Competency Based Training (CBT) and assessment - An introduction for trainers

Competency

Competency refers to the ability to perform particular tasks and duties to the standard of performance expected in the workplace.

Competency requires the application of specified knowledge, skills and attitudes relevant to effective participation, consistently over time and in the workplace environment.

The essential skills and knowledge are either identified separately or combined.

Knowledge identifies what a person needs to know to perform the work in an informed and effective manner.

Skills describe the application of knowledge to situations where understanding is converted into a workplace outcome.

Attitude describes the founding reasons behind the need for certain knowledge or why skills are performed in a specified manner.

Competency covers all aspects of workplace performance and involves:

- Performing individual tasks
- Managing a range of different tasks
- Responding to contingencies or breakdowns
- Dealing with the responsibilities of the workplace
- Working with others.

Unit of Competency

Like with any training qualification or program, a range of subject topics are identified that focus on the ability in a certain work area, responsibility or function.

Each manual focuses on a specific unit of competency that applies in the hospitality workplace.

In this manual a unit of competency is identified as a 'unit'.

Each unit of competency identifies a discrete workplace requirement and includes:

- Knowledge and skills that underpin competency
- Language, literacy and numeracy
- Occupational safety and health requirements.

Each unit of competency must be adhered to in training and assessment to ensure consistency of outcomes.

Element of Competency

An element of competency describes the essential outcomes within a unit of competency.

The elements of competency are the basic building blocks of the unit of competency. They describe in terms of outcomes the significant functions and tasks that make up the competency.

In this manual elements of competency are identified as an 'element'.

Performance criteria

Performance criteria indicate the standard of performance that is required to demonstrate achievement within an element of competency. The standards reflect identified industry skill needs.

Performance criteria will be made up of certain specified skills, knowledge and attitudes.

Learning

For the purpose of this manual learning incorporates two key activities:

- Training
- Assessment.

Both of these activities will be discussed in detail in this introduction.

Today training and assessment can be delivered in a variety of ways. It may be provided to participants:

- On-the-job – in the workplace
- Off-the-job – at an educational institution or dedicated training environment
- As a combination of these two options.

No longer is it necessary for learners to be absent from the workplace for long periods of time in order to obtain recognised and accredited qualifications.

Learning Approaches

This manual will identify two avenues to facilitate learning:

Competency Based Training (CBT)

This is the strategy of developing a participant's competency.

Educational institutions utilise a range of training strategies to ensure that participants are able to gain the knowledge and skills required for successful:

- Completion of the training program or qualification
- Implementation in the workplace.

The strategies selected should be chosen based on suitability and the learning styles of participants.

Competency Based Assessment (CBA)

This is the strategy of assessing competency of a participant.

Educational institutions utilise a range of assessment strategies to ensure that participants are assessed in a manner that demonstrates validity, fairness, reliability, flexibility and fairness of assessment processes.

Flexibility in Learning

It is important to note that flexibility in training and assessment strategies is required to meet the needs of participants who may have learning difficulties. The strategies used will vary, taking into account the needs of individual participants with learning difficulties. However they will be applied in a manner which does not discriminate against the participant or the participant body as a whole.

Catering for Participant Diversity

Participants have diverse backgrounds, needs and interests. When planning training and assessment activities to cater for individual differences, trainers and assessors should:

- Consider individuals' experiences, learning styles and interests
- Develop questions and activities that are aimed at different levels of ability
- Modify the expectations for some participants
- Provide opportunities for a variety of forms of participation, such as individual, pair and small group activities
- Assess participants based on individual progress and outcomes.

The diversity among participants also provides a good reason for building up a learning community in which participants support each other's learning.

Participant Centred Learning

This involves taking into account structuring training and assessment that:

- *Builds on strengths* – Training environments need to demonstrate the many positive features of local participants (such as the attribution of academic success to effort, and the social nature of achievement motivation) and of their trainers (such as a strong emphasis on subject disciplines and moral responsibility). These strengths and uniqueness of local participants and trainers should be acknowledged and treasured
- *Acknowledges prior knowledge and experience* – The learning activities should be planned with participants' prior knowledge and experience in mind
- *Understands learning objectives* – Each learning activity should have clear learning objectives and participants should be informed of them at the outset. Trainers should also be clear about the purpose of assignments and explain their significance to participants
- *Teaches for understanding* – The pedagogies chosen should aim at enabling participants to act and think flexibly with what they know
- *Teaches for independent learning* – Generic skills and reflection should be nurtured through learning activities in appropriate contexts of the curriculum. Participants should be encouraged to take responsibility for their own learning

- *Enhances motivation* – Learning is most effective when participants are motivated. Various strategies should be used to arouse the interest of participants
- *Makes effective use of resources* – A variety of teaching resources can be employed as tools for learning
- *Maximises engagement* – In conducting learning activities, it is important for the minds of participants to be actively engaged
- *Aligns assessment with learning and teaching* – Feedback and assessment should be an integral part of learning and teaching
- *Caters for learner diversity* – Trainers should be aware that participants have different characteristics and strengths and try to nurture these rather than impose a standard set of expectations.

Active Learning

The goal of nurturing independent learning in participants does not imply that they always have to work in isolation or solely in a classroom. On the contrary, the construction of knowledge in tourism and hospitality studies can often best be carried out in collaboration with others in the field. Sharing experiences, insights and views on issues of common concern, and working together to collect information through conducting investigative studies in the field (active learning) can contribute a lot to their eventual success.

Active learning has an important part to play in fostering a sense of community in the class. First, to operate successfully, a learning community requires an ethos of acceptance and a sense of trust among participants, and between them and their trainers. Trainers can help to foster acceptance and trust through encouragement and personal example, and by allowing participants to take risks as they explore and articulate their views, however immature these may appear to be. Participants also come to realise that their classmates (and their trainers) are partners in learning and solving.

Trainers can also encourage cooperative learning by designing appropriate group learning tasks, which include, for example, collecting background information, conducting small-scale surveys, or producing media presentations on certain issues and themes. Participants need to be reminded that, while they should work towards successful completion of the field tasks, developing positive peer relationships in the process is an important objective of all group work.

Competency Based Training (CBT)

Principle of Competency Based Training

Competency based training is aimed at developing the knowledge, skills and attitudes of participants, through a variety of training tools.

Training Strategies

The aims of this curriculum are to enable participants to:

- Undertake a variety of subject courses that are relevant to industry in the current environment
- Learn current industry skills, information and trends relevant to industry
- Learn through a range of practical and theoretical approaches
- Be able to identify, explore and solve issues in a productive manner

- Be able to become confident, equipped and flexible managers of the future
- Be 'job ready' and a valuable employee in the industry upon graduation of any qualification level.

To ensure participants are able to gain the knowledge and skills required to meet competency in each unit of competency in the qualification, a range of training delivery modes are used.

Types of Training

In choosing learning and teaching strategies, trainers should take into account the practical, complex and multi-disciplinary nature of the subject area, as well as their participant's prior knowledge, learning styles and abilities.

Training outcomes can be attained by utilising one or more delivery methods:

Lecture/Tutorial

This is a common method of training involving transfer of information from the trainer to the participants. It is an effective approach to introduce new concepts or information to the learners and also to build upon the existing knowledge. The listener is expected to reflect on the subject and seek clarifications on the doubts.

Demonstration

Demonstration is a very effective training method that involves a trainer showing a participant how to perform a task or activity. Through a visual demonstration, trainers may also explain reasoning behind certain actions or provide supplementary information to help facilitate understanding.

Group Discussions

Brainstorming in which all the members in a group express their ideas, views and opinions on a given topic, is a free flow and exchange of knowledge among the participants and the trainer. The discussion is carried out by the group on the basis of their own experience, perceptions and values. This will facilitate acquiring new knowledge. When everybody is expected to participate in the group discussion, even the introverted persons will also get stimulated and try to articulate their feelings.

The ideas that emerge in the discussions should be noted down and presentations are to be made by the groups. Sometimes consensus needs to be arrived at on a given topic. Group discussions are to be held under the moderation of a leader guided by the trainer. Group discussion technique triggers thinking process, encourages interactions and enhances communication skills.

Role Play

This is a common and very effective method of bringing into the classroom real life situations, which may not otherwise be possible. Participants are made to enact a particular role so as to give a real feel of the roles they may be called upon to play. This enables participants to understand the behaviour of others as well as their own emotions and feelings. The instructor must brief the role players on what is expected of them. The role player may either be given a ready-made script, which they can memorise and enact, or they may be required to develop their own scripts around a given situation. This technique is extremely useful in understanding creative selling techniques and human relations. It can be entertaining and energising and it helps the reserved and less literate to express their feelings.

Simulation Games

When trainees need to become aware of something that they have not been conscious of, simulations can be a useful mechanism. Simulation games are a method based on "here and now" experience shared by all the participants. The games focus on the participation of the trainees and their willingness to share their ideas with others. A "near real life" situation is created providing an opportunity to which they apply themselves by adopting certain behaviour. They then experience the impact of their behaviour on the situation. It is carried out to generate responses and reactions based on the real feelings of the participants, which are subsequently analysed by the trainer.

While use of simulation games can result in very effective learning, it needs considerable trainer competence to analyse the situations.

Individual /Group Exercises

Exercises are often introduced to find out how much the participant has assimilated. This method involves imparting instructions to participants on a particular subject through use of written exercises. In the group exercises, the entire class is divided into small groups, and members are asked to collaborate to arrive at a consensus or solution to a problem.

Case Study

This is a training method that enables the trainer and the participant to experience a real life situation. It may be on account of events in the past or situations in the present, in which there may be one or more problems to be solved and decisions to be taken. The basic objective of a case study is to help participants diagnose, analyse and/or solve a particular problem and to make them internalise the critical inputs delivered in the training. Questions are generally given at the end of the case study to direct the participants and to stimulate their thinking towards possible solutions. Studies may be presented in written or verbal form.

Field Visit

This involves a carefully planned visit or tour to a place of learning or interest. The idea is to give first-hand knowledge by personal observation of field situations, and to relate theory with practice. The emphasis is on observing, exploring, asking questions and understanding. The trainer should remember to brief the participants about what they should observe and about the customs and norms that need to be respected.

Group Presentation

The participants are asked to work in groups and produce the results and findings of their group work to the members of another sub-group. By this method participants get a good picture of each other's views and perceptions on the topic and they are able to compare them with their own point of view. The pooling and sharing of findings enriches the discussion and learning process.

Practice Sessions

This method is of paramount importance for skills training. Participants are provided with an opportunity to practice in a controlled situation what they have learnt. It could be real life or through a make-believe situation.

Games

This is a group process and includes those methods that involve usually fun-based activity, aimed at conveying feelings and experiences, which are everyday in nature, and applying them within the game being played. A game has set rules and regulations, and may or may not include a competitive element. After the game is played, it is essential that the participants be debriefed and their lessons and experiences consolidated by the trainer.

Research

Trainers may require learners to undertake research activities, including online research, to gather information or further understanding about a specific subject area.

Competency Based Assessment (CBA)

Principle of Competency Based Assessment

Competency based assessment is aimed at compiling a list of evidence that shows that a person is competent in a particular unit of competency.

Competencies are gained through a multitude of ways including:

- Training and development programs
- Formal education
- Life experience
- Apprenticeships
- On-the-job experience
- Self-help programs.

All of these together contribute to job competence in a person. Ultimately, assessors and participants work together, through the 'collection of evidence' in determining overall competence.

This evidence can be collected:

- Using different formats
- Using different people
- Collected over a period of time.

The assessor, who is ideally someone with considerable experience in the area being assessed, reviews the evidence and verifies the person as being competent or not.

Flexibility in Assessment

Whilst allocated assessment tools have been identified for this subject, all attempts are made to determine competency and suitable alternate assessment tools may be used, according to the requirements of the participant.

The assessment needs to be equitable for all participants, taking into account their cultural and linguistic needs.

Competency must be proven regardless of:

- Language
- Delivery Method
- Assessment Method.

Assessment Objectives

The assessment tools used for subjects are designed to determine competency against the 'elements of competency' and their associated 'performance criteria'.

The assessment tools are used to identify sufficient:

- a) Knowledge, including underpinning knowledge
- b) Skills
- c) Attitudes

Assessment tools are activities that trainees are required to undertake to prove participant competency in this subject.

All assessments must be completed satisfactorily for participants to obtain competence in this subject. There are no exceptions to this requirement, however, it is possible that in some cases several assessment items may be combined and assessed together.

Types of Assessment

Allocated Assessment Tools

There are a number of assessment tools that are used to determine competency in this subject:

- Work projects
- Written questions
- Oral questions
- Third Party Report
- Observation Checklist.

Instructions on how assessors should conduct these assessment methods are explained in the Assessment Manuals.

Alternative Assessment Tools

Whilst this subject has identified assessment tools, as indicated above, this does not restrict the assessor from using different assessment methods to measure the competency of a participant.

Evidence is simply proof that the assessor gathers to show participants can actually do what they are required to do.

Whilst there is a distinct requirement for participants to demonstrate competency, there are many and diverse sources of evidence available to the assessor.

Ongoing performance at work, as verified by a supervisor or physical evidence, can count towards assessment. Additionally, the assessor can talk to customers or work colleagues to gather evidence about performance.

A range of assessment methods to assess competency include:

- Practical demonstrations
- Practical demonstrations in simulated work conditions
- Problem solving
- Portfolios of evidence
- Critical incident reports
- Journals
- Oral presentations
- Interviews
- Videos
- Visuals: slides, audio tapes
- Case studies
- Log books
- Projects
- Role plays
- Group projects
- Group discussions
- Examinations.

Recognition of Prior Learning

Recognition of Prior Learning is the process that gives current industry professionals who do not have a formal qualification, the opportunity to benchmark their extensive skills and experience against the standards set out in each unit of competency/subject.

Also known as a Skills Recognition Audit (SRA), this process is a learning and assessment pathway which encompasses:

- Recognition of Current Competencies (RCC)
- Skills auditing
- Gap analysis and training
- Credit transfer.

Assessing competency

As mentioned, assessment is the process of identifying a participant's current knowledge, skills and attitudes sets against all elements of competency within a unit of competency. Traditionally in education, grades or marks were given to participants, dependent on how many questions the participant successfully answered in an assessment tool.

Competency based assessment does not award grades, but simply identifies if the participant has the knowledge, skills and attitudes to undertake the required task to the specified standard.

Therefore, when assessing competency, an assessor has two possible results that can be awarded:

- Pass Competent (PC)
- Not Yet Competent (NYC).

Pass Competent (PC)

If the participant is able to successfully answer or demonstrate what is required, to the expected standards of the performance criteria, they will be deemed as 'Pass Competent' (PC).

The assessor will award a 'Pass Competent' (PC) if they feel the participant has the necessary knowledge, skills and attitudes in all assessment tasks for a unit.

Not Yet Competent' (NYC)

If the participant is unable to answer or demonstrate competency to the desired standard, they will be deemed to be 'Not Yet Competent' (NYC).

This does not mean the participant will need to complete all the assessment tasks again. The focus will be on the specific assessment tasks that were not performed to the expected standards.

The participant may be required to:

- a) Undertake further training or instruction
- b) Undertake the assessment task again until they are deemed to be 'Pass Competent'.

Competency standard

UNIT TITLE: OPERATE A BAR FACILITY		NOMINAL HOURS: 40
UNIT NUMBER: D1.HBS.CL5.04		
UNIT DESCRIPTOR: This unit deals with the skills and knowledge required to operate a bar facility in a range of settings within the hotel industries workplace context		
ELEMENTS AND PERFORMANCE CRITERIA	UNIT VARIABLE AND ASSESSMENT GUIDE	
Element 1: Prepare <i>bar</i> for service 1.1 Set up <i>bar</i> display and work area in accordance with enterprise requirements 1.2 Check and restock <i>bar products and materials</i> where necessary in accordance with enterprise requirements 1.3 Ensure <i>service equipment</i> is clean, operational and ready for use 1.4 <i>Store items</i> in the correct place at the correct temperature 1.5 Prepare and stock a suitable range of <i>garnishes and accompaniments</i> Element 2: Take drink orders 2.1 Receive customer orders 2.2 Check product and/or brand preferences with customer in a courteous manner 2.3 Provide clear and helpful <i>recommendations or information</i> to customers on selection of drinks if required	Unit Variables The Unit Variables provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. It relates to the unit as a whole and facilitates holistic assessment. This unit applies to all industry sectors that require to operate a bar facility within the labour divisions of the hotel and travel industries and may include: 1. Food and Beverage Service <i>Bar</i> may be: • Permanent • Temporary • Dry till. <i>Bar products and materials</i> may include: • All types of drinks • Garnishes • Cleaning equipment • Refrigeration equipment • Utensils	

Element 3: Prepare and serve drinks 3.1 Greet customers in a polite, friendly and helpful manner 3.2 Prepare drinks in accordance with legal and enterprise standards using the correct equipment, ingredients and measures 3.3 Serve drinks promptly and courteously 3.4 Handle and use industry <i>standard glassware</i> and use garnishes and accompaniments appropriately 3.5 Minimise spillage and wastage and attend to accidents during service promptly and safely 3.6 Seek assistance from appropriate people for situations which pose a threat to safety or security of colleagues, customers or property 3.7 Seek <i>feedback</i> from customers in order to identify and implement improvements to beverage quality and take appropriate <i>corrective action</i>, if required 3.8 Deal with <i>unexpected situations</i> in accordance with enterprise procedures Element 4: Close down bar operations 4.1 Turn off equipment in accordance with enterprise safety procedures and manufacturer's instructions 4.2 Clear, clean or dismantle bar areas in accordance with enterprise procedures 4.3 Store garnishes and accompaniments, correctly 4.4 Set up bar for next service 4.5 Handover bar, where appropriate, to incoming bar staff	• Bar towels • Display items. <i>Service equipment</i> may include: • Bottle openers • Corkscrews • Measures • Glassware • Knives and chopping boards • Ice containers • Tongs and scoops • Nip pourers • Coasters • Bar mats • Refrigeration equipment • Post mix • Beer dispensers • Trays. <i>Store items</i> may relate to: • Storage cupboards • Special storage areas • Pest control measures.
--	--

	<i>Garnishes and accompaniments</i> may include: • Coasters • Edible and non-edible garnishes. <i>Recommendations or information</i> may include: • Price • Special promotions • Ingredients • Relative strength • Suitable alternatives • Flavours • Value for money. <i>Standard glassware</i> may include: • Beer glass • Highball • Red wine glass • White wine glass • Tumblers • Champagne flute. <i>Feedback</i> may relate to: • Compliments • Complaints • Opinions.
--	---

	<i>Corrective action</i> may include reporting problems to: • Manager • Suppliers • Specialist staff. <i>Unexpected situations</i> may include: • Equipment breakdowns • Power failure • Violent incidents • Medical emergencies • Running out of stock • Employee absences. <i>Handover</i> may relate to: • Customer orders • Intoxication levels of customers • Customer preferences • Restocking bar products/equipment. Assessment Guide The following skills and knowledge must be assessed as part of this unit: • Knowledge of the relevant liquor licensing laws • Knowledge of hygiene issues of specific relevance to beverage service • Knowledge of the different types of bars • Knowledge of typical bar equipment • Knowledge of a variety of alcoholic beverages • Ability to demonstrate the preparation and serving of a range of standard drinks.
--	---

	Linkages To Other Units • Provide responsible service of alcohol • Prepare and serve cocktails • Prepare and serve non-alcoholic beverages • Operate a cellar system • Clean and tidy bar and food service areas • Process a financial sale transaction. Critical Aspects of Assessment Evidence of the following is essential: • Demonstrate understanding of legal requirements in relation to the service of alcohol • Ability to demonstrate the set up and how to operate bar equipment in accordance with enterprise procedures and systems • Ability to demonstrate offering customers assistance appropriate to situation and level of responsibility • Ability to demonstrate the preparation and service of drinks in accordance with enterprise procedures and accepted timelines. Context of Assessment This unit may be assessed on or off the job: • Assessment should include practical demonstration of the ability to operate a bar either in the workplace or through a simulation activity, supported by a range of methods to assess underpinning knowledge • Assessment must relate to the individual's work area, job role and area of responsibility • Assessment must include project or work activities that allow the candidate to respond to multiple and varying customer service and communication situations that require the candidate to operate a bar.
--	---

	Resource Implications Training and assessment to include access to a real or simulated workplace; and access to workplace standards, procedures, policies, guidelines, tools and equipment.									
	Assessment Methods The following methods may be used to assess competency for this unit: • Case studies • Observation of practical candidate performance • Oral and written questions • Portfolio evidence • Problem solving • Role plays • Third party reports completed by a supervisor • Project and assignment work.									
	Key Competencies in this Unit <i>Level 1 = competence to undertake tasks effectively</i> <i>Level 2 = competence to manage tasks</i> <i>Level 3 = competence to use concepts for evaluating</i>									
	<table><tr><th>Key Competencies</th><th>Level</th><th>Examples</th></tr><tr><td>Collecting, organising and analysing information</td><td>0</td><td></td></tr><tr><td>Communicating ideas and information</td><td>2</td><td>Use positive communication and customer service skills to provide bar service to customers</td></tr></table>	Key Competencies	Level	Examples	Collecting, organising and analysing information	0		Communicating ideas and information	2	Use positive communication and customer service skills to provide bar service to customers
	Key Competencies	Level	Examples							
Collecting, organising and analysing information	0									
Communicating ideas and information	2	Use positive communication and customer service skills to provide bar service to customers								

	Planning and organising activities	2	Undertake bar set up prior to service
	Working with others and in teams	2	Share relevant information with staff when executing handover to incoming bar staff
	Using mathematical ideas and techniques	0	
	Solving problems	0	
	Using technology	0	

Notes and PowerPoint slides

Slide

OPERATE A BAR FACILITY

D1.HBS.CL5.04

Slide 1

Slide No	Trainer Notes
----------	---------------

1.	Trainer welcomes trainees to class.
----	-------------------------------------

Slide

Operate a bar facility

This Unit comprises four Elements:

- Prepare bar for service
- Take drink orders
- Prepare and serve drinks
- Close down bar operations

Slide 2

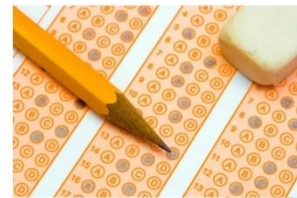

Slide No	Trainer Notes
2.	Trainer advises trainees this Unit comprises four Elements, as listed on the slide explaining: • Each Element comprises a number of Performance Criteria which will be identified throughout the class and explained in detail • Trainees can obtain more detail from their Trainee Manual • At times the course presents advice and information about various protocols but where their workplace requirements differ to what is presented, the workplace practices and standards, as well as policies and procedures must be observed.

Slide

Assessment

Assessment for this unit may include:

- Oral questions
- Written questions
- Work projects
- Workplace observation of practical skills
- Practical exercises
- Formal report from employer or supervisor

Slide 3

Slide No	Trainer Notes
3.	Trainer advises trainees that assessment for this Unit may take several forms, all of which are aimed at verifying they have achieved competency for the Unit as required. Trainer indicates to trainees the methods of assessment that will be applied to them for this Unit.

Slide

Prepare bar for service

Performance criteria for this Element are :

- Set up bar display and work area in accordance with enterprise requirements
- Check and restock bar products & materials where necessary in accordance with enterprise requirements
- Ensure equipment is clean, operational and ready for use
- Store items in correct place at correct temperature
- Prepare and stock garnishes and accompaniments

Slide 4

Slide No	Trainer Notes
4.	Trainer identifies for trainees the Performance Criteria for this Element, as listed on the slide. Class Activity – General Discussion Trainer leads a general class discussion on preparing a bar for service by asking questions such as: • What experience have you had in visiting bars? • What do you think is involved in preparing a bar for service? • How long do you think it takes to prepare bare ready for service? • What do you think is meant by the term 'opening procedures' in relation to preparing a bar for service? • Why do you think it is important to make sure a bar is ready for service when it opens?

Slide

Set up bar display and work area

In relation to this Unit:

- It reflects the role of a bar attendant
- It applies to all types of bars
- It applies to alcoholic and non-alcoholic drinks
- Liquor service is subject to local national legislation

Slide 5

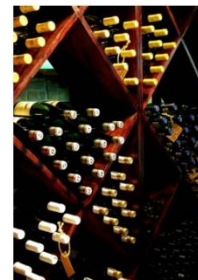

Slide No	Trainer Notes
5.	Trainer explains context for the Unit: • It reflects the role of a bar attendant and applies to bar operations in all hospitality sectors, including all types of bars • It relates to the service of a range of alcoholic and non-alcoholic beverages commonly found in a bar • Service of liquor is subject to local/in country legislation.

Slide

Set up bar display and work area

Bars must be set up prior to service:

- To ensure bar is ready to operate when customers arrive
- To optimise appeal and appearance

Slide 6

Slide No

Trainer Notes

6.

Trainer explains bars need to be properly set up prior to service for two important reasons:

- To ensure the bar is fully ready to provide service to customers when they arrive – everything must be ready, everything needs to be in place. There must be the impression customers were expected and things had been prepared for their arrival
- To make sure the bar looks appealing to customers – there is a need for the area to be neat and tidy and for staff to be able to focus on customer service when they place an order, rather than spend/waste time doing tasks which should have been done prior to opening.

Slide

Set up bar display and work area

This Unit embraces the use and operation of:

- Permanent bars
- Temporary bars
- Dry till bars

Slide 7

Slide No	Trainer Notes
7.	Trainer states this unit applies to the operation of all bar types including: • Permanent bars – bars which are ‘in place’ all the time • Temporary bars – bars which are established for short-term reasons such as parties, special events, or to cater for especially high levels of trade • Dry till bars – a bar where drinks are served but no money changes hands.

Slide

Set up bar display and work area

Bar operations = preparation and service of drinks:

- Mixed drinks:
 - Short (140 ml) and Long (200 ml)
 - Full nip of spirits (30 ml) or half-nip (15 ml)
- Cocktails
- Beer:
 - Draught – barrels or kegs
 - Packaged – bottles and cans

(Continued)

Slide 8

Slide No	Trainer Notes
8.	Trainer advises an understanding of what a bar does is useful as it gives a context and focus for the set up duties which need to be performed highlighting, in general terms, bar service will include the preparation and service of a range of drinks including: • A variety of mixed drinks – which may be served in short (capacity approx. 140 ml) or long glasses (capacity approx. 200 ml) and served using either a full nip of spirits (30 ml) and/or a half nip (15 ml) nips • A range of cocktails – some bars promote cocktails more than others. Some bars have a limited range of house cocktails while others boast a comprehensive range • Beers – draught and packaged. Draught beer comes from kegs/barrels and is the beer 'on tap' – packaged beer refers to all the beer available in bottles, stubbies and cans. Not all bars have 'draught' beer. Class Activity 1 – Question and Answer session Trainer asks class questions about local drinks and venues and identifies/accepts local examples as necessary: • What are some names of local bars and/or venues with bars in them? • What are examples of 'mixed drinks'? • How big is a measure of 30 ml? • What brands of beers are available locally? • What is/are brand names of local beers?

Class Activity 2 – Product Presentation

Trainer shows class examples of each product group/type identified.

Slide

Set up bar display and work area

- Spirits:
 - 'Neat'
 - 'On ice'
 - Mixed
- Liqueurs
- Wines:
 - Table wine or sparkling
 - Red or white

(Continued)

Slide 9

Slide No	Trainer Notes
9.	Trainer continues identifying what bar service may entail: ● Spirits – these may be: ■ 'Neat' - served on their own with nothing added ■ 'On ice' – served only with ice: also known as 'on the rocks' ■ Mixed with aerated waters (such as cola, lemonade, dry ginger, lemon squash) or juices ● Liqueurs – these are usually served on their own (a serve size is 28 ml – 30 ml) but may be served over ice, mixed into a cocktail or in some cases added to coffee ● Wines – still table wines and sparkling wines (red and white). Class Activity – Product Presentation Trainer shows class examples of each product group/type identified.

Slide

Set up bar display and work area

- Non-alcoholic beverages:

- Juices
- Waters
- Aerated waters

- Fortified wine:

- Juices

Slide 10

Slide No	Trainer Notes
10.	Trainer continues identifying what bar service may entail: • Non-alcoholic beverages – fruit juices, still and sparkling waters and aerated waters/soft drink: aerated waters may be dispensed from bottles, cans or post mix • Fortified drinks – which include sherry, port, muscat, tokay and frontignac. A standard serve size for a fortified wine is 60 ml. Class Activity – Product Presentation Trainer shows class examples of each product group/type identified.

Slide

Set up bar display and work area

Bar set up:

- Must support and reflect service style being provided
- Must address equipment in the bar
- Varies between bars
- Varies depending on number of staff
- Must meet food safety requirements

Slide 11

Slide No	Trainer Notes
11.	Trainer states enterprise requirements and standards will apply to the set up of a bar and the following requirements may apply – set up: • Must support and reflect the style of service being offered • Needs to accommodate and embrace the equipment being used • Will vary with the size and layout of the bar • Will vary depending on staff numbers working in the bar and helping with set up tasks • Must comply with required food safety requirements.

Slide

Set up bar display and work area

‘Opening procedures’:

- Term given to the procedures and tasks necessary to prepare the bar for service
- Vary between venues
- Vary between bars in the same premises

Slide 12

Slide No	Trainer Notes
12.	Trainer introduces concept of ‘opening procedures’: • ‘Opening procedures’ is a generic term used to describe the tasks needed to set up/prepare a bar for service • Opening procedures will vary between establishments and will vary between bars in the same business.

Slide

Set up bar display and work area

Opening procedures may include:

- Connecting draught beer:
 - Turning on refrigeration
 - Drawing beer through
- Turning on espresso machine
- Setting out drip trays

(Continued)

Slide 13

Slide No	Trainer Notes
13.	Trainer gives examples of tasks which may comprise opening procedures for bars: • Connecting the draught beer – where bulk beer is served you may be required to: ▪ Turning on instantaneous beverage chillers ▪ Drawing beer through to taps and testing/examining for quality • Turning on espresso coffee machine • Setting out drip trays – with de-naturing agent – under beer fonts. Class Activity – Item presentation/identification Trainer shows class a sample of items identified on slide.

Slide

Set up bar display and work area

- Setting out trays and racks
- Checking and ordering (as necessary) stock
- Collecting clean cloths and linen
- Laying out bar items

(Continued)

Slide 14

Slide No	Trainer Notes
14.	Trainer continues to give examples of tasks which may comprise opening procedures for bars: • Setting out trays and racks – ready to hold dirty glassware • Checking stock levels of all beverage items – where any beverage item is 'out of stock', other staff should be notified of this and effort made to order/obtain what is required • Collecting clean cloths/swabs, tea towels and bar runners • Laying out bar runners, coasters, tent cards, promotional materials and other requirements/advertising on tables as required. Class Activity – Item presentation/identification Trainer shows class a sample of items identified on slide.

Slide

Set up bar display and work area

- Setting out ashtrays
- Checking equipment, utensils and systems
- Setting out clean glasses
- Checking glassware

Slide 15

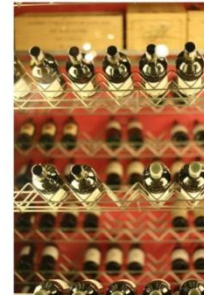

Slide No	Trainer Notes
15.	Trainer continues to give examples of tasks which may comprise opening procedures for bars: • Setting ashtrays in smoking areas • Checking equipment and bar utensils are clean and in working order – this check should include all operational bar equipment (such as refrigeration, beer taps, blenders, ice machines, ice crushers) as well as all ancillary items such as lighting, air conditioning, music systems, vending machines, advertising signage • Placing racks of clean glassware out into their service positions – this requires glasses to be placed into a glass chiller which will also need to be turned on • Checking glassware – to ensure they have no cracks, chips, lipstick marks: all glasses must look clean. Class Activity – Item presentation/identification Trainer shows class a sample of items identified on slide.

Slide

Set up bar display and work area

- Placing pourers on bottles
- Preparing garnishes
- Checking displays and promotional materials

(Continued)

Slide 16

Slide No	Trainer Notes
16.	Trainer continues to give examples of tasks which may comprise opening procedures for bars: • Placing spirit pourers on the appropriate bottles – ensuring sufficient supply of liquor • Preparing garnishes – most bars prepare standard garnishes such as lemon and orange slices, and lime quarters: where a strong demand for cocktails exists there will be a greater demand for a bigger range of garnishes (cherries, cucumber, orange wheels, pineapples) plus the likelihood of a need to prepare sugar syrup, sour mix, and fresh juices • Checking bar displays and all promotional material – refilling as required. Class Activity – Item presentation/identification Trainer shows class a sample of items identified on slide.

Slide

Set up bar display and work area

- Checking and re-stocking accessories for cocktails
- Stacking and preparing service trays
- Filling ice containers
- Collecting and counting cash drawer

Slide 17

Slide No	Trainer Notes
17.	Trainer continues to give examples of tasks which may comprise opening procedures for bars: • Re-stocking accessories for cocktails – straws, decorations, glassware • Stacking and ensuring cleanliness of service trays • Filling up ice buckets/tubs • Collecting cash drawer and placing/counting in cash register – checking/replacing register journal/audit roll. Class Activity – Item presentation/identification Trainer shows class a sample of items identified on slide.

Slide

Set up bar display and work area

Bars can operate in different ways and offer different options to customers:

- Most bars work on a cash basis – some offer credit card and electronic payment options
- Some offer dry till, tab or account

(Continued)

Slide 18

Slide No	Trainer Notes
18.	Trainer explains there is a need to know about different ways bars may operate with reference to: • The fact most bars work on a cash basis – people pay for drinks as they order/buy them: some bars will offer electronic cash facilities or debit/credit card facilities • Dry till, tab or account: ▪ This can be used where a group/party wishes drinks to be served to them without the need for payment every time they receive a drink ▪ When you run a dry till, tab or account, the selling prices of all the drinks served are rung up (or otherwise recorded) behind the bar, and the bill is then paid by the appropriate person (such as the person organising an event, or the host of a small party): in some cases, the account is pre-paid ▪ On some occasions, the person paying the account sets a pre-determined dollar amount up to which they will pay. It is usual to notify this person shortly before this amount is reached, as they sometimes extend the amount they have agreed to spend. Otherwise, when the set amount has been reached, people start paying for their own drinks ▪ There may be limitations on what people can order when a dry till is being used – for example, customers may only be able to have draught beer, soft drink and house wine: if guests want to drink spirits or bottles of wine they have to pay for their own drinks.

Slide

Set up bar display and work area

- Inclusive packages:
 - Deals where food and nominated or limited drinks are included in the price
- Pre-set drinks – where nominated drinks only are provided for a party or function
- Open bar – a term used at functions indicating there is no limit on the drinks which can be provided

Slide 19

Slide No	Trainer Notes
19.	Trainer gives further examples of different ways can operate: • Inclusive packages – where designated drinks are included in a package deal such as a single price for a meal or function including specified drinks at no extra cost: all other drinks have to be paid for. In package deal situations it is critical to ensure: ▪ Only people eligible for the package deal receive drinks ▪ Patrons only receive the number of drinks they are entitled to ▪ Patrons only receive the type of drinks covered by the deal • Pre-set drinks: ▪ On special occasions – the exact nature of these occasions is limitless but it is common – a group, business or individual may arrange a mini-function where they pay for a set amount of specified beverages ▪ In such a scenario the guests may arrive at a given time, and receive one or several drinks from a prescribed list – examples include a sherry, a glass of sparkling wine, a set cocktail. If patrons want anything else, they have to pay for it themselves • Open bar: ▪ The term 'open bar' is used for functions where there is no limit on the type of drink guests can order

- | | |
|--|---|
| | <ul style="list-style-type: none">▪ Whereas many/most functions will have some sort of limitation on what guests can have 'free of charge' an open bar means there are no such restrictions▪ Note: despite the above definition, there are variations on a theme – at some venues an open bar will include bottled/premium products and wine whereas other venues will exclude these from their definition of an open bar. |
|--|---|

Slide

Check and re-stock bar products and materials

Checks as part of opening procedures include:

- Drinks (alcoholic and non-alcoholic) to ensure:
 - Sufficient quantities
 - 'Use by' and 'Best Before' dates are OK
 - Accessible
 - Back-up supplies are available

(Continued)

Slide 20

Slide No	Trainer Notes
20.	Trainer explains an important part of setting up a bar is to ensure all the required products and materials are available and ready to use highlighting checks need to be made on: ● All types of drinks: ■ Alcoholic beverages – beers, wines, spirits, liqueurs ■ Non-alcoholic beverages – aerated waters, fruit juices, milk, cream ● Checks must ensure: ■ Sufficient quantities of all items to meet expected trade ■ Juices, milk and cream have not exceeded their 'best before' or 'use by' dates ■ Stock is readily accessible ■ Back-up supplies are available – stored in cupboards or elsewhere ready to access if needed.

Slide

Check and re-stock bar products and materials

- Garnishes:

- Commonly required garnishes are available
- Sufficient quantities
- Ingredients available to prepare others if required

(Continued)

Slide 21

Slide No	Trainer Notes
21.	Trainer continues to identify checks to be made as part of opening procedures: • Garnishes: ▪ The garnishes commonly required by the bar are prepared and available – these will include basics such as slices of lemon and slices of orange ▪ Ingredients are available to enable preparation of extra and/or other garnishes as possibly needed by the type of drinks offered on the drink list. Class Activity – Item/product Presentation Trainer shows class examples of each item/product identified on slide.

Slide

Check and re-stock bar products and materials

- Cleaning equipment:
 - All service areas are clean
 - All service equipment is clean
 - All required cleaning materials and chemicals are available

(Continued)

Slide 22

Slide No	Trainer Notes
22.	Trainer continues to identify checks to be made as part of opening procedures: ● Cleaning equipment: ▪ Equipment and service counters are clean and ready for service ▪ All equipment used in the preparation and service of drinks is clean ▪ Cleaning materials (chemicals, cleaning agents and cleaning tools and cloths) are available and ready to use if needed during trade. Class Activity – Item/product Presentation Trainer shows class examples of bar cleaning equipment and chemicals.

Slide

Check and re-stock bar products and materials

- Refrigeration equipment:
 - Units have been turned 'on'
 - Operating at correct temperature

(Continued)

Slide 23

Slide No	Trainer Notes
23.	Trainer continues to identify checks to be made as part of opening procedures: ● Refrigeration equipment: ■ All refrigeration units are turned on ■ Items are operating at the required temperature: – Units containing food (milk, cream, fruit) should operate at 5°C or below – Drink units may have a nominated temperature for different types of drinks – such as 2°C for beer fridges. Class Activity – Item/product Presentation Trainer shows class examples of each item/product identified on slide.

Slide

Check and re-stock bar products and materials

- Utensils and equipment:
 - Available as required for the individual bar and its trading needs
 - Safe to use, and clean
 - Sufficient in number
 - In correct required location

(Continued)

Slide 24

Slide No

Trainer Notes

24.

Trainer continues to identify checks to be made as part of opening procedures:

- Utensils and equipment:
 - All required utensils are available – items may include:
 - Chopping/cutting boards and knives
 - Bar spoons to stir drinks
 - Cocktail shakers
 - All required equipment is available – items may include:
 - Blenders
 - Ice crushers
 - Glass chillers
 - Utensils and equipment are safe to use
 - Items are clean
 - Sufficient utensils and equipment are available
 - Items are laid out in their correct location.

Class Activity – Item/product Presentation

Trainer shows class examples of each item/product identified on slide.

Slide

Check and re-stock bar products and materials

- Cloths and towels:
 - All required items are in place and available
 - Items are clean, washed and presentable
 - Sufficient quantities available

(Continued)

Slide 25

Slide No	Trainer Notes
25.	Trainer continues to identify checks to be made as part of opening procedures: ● Cloths and towels: ▪ All required linen is available – such as bar runners/towels, swabs, tea towels, cloths ▪ Items have been washed and are clean ▪ Sufficient quantities are available ▪ Items look appealing – not torn, tired or shabby. Class Activity – Item/product Presentation Trainer shows class examples of each item/product identified on slide.

Slide

Check and re-stock bar products and materials

- Display items:
 - Advertising and promotional materials for the venue
 - Special displays – for themes, events, parties

Slide 26

Slide No	Trainer Notes
26.	Trainer continues to identify checks to be made as part of opening procedures: • Display items • Advertising and promotional materials are available – these may include: ▪ Tent cards ▪ Menus ▪ Drink lists ▪ Book matches ▪ Signage and posters ▪ Sample products located strategically to encourage sales • Special displays have been created as required – these may include: ▪ Displays to support a theme ▪ Displays for a special event/party ▪ Displays in a dining area to promote wine.

Slide

Check and re-stock bar products and materials

Venue-specific re-stocking requirements may be:

- Only 'Supervisor' allowed to order stock
- 'Requisition' must be used to order stock
- Amount of stock which can be ordered may be limited
- 'Inter-departmental transfer' may be required for stock taken from another department
- Deliveries must be immediately put away and refrigerated where necessary
- Stock must be rotated using FIFO system

Slide 27

Slide No	Trainer Notes
27.	Trainer explains enterprise requirements relating to re-stocking bar products may include: • Only the supervisor may be allowed/authorised to order stock • A requisition must be used to order all stock • Stock can only be ordered to re-stock the bar to a nominated par level • An inter-departmental transfer form must be completed if stock is taken/borrowed from another bar/department • All stock delivered to a bar must be immediately secured and/or 'put away/placed behind the bar or under refrigeration (as appropriate) • New stock delivered to the bar must be rotated using the FIFO method – meaning new stock is placed behind old stock. Class Activity – Handouts Trainer distributes and explains use of: • Requisition form • Inter-departmental transfer sheet.

Slide

Check and re-stock bar products and materials

Possible action to take when checking:

- Advise Supervisor of problems
- Order any stock which is low or missing
- Clean anything not properly cleaned
- Put away deliveries which have not been stored
- Create and replenish displays as required

Slide 28

Slide No	Trainer Notes
28.	Trainer addresses action to take if items are not available/things are not correct when checking/preparing bar for service: • Advise your supervisor – tell them of your concern/s and they will take the necessary action • Order necessary stock and/or items (materials, ingredients, utensils, equipment, linen) • Undertake cleaning which has not been properly done • Put away deliveries to the bar which have arrived • Create (or replenish or tidy) displays and/or advertising materials – as and if required.

Slide

Ensure equipment is clean, operational and ready for use

Service equipment must be checked – can include:

- Bottle openers and corkscrews:
 - Clean; safe; operational
- Spirit measures – egg cup measures and or optics (15 ml and 30 ml):
 - Clean; fitted; not leaking

(Continued)

Slide 29

Slide No	Trainer Notes
29.	Trainer explains service equipment must be clean, operational and ready for use when the bar opens for business indicating bar service equipment can include: ● Bottle openers – which may be hand-held or counter-mounted: check they are clean, safe and operational ● Corkscrews – these may be hand-held ('waiter's friend') or counter-mounted units: check they are clean and safe to use ● Measures – these are items used to dispense controlled volumes of liquor. They include: ■ Egg cup measures – double-ended items into which liquor (usually spirits) are poured to measure quantity dispensed. Egg cup measures are usually 30 ml (at one end) and 15 ml at the other, but are also in 30 ml and 60 ml varieties ■ Optics – these are inserted into the necks of bottles (usually spirits) to measure the volume of liquor dispensed ■ Common sizes for optics are 15 ml and 30 ml ■ Check to ensure they are clean, not leaking and fitted to all spirits commonly used behind the bar. Class Activity – Item Presentation Trainer shows students examples of bar items identified on the slide.

Slide

Ensure equipment is clean, operational and ready for use

- Glassware – glasses and jugs:
 - Clean; in place; no chips or cracks
- Knives and chopping boards:
 - Clean; sufficient number; sharp and safe
- Ice containers – tubs and buckets:
 - Clean; sufficient number; full; accessible

(Continued)

Slide 30

Slide No	Trainer Notes
30.	Trainer continues to identify bar service equipment which needs to be checked prior to service: ● Glassware – glassware includes glasses and jugs: ▪ Jugs are used to serve water, contain bulk quantities of fruit juice, sour mix, or other liquids. Alcoholic beverages may also be served in jugs ▪ Glasses refer to all the types of glasses used by the venue to serve the drinks they offer for sale ▪ Check to ensure all glassware is clean and undamaged (no cracks or chips) ● Knives and chopping boards – these are required to cut and peel fruit: ▪ Check they are clean, safe to use and sufficient in quantity to address expected level of trade ● Ice containers – you may be required to work with: ▪ Containers of ice behind the bar for use when adding ice to drinks ▪ Ice buckets – used when serving bottles of white wine and sparkling wine to customers ▪ Make sure ice containers behind the bar are full and clean ▪ Make sure ice buckets are clean, look attractive and are readily accessible. Class Activity – Item Presentation Trainer shows students examples of bar items identified on the slide.

Slide

Ensure equipment is clean, operational and ready for use

- Tongs and scoops – used for fruit and ice:
 - Never use glass to scoop ice
 - Clean; sufficient; in place
- Coasters – placed under drinks:
 - Sufficient; in place; not used or dirty
- Bar mats – ‘runners’ on bars:
 - Clean; presentable; positioned where required

(Continued)

Slide 31

Slide No	Trainer Notes
31.	Trainer continues to identify bar service equipment which needs to be checked prior to service: ● Tongs and scoops – tongs are used to lift/place pieces of fruit or ice into drinks to avoid having to handle fruit/ice with the bare hands: ▪ Scoops are used for retrieving ice from ice making machines and ice containers ▪ A glass must never be used to remove ice from an ice machine or ice container as it can easily break causing bits of glass to mix with the ice presenting a serious hazard to customers ▪ Check tongs and scoops are located where they should be, are clean and sufficient in number ● Coasters – these are an effective way to promote drinks, cocktails and the venue: ▪ You will need to place them on the bar, service counters and tables as part of opening procedures ▪ It is an industry standard ‘used’ coasters are never re-used as they look unclean ● Bar mats – these are towels/runners placed on the bar to enhance presentation and absorb spills from drinks ▪ Make sure they are clean and presentable, and placed to cover the required bar counter areas. Class Activity – Item Presentation Trainer shows students examples of bar items identified on the slide.

Slide

Ensure equipment is clean, operational and ready for use

- Refrigeration equipment – under-counter and glass-fronted-display units:
 - Clean and attractive; stocked; operating at required temperature/s
- Post mix – bulk unit for soft drink:
 - Carbonation, mixing & temperature are correct
 - Sufficient syrup for all flavours
 - Clean and attractive

(Continued)

Slide 32

Slide No	Trainer Notes
32.	Trainer continues to identify bar service equipment which needs to be checked prior to service: ● Refrigeration equipment – includes under-counter storage units and glass-fronted display units: ▪ Check to ensure they are clean and attractive (no dirt or marks), fully stocked, and working as required (at the correct temperature) ● Post mix – these units provide bulk aerated waters at point of service. Check to ensure: ▪ All flavours are working/providing drink as required – that is, carbonation is correct and the strength of the product is correct ▪ Temperature is correct ▪ Sufficient syrup is available ▪ The unit is clean and attractive. Class Activity – Item Presentation Trainer shows students examples of bar items identified on the slide.

Slide

Ensure equipment is clean, operational and ready for use

- Beer dispensers:
 - Beer is attached and flowing
 - Beer temperature is correct
 - Taps are operating properly
 - Drip trays in position – with de-naturing agent
- Service trays:
 - Clean; sufficient number; anti-slip mats fitted

Slide 33

Slide No	Trainer Notes
33.	Trainer continues to identify bar service equipment which needs to be checked prior to service: ● Beer dispensers – where bulk beer is used, you need to check to ensure: ■ Beer is coming through every beer tap/beer line to be used ■ Temperature is correct ■ Taps are operating correctly – turning 'on' and 'off' properly ■ Drip trays are in position – and have de-naturing agent in them ● Service trays – where drinks are served to tables, there will be a need to ensure drink service trays are ready. Check to ensure: ■ They are clean ■ There is sufficient number ■ Anti-slip mats are fitted (if used by the venue). Class Activity – Item Presentation Trainer shows students examples of bar items identified on the slide.

Slide

Ensure equipment is clean, operational and ready for use

Highball glass (also called Hi-ball glass):

- 200 ml – 300 ml
- Used for cocktails such as Harvey Wallbanger, Collins and Tequila Sunrise
- Popular for serving juices and long mixed drinks

(Continued)

Slide 34

Slide No	Trainer Notes
34.	Trainer highlights drinks can be served in a variety of glasses explaining the following types are the most commonly used: ● Highball glass: ▪ A long, straight-sided glass holding 200 – 300 ml and used for cocktails such as Harvey Wallbanger, Collins and Tequila Sunrise ▪ The Highball is also a popular glass for serving fruit juice, soft drinks and long, mixed drinks. Class Activity – Item Presentation Trainer shows students examples of glasses identified on the slide.

Slide

Ensure equipment is clean, operational and ready for use

Pilsener – 200 ml upwards:

- Used for beer
- Mugs or handles also used

Martini glass – approx. 90 ml:

- Used for martinis and other small volume cocktails

(Continued)

Slide 35

Slide No	Trainer Notes
35.	Trainer continues identifying types of glassware used behind bars: • Pilsener – a beer glass (200 ml upwards in size): ▪ Mugs/handles are also used • Martini glass – the most well-known cocktail glass, featuring a classic V-shape (approximately 90s ml capacity) used for Martinis and other small volume cocktails. Class Activity – Item Presentation Trainer shows students examples of glasses identified on the slide.

Slide

Ensure equipment is clean, operational and ready for use

Manhattan glass – 180 ml – 200 ml:

- Generic cocktail glass

Old Fashioned glass – 200 ml:

- Used for cocktails such as Black Russian
- Used to serve neat spirits, spirits on-the-rocks and short, mixed drinks

(Continued)

Slide 36

Slide No	Trainer Notes
36.	Trainer continues identifying types of glassware used behind bars: • Manhattan glass – a larger version (180 – 200 ml) of the Martini glass used by many as their generic cocktail glass • Old fashioned glass – a squat glass (short and wide) of approximately 200 ml used for cocktails such as a Black Russian and a Godfather: ▪ Also commonly used to serve neat spirits, spirits served on-the-rocks, and short mixed drinks. Class Activity – Item Presentation Trainer shows students examples of glasses identified on the slide.

Slide

Ensure equipment is clean, operational and ready for use

Colada glass – 300 ml – 400 ml:

- Used for cocktails with large volume (Coladas; Fluffy Duck; Mai Tai)

Champagne flute – 160 ml – 200 ml:

- Used for champagne and sparkling wine as well as champagne cocktails

(Continued)

Slide 37

Slide No	Trainer Notes
37.	Trainer continues identifying types of glassware used behind bars: • Colada glass – curvy glass of 300 – 400 ml capacity used for cocktails such as Coladas, Fluffy Duck and Mai Tai • Champagne flute – a purpose-built glass used to serve Champagne and a range of Champagne cocktails: ▪ Capacity varies between 160 ml – 200 ml. Class Activity – Item Presentation Trainer shows students examples of glasses identified on the slide.

Slide

Ensure equipment is clean, operational and ready for use

Brandy Balloon – 200 ml to 4 litres!

- Used to serve cognac and some cocktails (Brandy Blazer; White Russian)

Test tube – 60 ml:

- Stored in a rack
- Used for some cocktails
- Some venues will not use them as they encourage irresponsible consumption

(Continued)

Slide 38

Slide No

Trainer Notes

38.

Trainer continues identifying types of glassware used behind bars:

- Brandy balloon – a short-stemmed, large-bowled glass used to serve straight Cognac as well as Brandy Blazers, White Russian and other cocktails:
 - This style of glassware comes in a very wide selection of sizes from 200 ml to 4 litres. The really large ones are used for display purposes, not for the presentation or service of drinks
- Test tube – test tube-shaped glasses (holding approximately 60 ml) commonly housed in a wooden or metal rack. Can be used as the glass for service of drinks, or (to enhance showmanship) as the vessel from which ingredients are poured into a glass when making a cocktail:
 - Some venues do not use these glasses as they believe they encourage irresponsible consumption of alcohol.

Class Activity – Item Presentation

Trainer shows students examples of glasses identified on the slide.

Slide

Ensure equipment is clean, operational and ready for use

Liqueur glass – 28 ml – 30 ml:

- Used for liqueurs including liqueurs with cream floated on top

Shot glass – 45 ml – 60 ml:

- Used for serving single 'shots'
- Some venues will not use them as they encourage irresponsible consumption

Slide 39

Slide No	Trainer Notes
39.	Trainer continues identifying types of glassware used behind bars: • Liqueur glass – a small glass (28 – 30 ml) used to serve a straight liqueur or a liqueur with cream floated on top • Shot glass – small glass (45 – 60 ml) used for Shooter recipes and for serving single shots: ▪ Some venues do not use these glasses as they believe they encourage irresponsible consumption of alcohol. Class Activity – Item Presentation Trainer shows students examples of glasses identified on the slide.

Slide

Ensure equipment is clean, operational and ready for use

Choice of glass for a drink will be determined by:

- House policy
- Tradition

Slide 40

Slide No	Trainer Notes
40.	Trainer explains the choice of glass for drinks will be dictated by: • House policy – such as the designated glass as listed in a house recipe. • For example, the venue may use Manhattan glasses (or some other generic glass) for the majority of its cocktails • Tradition – certain cocktails are traditionally served in certain glasses: cocktail books and house recipes will specify what is required. Class Activity – Internet research Trainer facilitates trainees visiting the following sites to gain an understanding of bar glassware: • http://www.spiritdrinks.com/DrinksByGlass.asp • http://www.nationalbartenders.com/ResGlassware.asp • http://www.hospitalitywholesale.com.au/front-of-house/glassware/cocktail-glasses.html • http://www.hostdirect.com.au/listProduct/Glassware/Cocktail+Glasses/.

Slide

Ensure equipment is clean, operational and ready for use

Glasses must be washed after every use:

- By machine or by hand
- Machine water must be at 70°C
- Detergent must be used
- Glasses must be stored after washing to keep them clean

Slide 41

Slide No	Trainer Notes
41.	Trainer explains To achieve clean glasses, standard industry practice is to: • Wash glasses after every use by hand or in a glass washing machine, ensuring: ▪ Water used is a minimum temperature of 70°C ▪ Appropriate detergent is used and diluted according to manufacturer's instructions, as or if required • Store glasses correctly. Clean glasses must be stored so they do not become re-contaminated • All glasses must be inspected before use to check they are clean and suitable for use. Class Activity 1 – Demonstration: operation of glass washing machine Trainer demonstrates to trainees how to: • Turn glass washer on • Fill with detergent • Interpret lights and switches • Operate machine.

Class Activity 2 – Demonstration: hand washing of glasses

Trainer demonstrates to trainees how to:

- Hand wash glassware
- Use bottle brushes
- Use suction-cup glass brush.

Slide

Ensure equipment is clean, operational and ready for use

Checking of items may include:

- Visual inspection
- Counting items
- Verifying temperatures
- Inspections
- Tasting

Slide 42

Slide No	Trainer Notes
42.	Trainer explains making the necessary checks will include the following activities: • Visually inspecting items – to ensure they look attractive/appealing and to check they are 'in place': see also Section 1.3 • Counting items to ensure there are 'enough' for the expected level of trade • Verifying the temperature of: ▪ Refrigeration units – by reading their temperature ▪ Draught beer – by using a beer/food thermometer ▪ Testing items – to make sure they are working ▪ Inspecting areas and items – to ensure they are safe ▪ Tasting products – such as draught beer to ensure it has no 'off flavours'.

Slide

Ensure equipment is clean, operational and ready for use

Bar hygiene requirements:

- Fresh glass for every drink
- Handle glasses by base or stem
- Use fork or scoop (not fingers)

(Continued)

Slide 43

Slide No	Trainer Notes
43.	Trainer stresses beverages are classified as food and all the requirements applicable to safe <i>food</i> handling also apply to beverages highlighting the following actions are the basic requirements for people who work behind a bar: • Use a fresh glass for every drink – do not re-fill a previously used glass, as this may be a source of contamination to drinkers • Handle glasses by the base or stem to prevent/avoid contamination of the glass by your fingers – do not touch glasses around the rim/top of the glass • Use a fork or tongs when putting fruit or ice in a glass – do not use your fingers. Class Activity – Demonstration Trainer demonstrates how glasses should be handled by stem/base.

Slide

Ensure equipment is clean, operational and ready for use

- Do not re-use previously used or served items
- Store straws to protect them from contamination
- Check glasswasher:
 - Has detergent
 - Operating at correct temperature

(Continued)

Slide 44

Slide No	Trainer Notes
44.	Trainer continues providing safe food handling practices when working behind bar: • Do not re-use any fruit, straws, beverage, garnish left by a customer or which comes back from the tables – all waste must be thrown out • Ensure drinking straws are correctly stored – they should be stored so they are kept free from flies, dust and contamination. They must be able to be obtained one at a time without the others being touched so it is not acceptable to store straws in a drinking glass on the bar counter • Check glass washing machine has detergent, and is operating at the prescribed temperature (70°C).

Slide

Ensure equipment is clean, operational and ready for use

- Put de-naturing agent in drip trays
- Throw out 'waste beer'
- Do not smoke or spit in the bar
- Wash hands

(Continued)

Slide 45

Slide No	Trainer Notes
45.	Trainer continues providing safe food handling practices when working behind bar: • Put de-naturing agent in drip trays – there must be sufficient de-naturing agent to actually de-nature the waste beer and stop the premises pouring this waste beer back into the barrel • Do not keep/re-use 'waste' beer (waste beer includes beer left by patrons or beer derived from flushing out the beer lines prior to ending trade for the day, or prior to cleaning them) – this includes beer returned from tables in glasses and jugs • No smoking or spitting behind the bar • Wash hands at all times kitchen-based food handlers are required to wash their hands – such as after handling chemicals, after using toilet, after handling rubbish.

Slide

Ensure equipment is clean, operational and ready for use

- Wear clean clothes
- Ensure clean hands and fingernails
- Do not work if ill
- Never substitute or water-down beverages
- Make sure glasses are clean

Slide 46

Slide No	Trainer Notes
46.	Trainer continues providing safe food handling practices when working behind bar: • Ensure you have clean clothes, hands and fingernails • Stay away from work if ill or suffering from an infected cut: notify doctor of food handler status – bring a medical clearance stating fitness for work on return • Do not substitute brands or water down any beverages • Ensure all glassware and utensils are clean – plates and glasses must also be free of chips and cracks.

Slide

Store items in correct place at correct temperature

Storage of beverage:

- Some require refrigeration, some do not
- Use FIFO method of stock rotation (except for some wines):
 - Move old stock forward and place fresh stock behind
 - Use stock in correct sequence

Slide 47

Slide No	Trainer Notes
47.	Trainer states in the same way foodstuffs must be stored under the right conditions, so too must bar products be correctly stored explaining: • Some products are stored at room temperature, some are stored under refrigeration and some are stored in purpose-designed and built units • The FIFO stock rotation method is used • Warm stock is placed behind cold/refrigerated stock – meaning the customer will get a cold bottle/can rather than a warm one • Stock is used in its correct sequence – helping to avoid out-of-date stock • Some venues buy wines to lay down and so FIFO principles/practices will not apply to these.

Slide

Store items in correct place at correct temperature

Storage requirements:

- Packaged beer:
 - Under refrigeration
 - 1°C – 3°C
- Bulk beer:
 - Store in coolrooms or cellars
 - Remote pull systems: store at 5°C – 10°C
 - Direct pull systems: -1°C to +1°C

(Continued)

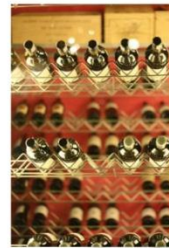

Slide 48

Slide No	Trainer Notes
48.	Trainer identifies storage requirements for various bar products: • Packaged beer in a cool storeroom or in a refrigerated coolroom – this is a requirement where the bar also doubles as a bottleshop and where bar staff are also required to sell products for take-away/consumption off the premises • Packaged beer for service in the bar should be kept in refrigerators at service temperature (1°C – 3°C) • Beer kegs in a coolroom/cellar – for remote pull systems the recommended temperature range is 5°C – 10°C and for direct pull systems the recommended temperature range is -1°C – +1°C.

Slide

Store items in correct place at correct temperature

- Red wine:
 - 'Room temperature' but because this varies so much some venues specify a temperature point (say, 15°C) or a range (such as 14°C to 18°C)
- White wine:
 - Under refrigeration – an exact temperature may be specified (say, 10°C) or a range (say, 2°C to 3°C)
- Generally wines are stored lying down

(Continued)

Slide 49

Slide No	Trainer Notes
49.	Trainer continues to identify storage requirements for various bar products: ● Debate exists as to the optimum storage temperature for red wine – some will nominate a precise temperature (say, 15°C), others will nominate a temperature range (say, 14°C – 18°C), while others will indicate different reds should be stored at different temperatures depending on where they were made, the grapes used, the vintage ● This said, generally speaking, reds are kept at 'room temperature' in a room out of direct sunlight: red wine bottles should be stored lying in racks, on their sides, to keep any corks wet – this stops them drying out and allowing the wine to oxidise ● Where the red wines are capped with a Stelvin seal (screw cap), it makes no difference whether the bottle is stored standing up or lying down because the seal is air-tight: tradition may require the venue/dining room stores Stelvin-capped wines lying down to fit/suit their red wine displays/racks ● White wine is best kept stored in a cool storeroom and/or placed in a refrigeration unit until required ● In practice this will usually mean they are stored at around 2°C – 3°C even though there may be very legitimate reasons for storing them at (slightly higher) temperatures, up to 10°C for some whites in order to enhance their flavour.

Class Activity 1 – Item presentation

Trainer shows trainees difference between:

- Bottle of wine sealed with a cork
- Bottle of wine with Stelvin seal.

Class Activity 2 – Internet research

Trainer facilitates student research of relevant websites such as:

- http://www.vanlines.com/storage_guide/wine_storage.html
- <http://ezinearticles.com/?Wine-Storage-Dos-And-Donts&id=1035984>.

Slide

Store items in correct place at correct temperature

- Dairy products (cream and milk) and fruit juices:
 - Under refrigeration
- Spirits and liqueurs:
 - At room temperature
- Fortified wines – at room temperature:
 - Dry sherry – under refrigeration

Slide 50

Slide No	Trainer Notes
50.	Trainer continues to identify storage requirements for various bar products: • Dairy items (milk, cream) should be kept under refrigeration (below 4°C) at all times • Juices can be stored in a cool storeroom and/or in a refrigerator (below 4°C) until service • Spirits and liqueurs are to be stored in a cool storeroom or on shelves in a bar: keep out of direct sunlight • Fortified wines can be stored at room temperature but some establishments require their <i>dry sherries</i> (only) to be stored under refrigeration.

Slide

Store items in correct place at correct temperature

Wine units:

- Allow service of premium wine by the glass
- Replace air with nitrogen (to control oxidation)
- Also control temperature and or humidity

Slide 51

Slide No	Trainer Notes
51.	Trainer explains the growth in the popularity of varietal table wines, the increase in customer knowledge about them and higher levels of customer expectations has seen the need for many bars to offer premium bottled wines for sale by the glass: • This concept allows customers to enjoy just one glass of a top quality wine without having to buy (or drink) the entire bottle • The ability of premises to offer such wines by the glass has resulted in the growth of a variety of wine dispensing units able to hold opened wine (at room temperature, or under more controlled conditions [temperature and humidity]), using nitrogen to replace air/oxygen in the bottle and avoid problems associated with oxidation.

Slide

Store items in correct place at correct temperature

Pest control must involve:

- 'Building them out'
- 'Chasing them out'
- 'Starving them out'

Slide 52

Slide No	Trainer Notes
52.	Trainer explains standard pest control measures should be applied in a bar to control pests highlighting the three standard practices are: • Build them out – this means: ▪ Blocking up holes where they can enter ▪ Fitting fly screens • Chase them out – this means: ▪ Using sprays to get rid of flies, mosquitoes and other flying and crawling pests ▪ Using traps to catch mice and rats • Starve them out – this means: ▪ Cleaning the bar area regularly and properly ▪ Not leaving food or water lying around to serve as a source of sustenance.

Slide

Prepare and stock garnishes and accompaniments

Garnishes and accompaniments are required to:

- Meet customer expectations
- Meet competition
- Create a point of difference

Slide 53

Slide No	Trainer Notes
53.	Trainer states some bars will have very little in the way of garnishes and decorations, and some will have quite a deal indicating they are required to: • To meet customer expectations • To meet competition • To differentiate the establishment from the opposition.

Slide

Prepare and stock garnishes and accompaniments

Workplaces may use:

- Coasters
- Decorations
- Edible garnishes
- Non-edible garnishes
- Drinking straws

Slide 54

Slide No	Trainer Notes
54.	Trainer gives identifies possible 'miscellaneous' items behind a bar to enhance the presentation of drinks: • Coasters – these can be placed on bar counters, tables, shelving, and served with individual drinks • Decorations – there is a wide range of animal figures, umbrellas and the traditional mermaid • Edible garnishes – usually lemon and orange slices, but can include almost anything where the bar serves an extensive variety of cocktails • Non-edible garnishes – includes hollowed-out pineapples (or coconut shells) for eye-catching cocktails • Drinking straws – these may be long or short, straight or flexible: they may also be individually wrapped or stored in a container to comply with health regulations.

Slide

Prepare and stock garnishes and accompaniments

After garnishes have been cut and prepared:

- Use left-over garnishes first
- Place items on small plate or saucer
- Cover
- Refrigerate

Slide 55

Slide No	Trainer Notes
55.	Trainer indicates after garnishes have been cut/prepared there is a need to: • Use left-over garnishes first – standard stock rotation should apply • Place on a plate/saucer – or in a designated container for ease of access • Cover – to protect against contamination • Refrigerate – to maintain quality/appearance. Class Activity – Guest Speaker Trainer arranges suitable person from local bar to attend and talk to students about: • Opening procedures used/applied in their venue • Reasons/need for preparing bar ready for service • The roles and responsibilities of people who work in bars • Garnishes and decorations used in the bar • Storing and re-stocking of bar needs (beverage and non-beverage items).

Slide

Prepare and stock garnishes and accompaniments

Preparing 'decorations' involves:

- Checking availability
- Re-stocking straws
- Making sure boxes of decorations are at hand
- Placing decorations into designated containers

Slide 56

Slide No	Trainer Notes
56.	Trainer indicates preparation requirements for decorations: • Checking they are available – in sufficient quantities to meet expected demand • Re-stocking supplies of drinking straws • Ensuring the boxes/containers they are supplied in are open and readily accessible • Placing individual decorations/items into other containers ready for use. Class Activity – Internet research Trainer facilitates access to website to view samples of drink decorations – such as: • http://barware.cart.net.au/cat/34725.html.

Slide

Summary – Element 1

When preparing bar for service:

- Adhere to enterprise standards and requirements
- Follow all nominated opening procedures
- Be aware of the upcoming trading session and the requirements it is likely to create
- Set up for the requirements of the individual session

(Continued)

Slide 57

Slide No	Trainer Notes
57.	Trainer provides a recap of the Element asking questions to check trainee understanding and responding to questions from trainees, as required.

Slide

Summary – Element 1

- Check and re-stock alcoholic and non-alcoholic beverages as required
- Prepare garnishes as required
- Check and replenish decorations as necessary
- Ensure all items, equipment and utensils are clean

(Continued)

Slide 58

Slide No	Trainer Notes
58.	Trainer provides a recap of the Element asking questions to check trainee understanding and responding to questions from trainees, as required.

Slide

Summary – Element 1

- Check operational readiness of all equipment
- Turn on refrigeration as required
- Check supply of cloths, towels and other linen
- Notify supervisor of problems or bar-related needs

(Continued)

Slide 59

Slide No	Trainer Notes
59.	Trainer provides a recap of the Element asking questions to check trainee understanding and responding to questions from trainees, as required.

Slide

Summary – Element 1

- Check and make ready glassware
- Apply all safe food handling protocols
- Store and rotate stock correctly

Slide 60

Slide No

Trainer Notes

60.

Trainer provides a recap of the Element asking questions to check trainee understanding and responding to questions from trainees, as required.

Slide

Take drink orders

Performance Criteria for this Element are :

- Receive customer orders
- Check product and or brand preferences with customer in a courteous manner
- Provide clear and helpful recommendations or information to customers on selection of drinks if required

Slide 61

Slide No	Trainer Notes
61.	Trainer identifies for trainees the Performance Criteria for this Element, as listed on the slide. Class Activity – Discussion Trainer asks trainees questions about the taking of drink orders by asking questions such as: • What do you think are the important points to consider/address when taking a customer drink order? • What does 'being courteous' to customers mean when taking their drink order? • Why is courtesy important when dealing with customers? • What recommendations or advice might you need to provide to customers when they are placing a drink order or considering what to drink?

Slide

Receive customer orders

When taking customer order:

- Greet customer
- Make sure you know what is being asked for
- Memorise the order
- Write order down – use 'house' abbreviations

(Continued)

Slide 62

Slide No	Trainer Notes
62.	Trainer provides direction about taking customer order: • Greet customer – as identified already • Ensure you know what is being ordered: ▪ Clarify where necessary ▪ Ask customer to repeat order if unsure • Memorise order – usual method when customers order at the bar • Write order down – commonly used if customers order at table: ▪ Use abbreviations to assist – OJ = Orange juice; DWW = glass of house, dry, white wine.

Slide

Receive customer orders

- Capture detail:
 - Brand
 - Style
 - Can, bottle or glass
 - Size

Slide 63

Slide No	Trainer Notes
63.	Trainer continues advising about taking drink orders: ● Capture details: ■ The brand they want ■ The style of beer required ■ Whether they want a can or glass ■ The size they want ● The moral of this story is where there is room for confusion, ambiguity or options/alternatives, make sure you clarify the situation, for example: ■ If they order “rum” do they want: – Dark, white or other? – Under- or over-proof? – Imported or domestic? ■ If they order a “glass of white wine, do they want: – Dry? – Sweet?

Slide

Receive customer orders

Unless customer specifies something different house standards will apply to mixed drink orders – this means unless guest says they want something else, all mixed drinks:

- Serve 30 ml nip
- Use long glass
- Serve with ice

Slide 64

Slide No	Trainer Notes
64.	Trainer explains house/industry standards apply to taking orders of mixed unless customer specifies something different. In practice this means unless the patron deliberately/intentionally says they want something different the following will apply to the preparation of mixed drinks: • All spirits will be full nip (30 ml) – not half nip, not double • All drinks will be served in long glass (approx 200 ml) • All drinks will be served with ice.

Slide

Check product and or brand preferences

- There are many different brands of liquor
- Bars cannot stock all brands
- Staff should check if customers have a brand preference
- Customers will often prefer to change type of drink if their preferred brand is unavailable

Slide 65

Slide No	Trainer Notes
65.	Trainer explains: • There are many different brands of products and while many customers have their personal favourites/preferences • It is impossible for all bars to stock all brands/options • Bar staff should check with customers if they have not identified a brand name when they place their order • Most customers will switch drink type if the bar does not stock their preferred brand.

Slide

Check product and or brand preferences

Bars will have:

- Several 'call' brands:
 - Brand names 'called' for (named) by customers
 - These must be served where available
 - Apologise if call brand is not available
 - Offer an alternative

Slide 66

Slide No	Trainer Notes
66.	Trainer introduces & differentiates between 'Call' and 'Pour' brands: Call brands • A 'call' brand is the brand specified by/called out by the customer. Instead of just asking for a 'Scotch', the customer would ask for a specific brand – perhaps a Dewars, Teacher's or Johnnie Walker Black Label • Most bars will stock a range of call brands, but no bar can stock them all. Staff need to become familiar with the ones they stock so they can accept an order straightaway, or inform the customer bar does not stock their preferred brand • Always be alert to the possibility to up-sell the customer to a more expensive brand • Where you do not have the call brand the customer asks for you should: ▪ Apologise for not having the brand asked for ▪ Offer an alternative. Class Activity – Demonstration Trainer demonstrates how to suggest an alternative when a 'call' brand is unavailable.

Slide

Check product and or brand preferences

‘Pour’ brand:

- Is the brand used when customer does not name or call for a specific brand
- May be a cheaper product
- It is important for staff to know what the ‘pour’ brands are for all the spirits and liqueurs served

Slide 67

Slide No	Trainer Notes
67.	Trainer explains concept of ‘pour’ brand: • A ‘pour’ brand (sometimes referred to as a ‘house’ brand) is the brand of spirit (or other drink such as liqueurs or wine) used/poured if a customer does not specify a brand name • If the customer simply asks for a ‘Scotch’, then they have not indicated a preference for one particular brand so it does not matter what brand you pour them just so long as it is Scotch • Usually pour brands are cheaper alternatives to recognised national brands but sometimes they are the better known, better quality, premium brands.

Slide

Provide recommendations or information on selection of drinks

When advising customers give information about:

- Price
- Special promotions
- Details of the product – taste, ingredients, colour, aroma

(Continued)

Slide 68

Slide No	Trainer Notes
----------	---------------

68.	Trainer explains when advising customers it is useful to give them information about: ● Price – this is the price for: ▪ Individual drinks ▪ Different size bottles/cans ● Special promotions – informing them of: ▪ Discounts applying at the time – such as ‘Happy Hour’ ▪ Low prices for new drinks or drinks/brands being promoted at the time ● Details of the product/beverage – which may include details about: ▪ Taste/flavour ▪ Ingredients it is made from ▪ Colour ▪ Aroma of the product ▪ Be prepared to let customers handle/have a look at the bottle/product. Class Activity – Excursion Trainer arranges excursion to local bar to: ● Observe opening (or closing) procedures ● Observe staff taking orders and making and serving drinks ● Observe staff preparing garnishes.
-----	---

Slide

Provide recommendations or information on selection of drinks

- Whether 'domestic' or 'imported'
- How it may be served
- Alcoholic strength
- Special points

Slide 69

Slide No	Trainer Notes
69.	Trainer continues explaining when advising customers it is useful to give them information about: • Whether it is imported or domestic: ▪ Including identification of the country of origin • How it may be served or consumed – give the customers some options about how they can experience the beverage: ▪ Can it be served over crushed ice? ▪ Can it be mixed with a fruit juice or aerated water? ▪ Can it be made into a cocktail? • The alcoholic strength: ▪ Never guess at this (for RSA reasons): read it from the label • Any special points about the product – for example: ▪ Mention any awards it may have won ▪ Tell customers about special things like the worm in certain tequilas ▪ Inform guests about any special advertising campaigns running for it ▪ Tell them of any competitions people are eligible to enter if they buy it ▪ Explain the value-for-money it represents.

Slide

Summary – Element 2

When taking drink orders:

- Greet the customer
- Be polite
- Be friendly
- Be helpful

(Continued)

Slide 70

Slide No

Trainer Notes

70.

Trainer provides a recap of the Element asking questions to check trainee understanding and responding to questions from trainees, as required.

Slide

Summary – Element 2

- Provide advice, suggestions and recommendations
- Repeat the order back to the customer
- Clarify ambiguous orders
- Note or memorise the order
- Check for customer preferences

Slide 71

Slide No	Trainer Notes
71.	Trainer provides a recap of the Element asking questions to check trainee understanding and responding to questions from trainees, as required.

Slide

Prepare and serve drinks

Performance Criteria for this Element are :

- Greet customers in a polite, friendly and helpful manner
- Prepare drinks in accordance with legal and enterprise standards using correct equipment, ingredients and measures
- Serve drinks promptly and courteously
- Handle and use industry standard glassware and use garnishes and accompaniments appropriately

(Continued)

Slide 72

Slide No	Trainer Notes
72.	Trainer identifies for trainees the Performance Criteria for this Element, as listed on the slide.

Slide

Prepare and serve drinks

- Minimise spillage and wastage and attend to accidents during service promptly and safely
- Seek assistance from appropriate people for situations which pose a threat to safety or security of colleagues, customers or property
- Seek feedback from customers in order to identify and implement improvements to beverage quality and take appropriate corrective action, if required
- Deal with unexpected situations in accordance with enterprise procedures

Slide 73

Slide No	Trainer Notes
73.	Trainer identifies for trainees the Performance Criteria for this Element, as listed on the slide. Class Activity – Discussion Trainer asks trainees questions regarding preparing and serving drinks asking questions such as: • What is an example of a greeting you might give to a customer in a bar? • Why is prompt service of drinks important in a bar? • What do you think are the industry standards for the correct handling of glassware? • Why is it necessary to minimise wastage & spillage when working in a bar? • What situations in a bar might pose a threat to safety and/or security in a bar?

Slide

Greet customers

Customer service is vital – when taking orders:

- Be polite
- Be friendly
- Be helpful

Slide 74

Slide No	Trainer Notes
74.	Trainer introduces this section by stating customer service is vital in the hospitality industry and when taking a drink order staff must always greet all customers in a manner that is: • Polite – this includes: ▪ Using customer name of known ▪ Saying 'Please' and 'Thank you' • Friendly – this includes: ▪ Smiling ▪ Showing interest in the individual • Helpful – this includes: ▪ Making suggestions/recommendations ▪ Answering questions. Class Activity – Demonstration and Practical Trainer demonstrates how to greet customer at bar when taking an order and provides opportunity for students to practice.

Slide

Greet customers

When serving in a bar:

- Everyone who approaches the bar must be acknowledged even if they cannot be served immediately
- Serve customers in their correct turn

Slide 75

Slide No	Trainer Notes
75.	Trainer advises students when serving in a bar: • If a customer cannot be served immediately, they should at least be acknowledged verbally and with a smile – “Sorry, I’ll be with you in a moment”. Never ignore customers who are waiting to be served: ▪ Even a non-verbal acknowledgement (a nod of the head, eye contact, a hand signal) is appropriate in some circumstances • Always try to serve customers in the order they were waiting – people become upset if served after a person who arrived at the bar after they did. If things are so busy you do not know who was next, the two options are: ▪ Ask customers who was next ▪ Work in a set pattern (left to right, or right to left) and serve the next person in-line in the direction you are working regardless of when they arrived – most customers will quickly understand what you are doing and accept it.

Slide

Prepare drinks

When working in bars you must comply with:

- Legal requirements
- Enterprise standards

Slide 76

Slide No	Trainer Notes
----------	---------------

76.

Trainer explains all people preparing drinks/working in bars must conform to:

- Legal requirements
- Enterprise standards.

Slide

Prepare drinks

Liquor licensing requirements:

- Age of those who can be **served** with liquor
- Age of people who can be **on the premises**
- Trading hours
- Whether liquor is for 'on' and or 'off' premises consumption

(Continued)

Slide 77

Slide No	Trainer Notes
77.	Trainer explains liquor licensing obligations relate to: • The age of people who can be served with liquor • The age of people who can be in licensed venues – even though they are not consuming alcohol • Hours liquor is allowed to be served • Whether liquor can be served for drinking on or off the premises.

Slide

Prepare drinks

- Physical location where liquor can be served – from or to
- Classes of people who may be served with alcohol
- Behaviour of people on the premises
- Requirement for RSA certification of staff

Slide 78

Slide No	Trainer Notes
78.	Trainer continues explaining liquor licensing regulations: • The areas from which liquor can be served/sold • Who may be served with alcohol – prohibitions may apply to certain classes of people • Behaviour of people on licensed premises • There may also be a requirement anyone serving alcohol must hold an RSA certificate.

Slide

Prepare drinks

Enterprise requirements and standards may relate to:

- Need to follow house recipes
- Serve sizes
- Glassware for drinks
- Garnishes

Slide 79

Slide No	Trainer Notes
79.	Trainer explains enterprise standards and requirements may relate to: • House recipes – to follow when mixing drinks (including brands of liquor to use) • Serve sizes – for spirits, fortified wine, table wine, glasses of beer • Use of glassware – for different types/styles of drinks and cocktails • Garnishes – to use for juices, mixed drinks and cocktails

Slide

Prepare drinks

Soft drink:

- Highball glass
- Fill 1/3 with ice
- Add soft drink
- Add straw and garnish

Slide 80

Slide No	Trainer Notes
80.	Trainer gives example of possible/model enterprise requirement for drink type as listed: • Soft drink: 'Aerated waters' • Glassware: Highball • Method: 1/3 full of ice; Add soft drink • Garnish/Additional: Straw; Add a slice of lemon to mineral water, soda water, water, lemonade, tonic and squash. Class Activity – Demonstration and Practical Trainer demonstrates making drink as described on slide and provides opportunity for students to practice.

Slide

Prepare drinks

Juice:

- Highball glass
- Fill 1/3 with ice
- Add juice
- Garnish with straw and slice

Slide 81

Slide No	Trainer Notes
81.	Trainer gives example of possible/model enterprise requirement for drink type as listed: • Juice • Glassware: Highball • Method: fill 1/3 with ice: Add juice • Garnish/Additional: Straw; Add slice of lemon or orange according to juice type. Class Activity – Demonstration and Practical Trainer demonstrates making drink as described on slide and provides opportunity for students to practice.

Slide

Prepare drinks

Straight spirit; on the rocks; on ice:

- Old Fashioned glass
- Fill 1/3 with ice
- Add 30 ml spirits
- No straw or garnish

Slide 82

Slide No	Trainer Notes
82.	Trainer gives example of possible/model enterprise requirement for drink type as listed: • Spirit – ‘on the rocks’ or ‘on ice’ • Glassware: Old Fashioned • Method: 1/3 full of ice; Measure of spirit (30 ml) • Garnish/Additional: None. Class Activity – Demonstration and Practical Trainer demonstrates making drink as described on slide and provides opportunity for students to practice.

Slide

Prepare drinks

Spirit with mixer:

- Old Fashioned – short glass
- Highball – long glass
- Add 1/3 ice + 30 ml spirits + mixer
- Straw – optional
- Slice

Slide 83

Slide No	Trainer Notes
83.	Trainer gives example of possible/model enterprise requirement for drink type as listed: • Spirit with mixer: ▪ Glassware: Old Fashioned (for short glass); Highball (for long glass) ▪ Method: Fill glass 1/3 with ice; Add 30 ml spirits; Add mixer ▪ Garnish/Additional: Straw – optional; Lemon garnish – in clear spirits: vodka, gin, tequila; Orange garnish in all orange-based drinks. Class Activity – Demonstration and Practical Trainer demonstrates making drink as described on slide and provides opportunity for students to practice.

Slide

Prepare drinks

Liqueur:

- Liqueur glass
- Fill with liqueur
- No garnish (usually)

Slide 84

Slide No	Trainer Notes
84.	Trainer gives example of possible/model enterprise requirement for drink type as listed: • Liqueur – neat • Glassware: Liqueur glass • Method: Measure of liqueur • Garnish/Additional: Not normally. Class Activity – Demonstration and Practical Trainer demonstrates making drink as described on slide and provides opportunity for students to practice.

Slide

Prepare drinks

Still table wine – white or red:

- House wine glass:
 - Larger glasses – for red
 - Smaller glasses – for white
- Fill from bottle
- No garnish

Slide 85

Slide No	Trainer Notes
85.	Trainer gives example of possible/model enterprise requirement for drink type as listed: ● Table wine – red or white: ▪ Glassware: Wine glass: larger ones may be used for red wines, smaller size for white wine ▪ Method: Dispense wine from bottle or cask into glass to house level (may be approx 2/3 full) ▪ Garnish/Additional: None. Class Activity – Demonstration and Practical Trainer demonstrates filling wine glass as described on slide and provides opportunity for students to practice.

Slide

Prepare drinks

Bottled beer:

- Pilsener; Pot or Handle
- Open bottle
- Pour into glass OR give glass and bottle to customer so they can pour their own
- Normally no garnish (Corona has lemon or lime wedge)

Slide 86

Slide No	Trainer Notes
86.	Trainer gives example of possible/model enterprise requirement for drink type as listed: ● Bottled beer: ▪ Glassware: Pilsener; Pot/Handle ▪ Method: Open bottle; May need to pour beer before serving (tilt the glass to avoid creating a large head) or house rule may be to allow customer to pour their own ▪ Garnish/Additional: Normally none (lemon or lime wedge with Corona). Class Activity – Demonstration and Practical Trainer demonstrates making drink as described on slide and provides opportunity for students to practice.

Slide

Prepare drinks

Pouring draught beer:

- Minimise waste
- Pour a beer with approx. 2.5 cm of head
- Check it is cold enough
- Check visual appearance

Slide 87

Slide No	Trainer Notes
87.	Trainer advises about pouring draught beer stating it is a necessary skill for staff where beer is 'on tap' and attention must be paid to: • Minimising waste – beer is expensive and employers do not like it being wasted • Pulling a beer with a good head – beer should have about 2.5 cm of head • Checking it is cold enough – when chilled properly the beer should put a frost on the outside of the glass (2°C to 3°C) • Checking quality – the beer 'in glass' should look clear (not cloudy; nothing floating in it) and be slightly effervescent.

Slide

Prepare drinks

Techniques for pulling a draught beer:

- Hold glass near tap on an angle
- Turn tap 'on' (and 'off') quickly
- Fill glass adjusting position of glass to obtain required head

Slide 88

Slide No

Trainer Notes

88.

Trainer describes techniques for pulling draught beer:

- Keep the glass away from the tap, hold the glass on an angle to break the fall of the beer
- Never hold the glass straight up and down, or the beer will have too much head: do not knock the glass against the tap or it may crack/break the glass
- Turn the beer tap on quickly and ensure the glass is angled so beer hits the side of the glass about halfway down the main trunk
- Never turn the tap on slowly, or the beer will 'squirt' out from the beer tap and result in loads of froth and wastage
- As the glass starts to fill and the beer reaches three quarters of the way up the side of the glass, lower the glass away from the tap and straighten it
- Keep pouring beer until the glass is full and has the appropriate amount of head: you may have to 'drop' the glass to get the 'head' right.

Slide

Prepare drinks

When pouring draught beer:

- Do not over-pour
- Check quality as you pour
- Use clean glass every time

(Continued)

Slide 89

Slide No	Trainer Notes
89.	Trainer continues giving tips about pouring draught beer: • Do not over-pour beer – if you fill the glass too much this will: ▪ Give the beer no head ▪ Waste beer ▪ Produce a very unattractive looking product • Check the quality of the product: ▪ If beer is pouring heady, cloudy, slow or warm, alert the appropriate person (cellar person, supervisor) immediately • Always use clean glasses: ▪ It is standard practice to use as fresh glass for every beer – you should not re-fill a previously used glass ▪ Grease from people's lips (who are eating a meal) and lipstick can flatten beer ▪ Ensure glasses have lipstick removed – hand washing can be necessary to achieve this ▪ Make sure glasses are not cracked or chipped before using them: a visual inspection is required. Class Activity – Demonstration and Practical Trainer demonstrates pulling draught beer and provides opportunity for students to practice.

Slide

Prepare drinks

- Do not touch glass against tap
- Hold glass near base
- Do not flow beer over side of glass

Slide 90

Slide No	Trainer Notes
90.	Trainer continues giving tips about pouring draught beer: • Never touch/knock the glass on the tap: ▪ This is a common way in which expensive glasses can be chipped, cracked or broken • Hold the glass near the base: ▪ Glasses must not be held around the rim – it looks bad to the customer and raises cross-contamination/hygiene issues ▪ Hold the glass around its bottom half/part ▪ Never put your fingers <i>in</i> the glass • Do not let beer flow over the side of the glass: ▪ This is not only wasteful but it really annoys customers when they pick up their beer and it drips down their shirt/tie. Class Activity – Demonstration and Practical Trainer demonstrates pulling draught beer and provides opportunity for students to practice.

Slide

Prepare drinks

Need to know the non-alcoholic drinks served:

- Juices
- Waters
- Aerated waters
- Coffee
- Tea

Slide 91

Slide No	Trainer Notes
91.	Trainer explains there is a need to know of non-alcoholic drinks served by the bar including: • Juices • Waters • Aerated waters • Frappes • Coffee • Tea.

Slide

Prepare drinks

Juices can include:

- Fresh
- Pre-prepared
- Traditional – tomato, apple, pineapple, orange
- Local variations

Slide 92

Slide No

Trainer Notes

92.

Trainer identifies juices:

- Fresh – using local fruit:
 - Single juices
 - Combination
- Pre-prepared – bought-in from suppliers
- Examples include:
 - Orange
 - Pineapple
 - Tomato
 - Apple
 - Mango.

Slide

Prepare drinks

Waters can include:

- Bottled water
- Still water
- Sparkling water
- Flavoured waters
- Tap water

Slide 93

Slide No	Trainer Notes
93.	Trainer introduces waters: • Bottled water – proprietary brands; bottles of various sizes; glass or plastic • Still water – mineral water without bubbles; non-sparkling • Sparkling water – effervescent water (with carbon dioxide added) • Flavoured water – mineral water with added fruit juice (usually around 5% fruit juice) • Tap water – local water served with ice and slice of lemon.

Slide

Prepare drinks

Aerated waters:

- Also known as 'carbonated waters' or 'soft drink'
- May be bottled or post mix
- Flavours include cola, lemon squash, dry ginger, soda water, tonic water

Slide 94

Slide No	Trainer Notes
94.	Trainer recaps aerated waters – also known as 'carbonated water' and 'soft drink': • Can be served from a bottle or can or via post mix • Flavours include: • Cola • Lemon squash • Dry ginger • Lemonade • Soda water • Tonic water.

Slide

Prepare drinks

Mocktails:

- Non-alcoholic cocktails
- Look like cocktails (same type of glasses; garnished) but contain no liquor
- May be offered on a separate 'Mocktail' drink list..

Slide 95

Slide No	Trainer Notes
95.	Trainer introduces 'Mocktails': • Are non-alcoholic cocktails – mock cocktails • Look like cocktails – by virtue of glass used and garnishes and decorations • Can be offered via 'Mocktail' drink list. Class Activity – Demonstration and Practical Trainer demonstrates how to mix a range of Mocktails and provides opportunity for students to practice.

Slide

Prepare drinks

Frappes:

- Made by blending ice with ingredients (such as coffee, fruit, milk, flavourings and fruit juice)
- Also includes 'shaved ice' with ingredients poured over
- Popular for those wanting a healthy drink

Slide 96

Slide No	Trainer Notes
96.	Trainer introduces 'frappes': • Frappes are cold drinks made by blending ice together with other ingredients such as coffee, fruit, milk, flavourings, yoghurt and/or fruit juice • They can include shaved ice with ingredients poured over it • They are very popular where customers are health conscious and/or where there is a strong demand for non-alcoholic beverages to be served. Class Activity – Demonstration and Practical Trainer demonstrates how to mix a range of frappes and provides opportunity for students to practice.

Slide

Prepare drinks

Coffee – may be made using:

- Dripolator
- Plunger
- Espresso machine
- Percolator

Slide 97

Slide No	Trainer Notes
97.	Trainer introduces coffees: • Coffee may be made using : ▪ Dripolator – ‘Cona’-style filter coffee: frequently used in self-serve situations ▪ Plunger – available in different sizes and may be placed on the customer’s table for self-serve ▪ Espresso machine – very popular for service of cappuccinos etc • Percolator – may be used at large functions: can hold over 50 cups • All coffee machines should be wiped down externally during a shift and dismantled and cleaned fully at the end of each shift. Class Activity – demonstration Trainer demonstrates how to make coffee using a variety of machines/equipment.

Slide

Prepare drinks

Cappuccino:

- Fill cup 1/3 with espresso coffee
- Fill remaining space 80% with hot milk
- Add frothed milk
- Sprinkle with chocolate powder

Slide 98

Slide No	Trainer Notes
98.	Trainer provides coffee recipes highlighting need to follow House Recipes where they differ from what is presented here: • Cappuccino – normal cup • 1/3 espresso coffee • Fill cup with 80% hot milk • Top with milk froth • Sprinkle with chocolate powder. Class Activity 1 – View Websites Trainer provides internet access to students for them to view relevant sites such as: • http://coffeetea.about.com/od/expressorecipes/Espresso_Recipes.htm • http://www.espressoplanet.com/espresso_recipe.htm. Class Activity 2 – Demonstration and Practical Trainer demonstrates how to make coffee listed on slide and provides opportunity for students to practice.

Slide

Prepare drinks

Vienna Coffee:

- Same as a long black
- Top with whipped cream
- Sprinkle with chocolate powder

Slide 99

Slide No	Trainer Notes
99.	Trainer continues with coffee recipes: • Vienna Coffee – tall glass (handled): ▪ Same as a long black ▪ Top with whipped cream – may be a commercial product from a pressure can ▪ Sprinkle with chocolate powder. Class Activity – Demonstration and Practical Trainer demonstrates how to make coffee listed on slide and provides opportunity for students to practice.

Slide

Prepare drinks

Iced Coffee:

- 1/3 cold, strong espresso
- Add ice cream (vanilla)
- Fill with cold milk
- Top with whipped cream'
- Sprinkle with chocolate powder

Slide 100

Slide No

Trainer Notes

100.

Trainer continues with coffee recipes:

- Iced Coffee – tall glass with a spoon
- 1/3 cold espresso
- Add ice cream
- Fill with cold milk
- Top with whipped cream
- Sprinkle with chocolate powder.

Class Activity – Demonstration and Practical

Trainer demonstrates how to make coffee listed on slide and provides opportunity for students to practice.

Slide

Prepare drinks

Tea may be served:

- In a teapot – different sizes depending on number of guests
- Using a tea bag – always provide a ‘rest’ for the used tea bag:
 - Milk served separately for white tea
 - Lemon slice should be served with black tea

Slide 101

Slide No	Trainer Notes
101.	Trainer introduces teas stating service of tea can be: • In a teapot • In a cup using a tea bag • Tea should be served with milk (white tea) or slices of lemon (black tea) on the side • Never forget to provide the customer with a plate for the used tea bag, where appropriate. Class Activity 1 – View Websites Trainer provides internet access to students for them to view relevant sites such as: • http://coffeetea.about.com/od/tearecipes/Tea_Recipes.htm • http://www.tbythesea.com/tearecipes.html. Class Activity 2 – Demonstration and Practical Trainer demonstrates how to make and serve black and white tea as listed on slide and provides opportunity for students to practice.

Slide

Prepare drinks

Types of teas include:

- English Breakfast, Irish Breakfast and Ceylon Breakfast
- Darjeeling
- Earl Grey
- Jasmine
- Chamomile
- Peppermint

Slide 102

Slide No

Trainer Notes

102.

Trainer identifies teas available:

- While the service of coffee has started to become popular in some bars, the service of tea hasn't reached the same heights. There are many types of tea available with some featuring effective eye-catching displays for presentation on the bar/behind the bar to promote the sale of teas:
 - English breakfast
 - Irish breakfast
 - Ceylon breakfast
 - Darjeeling
 - Earl Grey
 - Jasmine
 - Chamomile
 - Peppermint.

Class Activity – Demonstration and Tasting

Trainer makes a variety of teas (as listed on slide) and gives students an opportunity to taste each one.

Slide

Prepare drinks

Iced Tea:

- Make ¼ cup very strong black tea
- Place tea in cocktail shaker with ice
- Shake and strain into glass of fresh ice
- Garnish with lemon slice

Slide 103

Slide No	Trainer Notes
103.	Trainer gives tea recipe: • Iced tea – highball glass • Make quarter of a cup of strong tea • Place tea in shaker full of ice • Shake and strain into a glass full of fresh ice • Garnish with a slice of lemon. Class Activity – Demonstration and Practical Trainer demonstrates how to make Iced Tea and provides opportunity for students to practice.

Slide

Serve drinks

Drinks must be served quickly and courteously once order has been taken:

- Thank customer for their order
- Work quickly
- Interpret the order before making the drink so you know what is required

(Continued)

Slide 104

Slide No	Trainer Notes
104.	Trainer explains once drink order has been taken it is important to prepare and serve all beverages in a prompt and courteous manner according to known or stated customer preferences indicating the basics elements of providing prompt and courteous service for drinks are: • Thank the customer for placing the order – always thank the customer for every order they place • Fill the order as quickly as possible – this may involve: ▪ Making the drink straight-away ▪ Preparing the drink 'in turn' • Interpret the order properly – make sure you: ▪ Comply with special instructions made by the customer, such as 'extra ice', 'long glass' or 'two slices of lemon' ▪ Use the ingredients requested by the customer – where possible ▪ Apply house 'standard recipes' for the preparation of mixed drinks and cocktails – where customer wants to depart from these standard practices there may be a need to charge extra for different ingredients or extra ingredients.

Slide

Serve drinks

- Be accurate
- Work cleanly
- Use the correct glass
- Follow correct sequence:
 - Obtain glass and add ice
 - Add spirit and add mixer
 - Add garnish and serve

(Continued)

Slide 105

Slide No	Trainer Notes
105.	Trainer continues providing instruction on making/serving drinks: ● Never sacrifice accuracy and cleanliness of drink preparation for speed – customers will always prefer to have a properly made/served drink rather than one which gives them less than what they paid for, and/or is served in a sloppy fashion ● Use the right glass for the right drink – the basis for this is: ■ House recipes ■ Tradition ■ Never over-fill glasses ● Follow required mixing/preparation methods – for example: ■ For mixed drinks the accepted sequence is: – Get the glass – check it is clean and not cracked – Add the ice to the glass – Add the spirit – Add the aerated water/mixer – Add the garnish and/or decoration – Serve – may be served with a coaster ■ Follow 'house methods/protocols' – where they differ from the above.

Slide

Serve drinks

- Serve as soon as drink is made
- Identify drink when it is served
- Thank customer
- Offer an appropriate sentiment

Slide 106

Slide No	Trainer Notes
106.	Trainer continues providing instruction on making/serving drinks: • Serve the drink as soon as possible – this may require: ▪ Physically handing/serving the drink to the customer ▪ Notifying wait staff the drink is ready to be served: – Prompt service of the drink once it has been made is important to: – Optimise enjoyment of the drink – most drinks should be served cold and they will quickly warm-up and become less pleasing if allowed to stand on the bar for even short periods of time – Avoid/reduce customer waiting time – patrons do not like being kept waiting for the drinks • Name the drink as you present it to them – ‘Your brandy and dry, Sir, with extra ice’ • Thank the customer – when you give them their drink • Offer a pleasant sentiment – ‘Enjoy!’ Class Activity – Demonstration and Practical Trainer demonstrates how to mix and serve a range of standard drinks and provides opportunity for students to practice.

Slide

Handle glassware and use garnishes and accompaniments

Glasses may be used as follows:

Glass	Drink	Glass	Drink
Highball Pilsener	Soft drink Juice	Old Fashioned	Neat spirits Spirits 'on ice' Short mixed drink
Liqueur glass	Liqueurs	Old Fashioned (Short) Highball (Long)	Spirit or liqueur with mixer

Slide 107

Slide No Trainer Notes

107.

Trainer advises industry and/or venue standards must be applied when handling and using glassware and garnishes/accompaniments indicating the following glasses may be used as identified on slide.

Class Activity – Exercise

Trainer provides a range of glassware (as identified on slide) and asks students to:

- Choose the correct glass when the name of a glass is given them
- Identify what the glass may be used for.

Slide

Handle glassware and use garnishes and accompaniments

Glasses may be used as follows:

Glass	Drink	Glass	Drink
Stemmed wine glass	Still table wine Larger glasses used for red wine; smaller glasses for white wine	Pot Pilsener Handle Mug	Beer
Champagne flute Champagne saucer	Champagne and other sparkling wines	Port glass	Fortified wine

Slide 108

Slide No

Trainer Notes

108.

Trainer advises industry and/or venue standards must be applied when handling and using glassware and garnishes/accompaniments indicating the following glasses may be used as identified on slide.

Class Activity – Exercise

Trainer provides a range of glassware (as identified on slide) and asks students to:

- Choose the correct glass when the name of a glass is given them
- Identify what the glass may be used for.

Slide

Handle glassware and use garnishes and accompaniments

When making garnishes:

- Use clean utensils and cutting surfaces
- Prepare garnishes fresh for each service
- Store under refrigeration
- Never re-use garnishes
- Do not eat garnishes or ingredients

Slide 109

Slide No	Trainer Notes
109.	Trainer presents points to note when making/preparing garnishes: • Always use a clean surface when cutting garnishes • Always have plenty of fresh garnishes prepared before service • Always store garnishes under refrigeration – at the end of trading, all garnish containers should be sealed with a lid or a good quality clear wrap • Never re-use garnishes that come back from the table/customer – they may be contaminated • Do not eat the garnishes – or the raw materials from which they are made.

Slide

Handle glassware and use garnishes and accompaniments

Industry requirements when handling glasses:

- Check before use:
 - Clean; no chips or cracks
- Same glass for same type of drink
- Handle by base or stem
- Take care

Slide 110

Slide No**Trainer Notes**

110.

Trainer explains following standard industry requirements applying to the handling of glasses:

- Check all glasses before using them or offering them – no cracks, no chips: they must be clean
- Use the same type of glass for the same type of drink – to give consistency
- Handle glasses by stem or base – not by top/rim
- Be careful – glasses are fragile and easily broken.

Slide

Handle glassware and use garnishes and accompaniments

Drink garnishes:

- Citrus slice and wheel
- Maraschino cherries
- Olives
- Wedges – pineapple and citrus

(Continued)

Slide 111

Slide No	Trainer Notes
111.	Trainer presents drink garnishes: • Citrus slices – half and full • Maraschino cherries – speared on to either one or two toothpicks • Olives – speared on a toothpick, traditional with a dry martini • Pineapple, and citrus wedges – pineapple done like this is also called 'pineapple spears'. Pineapples may also be hollowed out and used as the 'glass'/service item for some cocktails. Class Activity – Demonstration and Practical Trainer demonstrates preparation and/or use of garnishes as identified on slide and provides opportunity for students to practice making and using same.

Slide

Handle glassware and use garnishes and accompaniments

- Citrus twists
- Celery rib
- Sprigs of fresh herbs
- Kiwi fruit
- Chocolate powder

(Continued)

Slide 112

Slide No

Trainer Notes

112.

Trainer continues presenting drink garnishes:

- Citrus twists – the twisted zest of citrus fruits
- Celery rib – used traditionally for a Bloody Mary
- Sprigs of fresh herbs – rosemary, thyme and mint are common
- Kiwi fruit – half or full slices
- Chocolate powder – sprinkled on top of the finished drink.

Class Activity – Demonstration and Practical

Trainer demonstrates preparation and/or use of garnishes as identified on slide and provides opportunity for students to practice making and using same.

Slide

Handle glassware and use garnishes and accompaniments

- Whole strawberries
- Nutmeg
- Fruit knots or twists
- Lemon and orange wheels
- Slice of fruit and a cherry

(Continued)

Slide 113

Slide No	Trainer Notes
113.	Trainer continues presenting drink garnishes: • Whole strawberries – or sliced strawberries (sometimes chocolate-dipped) • Nutmeg – sprinkled as a powder, or used as a stick • Fruit knots – lemon, orange or lime • Fruit wheels – lemon and orange • Slice and cherry – a slice of, for example, orange with a cherry attached by a toothpick. The slice is slightly bent to give the garnish a 'sail' effect. Class Activity – Demonstration and Practical Trainer demonstrates preparation and/or use of garnishes as identified on slide and provides opportunity for students to practice making and using same.

Slide

Handle glassware and use garnishes and accompaniments

- Coffee beans
- Liquorice sticks
- Jelly beans and jelly babies
- Edible flowers:
 - Floating heads
 - Frozen into ice blocks

Slide 114

Slide No

Trainer Notes

114.

Trainer continues presenting drink garnishes:

- A range of other products can be added to different, more modern cocktails – coffee beans, liquorice sticks, jelly beans, jelly babies
- Edible flowers:
 - Flowers are sometimes used as garnishes for cocktails – both as heads floating in drinks, or frozen in an ice block which is placed into the drink – but some flowers are poisonous so some venues avoid them
 - Edible flowers include:
 - Nasturtiums
 - Marigold
 - Borage
 - Ranunculus
 - Primrose
 - Rose
 - Crystallised poppies.

Class Activity – Demonstration and Practical

Trainer demonstrates preparation and/or use of garnishes as identified on slide and provides opportunity for students to practice making and using same.

Slide

Handle glassware and use garnishes and accompaniments

Drink decorations:

- Commercially prepared – they cost money
- Used with cocktails and other drinks
- Use only what is indicated by House Recipe
- Never over-decorate

Slide 115

Slide No	Trainer Notes
115.	Trainer introduces drink decorations stating: • These are commercially prepared decorations that cost money • They are most commonly used with cocktails but may be used on other long drinks as well • Make sure you use only the amount of decorations as specified in house recipes – no more, no less • Never over-decorate – the finished product should look like a drink or cocktail and not a fruit salad.

Slide

Handle glassware and use garnishes and accompaniments

Drink decorations:

- Paper parasols
- Plastic animals, pick-axes and mermaids
- Doilies
- Swizzle sticks
- Sparklers
- Straws

Slide 116

Slide No

Trainer Notes

116.

Trainer gives examples of drink decorations:

- Paper parasols – stuck into a wedge of fruit
- Plastic animals – hung off the side of the glass: monkey, giraffe, dolphin, elephant
- Mermaids – also hung from side of glass
- Pickaxes – can be used to hang cherries onto side of glass
- Doilies – sometimes placed under drinks
- Swizzle sticks – placed into a cocktail for the customer to stir the drink if they choose
- Sparklers – to add a fiery dimension to cocktails and popular for use at celebrations
- Straws – placed into the cocktail and should be the right size: flexible long straws are commonly used in tall cocktails, and other alternatives include normal full-length straws, and half-straws.

Class Activity – Presentation

Trainer obtains and presents a range of drink decorations to students, asking them:

- What each is called
- Drinks they may be used for
- How they might be used.

Slide

Minimise spillage and wastage and attend to accidents

Spillage and wastage caused by:

- Rushing
- Lack of training
- Failure to store products properly after service

Slide 117

Slide No	Trainer Notes
117.	Trainer highlights wastage and spillage costs the venue money and usually slows down or otherwise adversely impacts on service explaining causes of waste and spillage are: • Rushing – causes knocking bottles and glasses over, overfilling glasses, knocking bottles against each other and breaking them, and knocking glasses against taps and cracking them • Lack of training – can cause waste, especially with beer pulling, mixing drinks and cocktails, carrying trays, pouring bottled product (especially wine and beer) • Failure to store opened products properly after service has finished can also cause waste – tops must be put on open bottles to preserve the contents (if this is house policy), and they must be refrigerated where appropriate.

Slide

Minimise spillage and wastage and attend to accidents

House policies relating to spillage and waste:

- Use of an 'Ullage Book'
- 'Drink replacement' policy for drinks which are knocked over
- No drinking while on duty

Slide 118

Slide No	Trainer Notes
118.	Trainer explains possible house policies regarding spillage and waste: • Workplace may require you to record waste in a book (such as an Ullages Book) – this may include recording waste beer from beer drip trays, a bottle dropped and smashed, and drinks knocked over: ▪ This book <i>may</i> also be used to record 'promotional' drinks – that is, drinks given away by the establishment with the approval of management for promotional purposes or to replace drinks accidentally knocked over, or drinks given away in order to compensate for poor/bad service. These are known as 'Comp' drinks • Venue will also have a policy on replacing drinks which customers knock over. Many establishments will replace soft drinks, house wines and beers free of charge, but charge for replacement spirits and premium wines. Some places will replace everything free-of-charge, some will charge for everything: ▪ Things become tricky when a customer knocks over a drink you believe was nearly empty, and then demands you replace it – free of charge: check with your supervisor to see what the house does in these circumstances. Often the decision made will depend on the customer in question – questions address issues such as: – Are they a regular? – Do they spend significant money with you? – Are they part of a larger group spending well and not causing any trouble? – Is it house policy?

Slide

Minimise spillage and wastage and attend to accidents

Dealing with broken glass:

- Do not pick up with hands
- Use dustpan and brush
- Place into box or multiple sheets of paper
- Put in bin

Slide 119

Slide No	Trainer Notes
119.	Trainer explains broken glass is a regular occurrence in bars and proper procedures must be followed when cleaning it up: • Never pick up glass with bare hands – to avoid risk of getting cut • Sweep the broken glass into a cardboard box – or sheets of paper • Seal the box – there are always boxes lying around somewhere behind the bar • Dispose of it into bin. Class Activity – Demonstration and Practical Trainer demonstrates how to safely dispose of broken glass and provides opportunity for students to practice.

Slide

Seek assistance to threat situations

Duty of Care obligations:

- Mean the venue must look after safety of people on the premises
- Mean the bar must protect people against 'foreseeable harm'
- May mean the venue can be sued for 'negligence' if people are injured in the bar

Slide 120

Slide No	Trainer Notes
120.	Trainer explains all venues are under an obligation (Duty of Care) to care for the safety and welfare of people when they are on the premises. Trainer indicates: • This obligation applies to anyone who is on the premises – such as: ▪ Customers, guests and patrons of any type ▪ Staff ▪ Members of the public ▪ Delivery drivers ▪ Service men and technicians who are installing or repairing equipment/systems • Duty of Care obligations means the premises must take necessary action to protect people from 'foreseeable harm' • If the business fails to do this they can be held liable for 'negligence' and sued by those who may have been injured (or lost property) as a result of that negligence. This means the venue is under an obligation to take action when it identifies a situation which poses a threat.

Slide

Seek assistance to threat situations

A threat may be:

- Anything exposing the venue top legal action
- Anything placing customers or their property at risk

Slide 121

Slide No	Trainer Notes
121.	Trainer defines a threat: • In the context of a bar, a 'threat' may be seen as: ▪ Anything which exposes the venue to legal action – that is: – Being charged by police or the authorities – Being sued by customers ▪ Anything which places the safety of individuals in danger and/or jeopardises the security of physical property – including stock, cash and personal belongings.

Slide

Seek assistance to threat situations

Exposure to legal action may include:

- Under-age people
- People who are intoxicated
- Violence
- Illegal gambling
- Disorderly conduct

(Continued)

Slide 122

Slide No	Trainer Notes
122.	Trainer provides examples of situations which may expose bar to legal action: • People on the premises who are under legal drinking age • Intoxicated/drunk patrons in the bar • Violent behaviour by patrons to other customers or staff • Gambling in a way prohibited by law for the venue • Disorderly conduct – annoying others; making too much noise; not behaving in an acceptable way.

Slide

Seek assistance to threat situations

- A person attempting to buy liquor for someone who has been refused service
- Someone who has been banned or excluded
- Person engaging in unacceptable behaviour
- Person trying to buy liquor outside licensing hours
- People of class or type not allowed by licence

Slide 123

Slide No	Trainer Notes
123.	Trainer continues providing examples of situations which may expose bar to legal action: • A customer trying to obtain liquor for someone who has been refused service • Presence of a person who is the subject of an exclusion order • Behaviour which is in any way quarrelsome/argumentative • People trying to obtain liquor outside licensed hours • Presence of people on the premises who are unable to be served with alcohol given the type of licence in operation • People identified by legislation as not being allowed on licensed premises – this will vary between countries and may include known prostitutes, known criminals and/or people who associate with known prostitutes or criminals.

Slide

Seek assistance to threat situations

Situations threatening safety or security:

- Drunk, violent or quarrelsome customers
- Patrons who are intimidating or threatening others
- Anyone who is fighting
- Extreme weather

(Continued)

Slide 124

Slide No	Trainer Notes
124.	Trainer indicates situations which may impact on safety/security of patrons and staff: • Customers who are drunk, violent and quarrelsome • Patrons who are threatening or intimidating others • People who are fighting • Extreme weather events – rain, storms, lightning, high winds.

Slide

Seek assistance to threat situations

- Some equipment failures or breakdowns
- Gate crashers
- Power failure
- Emergency situations

Slide 125

Slide No	Trainer Notes
125.	Trainer continues to indicate situations which may impact on safety/security of patrons and staff: • Equipment breakdowns – which pose a hazards • Gate crashers – people who gate crash a private party or function • Power failures • Emergency situations – such as fire, gas leaks, any situation creating a need for evacuation.

Slide

Seek assistance to threat situations

Responding to threats:

- Follow workplace training, SOPs and drills
- Notify others of the situation promptly
- Provide details of the situation
- Take action:
 - If trained or authorised
 - Without putting yourself in danger

Safety of people takes priority over security of property.

Slide 126

Slide No	Trainer Notes
126.	Trainer instructs keys for responding to threats: ● Follow workplace policies and procedures – many venues have Emergency Management Plans in place to deal with these situations and conduct drills to assist you become familiar with what you need to do when faced with such a situation: ■ Make sure you determine what is required and participate in the training/drills ● Notify others promptly – as soon as you become aware of a situation you must report it: ■ It is a fact of life situations never resolve themselves so you have to notify the appropriate person (supervisor, bar manager, duty manager, security, front desk, owner) in order they may take the most appropriate action to resolve/address the identified problem ● Provide details of the situation – such as: ■ Location of the problem ■ Number of people involved ■ Reason for your concern ■ Details of anything already said, or action already taken in relation to the issue ● Take action where authorised to do so and when safe to do so – this may include: ■ Removing customers to a safe area ■ Securing property – by locking doors and cash drawers ■ Initiating a first response - such as fire fighting

- | | |
|--|--|
| | <ul style="list-style-type: none">• Calling external authorities for assistance• When taking action always put the safety of people above the security of property: people must always take priority over money or other physical resources/assets. |
|--|--|

Slide

Seek feedback about beverage quality

Ways to obtain feedback from customers on beverage quality:

- Ask for it
- Listen to what patrons are saying
- Observe patrons
- Note unfinished drinks
- Encourage feedback and comment

Slide 127

Slide No	Trainer Notes
127.	Trainer explains it must be part of standard operating procedure to always check the quality of all beverages served highlighting no sub-standard product/beverage must ever be allowed to leave the bar for service to a customer, regardless of who the customer is, or how much/little they are paying for the drink. Trainer indicates ways to obtain feedback about beverage quality include: • Ask for feedback – verbally or by asking customers to complete a 'Customer Comment/Feedback' form • Listen to what customers are saying to each other – are they complaining to each other, or do they seem happy with what is happening? Follow up with a question where you think there may be a problem – the sooner you know, the better • Observe customer body language – do they appear pleased or displeased: ask a question if you suspect a problem • Note the drinks which are being left unfinished – a trend in a certain type of drink may indicate a problem • Encourage feedback – tell customers to let you know if they have compliment, complaint or opinion they want to share.

Slide

Seek feedback about beverage quality

Check beverage quality every time a drink is made:

- Temperature
- Taste
- Smell
- Clarity

Slide 128

Slide No	Trainer Notes
128.	Trainer stresses checks on beverage quality must be done every time a drink is made/served highlighting points to check: • Temperature: ▪ Cold drinks should be cold ▪ Hot drinks should be hot ▪ Every bar should have its own thermometer to be used to objectively test/take the temperature of beverages if there is a concern they are not (for example) cold enough. Use the feel of your hands on products/glasses, as well as the readouts on refrigeration units, to judge temperature • Taste – making sure: ▪ There are no 'off' tastes ▪ The beer is not 'green' (sour) ▪ Wine has not oxidised ▪ Post-mix brixing is correct • Smell – there must be no 'off' smells • Clarity – check to ensure: ▪ The product is not cloudy ▪ There is nothing floating in the glass, bottle or jug.

Slide

Seek feedback about beverage quality

Responding to problems with beverage quality:

- Take action – never ignore the situation
- Remove product from sale
- Retain the product – for later inspection and review
- Advise other staff
- Notify management

Slide 129

Slide No	Trainer Notes
129.	Trainer explains response if a problem with beverage quality is detected: • Take action – never ignore the situation and simply hope ‘no-one will notice’ or ‘the problem will solve itself’ • Remove the product from sale – do not sell/serve any more of it: ▪ Where you believe the product poses a risk to public health, you must also initiate immediate action to retrieve from customers any of the affected product – this means you may have to walk around the bar/tables looking for the product and removing it from patrons: you will have to apologise for this, explain the situation and offer an appropriate replacement drink • Keep the offending bottle, drink, item safely to one side – so it can be shown to your supervisor or examined later in more detail but will not be used by others/served inadvertently to customers • Advise other service staff immediately about the problem and the beverages involved – so they do not serve/use the product • Inform management about the problem – tell supervisor.

Slide

Seek feedback about beverage quality

If a patron identifies problem with beverage:

- Thank them
- Apologise
- Offer an alternative
- Explain action to address the situation will be taken

Slide 130

Slide No	Trainer Notes
130.	Trainer explains response if customer identifies a problem with beverage quality: • Thank them – for their complaint • Apologise • Offer a suitable alternative • Advise them you are immediately notifying management so they can take the appropriate action. Class Activity – Demonstration and Practical Trainer demonstrates how to deal with a situation where a guest has complained about beverage quality and provides opportunity for students to practice.

Slide

Deal with unexpected situations

Dealing with unexpected situations:

- Act quickly and professionally
- Identify and analyse the situation
- Decide most appropriate course of action:
 - Use common sense
 - Follow internal policies and procedures
- Notify management

Slide 131

Slide No	Trainer Notes
131.	Trainer explains it is difficult to predict all unexpected situations which can arise when operating a bar but staff must develop the capacity to respond to all of them promptly and effectively indicating response should involve: • Immediate and professional response – do not panic • Generic responses should be: ■ Identify/recognise the problem as soon as possible ■ Analyse the situation: – What is the problem/issue? – What impact will it have on service/customers? ■ Decide the best course of action to take – given the circumstances: – Take action – two keys are: – Use common sense – Follow internal EMP or pre-determined decisions ■ Notify the appropriate person straightaway – supervisor/management or Security.

Slide

Deal with unexpected situations

Dealing with equipment breakdown:

- Notify management or Maintenance
- Request replacement item
- Tag item
- Advise other staff
- Remove item
- Advise patrons how the breakdown impacts service/ and the products which can be provided

Slide 132

Slide No	Trainer Notes
132.	Trainer provides examples of 'unexpected situations and sample/possible responses: • Dealing with equipment breakdowns – response may be: ▪ Notify management or Maintenance – so they can assist and/or provide repairs ▪ Arrange replacement item – if available ▪ Tag broken item – as 'Out of Order': so others know it is not working ▪ Make sure others do not use it – tell them the item is not working ▪ Remove item from service – if possible ▪ Advise customers of products which cannot be produced/served due to item breakdown.

Slide

Deal with unexpected situations

Dealing with power failure:

- Notify management or Maintenance
- Implement EMP for 'power failure'
- Protect assets and cash
- Urge customers to be calm
- Use ice to chill bottles and cans
- Use 'manual' operation of registers

Slide 133

Slide No	Trainer Notes
133.	Trainer continues to provide examples of 'unexpected situations and sample/possible responses: ● Dealing with power failure – response may be: ▪ Notify management or Maintenance – they will probably be aware of the situation but it is best to notify them as the power failure may just be localised to your bar ▪ Implement EMP for 'power failure' – evacuate customers; activate emergency/stand-by generator; verify emergency lighting has activated ▪ Protect assets/cash – thieves may stage a power failure at night as a pretext for stealing cash from the cash register ▪ Urge people to keep calm – tell them power will be restored shortly ▪ Use ice to chill bottles and cans – because refrigeration units will not be working & drinks will soon get warm ▪ Switch to manual operation – of POS registers/terminals.

Slide

Deal with unexpected situations

Dealing with violent incidents:

- Notify management or Security
- Implement relevant EMP
- Stay safe
- Move other patrons to safe location
- Ask people to stop fighting
- Contact authorities

Slide 134

Slide No	Trainer Notes
134.	Trainer continues to provide examples of 'unexpected situations and sample/possible responses: • Dealing with violent incidents – response may be: ▪ Notify management or Security – to get help on the way to you ▪ Implement EMP for 'violent incidents' ▪ Never place self in danger – do not intervene ▪ Move customers to safety – away from the fracas ▪ Ask people to modify their behaviour – if safe to do so ▪ Contact police/authorities – if scope of authority allows.

Slide

Deal with unexpected situations

Dealing with medical emergencies:

- Notify relevant person
- Provide basic first aid
- Comfort patient
- Contact authorities

Slide 135

Slide No	Trainer Notes
135.	Trainer continues to provide examples of 'unexpected situations and sample/possible responses: ● Dealing with medical emergencies – response may be: ▪ Notify management, Security or reception – or House Doctor, or designated staff member trained in First Aid ▪ Provide basic first aid ▪ Comfort and re-assure patient ▪ Contact ambulance/authorities – if scope of authority allows.

Slide

Deal with unexpected situations

Dealing with run out of stock:

- Try to predict the situation so it is avoided
- Notify management
- Requisition extra stock
- Borrow stock

Slide 136

Slide No	Trainer Notes
136.	Trainer continues to provide examples of 'unexpected situations and sample/possible responses: • Dealing with running out of stock – response may be: ▪ Predict the situation – try to <i>avoid</i> actual stock outages ▪ Notify management – and request extra stock ▪ Requisition or obtain stock from Store ▪ Borrow stock from another department – completing an inter-departmental transfer sheets if required.

Slide

Deal with unexpected situations

Dealing with staff absences:

- Notify management
- Close sections of the bar?
- Reduce service levels?
- Reduce range of products which can be served?
- Work overtime

Slide 137

Slide No	Trainer Notes
137.	Trainer continues to provide examples of 'unexpected situations and sample/possible responses: • Dealing with employee absences – response may be: ▪ Notify management/supervisor staff are absent ▪ Consider closing sections of the work area ▪ Consider reducing service and/or items offered/produced ▪ Work overtime/extra hours to cover absences – if authorised.

Slide

Deal with unexpected situations

‘Programmed decisions’ are prepared by management to give guidance about what to do when certain situations arise – for example:

Mishap/Situation	Programmed Decision
You knock over customer’s drink at bar	Apologise Replace drink, free-of-charge

Slide 138

Slide No Trainer Notes

- | | |
|------|---|
| 138. | <p>Trainer identifies role of ‘programmed decisions’ as a way of addressing unexpected situations or situations which arise during service sessions:</p> <ul style="list-style-type: none"> • Most establishments will have a set of guidelines to use/follow where certain predictable situations/mishaps arise • These pre-determined decisions will allow you take immediate on-the-spot action when a mishap occurs and saves you involving management in every single minor mishap/decision. |
|------|---|

Slide

Deal with unexpected situations

Mishap/Situation	Programmed Decision
You spill tray of drinks over guests at table	Apologise; Immediately obtain help from other staff Clean and dry affected areas – offer cloths for guests to dry their own clothes Replenish and re-serve drinks Contact supervisor who will make decision on any further action or reimbursement

Slide 139

Slide No

Trainer Notes

139.

Trainer provides and explains another example of a programmed decisions.

Class Activity – Group Exercise

Trainer asks students to:

- Identify situations which may have 'programmed decisions' for them
- Develop appropriate responses for each identified situation.

Slide

Summary – Element 3

When preparing and serving drinks:

- Greet the customer
- Be friendly
- Acknowledge the presence of any customer who may have to wait to be served
- Apologise if customer has to wait

(Continued)

Slide 140

Slide No	Trainer Notes
140.	Trainer provides a recap of the Element asking questions to check trainee understanding and responding to questions from trainees, as required.

Slide

Summary – Element 3

- Thank the customer for their order.
- Follow all legal requirements regarding service of alcohol
- Adhere to house protocols when preparing and serving drinks
- Serve drinks promptly and courteously

(Continued)

Slide 141

Slide No	Trainer Notes
----------	---------------

141.	Trainer provides a recap of the Element asking questions to check trainee understanding and responding to questions from trainees, as required.
------	---

Slide

Summary – Element 3

- Handle glassware carefully and hygienically
- Add garnishes and decorations as appropriate
- Take care to minimise spillages and wastage
- Clean up breakages carefully and safely

(Continued)

Slide 142

Slide No	Trainer Notes
142.	Trainer provides a recap of the Element asking questions to check trainee understanding and responding to questions from trainees, as required.

Slide

Summary – Element 3

- Monitor patrons and seek assistance where customer behaviour requires attention
- Follow house rules when responding to threats
- Never place yourself in danger
- Seek feedback from customers about drinks

(Continued)

Slide 143

Slide No

Trainer Notes

143.

Trainer provides a recap of the Element asking questions to check trainee understanding and responding to questions from trainees, as required.

Slide

Summary – Element 3

- Check quality of beverages on an on-going basis
- Report problems with beverage quality as required
- Take corrective action to rectify beverage quality if possible
- Respond sensibly to unexpected problems

Slide 144

Slide No	Trainer Notes
144.	Trainer provides a recap of the Element asking questions to check trainee understanding and responding to questions from trainees, as required.

Slide

Close down bar operations

Performance Criteria for this Element are:

- Turn off equipment in accordance with enterprise safety procedures and manufacturer's instructions
- Clear, clean and dismantle bar areas in accordance with enterprise procedures
- Store garnishes and accompaniments correctly
- Set up bar for next service
- Handover bar, where appropriate, to incoming bar staff

Slide 145

Slide No	Trainer Notes
145.	Trainer identifies for trainees the Performance Criteria for this Element, as listed on the slide. Class Activity – Discussion Trainer asks trainees questions regarding closing down of bar operations asking questions such as: • What do you think would be tasks involved in closing a bar at the end of trade? • What equipment do you think might need to be turned off at the end of trade? • What items may need to be turned on? • How do you think left-over garnishes may be stored at the end of trade? • What is a 'handover' of a bar?

Slide

Turn off equipment

At the end of shift or session you **may** need to turn off:

- Anything which was turned on
- Beer chillers
- Music systems
- Heating or air conditioning
- Lighting

(Continued)

Slide 146

Slide No	Trainer Notes
146.	Trainer notes at the end of trade, various items of equipment will need to be turned off, or shut down explaining exactly what needs to be turned off will vary between bars giving examples of equipment needing to be turned off as: • Anything which was turned on • Instantaneous beverage chillers – beer coolers • Music and entertainment systems or units – radio, tape, CD or other music source, PA systems, televisions • Heating or air conditioning units • Lighting.

Slide

Turn off equipment

- Coin-operated entertainment units
- Vending machines
- Advertising signs
- Glass chillers
- Coffee machine

Slide 147

Slide No	Trainer Notes
147.	Trainer continues giving examples of items which may need to be turned off at end of session: • Coin-operated entertainment units • Vending machines • Advertising signs • Glass chillers – so they can defrost overnight and be ready to clean the next morning • Coffee machine/s.

Slide

Turn off equipment

Some items may need to be turned on:

- Answering machine
- Washing machine
- Security alarms

Slide 148

Slide No	Trainer Notes
148.	Trainer explains some things may also need to be turned on: • A telephone answering machine – although most are automatically configured • Washing machine – this is commonly required in smaller venues where bar staff are asked to wash the bar towels, runners and swabs • Security alarms – the last person out of an area/venue will normally be responsible for activating the security system.

Slide

Turn off equipment

Security checks should be made of:

- Toilets
- Store rooms
- Behind curtains
- Behind alcoves
- Any area open to the public

Slide 149

Slide No

Trainer Notes

149.

Trainer advises security checks should also be made to ensure no-one remains on/locked in the premises indicating areas to check include:

- Toilets – male, female and disabled
- Store rooms
- Behind curtains
- Behind alcoves
- Any areas open to the public.

Slide

Clear, clean and dismantle bar area

At end of trade there may be a need to:

- Clear items – move items from one place to another
- Clean items – removing physical dirt and debris
- Dismantle items – for cleaning

Slide 150

Slide No	Trainer Notes
150.	Trainer explains in all bar closing procedures there will be a need for some items to be cleared, cleaned or dismantled in preparation for the next shift/day of trade defining: • Clearing includes removing items – such as taking items off tables, from displays and from waiting stations and bar counters • Cleaning is the removal of visible debris from food/beverage preparation items and equipment – such as cleaning of drip trays, cleaning of bar counters and cleaning of jugs, knives, glasses etc • Dismantling of items involves the taking apart (and sometimes, also, the re-assembly of) espresso machines, post-mix machines, blenders and other items of equipment used in the preparation of and service of drinks.

Slide

Clear, clean and dismantle bar area

'Closing procedures' may include:

- Disconnecting draught beer
- Washing drip trays
- Cleaning dirty glasses
- Checking stock levels

(Continued)

Slide 151

Slide No	Trainer Notes
151.	Trainer introduces concept of closing procedures' explaining this a generic name for all the activities which need to be undertaken when a bar closes – such as: • Disconnecting the draught beer – turning off beer chillers (where applicable) and running water through the lines and leaving lines wet or dry depending on house policy: beer dispensed from the lines must be thrown out as it falls under the definition of 'waste beer' • Washing the drip trays from under beer fonts, post-mix units, espresso machines and glass racks, and allowing to air dry • Cleaning all dirty glassware and storing them in appropriate places – pay attention to ensure all glasses are washed/cleaned properly and remove any chipped or broken glassware from service • Checking stock levels of all beverage items including beer, wine, spirits, liqueurs, mixers, bottled water, milk, cream, fruit juices, and re-ordering as necessary.

Slide

Clear, clean and dismantle bar area

- Collecting dirty bar cloths and linen
- Throwing out used and dirty coasters
- Washing ashtrays
- Checking all equipment is in working order

(Continued)

Slide 152

Slide No	Trainer Notes
152.	Trainer continues giving examples of 'closing procedures': • Collecting all dirty bar runners, tea towels, swabs and cloths and placing them in the laundry – in some/smaller venues you may be required to place them in a washing machine and start the wash cycle • Discarding all used/dirty coasters – keeping suitable ones for next service • Collecting and washing all ashtrays – ashtrays should not be washed in the glass washing machine • Checking all equipment and bar utensils are clean and in good working order – this includes completing necessary documentation (such as 'Maintenance Request' forms), or verbally notifying the supervisor of anything you believe needs attention.

Slide

Clear, clean and dismantle bar area

- Soaking pourers
- Covering and storing garnishes – or discarding them.
- Cleaning and stacking service trays
- Emptying ice buckets and bins

(Continued)

Slide 153

Slide No

Trainer Notes

153.

Trainer continues giving examples of 'closing procedures':

- Placing appropriate spirit pourers into soda water to soak overnight – place ouzo pourer into a separate container to soak: always follow house policies in this regard
- Covering all garnishes and perishable items and storing under refrigeration – throw out items as necessary
- Cleaning, drying and stacking service trays
- Emptying and cleaning ice buckets.

Slide

Clear, clean and dismantle bar area

- Cleaning espresso machine
- Removing rubbish
- Emptying bottle bins
- Cleaning – counters, preparation and service surfaces

(Continued)

Slide 154

Slide No	Trainer Notes
154.	Trainer continues giving examples of 'closing procedures': • Turning off, dismantling and cleaning espresso coffee machine – always follow manufacturer's instructions • Removing all rubbish from bar areas and cleaning the internal rubbish bins • Emptying the empty-bottle bin/s – note attention should be paid to the noise dumping empty bottles into a bin makes at night time/early morning: venues may receive complaints from in-house guests and local residents if they make a noise when emptying bottles into bins at night/early morning so many venues do this job the following day as part of the cleaners' duties • Cleaning all surfaces.

Slide

Clear, clean and dismantle bar area

- Sweeping and mopping
- Reconciling takings
- Checking general cleanliness and appearance for next shift

Slide 155

Slide No	Trainer Notes
155.	Trainer continues giving examples of 'closing procedures': • Sweeping and mopping the floor – unless these jobs are done by cleaning staff • Counting/reconciling the takings and transporting same to a central secure area/safe • Checking to ensure the bar is presentable and ready for the next service.

Slide

Clear, clean and dismantle bar area

When undertaking closing procedures:

- Follow manufacturer's instructions for cleaning and shut-down
- Follow workplace cleaning schedules
- Check all equipment
- Report problems

Slide 156

Slide No	Trainer Notes
156.	Trainer identifies general responsibilities for staff when performing work to close a bar: • Following manufacturer's instructions – in the use, dismantling, cleaning and maintenance of bar equipment • Adhering to all workplace cleaning schedules – including applying all given cleaning instructions as they apply to chemicals to be used and cleaning items (equipment, cloths, swabs) to be used • Conducting daily checks on equipment – to verify they are working properly and to identify need for maintenance/service: this is done on an on-going basis throughout the day as items are used, and is always undertaken at the end of the day when regular cleaning and closing down procedures are being done • Reporting any equipment not operating correctly – report it immediately to your supervisor.

Slide

Store garnishes and accompaniments

Storage of garnishes at end of shift:

- Varies greatly between bars
- Check to identify workplace protocols
- Some bars save and store all unused garnishes
- Some bars discard all unused garnishes

Slide 157

Slide No

Trainer Notes

157.

Trainer explains at the end of trade all garnishes and accompaniments may need to stored highlighting:

- The storage of garnishes varies greatly
- Because of this great variation, you must check your house policy to determine what they see as 'correct' storage
- Some premises store *all* unused garnishes so they can be used during the next session, while others throw out everything left over.

Slide

Store garnishes and accompaniments

If bar stores unused garnishes they will normally also save and store:

- Open bottles of drink
- Fresh fruit juice
- Sour mix
- Sugar syrup

Slide 158

Slide No	Trainer Notes
158.	Trainer notes where venues store garnishes they usually also store/save: • Opened bottles of soft drink which they re-seal – most premises do not store open <i>cans</i> of drink • Fresh fruit juice squeezed on the premises • Sour mix – for use in cocktails • Sugar syrup – an ingredient in sour mix and in some cocktails.

Slide

Store garnishes and accompaniments

Storage options:

- Seal and refrigerate soft drink bottles
- Cover jugs and refrigerate
- Cover garnishes and refrigerate
- Replace cherries into original jar

Slide 159

Slide No	Trainer Notes
159.	Trainer gives storage options for items: • Using a bottle seal to re-seal bottles prior to storing them under refrigeration • Covering jugs of fruit juice, sour mix and/or sugar syrup with plastic wrap and then refrigerating • Covering slices of lemon, orange and lime with (soda) water and refrigerating them – an alternative is to just cover them with plastic film and refrigerate • Maraschino cherries should be replaced in their original bottle/jar, sealed and refrigerated.

Slide

Store garnishes and accompaniments

Storage of decorations – options are:

- Cover and leave where they are
- Cover and return to storage cupboard or shelf

Slide 160

Slide No	Trainer Notes
160.	Trainer describes storage of accompaniments: • The storage of accompaniments (drinking straws, drink decorations) is comparatively straight-forward. They are either: ▪ Covered and left where they are – behind/on the bar ▪ Covered and moved to a cupboard or other storage area in the bar. Class Activity – Guest Speaker Trainer arranges for guest speaker from local bar to attend and talk to students about: • Closing procedures – for work to be done; storage of garnishes; completion of documentation • Items needing to be turned on and/or off • Cleaning practices • Checks to be made at closing • Security issues.

Slide

Set up bar for next service

Activities in setting up bar for next session:

- Washing and putting away glasses
- Stack and lay out fresh linen
- Store stock, as required
- Complete 'Communication Book' if necessary
- Complete 'Maintenance Request' if necessary
- Cleaning and allied tasks

Slide 161

Slide No	Trainer Notes
161.	Trainer explains at end of trade there is a need to set bar up for next day/service session highlighting the following tasks are part of this process: ● Washing and putting away all glassware – all glasses should go into their own individual trays/holders: there should never be a mixture of glass sizes/types in the one tray ● Fresh bar linen may be stacked behind the bar – ready for the next shift to use and/or lay out ● Any available stock must be stored away – this especially applies to items needing to be served refrigerated ● Staff communication book to be completed where necessary – to advise incoming shift regarding any issues they need to be aware of ● Complete necessary 'Maintenance Request' forms – to initiate required repairs or service for bar equipment ● Cleaning – this is an important consideration in all bars and includes ensuring behind the bar and 'the customer's side' of the bar is clean: cleaning must include tasks appropriate to the type of bar, the bar facilities and the level of dirt/mess, but can be seen to include: ▪ Picking up papers, debris and rubbish/litter ▪ Sweeping and mopping ▪ Washing down and drying surfaces ▪ Putting items away/into their correct place

- | | |
|--|--|
| | <ul style="list-style-type: none">▪ Taking out rubbish and empty bottles/cans▪ Moving tables and/or chairs to facilitate the work to be done by the full-time cleaners. |
|--|--|

Slide

Set up bar for next service

Standard set ups for next session may vary on certain occasions:

- Before a public holiday
- When a special promotion starts
- To accommodate known staff absences
- If a large booking is expected
- Before a special day, event or celebration
- If new equipment is expected

Slide 162

Slide No	Trainer Notes
162.	Trainer indicates there can be times when the 'standard' set up for a bar needs to change identifying these occasions as: • A public holiday – management may want staff to do extra work on the day prior to the public holiday because the pay rate is cheaper and there is a need to be well-prepared • A special promotion expected to attract large numbers – to ensure sufficient stock, equipment, glasses etc are available to cater for the increased, expected numbers • Any staff absence known about in advance – to ease the pressure on tomorrow's staff • A large booking – to make sure all special requests have been accommodated and all possible preparations have been done to optimise the chances of a successful function • A special day (event, celebration, public holiday) – to put the final touches to themed displays, advertised events or special occasions • Special/major servicing, maintenance or cleaning of facilities or equipment – from time-to-time there will be a need to accommodate major events such as carpet cleaning, programmed maintenance services, major repairs • Arrival and installation of new equipment into the bar area.

Slide

Handover bar to incoming bar staff

A 'handover' is:

- Where bar stays open
- When new staff come on duty
- When existing staff go home

Slide 163

Slide No	Trainer Notes
163.	Trainer explains sometimes bar staff will need to perform a 'handover' defining it as a situation where: • The bar remains open – and continues to sell and serve drinks • New staff come on duty – to replace the staff who have now finished their shift • Existing staff leave work – meaning they have finished working their rostered hours.

Slide

Handover bar to incoming bar staff

When doing a handover:

- Ensure bar is clean
- Make sure there is enough change
- Pass on customer-related information
- Communicate operational issues
- Inform incoming shift about orders yet to be filled

(Continued)

Slide 164

Slide No

Trainer Notes

164.

Trainer explains requirements when handing over a bar:

- The bar is clean and in good order – as mentioned previously, the out-going staff member should try to leave the bar (as far as is possible given the level of trade) in the condition they would like to find it. This means they should do some cleaning before the new staff arrive, as opposed to leaving the bar dirty and just walking out at knock off time
- Change/money in the cash register is sufficient for the next shift – and necessary change has been ordered/obtained, where necessary
- Information about particular customers in the bar is passed on – special attention must be paid to those who have already been spoken to/caused trouble or who appear to be intoxicated
- Information about customer complaints and operational problems is passed on – covering all relevant details
- Customer orders are addressed – if there is a customer order which has been taken but not filled this must be communicated to in-coming staff.

Slide

Handover bar to incoming bar staff

- Communicate customer preferences to incoming staff
- Stock the bar as well as possible
- Never just walk out

Slide 165

Slide No	Trainer Notes
165.	Trainer continues to explain requirements when handing over a bar: • Customer preferences are passed on – if a certain customer is drinking a certain brand of spirits, beer or wine this should be shared with staff who will be serving that customer • The bar is as well-stocked as possible – this may necessitate obtaining more stock to allow the next shift to trade as expected • Before departing after making a handover, check all is running smoothly and verify your services are no longer needed. It is not acceptable practice to simply walk out of the bar when the clock reaches your knock-off time.

Slide

Summary – Element 4

When closing down bar operations:

- Turn off nominated equipment
- Turn off nominated equipment
- Conduct internal security checks
- Activate alarms as required

(Continued)

Slide 166

Slide No

Trainer Notes

166.

Trainer provides a recap of the Element asking questions to check trainee understanding and responding to questions from trainees, as required.

Slide

Summary – Element 4

- Clean and dismantle equipment as required
- Implement all established closing procedures
- Store garnishes and left-over bottles as required
- Protect and store other stock and decorations

(Continued)

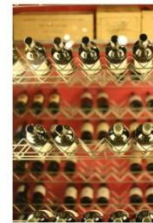

Slide 167

Slide No	Trainer Notes
167.	Trainer provides a recap of the Element asking questions to check trainee understanding and responding to questions from trainees, as required.

Slide

Summary – Element 4

- Set up bar for next service
- Order stock if required
- Perform handover in accordance with bar protocols

Slide 168

Slide No	Trainer Notes
168.	Trainer provides a recap of the Element asking questions to check trainee understanding and responding to questions from trainees, as required. Trainer thanks trainees for their attention and encourages them to apply course content as required in their workplace activities.

Recommended training equipment

- Bar room with all standard bar equipment such as glass washer, sinks, service counters, preparation areas, refrigeration units (under-counter and glass-fronted display type), glass chillers, beer fonts and taps, shelving, glass racks and trays, ice machine, ice crusher, cash register, glass washing machine
- Beer reticulation system (and product/s) including chilling units (such as Instantaneous Beverage Chillers) and drip trays
- Post mix system (and product and gas) – heads, towers, gun, drip trays
- Coffee and tea making facilities – urns, percolators, plungers, dripolators, jugs, espresso machines, crockery and cutlery, teas and coffees
- Computer with Internet access
- Wine storage units
- Full range of glassware of different sizes – such as wine (still and sparkling/champagne) glasses, liqueur glasses, beer glasses (pilsener, handles/mugs), fortified wine glasses, Highball glasses, Old Fashioned glasses, Brandy balloons, Shot glasses, test tubes, cocktail glasses (martini, Manhattan, Pina colada)
- Glass cleaning brush (suction type attaching to bottom of sink)
- Full range of jugs of different sizes
- Range of drink service trays and drink coasters
- Comprehensive range of alcoholic beverages – such as wines (red and white; varietal and generic; still and sparkling; fortified), beers (bulk and packaged), spirits, liqueurs, ready-to-drink (pre-mixed) beverages
- Comprehensive range of non-alcoholic beverages – such as dairy products, fruit juices, waters, aerated waters
- Spirit measures – optics and egg-cup measures
- Cutting boards and knives
- Ice buckets, ice tongs and scoops, cocktail mixing equipment, bottle re-sealers, bottle openers and corkscrews (hand-held and counter-mounted)
- Bar towels, swabs, tea towels, bar mats
- Cleaning chemicals and agents, cleaning equipment, de-naturing agent
- Bottle re-sealers
- Fruit for making garnishes
- Drink decorations, swizzle sticks and drinking straws
- Drink ordering pads or systems ('palm pilots')
- Standard/sample drink recipe sheets
- Liquor licensing regulations and health legislation (safe food handling) for host country
- Sample Emergency Management Plans

- Beverage thermometer
- Sample Requisition forms, inter-departmental transfer sheets, stock sheets.

Instructions for Trainers for using PowerPoint – Presenter View

Connect your laptop or computer to your projector equipment as per manufacturers' instructions.

In PowerPoint, on the **Slide Show** menu, click **Set Up Show**.

Under Multiple monitors, select the Show Presenter View check box.

In the **Display slide show** on list, click the monitor you want the slide show presentation to appear on.

Source: <http://office.microsoft.com>

Note:

In Presenter View:

You see your notes and have full control of the presentation

Your trainees only see the slide projected on to the screen

More Information

You can obtain more information on how to use PowerPoint from the Microsoft Online Help Centre, available at:

<http://office.microsoft.com/training/training.aspx?AssetID=RC011298761033>

Note Regarding Currency of URLs

Please note that where references have been made to URLs in these training resources trainers will need to verify that the resource or document referred to is still current on the internet. Trainers should endeavour, where possible, to source similar alternative examples of material where it is found that either the website or the document in question is no longer available online.
