according to industry and enterprise standards
- Demonstration of commodity knowledge, including quality aspects
- Demonstrated ability to safely and hygienically handle products
- Knowledge of specific terminology related to chocolate and chocolate products
- Demonstrated ability to prepare a variety of chocolate and chocolate products from five different recipes and cultural backgrounds
- Demonstration of creative and artistic skills in preparation, decoration and display of chocolate and chocolate products
- Demonstrated ability to store a range of chocolate and chocolate products to industry and enterprises standards.

	Context of Assessment This unit may be assessed on or off the job • Assessment should include practical demonstration either in the workplace or through a simulation activity, supported by a range of methods to assess underpinning knowledge • Assessment must relate to the individual's work area or area of responsibility • Demonstration of skills on more than one occasion • Preparation, decoration and display of chocolate and chocolate products within typical workplace conditions and timeframes. Resource Implications Training and assessment must include access and use to a fully equipped commercial kitchen, use of real ingredients, storage and service equipment; and access to workplace standards, procedures, policies, guidelines, tools and equipment. Assessment Methods The following methods may be used to assess competency for this unit: • Observation of practical candidate performance • Oral and written questions • Third party reports completed by a supervisor • Project and assignment work • Sampling of products prepared by the student. Key Competencies in this Unit <i>Level 1 = competence to undertake tasks effectively</i> <i>Level 2 = competence to manage tasks</i> <i>Level 3 = competence to use concepts for evaluating</i>
--	---

	Key Competencies	Level	Examples
	Collecting, organising and analysing information	2	Determine requirements of standard recipes and/or menu requirements; collect equipment, commodities and ingredients; select and obtain commodities, organise ingredients and task sheets
	Communicating ideas and information	1	Share information with other kitchen and floor service staff; read recipes, menus, instructions and orders
	Planning and organising activities	2	Complete preparation (mise-en-place) and organise for the production of chocolate products; work within time constraints in a logical sequence
	Working with others and in teams	2	Work cooperatively with other team members
	Using mathematical ideas and techniques	1	Calculate quantities and portions against standard recipes and/or menu requirements
	Solving problems	1	Identify and correct problems in the preparation, production of chocolate and chocolate products, such as ingredient quality
	Using technology	1	Use mechanical kitchen equipment, including weighing equipment

Notes and PowerPoint slides

Slide

PREPARE CHOCOLATE AND PRODUCE CHOCOLATE PRODUCTS

D1.HCC.CL2.13
D1.HPA.CL4.05

Slide 1

Slide No	Trainer Notes
----------	---------------

1.	Trainer welcomes trainees to class and informs that they will be learning how to "Prepare chocolate and produce chocolate products".
----	--

Slide

Prepare chocolate and produce chocolate products

Assessment for this Unit may include:

- Oral questions
- Written questions
- Work projects
- Workplace observation of practical skills
- Practical exercises
- Formal report from employer/supervisor

Slide 2

Slide No	Trainer Notes
2.	Trainer advises students that assessment for this Unit may take several forms all of which are aimed at verifying they have achieved competency for the Unit as required. Trainer indicates to students the methods of assessment that will be applied to them for this Unit.

Slide

Prepare chocolate and produce chocolate products

This unit comprises six elements:

1. Temper couverture
2. Prepare chocolate based fillings, coatings and decorations
3. Prepare chocolate moulds
4. Make moulded chocolates
5. Coat and decorate with chocolate
6. Store chocolate and chocolate products

Slide 3

Slide No	Trainer Notes
3.	Trainer advises students this Unit comprises six elements, as listed on the slide explaining: • Each Element comprises a number of Performance Criteria which will be identified throughout the class and explained in detail • Students can obtain more detail from their Trainee Manual • The course presents advice and information but where their workplace requirements differ to what is presented, the workplace practices and standards must be observed.

Slide

Prepare chocolate and produce chocolate products

Element 1: Temper chocolate:

- Melt and temper couverture using correct techniques and temperatures
- Maintain tempered couverture for use

Slide 4

Slide No	Trainer Notes
4.	The trainer to relate how the performance criteria are related to the element 1. To be able to prepare chocolate and produce chocolate products, the students must be able to temper chocolate. The student should be able to: • Melt and temper couverture using correct techniques and temperatures • Maintain tempered couverture for use.

Slide

Temper chocolate

Melt and temper couverture:

- Cut into small pieces or use chocolate pellets
- Heat slowly over warm water
- Stir with clean dry utensil
- No more than 50°C
- Keep water away from chocolate
- Use clean equipment

Slide 5

Slide No	Trainer Notes
5.	Trainer to advise: • Cut into small pieces • The faster the chocolate melts the better • Small pieces will melt quicker than larger pieces • Place chocolate into clean DRY container • Allow steam to warm the container that holds the chocolate: DO NOT allow water to touch the container.

Slide

Temper couverture

Melt and Temper chocolate:

- Dark Chocolate ↑45° ↓28° ↑32°☑
- Milk Chocolate ↑45° ↓27° ↑30°☑
- White chocolate ↑45° ↓26° ↑29°☑
- Compound chocolate no more than 40°☑

Slide 6

Slide No

Trainer Notes

6.

Trainer to advise:

- Temperature range to be measured when tempering chocolate
- Use digital thermometer
- Stir slowly.

Slide

Temper couverture

Maintain tempered couverture for use:

- Insulate container to retain warmth
- Use warmed cloth around bowl
- Place into chocolate warming bain marie to hold at static 30°C or less

Slide 7

Slide No	Trainer Notes
7.	Trainer to advise: Working in colder climates like Europe and Southern Australia, air temperature can be as low as 15°C to 18°C in workplaces. It is important to keep the tempered chocolate at a working temperature of 28°C to 30°C. Static warmers: these are basically warm bain-maries using dry electric elements inside a box to keep temperature at a constant temperature. These are available in various sizes: Contact specialist chocolate supplier. There are now machines that will temper for the confectioner but these take longer time than what can be achieved by hand.

Slide

Prepare chocolate and produce chocolate products

Element 2: Prepare chocolate based fillings, coatings and decorations:

- Select required commodities according to recipe and production requirements
- Use appropriate equipment to prepare chocolate based fillings, coatings and decorations
- Use correct techniques to produce chocolate based fillings, coatings and decorations to enterprise standards
- Produce chocolate based fillings/centres, coatings and decorations to enterprise requirements and standards

Slide 8

Slide No	Trainer Notes
8.	The trainer to relate how the performance criteria are related to element 2. To be able to prepare chocolate and produce chocolate products, the students must be able to prepare chocolate based fillings, coatings and decorations. The student should be able to: • Select required commodities according to recipe and production requirements • Use appropriate equipment to prepare chocolate based fillings, coatings and decorations • Use correct techniques to produce chocolate based fillings, coatings and decorations to enterprise standards • Produce chocolate based fillings/centres, coatings and decorations to enterprise requirements and standards.

Slide

Prepare chocolate based fillings, coatings and decorations

Select required commodities:

- Compound chocolate looks very similar to couverture
- Keep labeling with all products
- Follow standard recipe ingredients
- Collect all ingredients before beginning the production process

Slide 9

Slide No	Trainer Notes
9.	Trainer to advise: • Confectioners need to be able to identify quality products • Compound chocolates are similar to couverture • Remember: couverture is the better product with excellent mouth feel and longer flavour structures in the mouth after consumption • All products must have a standard recipe; this keeps the consistency in the product • The customers want the same product as they purchased last time.

Slide

Prepare chocolate based fillings, coatings and decorations

Use appropriate equipment to prepare fillings:

- Equipment must be clean
- Stainless steel is recommended
- Equipment must be dry
- Equipment must be suitable to the job

Slide 10

Slide No

Trainer Notes

10.

Trainer to advise:

Even the small equipment must be suitable for the job.

Example:

- Do not try to stir the chocolate with a small spoon
- Use a good size spoon that is clean
- It must not be a spoon that has been used to stir savoury foods and is embedded with taste of garlic and onions for example.

Slide

Prepare chocolate based fillings, coatings and decorations

Use correct technique to produce fillings:

- Whisk
 - Combining chocolate and cream for ganache
- Blend slowly
 - Stirring chocolate while it is melting
- Pipe consistent sizes
 - Piping truffles to be sold individually requires them to be same size
- Enrobe
 - Complete coverage of soft centers

Slide 11

Slide No	Trainer Notes
11.	Trainer to advise: The skills used by the confectioner is the same as the patissier: • Blend • Whisk • Enrobe • Piping. Many skills are required but the most important is 'patience'. All steps must be followed. If shortcuts are used then product quality will be compromised.

Slide

Prepare chocolate based fillings, coatings and decorations

Produce to enterprise standards:

- Enterprise standards will vary
- Use best quality ingredients
- Follow standard recipe

Slide 12

Slide No

Trainer Notes

12.

Trainer to advise:

- Enterprises will have varying standards
- What is the market place that is being supplied
- High quality; the best ingredients and flavourings
- Budget quality; good quality ingredients.

Slide

Prepare chocolate and produce chocolate products

Element 3: Prepare chocolate moulds

- Ensure moulds are clean
- Polish moulds ready for use
- Moulds are kept at correct temperature for production

Slide 13

Slide No	Trainer Notes
13.	The trainer to relate how the performance criteria are related to the element 3. To be able to prepare chocolate and produce chocolate products, the students must be able to prepare chocolate moulds. The student should be able to: • Ensure moulds are clean • Polish moulds ready for use • Keep Moulds at correct temperature for production.

Slide

Prepare chocolate moulds

Ensure moulds are clean

- Moulds need to be clean
- Clean with soft cloth
- Do not use knife or sharp object to rush job
- Imperfection will cause chocolate to stick and show on moulded product

Wash:

- Only use hot water and soft cloth
- Dry thoroughly

Slide 14

Slide No	Trainer Notes
14.	Trainer to advise: • Any imperfection on inside of mould will show as an imperfection on moulded chocolate when it is demoulded • Do not scrape or scratch cold chocolate from mould • Wash in hot water and mild detergent; rinse in hot water • Use soft cloth to wipe chocolate from mould • Air dry • Use hair dryer if required.

Slide

Prepare chocolate moulds

Polish moulds ready for use

- Use soft cloth
- Smooths the surface ready for tempered chocolate

Slide 15

Slide No	Trainer Notes
15.	Trainer to advise: • Polish with clean soft cloth • If surface is clean the chocolate will release from the surface when it contracts • The product will then release from mould more easily.

Slide

Prepare chocolate moulds

Keep moulds at correct temperature for production

- Polycarbonate - 20°C
- Metal - 25°C
- Best kept in dry warmed storage box
- Important in cooler climates; not in tropics

Slide 16

Slide No

Trainer Notes

16.

Trainer to advise:

- If the moulds are too cold the chocolate will thicken too quickly
- Especially when doing filled chocolates and when tipped over the shell will be too thick and not be able to hold enough filling
- Keep moulds in secure storage to will minimise chance of damage.

Slide

Prepare chocolate and produce chocolate products

Element 4: Make moulded chocolates

- Select and prepare combinations to be produced
- Use tempered couverture and set in moulds correctly
- Fill moulded chocolates correctly
- Set, release and handle moulded chocolates appropriately

Slide 17

Slide No	Trainer Notes
17.	The trainer to relate how the performance criteria are related to the element 4. To be able to prepare chocolate and produce chocolate products, the students must be able to make moulded chocolates. The student should be able to: • Select and prepare combinations to be produced • Use tempered couverture and set in moulds correctly • Fill moulded chocolates correctly • Set, release and handle moulded chocolates appropriately.

Slide

Make moulded chocolates

Select and prepare combinations of choice

- Personal taste
- What will customers like?
- Select quality ingredients
- Prepare with care

Slide 18

Slide No

Trainer Notes

18.

Trainer to advise:

- Confectioners need to produce product that will sell
- Use combinations that are known to work and have been sold before
- Be adventurous with some flavour combinations
- Chilli chocolate was not used 30 years ago but is now popular in Australia
- Not a big market BUT the flavour combination is enjoyed by some people.

Student Activity

- Ask the students to work on flavour combinations
- Who has eaten chilli chocolate?

Slide

Make moulded chocolates

Fill moulded chocolates correctly

- Use warmed moulds
- Use tempered couverture
- Fill moulds
- Tap gently to release air bubbles
- Roll over to release excess chocolate and drain
- Scrape mould level; allow to set

Slide 19

Slide No	Trainer Notes
19.	Trainer to advise: With properly prepared moulds and correctly tempered couverture: • Fill moulds with couverture • Tap mould gently on bench to all any air bubbles to move away from edges of moulds • Tip moulds over to allow excess couverture to drain out • When majority of couverture has drained, turn mould back upright • Scrape with PLASTIC scraper the base of moulded shell to give straight edge to chocolate base.

Slide

Make moulded chocolates

Fill moulded chocolates correctly

- When set pipe filling into empty mould
- DO NOT fill to top
- Tap chocolate shell to settle filling
- Top with tempered couverture
- Smooth base level with bottom of mould

Slide 20

Slide No

Trainer Notes

20.

Trainer to advise:

Filling of empty chocolate shell requires a fine tipped piping bag:

- Do not fill the moulded chocolate
- This is biggest mistake of beginners
- Leave space for the remaining couverture base
- The filling must be below the surface of the edge of the mould.
- Pour couverture over the base
- Smooth with flat plastic scraper to remove all excess chocolate from base.

Slide

Make moulded chocolates

Set release and handle moulded chocolates

- Allow for chocolate to set
- Place into cool room for short period
- Release
- Tap gently on bench
- Careful: do not do this too close to bench edge
(as they may fall onto the floor)

Slide 21

Slide No	Trainer Notes
21.	Trainer to advise: • Set aside in cool space for chocolate to set and harden • In warmer climates chocolate may need to be placed into cool room for short period to set chocolate • When set , invert mould over papered bench and tap sharply on bench top to dislodge product from mould • Using a gloved hand place chocolate onto clean tray; place into covered storage space.

Slide

Make moulded chocolates

Set release and handle moulded chocolates

- Handle de-moulded chocolates with gloved hands
- Fingers leave oil mark on chocolate
- Reject any chocolates that are dull in patches

Slide 22

Slide No	Trainer Notes
22.	Trainer to advise: • When set , invert mould over papered bench and tap sharply on bench top to dislodge product from mould • Using a gloved hand place chocolate onto clean tray; place into covered storage space • Any chocolates that show blemishes should be set aside and recycled.

Slide

Prepare chocolate and produce chocolate products

Element 5: Coat and decorate with chocolate:

- Prepare a variety of chocolate coating, icing, glazes and decorations
- Decorate using coating, icing, glazes and decorations according to standard recipes and or enterprise standards and or customer requests

Slide 23

Slide No	Trainer Notes
23.	The trainer to relate how the performance criteria are related to the element 5. To be able to prepare chocolate and produce chocolate products, the students must be able to coat and decorate chocolates. The student should be able to: • Prepare a variety of chocolate coating, icing, glazes and decorations • Decorate using coating, icing, glazes and decorations according to standard recipes and/or enterprise standards and/or customer requests.

Slide

Coat and decorate with chocolate

Prepare variety of coatings, glazes and decorations:

- Coloured
- Flavoured
- Roasted nut portions
- Glace fruits
- Crystallised fruits

Slide 24

Slide No	Trainer Notes
24.	Trainer to advise: Many variations exist for decorating finished chocolates. Basic rules: • Decoration must be edible • Decorations must be long lasting and not be affected by air dehydration; examples to use are glace fruits, nut portions, crystallised fruits • Decorations must not lose appearance by being exposed to air.

Slide

Coat and decorate with chocolate

Decorate to standard required:

- Standards vary in enterprises
- What is the role of product?
 - To be sold as individual chocolates
 - To be sold by weight
 - To be served as Friandise with coffee

Slide 25

Slide No	Trainer Notes
25.	Trainer to advise: • Chocolates standard will vary due to the role that they will be required • If they are sold individually then they must all look the same • Sold by weight (by the kilo) then they may be slightly different in size • Maybe they are to be used as friandise with coffee • Decoration will vary but should always compliment the flavour.

Slide

Prepare chocolate and produce chocolate products

Element 6: Store at correct temperature and conditions

- Store at correct temperature and conditions
- Maintain maximum eating quality, appearance and freshness

Slide 26

Slide No	Trainer Notes
26.	Trainer to advise: The trainer to relate how the performance criteria are related to the element 6. To be able to prepare chocolate and produce chocolate products, the students must be able to store chocolate at correct temperature and conditions. The student should be able to: • Store at correct temperature and conditions • Maintain maximum eating quality, appearance and freshness.

Slide

Store chocolate and chocolate products

Store at correct temperature and conditions

- Closed environment
- No air movement
- Low humidity
- Cool temperature 15°C to 18°C
- Minimal handling

Slide 27

Slide No	Trainer Notes
27.	Trainer to advise: • Chocolate products are susceptible to damage easily • They are a delicate product • If humidity is too high water condensation will appear on surface and cause chocolate to go grey • Keep covered • Keep cool • Low humidity environment • Less than 50% is preferred.

Slide

Store chocolate and chocolate products

Maintain eating quality, appearance and freshness

- Make in small quantities
- Use best quality ingredients
- Store in low humidity environment
- Handle with gloved hands

Slide 28

Slide No	Trainer Notes
28.	Trainer to advise: • Best way to maintain eating quality is to use best quality ingredients and to make in small batches • Make often • Appearance: to keep their gloss chocolates must be stored in low humidity environment • Handling; handle with gloved hands as oil in skin leaves residue mark in gloss on chocolates.

Recommended training equipment

Work benches of stainless steel preferred

Stainless steel sinks for washing

Stove for cooking as required

Stainless steel bowls of various sizes

Palette knives

Plastic scrapers

Piping bags, clean disposable are recommended

Piping tubes of various sizes

Polycarbonate chocolate moulds; of sizes and shapes desired

Cooking pots

Warming cupboards for mould storage

Spoons for stirring chocolate

Whisks

Steel scrapers for handling chocolate

Ingredients

Couverture

Other ingredients as required by standard recipe

Flavourings as required from standard recipes

Generic kitchen supplies

Plastic wrap

Baking paper

Detergent for cleaning

General cleaning supplies

Instructions for Trainers for using PowerPoint – Presenter View

Connect your laptop or computer to your projector equipment as per manufacturers' instructions.

In PowerPoint, on the **Slide Show** menu, click **Set up Show**.

Under Multiple monitors, select the Show Presenter View check box.

In the **Display slide show** on list, click the monitor you want the slide show presentation to appear on.

Source: <http://office.microsoft.com>

Note:

In Presenter View:

You see your notes and have full control of the presentation

Your trainees only see the slide projected on to the screen

More Information

You can obtain more information on how to use PowerPoint from the Microsoft Online Help Centre, available at:

<http://office.microsoft.com/training/training.aspx?AssetID=RC011298761033>

Note Regarding Currency of URLs

Please note that where references have been made to URLs in these training resources trainers will need to verify that the resource or document referred to is still current on the internet. Trainers should endeavour, where possible, to source similar alternative examples of material where it is found that either the website or the document in question is no longer available online.
