Competency Based Training (CBT) and assessment – An introduction for trainers

Competency

Competency refers to the ability to perform particular tasks and duties to the standard of performance expected in the workplace.

Competency requires the application of specified knowledge, skills and attitudes relevant to effective participation, consistently over time and in the workplace environment.

The essential skills and knowledge are either identified separately or combined.

Knowledge identifies what a person needs to know to perform the work in an informed and effective manner.

Skills describe the application of knowledge to situations where understanding is converted into a workplace outcome.

Attitude describes the founding reasons behind the need for certain knowledge or why skills are performed in a specified manner.

Competency covers all aspects of workplace performance and involves:

- Performing individual tasks
- Managing a range of different tasks
- Responding to contingencies or breakdowns
- Dealing with the responsibilities of the workplace
- Working with others.

Unit of competency

Like with any training qualification or program, a range of subject topics are identified that focus on the ability in a certain work area, responsibility or function.

Each manual focuses on a specific unit of competency that applies in the hospitality workplace.

In this manual a unit of competency is identified as a 'unit'.

Each unit of competency identifies a discrete workplace requirement and includes:

- Knowledge and skills that underpin competency
- Language, literacy and numeracy
- Occupational safety and health requirements.

Each unit of competency must be adhered to in training and assessment to ensure consistency of outcomes.

Element of competency

An element of competency describes the essential outcomes within a unit of competency.

The elements of competency are the basic building blocks of the unit of competency. They describe in terms of outcomes the significant functions and tasks that make up the competency.

In this manual elements of competency are identified as an 'element'.

Performance criteria

Performance criteria indicate the standard of performance that is required to demonstrate achievement within an element of competency. The standards reflect identified industry skill needs.

Performance criteria will be made up of certain specified skills, knowledge and attitudes.

Learning

For the purpose of this manual learning incorporates two key activities:

- Training
- Assessment.

Both of these activities will be discussed in detail in this introduction.

Today training and assessment can be delivered in a variety of ways. It may be provided to participants:

- On-the-job – in the workplace
- Off-the-job – at an educational institution or dedicated training environment
- As a combination of these two options.

No longer is it necessary for learners to be absent from the workplace for long periods of time in order to obtain recognised and accredited qualifications.

Learning approaches

This manual will identify two avenues to facilitate learning:

Competency Based Training (CBT)

This is the strategy of developing a participant's competency.

Educational institutions utilise a range of training strategies to ensure that participants are able to gain the knowledge and skills required for successful:

- Completion of the training program or qualification
- Implementation in the workplace.

The strategies selected should be chosen based on suitability and the learning styles of participants.

Competency Based Assessment (CBA)

This is the strategy of assessing competency of a participant.

Educational institutions utilise a range of assessment strategies to ensure that participants are assessed in a manner that demonstrates validity, fairness, reliability, flexibility and fairness of assessment processes.

Flexibility in learning

It is important to note that flexibility in training and assessment strategies is required to meet the needs of participants who may have learning difficulties. The strategies used will vary, taking into account the needs of individual participants with learning difficulties. However they will be applied in a manner which does not discriminate against the participant or the participant body as a whole.

Catering for participant diversity

Participants have diverse backgrounds, needs and interests. When planning training and assessment activities to cater for individual differences, trainers and assessors should:

- Consider individuals' experiences, learning styles and interests
- Develop questions and activities that are aimed at different levels of ability
- Modify the expectations for some participants
- Provide opportunities for a variety of forms of participation, such as individual, pair and small group activities
- Assess participants based on individual progress and outcomes.

The diversity among participants also provides a good reason for building up a learning community in which participants support each other's learning.

Participant centred learning

This involves taking into account structuring training and assessment that:

- *Builds on strengths* – Training environments need to demonstrate the many positive features of local participants (such as the attribution of academic success to effort, and the social nature of achievement motivation) and of their trainers (such as a strong emphasis on subject disciplines and moral responsibility). These strengths and uniqueness of local participants and trainers should be acknowledged and treasured
- *Acknowledges prior knowledge and experience* – The learning activities should be planned with participants' prior knowledge and experience in mind
- *Understands learning objectives* – Each learning activity should have clear learning objectives and participants should be informed of them at the outset. Trainers should also be clear about the purpose of assignments and explain their significance to participants
- *Teaches for understanding* – The pedagogies chosen should aim at enabling participants to act and think flexibly with what they know
- *Teaches for independent learning* – Generic skills and reflection should be nurtured through learning activities in appropriate contexts of the curriculum. Participants should be encouraged to take responsibility for their own learning

- *Enhances motivation* – Learning is most effective when participants are motivated. Various strategies should be used to arouse the interest of participants
- *Makes effective use of resources* – A variety of teaching resources can be employed as tools for learning
- *Maximises engagement* – In conducting learning activities, it is important for the minds of participants to be actively engaged
- *Aligns assessment with learning and teaching* – Feedback and assessment should be an integral part of learning and teaching
- *Caters for learner diversity* – Trainers should be aware that participants have different characteristics and strengths and try to nurture these rather than impose a standard set of expectations.

Active learning

The goal of nurturing independent learning in participants does not imply that they always have to work in isolation or solely in a classroom. On the contrary, the construction of knowledge in tourism and hospitality studies can often best be carried out in collaboration with others in the field. Sharing experiences, insights and views on issues of common concern, and working together to collect information through conducting investigative studies in the field (active learning) can contribute a lot to their eventual success.

Active learning has an important part to play in fostering a sense of community in the class. First, to operate successfully, a learning community requires an ethos of acceptance and a sense of trust among participants, and between them and their trainers. Trainers can help to foster acceptance and trust through encouragement and personal example, and by allowing participants to take risks as they explore and articulate their views, however immature these may appear to be. Participants also come to realise that their classmates (and their trainers) are partners in learning and solving.

Trainers can also encourage cooperative learning by designing appropriate group learning tasks, which include, for example, collecting background information, conducting small-scale surveys, or producing media presentations on certain issues and themes. Participants need to be reminded that, while they should work towards successful completion of the field tasks, developing positive peer relationships in the process is an important objective of all group work.

Competency Based Training (CBT)

Principle of Competency Based Training

Competency based training is aimed at developing the knowledge, skills and attitudes of participants, through a variety of training tools.

Training strategies

The aims of this curriculum are to enable participants to:

- Undertake a variety of subject courses that are relevant to industry in the current environment
- Learn current industry skills, information and trends relevant to industry
- Learn through a range of practical and theoretical approaches
- Be able to identify, explore and solve issues in a productive manner

- Be able to become confident, equipped and flexible managers of the future
- Be 'job ready' and a valuable employee in the industry upon graduation of any qualification level.

To ensure participants are able to gain the knowledge and skills required to meet competency in each unit of competency in the qualification, a range of training delivery modes are used.

Types of training

In choosing learning and teaching strategies, trainers should take into account the practical, complex and multi-disciplinary nature of the subject area, as well as their participant's prior knowledge, learning styles and abilities.

Training outcomes can be attained by utilising one or more delivery methods:

Lecture/tutorial

This is a common method of training involving transfer of information from the trainer to the participants. It is an effective approach to introduce new concepts or information to the learners and also to build upon the existing knowledge. The listener is expected to reflect on the subject and seek clarifications on the doubts.

Demonstration

Demonstration is a very effective training method that involves a trainer showing a participant how to perform a task or activity. Through a visual demonstration, trainers may also explain reasoning behind certain actions or provide supplementary information to help facilitate understanding.

Group discussions

Brainstorming in which all the members in a group express their ideas, views and opinions on a given topic. It is a free flow and exchange of knowledge among the participants and the trainer. The discussion is carried out by the group on the basis of their own experience, perceptions and values. This will facilitate acquiring new knowledge. When everybody is expected to participate in the group discussion, even the introverted persons will also get stimulated and try to articulate their feelings.

The ideas that emerge in the discussions should be noted down and presentations are to be made by the groups. Sometimes consensus needs to be arrived at on a given topic. Group discussions are to be held under the moderation of a leader guided by the trainer. Group discussion technique triggers thinking process, encourages interactions and enhances communication skills.

Role play

This is a common and very effective method of bringing into the classroom real life situations, which may not otherwise be possible. Participants are made to enact a particular role so as to give a real feel of the roles they may be called upon to play. This enables participants to understand the behaviour of others as well as their own emotions and feelings. The instructor must brief the role players on what is expected of them. The role player may either be given a ready-made script, which they can memorise and enact, or they may be required to develop their own scripts around a given situation. This technique is extremely useful in understanding creative selling techniques and human relations. It can be entertaining and energising and it helps the reserved and less literate to express their feelings.

Simulation games

When trainees need to become aware of something that they have not been conscious of, simulations can be a useful mechanism. Simulation games are a method based on "here and now" experience shared by all the participants. The games focus on the participation of the trainees and their willingness to share their ideas with others. A "near real life" situation is created providing an opportunity to which they apply themselves by adopting certain behaviour. They then experience the impact of their behaviour on the situation. It is carried out to generate responses and reactions based on the real feelings of the participants, which are subsequently analysed by the trainer.

While use of simulation games can result in very effective learning, it needs considerable trainer competence to analyse the situations.

Individual /group exercises

Exercises are often introduced to find out how much the participant has assimilated. This method involves imparting instructions to participants on a particular subject through use of written exercises. In the group exercises, the entire class is divided into small groups, and members are asked to collaborate to arrive at a consensus or solution to a problem.

Case study

This is a training method that enables the trainer and the participant to experience a real life situation. It may be on account of events in the past or situations in the present, in which there may be one or more problems to be solved and decisions to be taken. The basic objective of a case study is to help participants diagnose, analyse and/or solve a particular problem and to make them internalise the critical inputs delivered in the training. Questions are generally given at the end of the case study to direct the participants and to stimulate their thinking towards possible solutions. Studies may be presented in written or verbal form.

Field visit

This involves a carefully planned visit or tour to a place of learning or interest. The idea is to give first-hand knowledge by personal observation of field situations, and to relate theory with practice. The emphasis is on observing, exploring, asking questions and understanding. The trainer should remember to brief the participants about what they should observe and about the customs and norms that need to be respected.

Group presentation

The participants are asked to work in groups and produce the results and findings of their group work to the members of another sub-group. By this method participants get a good picture of each other's views and perceptions on the topic and they are able to compare them with their own point of view. The pooling and sharing of findings enriches the discussion and learning process.

Practice sessions

This method is of paramount importance for skills training. Participants are provided with an opportunity to practice in a controlled situation what they have learnt. It could be real life or through a make-believe situation.

Games

This is a group process and includes those methods that involve usually fun-based activity, aimed at conveying feelings and experiences, which are everyday in nature, and applying them within the game being played. A game has set rules and regulations, and may or may not include a competitive element. After the game is played, it is essential that the participants be debriefed and their lessons and experiences consolidated by the trainer.

Research

Trainers may require learners to undertake research activities, including online research, to gather information or further understanding about a specific subject area.

Competency Based Assessment (CBA)

Principle of Competency Based Assessment

Competency based assessment is aimed at compiling a list of evidence that shows that a person is competent in a particular unit of competency.

Competencies are gained through a multitude of ways including:

- Training and development programs
- Formal education
- Life experience
- Apprenticeships
- On-the-job experience
- Self-help programs.

All of these together contribute to job competence in a person. Ultimately, assessors and participants work together, through the 'collection of evidence' in determining overall competence.

This evidence can be collected:

- Using different formats
- Using different people
- Collected over a period of time.

The assessor, who is ideally someone with considerable experience in the area being assessed, reviews the evidence and verifies the person as being competent or not.

Flexibility in assessment

Whilst allocated assessment tools have been identified for this subject, all attempts are made to determine competency and suitable alternate assessment tools may be used, according to the requirements of the participant.

The assessment needs to be equitable for all participants, taking into account their cultural and linguistic needs.

Competency must be proven regardless of:

- Language
- Delivery Method
- Assessment Method.

Assessment objectives

The assessment tools used for subjects are designed to determine competency against the 'elements of competency' and their associated 'performance criteria'.

The assessment tools are used to identify sufficient:

- a) Knowledge, including underpinning knowledge
- b) Skills
- c) Attitudes

Assessment tools are activities that trainees are required to undertake to prove participant competency in this subject.

All assessments must be completed satisfactorily for participants to obtain competence in this subject. There are no exceptions to this requirement, however, it is possible that in some cases several assessment items may be combined and assessed together.

Types of assessment

Allocated Assessment Tools

There are a number of assessment tools that are used to determine competency in this subject:

- Work projects
- Written questions
- Oral questions
- Third Party Report
- Observation Checklist.

Instructions on how assessors should conduct these assessment methods are explained in the Assessment Manuals.

Alternative assessment tools

Whilst this subject has identified assessment tools, as indicated above, this does not restrict the assessor from using different assessment methods to measure the competency of a participant.

Evidence is simply proof that the assessor gathers to show participants can actually do what they are required to do.

Whilst there is a distinct requirement for participants to demonstrate competency, there are many and diverse sources of evidence available to the assessor.

Ongoing performance at work, as verified by a supervisor or physical evidence, can count towards assessment. Additionally, the assessor can talk to customers or work colleagues to gather evidence about performance.

A range of assessment methods to assess competency include:

- Practical demonstrations
- Practical demonstrations in simulated work conditions
- Problem solving
- Portfolios of evidence
- Critical incident reports
- Journals
- Oral presentations
- Interviews
- Videos
- Visuals: slides, audio tapes
- Case studies
- Log books
- Projects
- Role plays
- Group projects
- Group discussions
- Examinations.

Recognition of Prior Learning

Recognition of Prior Learning is the process that gives current industry professionals who do not have a formal qualification, the opportunity to benchmark their extensive skills and experience against the standards set out in each unit of competency/subject.

Also known as a Skills Recognition Audit (SRA), this process is a learning and assessment pathway which encompasses:

- Recognition of Current Competencies (RCC)
- Skills auditing
- Gap analysis and training
- Credit transfer.

Assessing competency

As mentioned, assessment is the process of identifying a participant's current knowledge, skills and attitudes sets against all elements of competency within a unit of competency. Traditionally in education, grades or marks were given to participants, dependent on how many questions the participant successfully answered in an assessment tool.

Competency based assessment does not award grades, but simply identifies if the participant has the knowledge, skills and attitudes to undertake the required task to the specified standard.

Therefore, when assessing competency, an assessor has two possible results that can be awarded:

- Pass Competent (PC)
- Not Yet Competent (NYC).

Pass Competent (PC)

If the participant is able to successfully answer or demonstrate what is required, to the expected standards of the performance criteria, they will be deemed as 'Pass Competent' (PC).

The assessor will award a 'Pass Competent' (PC) if they feel the participant has the necessary knowledge, skills and attitudes in all assessment tasks for a unit.

Not Yet Competent' (NYC)

If the participant is unable to answer or demonstrate competency to the desired standard, they will be deemed to be 'Not Yet Competent' (NYC).

This does not mean the participant will need to complete all the assessment tasks again. The focus will be on the specific assessment tasks that were not performed to the expected standards.

The participant may be required to:

- a) Undertake further training or instruction
- b) Undertake the assessment task again until they are deemed to be 'Pass Competent'.

Competency standard

UNIT TITLE: MANAGE AND MONITOR INNOVATIVE TOURISM PROGRAMS AND PROJECTS		NOMINAL HOURS: 60
UNIT NUMBER: D2.TGA.CL6.03 D2.TRM.CL9.10		
UNIT DESCRIPTOR: This unit deals with skills and knowledge required to administer innovative tourism and programs within a travel and tourism organisation		
ELEMENTS AND PERFORMANCE CRITERIA	UNIT VARIABLE AND ASSESSMENT GUIDE	
Element 1: Plan the administration of the innovative tourism program/project 1.1 <i>Confirm the program/project</i> 1.2 <i>Identify factors affecting timelines for implementation</i> 1.3 <i>Develop program/project plans</i> 1.4 <i>Link budget to key outcomes</i> 1.5 <i>Identify monitoring and reporting arrangements</i> 1.6 <i>Allocate resources</i> 1.7 <i>Integrate program/plan with other initiatives</i> 1.8 <i>Confirm agreements with service providers</i> 1.9 <i>Develop contingency plans</i> 1.10 <i>Develop teams to support program/project implementation</i> 1.11 <i>Select program/project management tools</i>	Unit Variables The Unit Variables provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. It relates to the unit as a whole and facilitates holistic assessment This unit applies to all industry sectors that are involved in the implementation of innovative tourism programs and projects within the labour divisions of the hotel and travel industries and may include: 1. Travel Agencies 2. Tour Operation <i>Confirm the program/project</i> may include: • Understanding the agreed details relating to the program/project in terms of: ▪ Purpose ▪ Scope ▪ Goals and objectives. <i>Factors affecting timelines for implementation</i> will include: • Legislated requirements	

Element 2: Coordinate the administration of the innovative tourism program/project 2.1 <i>Allocate tasks and resources</i> 2.2 <i>Maintain financial control systems</i> 2.3 <i>Monitor program/project progress</i> 2.4 <i>Report program/project progress</i> 2.5 <i>Maintain program/project records</i> 2.6 <i>Manage start-up activities and manage project implementation</i> Element 3: Finalise the innovative tourism program/project 3.1 <i>Administer winding up activities for the program/project</i> 3.2 <i>Review program/project administration</i> 3.3 <i>Evaluate the program/project</i> 3.4 <i>Report on program/project administration and results</i>	• Contractual obligations • Activities of competitors • Economic imperatives • Integration with other programs/projects • Advertised timelines for availability/implementation • Weather and economic conditions. <i>Develop program/project plans may be related to:</i> • Identifying relevant acquisition strategies for materials, information and resources required for the program/project • Developing a specific budget and financial management strategy • Developing communication and contract management plans, where applicable • Generating details cost estimates • Preparing evaluation criteria for program/project progress and completion • Determining final expected outcomes and measurable benefits of the program/project • Developing intellectual property strategies, where applicable • Determining program/project milestones • Clarifying/revising program/project objectives and purpose, including confirming or clarifying the rationale for the program/project • Defining program/project deliverables and criteria for evaluating acceptance of same • Developing a human resource plan, where applicable, describing training, staff involved, time commitment, authority and communication structure • Developing performance indicators • Describing project control mechanisms
---	---

- Developing program/project implementation and governance strategy
- Defining quality assurance and quality control strategies for the program/project
- Identifying program/project resource requirements, including human, physical and financial
- Developing risk management protocols for the program/project
- Defining relevant roles and responsibilities for those involved in the program/project
- Deciding schedules and timelines
- Defining tasks and activities
- Coordinating staff
- Preparing program/project-specific documentation
- Processing income and payments relating to the program/project
- Planning general and specific project activities
- Planning administrative tasks specific to the program/project.

Link budget to key outcomes should include:

- Prioritising outcomes
- Ensuring accountability and transparency
- Ensuring all resource types are involved as required, such as human, physical and financial
- Developing explanatory notes to supplement the allocation of resources.

Monitoring and reporting arrangements may include:

- Financial management arrangements
- Record keeping
- Reporting framework and schedule, including team reports

	• Project management software and other tools, such as Gantt and bar charts • Program Evaluation and Review Technique (PERT) • Critical Path Method • Cost schedule control system • Spreadsheets • Charts including project control chart, control point chart • Milestone chart and budget control chart • Defining report requirements, including contents, report structure and relevant timelines for report presentations. <i>Allocate resources may include:</i> • Establishing budgets • Establishing scopes of authority and discretionary powers relating to resources • Defining systems and procedures to guide the use and application of resources • Prioritising operational activities • Scheduling tasks and the overall workload for the program/project • Breaking tasks into sub-tasks • Arranging tasks into groups, where applicable • Facilitating team involvement in task and resources allocations • Allocating responsibilities to align with resources provided • Delegating tasks • Imposing constraints and limitations on resource availability and usage • Establishing line/chain of command protocols for managing resource use between joint venture partners, including private and public sector funding sources, where applicable.
--	---

	<i>Integrate program/plan with other initiatives</i> may include: • Capitalising on economies of scale • Utilising staff with complementary skills, knowledge and experience in associated areas and disciplines • Minimising unnecessary duplication • Centralising operations to facilitate control and minimise expenditure. <i>Agreements with service providers</i> may include: • Legally contracted arrangements • Word-of-mouth agreements • Previous services provided by suppliers • Negotiating changes to existing arrangements • Clarifying issues • Establishing operational protocols to guide/control the integration of service providers into the program/project. <i>Develop contingency plans</i> may include: • Identifying situations that may require contingency management plans, including: ▪ Operational issues ▪ Time-related issues ▪ Changed marketplace conditions • Obtaining stakeholder agreement • Identifying trigger points for implementation • Developing contingency management structure, composition and policies • Writing and approving draft contingency management plans.
--	---

	<i>Teams to support program/project implementation</i> may include: • Determining structure and size of teams • Matching team skills to the identified program/project needs, objectives, purpose, and/or outcomes • Developing guidelines for team activities • Allocating responsibilities and tasks within the team(s) • Determining team communication and report strategies • Facilitating communication • Undertaking relevant team training. <i>Allocate tasks and resources</i> may include: • Complying with approved/established plans • Modifying allocations on the basis of extra funds available • Taking action to address changes in the operational and implementation context for the program/project • Communicating actions taken to the appropriate team members and relevant stakeholders • Recording actions taken • Ensuring resource allocations align with established guidelines and accountability protocols • Ensuring transparency of relevant decision making processes and the expenditure of funds. <i>Maintain financial control systems</i> may include: • Entering data into established budgets • Approving expenditures • Obtaining necessary quotations for expenses over a designated amount • Verifying purchases, payments and products/services received
--	--

- Auditing the books
- Ensuring budgetary controls and guidelines are being met.

Report program/project progress may include:

- Supporting reports with fact-based evidence
- Preparing written reports
- Providing verbal presentation and explanations
- Organising meetings with relevant stakeholders.

Manage start-up activities and manage project implementation may include:

- Refining project plans
- Consulting with steering committees and other relevant stakeholders
- Initiating and operating identified systems, procedures, processes, practices and policies
- Facilitating operational and implementation understanding regarding the program/project
- Ensuring the requirements of all relevant plans are implemented as required and/or amended on the basis of feedback received and issues arising
- Providing leadership and direction to team members
- Responding appropriately to established system triggers as operational demands dictate
- Soliciting input and feedback from team members and relevant stakeholders
- Resolving disputes and disagreements relating to program/project implementation
- Negotiating program/project change proposals throughout the life of the initiative
- Apply consulting and reporting mechanisms.

	<i>Winding up activities</i> may include: • Inspection of the program/project deliverables • Testing operational capacity of the program/project deliverables • Evaluating the program/project deliverables against set criteria • Obtaining sign off on nominated aspects of the program/project • Finalising revenues promised to support the program/project • Finalising payments related to program/project expenditure • Undertaking internal and/or external auditing • Undertaking formal reporting procedures. <i>Review program/project administration</i> may include: • Reviewing the documentation that was used • Reviewing the systems and procedures developed • Reviewing the command, control and communication structure • Reviewing the input, contribution, cooperation and collaboration received from joint partners and contracted service providers. <i>Evaluate the program/project</i> may include: • Evaluating the outcomes of the program/project • Evaluating the contribution made by sub-systems that supported the development and implementation phases • Identifying lessons for inclusion in subsequent management and monitoring activities relating to innovative tourism programs/projects • Evaluating the potential for additional/follow-on innovative tourism programs/projects.
--	--

Assessment Guide

The following skills and knowledge must be assessed as part of this unit:

- Enterprise policies and procedures in regard to management and monitoring of innovative tourism activities, including allocation of resources, communication and control and protocols relating to the involvement of external third parties
- Principles of project management and implementation including planning and control techniques
- Ability to use planning and project management tools
- Knowledge of budgeting strategies for projects
- Ability to use communication, research, problem solving and innumeracy skills
- Ability to relate to people from a range of social, cultural and ethnic backgrounds
- Ability to produce and use project-related documentation
- Ability to allocate and coordinate the work of team members on the program/project
- Ability to monitor program/project implementation and respond effectively to issues arising throughout the life of the initiative
- Ability to oversee a program/project and deliver identified deliverable(s) on time and within budget.

Linkages To Other Units

- Access and retrieve computer-based data
- Manage and resolve conflict situations
- Work effectively with colleagues and customers
- Work in a socially diverse environment
- Establish and maintain a business relationship
- Develop and implement a business plan

- Develop new products and services
- Produce documents, reports and worksheets on a computer
- Manage and implement small projects
- Plan and establish systems and procedures
- Work cooperatively in a general administration environment
- Develop and implement operational policies
- Audit financial procedures
- Manage financial performance within a budget
- Manage legal requirements for business compliance
- Provide professional support to business colleagues
- Recruit and select staff
- Develop and update tourism industry knowledge
- Develop and implement operational plans
- Manage operational risk
- Monitor tourism operations
- Construct and apply tourism product research
- Create, implement and evaluate strategic product initiatives
- Plan and implement sales activities
- Develop and manage business strategies
- Manage contractual agreements/commitments
- Manage and control operational costs
- Lead and manage a development team
- Source and package tourism products and services.

	Critical Aspects of Assessment Evidence of the following is essential: • Understanding of host countries and/or enterprise policies and procedures in regard to management and monitoring of innovative tourism activities, including allocation of resources, communication and control and protocols relating to the involvement of external third parties • Demonstrated ability to manage and monitor a nominated real or simulated innovative tourism program or project including: ▪ Describing the context for the program/project ▪ Developing a set of comprehensive, appropriate and detailed plans to guide program/project implementation ▪ Providing and describing ongoing, day-to-day operational management of implementation of the program/project ▪ Resolving issues arising during the course of the program/project ▪ Maintaining an appropriate control system for all resources ▪ Maintaining appropriate records in relation to program/project implementation ▪ Providing copies of reports generated as part of the implementation process ▪ Evaluating management and monitoring activities. Context of Assessment This unit may be assessed on or off the job: • Assessment should include practical demonstration either in the workplace or through a simulation activity, supported by a range of methods to assess underpinning knowledge • Assessment must relate to the individual's work area or area of responsibility.
--	---

	Resource Implications Training and assessment to include access to a real or simulated workplace; and access to workplace standards, procedures, policies, guidelines, tools and equipment. Assessment Methods The following methods may be used to assess competency for this unit: • Case studies • Observation of practical candidate performance • Oral and written questions • Analysis of portfolio of evidence, including plans, budgets, reports, feedback, program/project information, suggestions and recommendations • Problem solving • Role plays involving interaction with team members • Third party reports completed by a supervisor • Project and assignment work. Key Competencies in this Unit <i>Level 1 = competence to undertake tasks effectively</i> <i>Level 2 = competence to manage tasks</i> <i>Level 3 = competence to use concepts for evaluating</i>
--	---

	Key Competencies	Level	Examples
	Collecting, organising and analysing information	3	Capture information to use as the basis for the development of plans
	Communicating ideas and information	3	Share objectives, outcomes and responsibilities with team members
	Planning and organising activities	3	Schedule implementation and monitor activities
	Working with others and in teams	3	Collaborate with internal staff and external providers to deliver the required outcomes
	Using mathematical ideas and techniques	3	Calculate resource requirements and monitor resource usage
	Solving problems	3	Address issues arising throughout the life/implementation of the program/project
	Using technology	3	Use software programs to manage the project

Notes and PowerPoint slides

MANAGE AND MONITOR INNOVATIVE TOURISM PROGRAMS AND PROJECTS

D2.TGA.CL6.03
D2.TRM.CL9.10

Slide 1

Slide No	Trainer Notes
1.	Trainer welcomes students to class and introduces them to this unit.

Slide

Subject elements

This unit comprises three elements:

- Plan the administration of the innovative tourism program/project
- Coordinate the administration of the innovative tourism program/project
- Finalise the innovative tourism program/project

Slide 2

Slide No	Trainer Notes
2.	Trainer advises this Unit comprises three Elements, as listed on the slide explaining: • Each Element comprises a number of Performance Criteria which will be identified throughout the class and explained in detail • Trainees can obtain more detail from their Trainee Manual • At times the course presents advice and information about various protocols but where their workplace requirements differ to what is presented, the workplace practices and standards, as well as policies and procedures must be observed.

Slide

Assessment

Assessment for this unit may include:

- Oral questions
- Written questions
- Work projects
- Workplace observation of practical skills
- Practical exercises
- Formal report from supervisor

Slide 3

Slide No	Trainer Notes
3.	Trainer advises that assessment for this Unit may take several forms all of which are aimed at verifying they have achieved competency for the Unit as required. Trainer indicates the methods of assessment that will be applied to them for this Unit.

Slide

Element 1:

Plan the administration of the innovative tourism program/project

Slide 4

Slide No

Trainer Notes

4.

Introduce topic.

Class Activity – General Discussion

Ask general questions:

- What tourism projects or program do you know of?
- What activities do they involve?
- What planning would need to take place?

Slide

Plan the administration of the innovative tourism program/project

Performance Criteria for this Element are:

- Confirm the program/project
- Identify factors affecting timelines for implementation
- Develop program/project plans
- Link budget to key outcomes
- Identify monitoring and reporting arrangements
- Allocate resources

Slide 5

Slide No	Trainer Notes
5.	Trainer identifies the Performance Criteria for this Element, as listed on the slide.

Slide

Plan the administration of the innovative tourism program/project

Performance Criteria for this Element are:

- Integrate program/plan with other initiatives
- Confirm agreements with service providers
- Develop contingency plans
- Develop teams to support program/project implementation
- Select program/project management tools

Slide 6

Slide No	Trainer Notes
6.	Trainer identifies the Performance Criteria for this Element, as listed on the slide.

Slide

Projects and programs

Definition of terms innovative, project and program

What do these terms mean?

- Innovative
- Project
- Program

Slide 7

Slide No	Trainer Notes
7.	Class Activity – Discussion Ask general questions: • Discuss the questions in the slide

Slide

Projects and programs

Definition of innovative

The term innovative is defined as:

- *(of a product, idea, etc.) featuring new methods; advanced and original. "innovative designs"*
- *(of a person) introducing new ideas; original and creative in thinking*

Slide 8

Slide No	Trainer Notes
8.	Class Activity – Discussion Ask general questions: • What 'innovative' tourism activities do you know of? • What makes them innovative?

Slide

Projects and programs

Definition of project

The term project is defined as:

- *'an individual or collaborative enterprise that is carefully planned and designed to achieve a particular aim'*

Slide 9

Slide No	Trainer Notes
9.	Class Activity – Discussion Ask general questions: • What is a project? • What are examples of tourism projects?

Slide

Projects and programs

Definition of program

The term program is defined as:

- *'a planned series of future events, activities, items, or performances'*

Slide 10

Slide No	Trainer Notes
10.	Class Activity – Discussion Ask general questions: • What is a program? • What are examples of tourism programs? • How do projects differ from programs?

Slide

Projects and programs

Aspects of project or program to confirm

The aspects of a project or program to clarify includes:

- Type of program
- Objectives
- Key initiatives

Slide 11

Slide No	Trainer Notes
11.	Class Activity – Discussion Ask general questions: • Why are these aspects important to know? • How can you identify them? • What other aspects would you like to know?

Slide

Projects and programs

Identify types of tourism project or program

- Development of towns, locations and attractions to support tourism
- Development of tourism infrastructure - including transportation, roads, airports, electricity, water etc
- Creating new tourism-related businesses - including accommodation, shops, entertainment
- Development of tourism related education and training
- Developing tourism infrastructure
- Promoting tourism for the country or region

Slide 12

Slide No	Trainer Notes
12.	Class Activity – Discussion ● Discuss these types of projects/programs.

Slide

Projects and programs

Identify types of tourism project or program

- Preserving, rehabilitating or expanding tourism attractions
- Development of eco-tourism initiatives
- Conservation of local community wildlife
- Development of local conservation projects
- Development of sustainability projects
- Developing tourism policies and procedures
- Developing tourism activities and events

Slide 13

Slide No	Trainer Notes
13.	Class Activity – Discussion • Discuss these types of projects/programs.

Slide

Projects and programs

Identify types of tourism project or program

- Conducting tourism research projects
- Conducting environmental assessments
- Developing local communities
- Developing awareness of local community issues
- Conduct fundraising campaigns

COMPLETE ACTIVITY 1

Slide 14

Slide No	Trainer Notes
14.	Class Activity – Discussion & Activity • Discuss these types of projects/programs • Complete Activity 1.

Slide

Projects and programs

Identify reasons for possible tourism projects or programs

- Changes in customer expectations
- Substandard products
- Marketing
- Opportunity / commercial potential
- Changes in local and global economic conditions
- Strategic directions of local communities or individual tourism organisation
- Inability to service current demand

Slide 15

Slide No	Trainer Notes
15.	Class Activity – Discussion • Discuss these reasons • Identify the nature of projects or programs designed to satisfy these reasons.

Slide

Projects and programs

Identify reasons for possible tourism projects or programs

- Inappropriate operating practices for the current market place and visitors
- Visitor expectation levels below acceptable levels
- Visible destruction of local environment and habitat resulting from tourism operations
- Increase in conflict within local community resulting from increased tourism activity
- Lack of resources for service delivery

Slide 16

Slide No	Trainer Notes
16.	Class Activity – Discussion • Discuss these reasons • Identify the nature of projects or programs designed to satisfy these reasons.

Slide

Projects and programs

Methods to identify and clarify possible objectives

- Talking to local business owners and senior management
- Identifying the specific tourism goals and objectives of local communities
- Speaking to a broad cross-section of those affected by tourism within the local community
- Understanding the changes in demand for local services and facilities

Slide 17

Slide No	Trainer Notes
17.	Class Activity – Discussion • What information can you gather from these methods? • What other methods can you use?

Slide

Establish project objectives

Establish project or program objectives

- One of the initial aspects in planning innovative tourism projects or programs is to identify objectives you wish to achieve
- The objectives are the goals or targets to work towards and once defined, enable the planning of projects or programs to achieve them

Slide 18

Slide No	Trainer Notes
18.	Class Activity – Discussion Ask general questions: • What are examples of objectives? • Who sets them?

Slide

Establish project objectives

Factors impacting on project objectives

- Results of consultations with the community
- Input made by relevant stakeholder groups
- Identified opportunities and threats as revealed by the research which has been undertaken
- Government policies, initiatives and over-arching plans and strategies
- Economic imperatives
- Local government or in-country plans
- Need to care for the local environment
- Action being taken in relation to tourism activities/initiatives by other similar communities

Slide 19

Slide No	Trainer Notes
19.	Class Activity – Discussion Ask general questions: • What other factors may impact on objectives for projects?

Slide

Establish project objectives

Develop SMART objectives

- Specific
- Measurable
- Accurate
- Realistic
- Trackable

Slide 20

Slide No	Trainer Notes
20.	Class Activity – Discussion Ask general questions: • What are SMART objectives important? • What are examples of SMART objectives?

Slide

Establish project objectives

Types of objectives of tourism projects or programs

- What are types of objectives that may exist for tourism projects and programs in your region?

COMPLETE ACTIVITY 2

Slide 21

Slide No	Trainer Notes
21.	Class Activity – Discussion & Activity - Discuss the different types of objectives that may exist - Refer to TM Page 18 for examples - Complete Activity 2.

Slide

Factors impacting project implementation

Identify factors affecting timelines for project implementation

There are many factors that may affect the planning, implementation and timelines for the introduction of various tourism projects and plans.

- What are examples of factors?

Slide 22

Slide No	Trainer Notes
22.	Class Activity – Questions Discuss questions in the slide.

Slide

Factors impacting project implementation

Identify factors affecting timelines for project implementation

- Economic factors
- Environmental factors
- Technological factors
- Political factors
- Social factors
- Legal factors

Slide 23

Slide No	Trainer Notes
23.	Class Activity – Questions • Identify the elements within each of these factors that will impact on projects being implemented.

Slide

Factors impacting project implementation

Identify factors affecting timelines for project implementation

- Competitive factors
- Contractual obligations
- Integration with other programs and projects
- Advertised timelines for availability or implementation
- Weather and seasonality factors

Slide 24

Slide No	Trainer Notes
24.	Class Activity – Questions • Identify the elements within each of these factors that will impact on projects being implemented.

Slide

Factors impacting project implementation

Common conflict factors

- Competition for local government resources
- Conflicting opinions about tourism development options
- Perceived threat to local amenity by high visitor numbers
- Conflicting opinions regarding local government levies for tourism

Slide 25

Slide No	Trainer Notes
25.	Class Activity – Questions • What are the reasons for these conflict factors? • How can they be overcome to ensure implementation of projects takes place? • Trainer to provide examples.

Slide

Factors impacting project implementation

Common conflict factors

- Conflict between environmental and business groups
- Misunderstanding regarding the relative benefits and disadvantages of tourism to the host community
- Misinterpretation and misunderstanding of the effects of tourism on other host communities

COMPLETE ACTIVITY 3

Slide 26

Slide No	Trainer Notes
26.	Class Activity – Questions & Activity • What are the reasons for these conflict factors? • How can they be overcome to ensure implementation of projects takes place? • Trainer to provide examples • Complete Activity 3.

Slide

Factors impacting project implementation

Identify feasibility for new projects and programs

Criteria may relate to:

- Achievement of established objectives
- Availability of resources and equipment
- Code of ethics
- Cost effectiveness
- Fulfilment of purpose
- Impact to organisation

Slide 27

Slide No	Trainer Notes
27.	Class Activity – Questions • What are other examples of feasibility? • How do these points impact projects from commencing?

Slide

Factors impacting project implementation

Identify feasibility for new projects and programs

- Innovativeness of ideas or concepts
- Level of risk
- Level of skill, and understanding required for implementation
- Potential benefits
- Suitability for target clients
- Technical feasibility
- Time needed to realise concept

Slide 28

Slide No	Trainer Notes
28.	Class Activity – Questions • What are other examples of feasibility? • How do these points impact projects from commencing?

Slide

Develop program/project plans

Develop project plans

Project/program plans focus on:

- The end result and what needs to be done to get there
- How it is to be done

Slide 29

Slide No	Trainer Notes
29.	Class Activity – Questions • What are planning steps to be undertaken?

Slide

Develop program/project plans

Importance of developing tourism projects and program plans

- Identifies all activities in a logical and sequential order
- Provides a clear outline of the project activities
- Provides a constant reference point
- Facilitates the sharing of the plan
- Forces all or more planning considerations to be undertaken
- Allows for informed feedback in relation to the plan

Slide 30

Slide No	Trainer Notes
30.	Class Activity – Questions • What are planning steps to be undertaken?

Slide

Develop program/project plans

Activities associated with developing project and program plans

- Identifying relevant acquisition strategies for materials, information and resources
- Developing a specific budget and financial management strategy
- Developing communication and contract management plans
- Generating details cost estimates
- Preparing evaluation criteria for program/project progress and completion
- Determining final expected outcomes and measurable benefits

Slide 31

Slide No	Trainer Notes
31.	Class Activity – Questions • Discuss these activities • What tasks are associated with each of these activities?

Slide

Develop program/project plans

Activities associated with developing project and program plans

- Developing intellectual property strategies
- Determining milestones
- Clarifying objectives and purpose
- Defining deliverables and criteria for evaluating acceptance of same
- Developing a human resource plan
- Developing performance indicators
- Describing project control mechanisms

Slide 32

Slide No	Trainer Notes
32.	Class Activity – Questions • Discuss these activities • What tasks are associated with each of these activities?

Slide

Develop program/project plans

Activities associated with developing project and program plans

- Developing implementation and governance strategy
- Defining quality assurance and quality control strategies
- Identifying resource requirements
- Developing risk management protocols
- Defining relevant roles and responsibilities for those involved
- Deciding schedules and timelines

Slide 33

Slide No	Trainer Notes
33.	Class Activity – Questions • Discuss these activities • What tasks are associated with each of these activities?

Slide

Develop program/project plans

Activities associated with developing project and program plans

- Defining tasks and activities
- Coordinating staff
- Preparing program/project-specific documentation
- Processing income and payments relating to the program/project
- Planning general and specific project activities
- Planning administrative tasks

Slide 34

Slide No	Trainer Notes
34.	Class Activity – Questions • Discuss these activities • What tasks are associated with each of these activities?

Slide

Develop program/project plans

Contents of the project / program plan

- Identification of the type of the project/plan
- A summary of the purpose of the plan
- Explanation for the need for the project / program
- Identification of objectives to be achieved
- Breakdown of long-term and short term goals
- Service performance measures and metrics
- Key Performance Indicators

Slide 35

Slide No	Trainer Notes
35.	Class Activity – Review a project plan • Review a project plan.

Slide

Develop program/project plans

Contents of the project / program plan

- Identification of key stakeholders
- Key roles and responsibilities
- Overall schedule of proposed activities against a timeline
- Detail of activities to be conducted
- Workflow processes and standard operating procedures for implementation

Slide 36

Slide No	Trainer Notes
36.	Class Activity – Review a project plan • Review a project plan.

Slide

Develop program/project plans

Contents of the project / program plan

- Budget and resources required to implement plan
- Potential risks and mitigating actions to manage the risks
- Contingency plans
- Reporting plans
- Timelines for completion

COMPLETE ACTIVITY 4

Slide 37

Slide No	Trainer Notes
37.	Class Activity – Review a project plan & Activity • Review a project plan • Complete Activity 4.

Slide

Link budget to key outcomes

Importance of budgets

One of the tools that assists project managers to plan and monitor finances associated with programs is a good budgeting system.

The product of this system is a document called a budget.

- What is a budget?
- How are they beneficial?
- How are they created?

Slide 38

Slide No

Trainer Notes

38.

Discussion

- Discuss the questions in the slide.

Slide

Link budget to key outcomes

Link budget to key objectives

This should include:

- Prioritising outcomes
- Ensuring accountability and transparency
- Ensuring all resource types are involved as required, such as human, physical and financial
- Developing explanatory notes to supplement the allocation of resources

Slide 39

Slide No	Trainer Notes
39.	Discussion • Discuss the importance of these points.

Slide

Link budget to key outcomes

Types of budgets

- Sales budgets
- Labour budgets
- Material budgets
- Inventory budget
- Overhead budgets
- Capital Expenditure budgets
- Budgeted Financial Performance Statement
- Cash budgets
- Budgeted Statement of Financial Position

Slide 40

Slide No	Trainer Notes
40.	Discussion & Review examples of budgets • What is the purpose of each of these budgets? • What information is included within these budgets? • Trainer to show examples of each of these budgets.

Slide

Link budget to key outcomes

Key requirements for budgets

When preparing budgets it is important to identify:

- The time frame or period to which the budget applies
- The budget line items to be included, including what is contained in each budget line items
- What departments or areas of responsibility individual budget line items will be grouped towards
- Budget line codes

Slide 41

Slide No	Trainer Notes
41.	Discussion • What are other considerations?

Slide

Determine project revenue

Considerations when estimating project revenue

- Aims of the project or program
- Competition
- Economy
- History
- Industry trends
- Other similar projects or programs
- Sales targets
- Key Performance Indicators
- Seasonality

Slide 42

Slide No	Trainer Notes
----------	---------------

42.

Discussion

- What are other considerations when determining revenue for projects?

Slide

Determine project expenditure

Considerations when estimating project expenses

- Materials
- Employees
- Equipment
- Contracted labour
- Compensation
- Products
- Rent
- Advertising
- Insurance
- Office expenses
- Maintenance
- Capital expenditures

Slide 43

Slide No	Trainer Notes
43.	Discussion • What are other examples of project expenses?

Slide

Determine project expenditure

Activities in estimating project expenses

The activities involved in estimating costs can include:

- Identifying each possible cost
- Calculating projected volumes or items required
- Factoring contingency costs
- Obtaining quotations, price lists and catalogues from potential suppliers
- Negotiating prices with suppliers

Slide 44

Slide No	Trainer Notes
44.	Discussion • What are other examples of project expenses?

Slide

Determine budget controls

Budget controls

What are budget controls you can implement to control:

- Revenue?
- Expenses?

Slide 45

Slide No	Trainer Notes
45.	Discussion • Answer questions in the slide • Refer to TM Pages 40-41 for examples.

Slide

Determine budget controls

Monitor budgets

- Why is it important to monitor budgets?
- How can you monitor budgets?
- What aspects of a budget would be your focus?

COMPLETE ACTIVITY 5

Slide 46

Slide No	Trainer Notes
46.	Discussion & Activity • Answer questions in the slide • Complete Activity 5.

Slide

Establish monitoring arrangements

Importance of monitoring projects and programs

All project activities must be monitored to find out:

- If they reflect the project objectives
- What is being done correctly
- Are in line with time and budget requirements
- What needs improvement, by identifying causes and remedy

Slide 47

Slide No	Trainer Notes
47.	Discussion • What is the importance of monitoring projects or programs?

Slide

Establish monitoring arrangements

Establish monitoring and reporting arrangements

Whilst each project is unique, common monitoring and reporting arrangements may include:

- Financial management arrangements
- Record keeping
- Reporting framework and schedule, including team reports
- Project management software and other tools, such as Gantt and bar charts
- Program Evaluation and Review Technique (PERT)

Slide 48

Slide No	Trainer Notes
48.	Discussion • Discuss the different types of monitoring tools.

Slide

Establish monitoring arrangements

Establish monitoring and reporting arrangements

- Critical Path Method
- Cost schedule control system
- Spreadsheets
- Charts including project control chart, control point chart
- Milestone chart and budget control chart
- Defining report requirements

COMPLETE ACTIVITIES 6&7

Slide 49

Slide No	Trainer Notes
49.	Discussion & Activities • Discuss the different types of monitoring tools • Complete Activities 6 & 7.

Slide

Establish monitoring arrangements

Importance of monitoring projects and programs

- Why is it important to identify monitoring criteria?
- What are the aims of monitoring project activities?
- What areas of a project can you evaluate?

COMPLETE ACTIVITY 8

Slide 50

Slide No	Trainer Notes
50.	Discussion & Activity • Discuss the questions in the slide • Refer to TM Pages 46-47 for examples • Complete Activity 8.

Slide

Establish reporting arrangements

Decision to be taken about reports

- The types of reports to be prepared
- What information is to be included in reports
- Who is to prepare reports
- The frequency with which reports are to be generated and disseminated
- The distribution list of who will receive these reports
- The method that will be use to disseminate the reports

COMPLETE ACTIVITY 9

Slide 51

Slide No	Trainer Notes
51.	Discussion & Activity • What types of reports need to be prepared? • Complete Activity 9.

Slide

Allocate project resources

Importance of identifying capabilities and resources

The key aspects of achieving project or program success is through the use of capabilities and resources.

Whilst it is important to review the 'end results' as identified in previous sections, it is important to identify the capabilities and resources used in successfully undertaking projects or programs.

- What are capabilities?
- What are resources?

Slide 52

Slide No	Trainer Notes
52.	Class Activity – Questions • Answer questions in the slide.

Slide

Allocate project resources

Activities associated with allocating resources

- Establishing budgets
- Establishing scopes of authority and discretionary powers relating to resources
- Defining systems and procedures to guide the use and application of resources
- Prioritising operational activities
- Scheduling tasks and the overall workload for the program/project
- Breaking tasks into sub-tasks

Slide 53

Slide No	Trainer Notes
53.	Class Activity – Discussion • Discuss these activities • What tasks are associated with each of these activities?

Slide

Allocate project resources

Activities associated with allocating resources

- Arranging tasks into groups, where applicable
- Facilitating team involvement in task and resources allocations
- Allocating responsibilities to align with resources provided
- Delegating tasks
- Imposing constraints and limitations on resource availability and usage
- Establishing line/chain of command protocols

Slide 54

Slide No	Trainer Notes
54.	Class Activity – Discussion • Discuss these activities • What tasks are associated with each of these activities?

Slide

Allocate project resources

Types of capabilities

- Products and or services
- Capacity to produce goods or services
- Equipment capacity
- Skill level of staff, management and owners
- Hours of operation
- Communication capabilities
- Location/position of the agency
- E-business capacity
- Need for specialist assistance in certain areas
- Maintaining a competitive advantage

Slide 55

Slide No	Trainer Notes
55.	Class Activity – Questions • Discuss these capabilities.

Slide

Types of project resources

Physical resources

These types of resources are essential in performing basic operational activities.

They include:

- Equipment
- Raw materials
- Stock
- Technology
- Location

Slide 56

Slide No	Trainer Notes
56.	Class Activity – Questions Provide examples for each type of resource.

Slide

Types of project resources

Financial resources

Types of financial resources include:

- Cash
- Stock
- Equity
- Loans

Slide 57

Slide No	Trainer Notes
57.	Class Activity – Questions • Provide examples for each type of resource.

Slide

Types of project resources

Human resources

Human resources include:

- Physical number of staff
- Staff expertise
- Skills
- Knowledge

Slide 58

Slide No	Trainer Notes
58.	Class Activity – Questions • Provide examples for each type of resource.

Slide

Types of project resources

Intangible resources

Whilst these are not 'seen' they are certainly important in the service industry.

- Reputation
- Good will
- Image
- Brand

Slide 59

Slide No	Trainer Notes
59.	Class Activity – Questions • Provide examples for each type of resource.

Slide

Factors affecting project resources

Internal factors

- Nature of the project or program
- Project activities
- Directions the business wishes to take
- Target markets
- Service levels and standards
- Services and products provided
- Equipment used

Slide 60

Slide No

Trainer Notes

60.

Class Activity – Questions

- How do these factors affect resources?

Slide

Factors affecting project resources

Internal factors

- The existing reputation and image of the business
- Budget
- Existing resources
- Volume of customers
- Promises made

Slide 61

Slide No	Trainer Notes
61.	Class Activity – Questions • How do these factors affect resources?

Slide

Factors affecting project resources

External factors

- The external business environment
- Customer expectations
- Emerging trends
- Changes in legislation and technology
- Availability of resources

COMPLETE ACTIVITY 10

Slide 62

Slide No	Trainer Notes
62.	Class Activity – Questions & Activity • How do these factors affect resources? • Complete Activity 10.

Slide

Factors affecting project resources

Utilising community resources

As well as gathering and using resources from within the organisation itself, there may be a range of resources within the local community that may also be used to undertake project activities.

- What are the benefits of using local community resources?
- What are types of local community resources?
- How can you identify local community resources?

Slide 63

Slide No	Trainer Notes
63.	Class Activity – Questions • Discuss the questions in the slide.

Slide

Factors affecting project resources

Identify tourism infrastructure inventory and tourism carrying capacity

An audit and assessment of the existing tourism infrastructure and carrying capacity allows an organisation to understand the extent which not only the project can be implemented but also the extent in which public resources can be obtained or used.

- What is 'infrastructure inventory'?
- What are examples of local infrastructure?

COMPLETE ACTIVITY 11

Slide 64

Slide No	Trainer Notes
64.	Class Activity – Questions & Activity • Discuss the questions in the slide • Complete Activity 11.

Slide

Integrate program/plan with other initiatives

Importance of integrating all business initiatives

Whilst it is important to plan each project or program as a separate entity, it is still vital to remember that a tourism organisation will be conducting other activities simultaneously.

These activities include, but not limited to:

- Normal operational activities
- Marketing
- Special promotions
- Events
- Training and development initiatives
- Refurbishments or upgrading of resources
- Other programs or projects

Slide 65

Slide No	Trainer Notes
65.	Discussion • How can you integrate projects with other business activities?

Slide

Integrate program/plan with other initiatives

Types of integrating considerations

Whilst the types of integration activities will depend on the complexity, size and nature of activities to be integrated, considerations include:

- Capitalising on economies of scale
- Utilising staff with complimentary skills, knowledge and experience in associated areas and disciplines
- Minimising unnecessary duplication
- Centralising operations to facilitate control and minimise expenditure

COMPLETE ACTIVITY 12

Slide 66

Slide No	Trainer Notes
66.	Discussion & Activity • How can you accommodate these considerations? • Complete Activity 12.

Slide

Obtain project approvals and agreements

Importance of obtaining approvals and agreements

Given that most innovative projects or programs will involve many activities, using much needed resources, provided by a range of internal and external suppliers, it is important that all necessary approvals and agreements confirmed with all necessary stakeholders.

- Why is this important?

Slide 67

Slide No	Trainer Notes
67.	Discussion Discuss the question in the slide.

Slide

Obtain project approvals

Obtaining approvals

- What approvals are needed?
- Who needs to give the approval?
- What methods can be used to get the approval?
- What funding approval needs to be sought?
- When is local community approval required?
- What feedback should be gathered by stakeholders when gaining approval?

COMPLETE ACTIVITY 13

Slide 68

Slide No	Trainer Notes
68.	Discussion & Activity • Discuss the questions in the slide • Complete Activity 13.

Slide

Joint ventures and strategic alliances

Explore the potential for joint ventures and strategic alliances.

- Where new projects or programs incorporate activities or initiatives that are outside the normal business stream, there may be an opportunity for your business to form a joint venture or strategic alliance with another organisation

COMPLETE ACTIVITY 14

Slide 69

Slide No	Trainer Notes
69.	Questions and Activity - Identify different types of successful ventures or strategic alliances between companies when conducting projects - Complete Activity 14.

Slide

Obtain project agreements

Confirming agreements with service suppliers

Agreements with service providers may include:

- Legally contracted arrangements
- Word-of-mouth agreements
- Previous services provided by suppliers
- Negotiating changes to existing arrangements
- Clarifying issues
- Establishing operational protocols to guide/control the integration of service providers into the program/project

COMPLETE ACTIVITY 15

Slide 70

Slide No	Trainer Notes
70.	Discussion & Activity • What service providers could you use? • What terms and conditions would need to be confirmed? • Complete Activity 15.

Slide

Develop project contingency plans

Importance of contingency plans

Contingency plans need to be prepared for all possible risk situations that may occur during the implementation of projects or programs.

- What is the purpose of a contingency plan?
- What information is contained within a contingency plan?

Slide 71

Slide No	Trainer Notes
71.	Discuss • Discuss question in the slide.

Slide

Develop project contingency plans

Importance of planning for unforeseen events

- To provide direction in the event of negative situations
- To mitigate negative outcomes
- To allow the project to continue, resume or recover normal business
- Because things do not always go as planned
- To address 'due diligence' requirements
- To protect the ongoing viability of the project
- To optimise project performance
- To provide you with a sense of security

Slide 72

Slide No	Trainer Notes
72.	Discuss ● Discuss importance of these points.

Slide

Develop project contingency plans

Contingency plans for 'positive' and 'negative' situations

Contingency plans can be developed to address:

- Positive situations
- Negative situations

Slide 73

Slide No	Trainer Notes
73.	Discuss • What are examples of both? • What contingencies can you put into place for both?

Slide

Develop project contingency plans

Contingency plan activities

Identifying situations that may require contingency management plans, including:

- Operational issues
- Time-related issues
- Changed marketplace conditions
- Obtaining stakeholder agreement
- Identifying trigger points for implementation
- Developing contingency management structure, composition and policies
- Writing and approving draft contingency management plans

Slide 74

Slide No	Trainer Notes
74.	Discuss What tasks are associated with these activities?

Slide

Develop project contingency plans

Common contingencies to be addressed

- Unsuccessful activities
- Substandard work performed by contractors
- Inability of service providers to provide products and services
- Terrorism
- Economic collapse
- Faults and malfunctions occur with significant organisational equipment and systems
- Adverse weather conditions

Slide 75

Slide No	Trainer Notes
75.	Discuss • What are examples of each?

Slide

Develop project contingency plans

Common contingencies to be addressed

- Changes to bookings
- Labour disputes
- Funding shortfalls
- Data loss
- Loss of a major client
- Power failure
- Loss or absence of key staff
- Death of customer

Slide 76

Slide No

Trainer Notes

76.

Discuss

- What are examples of each?

Slide

Develop project contingency plans

Contents of a contingency plan

- Title of the plan
- Actions to take
- Conditions and circumstances for action
- Responsibilities for actions
- Timelines
- Resources
- Parameters
- Intended results

COMPLETE ACTIVITY 16

Slide 77

Slide No	Trainer Notes
77.	Discuss & Activity • What are examples of each section of a contingency plan? • Refer to TM Pages 68-70 for examples • Complete Activity 16.

Slide

Develop teams to support project

Once all the plans have been identified for proposed projects or programs, it is now time to identify:

- The structure of the different roles required to successfully implement all initiatives and
- Possible learning and development to get personnel equipped to undertake their roles

Slide 78

Slide No	Trainer Notes
78.	Discuss • What are these activities important? • What tasks are involved in these activities?

Slide

Develop teams to support project

Identify team structure for projects / programs

- Structure of the team
- Possible positions and titles
- Lines of authority, responsibility and communication
- Key responsibilities and tasks for each position
- Size of teams for each position
- Selecting appropriate persons by matching team skills to the identified program/project needs, objectives, purpose or outcomes

COMPLETE ACTIVITY 17

Slide 79

Slide No	Trainer Notes
79.	Discuss & Activity • What tasks are involved in these activities? • Complete Activity 17.

Slide

Develop teams to support project

Develop project/program team

The process of implementing training and development for a project team may involve:

- Analyse training needs through gap analysis on project specifications and available capabilities
- Establish training needs for project team
- Organise learning for individuals or in groups
- Monitor learning roadmap to ensure adherence to plan

Slide 80

Slide No	Trainer Notes
----------	---------------

80.

Discuss

- What tasks are involved in these activities?

Slide

Develop teams to support project

Identify learning and development opportunities

All learning activities should, therefore be selected to ensure they:

- Appropriate to the identified project and learning objectives
- Appropriate, suitable and acceptable to the preferred learning style of participants
- Appropriate to the equipment and resources available to support the activity

Slide 81

Slide No	Trainer Notes
81.	Discuss • What tasks are involved in these activities?

Slide

Develop teams to support project

Types of learning and development opportunities

- What types of learning and development opportunities can be used to develop teams?

COMPLETE ACTIVITY 18

Slide 82

Slide No	Trainer Notes
82.	Discuss & Activity - Discuss question in the slide - Complete Activity 18.

Slide

Element 2:

Coordinate the administration of the innovative tourism program/project

Slide 83

Slide No	Trainer Notes
83.	Introduce topic. Class Activity – General Discussion Ask general questions: • What activities are associated with the coordination and administration of projects?

Slide

Coordinate the administration of the innovative tourism program/project

Performance Criteria for this Element are:

- Allocate tasks and resources
- Maintain financial control systems
- Monitor program/project progress
- Report program/project progress
- Maintain program/project records
- Manage start-up activities and manage project implementation

Slide 84

Slide No	Trainer Notes
84.	Trainer identifies the Performance Criteria for this Element, as listed on the slide.

Slide

Allocate tasks and resources

Activities associated with allocating tasks and resources

- Complying with approved/established plans
- Modifying allocations on the basis of extra funds available
- Taking action to address changes in the operational and implementation context for the program/project
- Communicating actions taken to the appropriate team members and relevant stakeholders

Slide 85

Slide No	Trainer Notes
85.	Discussion • Discuss the activities.

Slide

Allocate tasks and resources

Activities associated with allocating tasks and resources

- Recording actions taken
- Ensuring resource allocations align with established guidelines and accountability protocols
- Ensuring transparency of relevant decision making processes and the expenditure of funds

Slide 86

Slide No	Trainer Notes
86.	Discussion • Discuss the activities.

Slide

Allocate tasks and resources

Project/program implementation considerations

- Compliance requirements
- Occupational safety and health (OSH)
- Legal liability exposure
- Integration with other aspects of the business
- Timing issues
- Resources
- Changes to policies and procedures
- Documentation & record keeping
- Impact on organisational culture

Slide 87

Slide No	Trainer Notes
87.	Discussion • How can these considerations impact on the implementation of projects?

Slide

Allocate tasks and resources

Identify predictable consequences of implementing new projects

- Disruptions to routine
- Problems with timelines
- Issues with reporting structure
- Extra support required by employees

Slide 88

Slide No	Trainer Notes
----------	---------------

88.	
-----	--

	Discussion
--	-------------------

- | | |
|--|--|
| | <ul style="list-style-type: none">• How can you minimise these points? |
|--|--|

Slide

Allocate tasks and resources

Communicating project/program

- The nature of the project/program
- Purpose of the project/program
- Background information resulting in the creation of the project/program
- Objectives of the project/program
- Overall implementation strategy
- Outline of the project/program activities
- Timelines for completion
- Communication channels
- Project expectations

Slide 89

Slide No	Trainer Notes
89.	Discussion • Discuss importance of communicating these points.

Slide

Allocate tasks and resources

Communicating project/program responsibilities and tasks

- Structure of the project time
- Level of responsibility and authority
- Start dates of change
- Expected completion date
- Pre-change activities including attending meetings, reading job descriptions etc
- Activities to be performed
- Resources required to implement the plan

Slide 90

Slide No	Trainer Notes
----------	---------------

90.	Discussion • Discuss importance of communicating these points.
-----	---

Slide

Allocate tasks and resources

Communicating project/program responsibilities and tasks

- Work breakdown
- Involvement of other staff
- Training to be taken
- Support mechanisms
- Expected standard of performance
- Milestones for completion
- Budgets to work within
- Methods of communication
- Making observations
- Providing feedback

Slide 91

Slide No	Trainer Notes
91.	Discussion • Discuss importance of communicating these points.

Slide

Allocate tasks and resources

Methods to communicate project and roles

The communication of new project or program information may occur in various ways.

- What methods can be used?
- What are the advantages of these methods?

COMPLETE ACTIVITY 19

Slide 92

Slide No	Trainer Notes
92.	Discussion & Activity • Discuss questions in the slide • Complete Activity 19.

Slide

Manage project implementation

Manage project implementation activities

The activities associated with managing project implementation may include:

- Refining project plans
- Consulting with steering committees and other relevant stakeholders
- Initiating and operating identified systems, procedures, processes, practices and policies
- Facilitating operational and implementation understanding regarding the program/project

Slide 93

Slide No	Trainer Notes
93.	Discussion • Discuss monitoring activities in the slide.

Slide

Manage project implementation

Manage project implementation activities

- Ensuring the requirements of all relevant plans are implemented as required or amended on the basis of feedback received and issues arising
- Providing leadership and direction to team members
- Responding appropriately to established system triggers as operational demands dictate

Slide 94

Slide No	Trainer Notes
94.	Discussion • Discuss monitoring activities in the slide.

Slide

Manage project implementation

Manage project implementation activities

- Soliciting input and feedback from team members and relevant stakeholders
- Resolving disputes and disagreements relating to program/project implementation
- Negotiating program/project change proposals throughout the life of the initiative
- Apply consulting and reporting mechanisms

Slide 95

Slide No	Trainer Notes
95.	Discussion • Discuss monitoring activities in the slide.

Slide

Manage project implementation

Identify support and resources required to support implementation of new project/program strategies

What types of support can be provided to project team members during the implementation of projects and programs?

- Task functions
- Maintenance functions

COMPLETE ACTIVITY 20

Slide 96

Slide No	Trainer Notes
96.	Discussion & Activity • Discuss question in the slide • Explain the difference between these two types of functions • Refer to TM Pages 87-88 for examples • Complete Activity 20.

Slide

Maintain financial control systems

Importance of financial management

It is essential that project managers are able to manage the financial aspects of a project or program.

- How can you manage the finances of a project or program?
- What tools can help you manage finances?

Slide 97

Slide No	Trainer Notes
97.	Discussion • Discuss the questions in the slide.

Slide

Maintain financial control systems

Focus of financial management

Depending on whether the project or program generates revenue or is a 'cost only' exercise, successful financial management can be achieved by making decisions about:

- Profitability - generating sales, controlling costs and expenses
- Liquidity - managing cash flows and maintaining sufficient cash reserves

Slide 98

Slide No	Trainer Notes
98.	Discussion • How can you manage these aspects?

Slide

Maintain financial control systems

Focus of financial management

- Sales, costs and profit
- Internal control
- Pricing decisions
- Cash flow
- Performance compared with budget
- Stability – short term and long term

Slide 99

Slide No	Trainer Notes
99.	Discussion • How can you manage these aspects?

Slide

Maintain financial control systems

Financial management procedures and processes

Financial management involves the following procedures and processes:

- Book-keeping
- Reporting
- Analysing and interpreting the reports

Slide 100

Slide No	Trainer Notes
----------	---------------

100.

Discussion

- What activities are involved?

Slide

Maintain financial control systems

Financial control activities

- Entering data into established budgets
- Approving expenditures
- Obtaining necessary quotations for expenses over a designated amount
- Verifying purchases, payments and products/services received
- Auditing the books
- Ensuring budgetary controls and guidelines are being met

Slide 101

Slide No	Trainer Notes
101.	Discussion • What activities are involved?

Slide

Maintain financial control systems

Principles of a good financial control system

- Establish preventative procedures
- Management supervision is required
- Monitor and update systems
- Use employee selection and training systems
- Establish responsibilities
- Prepare written procedures
- Maintain adequate records

Slide 102

Slide No	Trainer Notes
102.	Discussion • Discuss the importance of these principles • What tasks are involved in these principles?

Slide

Maintain financial control systems

Principles of a good financial control system

- Meet relevant statutory requirements
- Separate record-keeping and control of assets
- Limit staff access to assets
- Conduct surprise checks
- Divide the responsibility for related transactions
- Rotating jobs also reduces collusion
- Insist on mandatory vacations
- Explain the reasons so those carrying out control functions

Slide 103

Slide No	Trainer Notes
103.	Discussion • Discuss the importance of these principles • What tasks are involved in these principles?

Slide

Maintain financial control systems

Principles of a good financial control system

- Use machines and technology
- Set standards and evaluate results
- Design forms and reports specific to the business
- Control mis-use of documents
- Have an audit trail
- Supervise the system and conduct reviews
- Conduct external audits

Slide 104

Slide No	Trainer Notes
104.	Discussion • Discuss the importance of these principles • What tasks are involved in these principles?

Slide

Maintain financial control systems

Financial monitoring activities

- Ensuring compliance with accounting policies and procedures
- Ensuring accuracy and completeness in entries and records
- Ensuring regular review and up-date of accounting policies and procedures
- Ensuring daily records are maintained
- Ensuring financial records are maintained
- Ensuring the security of all assets and accounting records
- Monitoring financing facilities

COMPLETE ACTIVITY 21

Slide 105

Slide No	Trainer Notes
105.	Discussion & Activity • What tasks are involved in these activities? • Complete Activity 21.

Slide

Maintain financial control systems

Take remedial action to address financial control problems

- What are common types of financial problems in projects or programs?
- How can you identify them?
- How can you control / resolve the financial problems?

Slide 106

Slide No	Trainer Notes
----------	---------------

106.

Discussion

- Discuss the questions in the slide.

Slide

Monitor program/project progress

Importance of monitoring progress

The key to monitoring the progress of project or program strategies is to be proactive.

- What is monitoring?
- Why is monitoring important?
- How can you monitor?
- What would you like to monitor?

Slide 107

Slide No	Trainer Notes
107.	Discussion • Discuss the questions in the slide.

Slide

Monitor program/project progress

Areas of project or program to monitor

These operations can include:

- Achievement of project objectives
- Relevance of original objectives against changing industry and customer needs and trends
- Feedback from stakeholders
- The procedures or systems
- The workflow
- Whether or not there are gaps or overlaps in activities or resources used

Slide 108

Slide No

Trainer Notes

108.

Discussion

- How can you monitor each of these areas?

Slide

Monitor program/project progress

Areas of project or program to monitor

- The workload of team members
- The time it takes to undertake activities
- Completion of individual timelines
- Costs associated with project or program
- Involvement from stakeholders
- Impact on environment or local community
- Level of stakeholder satisfaction with the project or program initiatives provided

Slide 109

Slide No	Trainer Notes
109.	Discussion • How can you monitor each of these areas?

Slide

Monitor program/project progress

Steps of monitoring project /program activities

- Work out what needs to be evaluated
- Select monitoring methods
- Compare what is happening with what should be happening
- Take appropriate action

Slide 110

Slide No	Trainer Notes
----------	---------------

110.

Discussion

- Discuss these steps
- What activities are associated with each of these steps?

Slide

Monitor program/project progress

Monitoring methods

- What are examples of monitoring methods?
- Refer to TM Pages 98-99

COMPLETE ACTIVITY 22

Slide 111

Slide No	Trainer Notes
111.	Discussion & Activity • Discuss the question in this slide • When would each of these monitoring methods best be used? • Complete Activity 22.

Slide

Monitor program/project progress

Monitoring project team member performance

Whilst it is important to monitor the project itself, it is still important to monitor the performance of individual team members.

- What activities are associated with monitoring team member performance?
- What areas of performance would you like to monitor?

Slide 112

Slide No	Trainer Notes
112.	Discussion • Discuss the question in this slide • Refer to TM Page 101.

Slide

Monitor program/project progress

Obtain feedback from key stakeholders

- Why is this important?
- What are the objectives when collecting and reviewing stakeholder feedback?
- What information would you like to get from stakeholders?

Slide 113

Slide No	Trainer Notes
113.	Discussion • Discuss the questions in this slide • Refer to TM Page 102.

Slide

Monitor program/project progress

Identify types of problems requiring corrective actions

The types of problems that may arise in project implementation but common problems may relate to:

- Product or service failures
- Long delays
- Escalating costs
- Inability to achieve objectives
- Government interference
- Competitor interference
- Inaccurate or conflicting information provided to stakeholders

Slide 114

Slide No	Trainer Notes
----------	---------------

114.

Discussion

- What causes these problems?
- How can they be overcome?

Slide

Monitor program/project progress

Identify types of problems requiring corrective actions

- Lack of resources required to implement projects
- Resource constraints
- Conflicts in priorities
- Lack of information
- Supplier delays
- Differences in opinion
- Interpersonal conflict

Slide 115

Slide No	Trainer Notes
115.	Discussion • What causes these problems? • How can they be overcome?

Slide

Monitor program/project progress

Identify types of problems requiring corrective actions

- Hazardous events
- Time constraints
- Electricity shortages
- Bad weather
- Shortfalls in expected outcomes
- Poor personnel performance

Slide 116

Slide No	Trainer Notes
----------	---------------

116.

Discussion

- What causes these problems?
- How can they be overcome?

Slide

Corrective action

Types of corrective actions

Quite simply, types of corrective actions taken to improve service operations may include:

- Improvements in the design of products or services
- Reviewing the allocation of resources for service operations
- Tweaking standard operating procedures to improve efficiency

Slide 117

Slide No	Trainer Notes
----------	---------------

117.

Questions

- What are examples of each type of action?

Slide

Initiate corrective action

Take appropriate corrective action

- This involves making the necessary adjustments to improve the level of service, productivity or customer satisfaction
- Depending on what is being monitored, involving staff in all or some stages of the monitoring process is likely to achieve better results

Slide 118

Slide No	Trainer Notes
118.	Class Activity – Questions • What are some examples of when operations have changed to improve the offering for customers?

Slide

Initiate corrective action

Short and long term corrective action

Corrective actions taken within an operation workplace context can be seen as either:

- Short term corrective action
- Long term corrective action

Slide 119

Slide No	Trainer Notes
119.	Class Activity – Questions • What is the difference between short term and long term action? • Why are these used?

Slide

Taking corrective action

Short term corrective action

It is sometimes necessary to take short term action to solve a problem until it can be looked at more closely and the problem dealt with more thoroughly.

Slide 120

Slide No

Trainer Notes

120.

Class Activity – Questions

- Why is this important to do?

Slide

Short term corrective action

Reasons for short-term action

- Isn't time to stop and analyse the problem more carefully and in more detail
- To provide the necessary or expected services to the customer
- To meet OSH requirements
- To deal with a complaint
- To get staff working together again
- To give you time to analyse and work through the problem at a later date

Slide 121

Slide No	Trainer Notes
121.	Class Activity – Questions • What are examples of problems that require short term solutions?

Slide

Short term corrective action

Considerations for short-term action

- Make a definite time to look at it more thoroughly later on
- Decide who to involve in further problem solving
- Inform staff and management it is a short term solution
- Cost the implications of tackling the problem this way

Slide 122

Slide No	Trainer Notes
122.	Class Activity – Discussion • Discuss points.

Slide

Long term corrective action

Management changes

- New management
- Change in orientation to service
- Setting of some new directions in relation to several other factors
- New management focus

Slide 123

Slide No	Trainer Notes
123.	Class Activity – Questions • Why can a change of management greatly change the direction of a business? • In what ways can the business change?

Slide

Long term corrective action

Organisational re-structures

- Change of personnel structure
- Elimination of positions
- New job roles
- Changes in job roles
- New knowledge or skills

Slide 124

Slide No

Trainer Notes

124.

Class Activity – Questions

- If a position changes, as a manager what must you do to ensure this happens effectively and smoothly?

Slide

Long term corrective action

Introduction of new equipment

New equipment means:

- Possible interruptions to operations for installation
- Training for staff
- Requires that staff can explain the new equipment to customers
- Changes in job roles
- Changes in procedures
- Changes to workflow

Slide 125

Slide No	Trainer Notes
125.	Class Activity – Questions • Think about a time when new equipment was introduced in a workplace. How did it interrupt operations and the role of staff? • What can a manager do to ensure new equipment is introduced with minimal disruption to staff and operations?

Slide

Long term corrective action

Recruitment practices

- Need to establish comprehensive job descriptions and job specifications
- Seeking of new knowledge and skills
- Change advertising strategy
- Revised interviewing and selection process
- Revised selection criteria

COMPLETE ACTIVITY 23

Slide 126

Slide No	Trainer Notes
126.	Class Activity – Discussion & Activity • Discuss the points in this slide and their impacts on the recruitment process • Complete Activity 23.

Slide

Report program/project progress

Report progress in a transparent manner

- A critical aspect of auditing the success of a project to date is to ensure the identified reports are produced and made available on the basis identified as being necessary for that project

Slide 127

Slide No	Trainer Notes
127.	Questions Ask general questions: • Why is it important to report progress? • What information should be included in a review? • Why is honesty and transparency essential?

Slide

Report program/project progress

Basic checks to ensure an effective reporting system

- The schedules for generation of project reports are established and being complied with
- The names of the projects reports required are identified
- The personnel who should generate these reports are identified
- The people to whom the reports are distributed are identified
- The method of distribution of the project reports is identified
- The personnel who must analyse the identified project reports are nominated
- Appropriate action is being taken to address deficiencies etc as identified from report analysis

Slide 128

Slide No	Trainer Notes
128.	Questions ● Explain the importance of these points.

Slide

Report program/project progress

Report schedules

Common schedules are:

- Daily
- Weekly
- Monthly
- Quarterly
- Annually
- Milestone and completion of key project activities

Slide 129

Slide No	Trainer Notes
129.	Questions Ask general questions: • What information should be reported at each of these times?

Slide

Report program/project progress

Activities associated with reporting project progress

Report program/project progress may include:

- Supporting reports with fact-based evidence
- Preparing written reports
- Providing verbal presentation and explanations
- Organising meetings with relevant stakeholders

Slide 130

Slide No	Trainer Notes
----------	---------------

130.	Questions Ask general questions: • What other activities can you conduct?
------	---

Slide

Report program/project progress

Methods to sharing progress information

- Holding team meetings
- Providing hard copy information
- Sharing information via the intranet
- Disseminating information at staff briefings

COMPLETE ACTIVITY 24

Slide 131

Slide No	Trainer Notes
131.	Class Activity – Questions & Activity Ask general questions: • What is the purpose of each type of presentation method? • Complete Activity 28.

Slide

Element 3:

Finalise the innovative tourism program/project

Slide 132

Slide No	Trainer Notes
132.	Introduce topic. Class Activity – General Discussion Ask general questions: • What classifies as the 'end of a project'? • What activities are associated with the finalising of a project/program?

Slide

Finalise the innovative tourism program/project

Performance Criteria for this Element are:

- Administer winding up activities for the program/project
- Review program/project administration
- Evaluate the program/project
- Report on program/project administration and results

Slide 133

Slide No	Trainer Notes
133.	Trainer identifies the Performance Criteria for this Element, as listed on the slide.

Slide

Administer winding up activities

Finalising a program or project

Quite often a tourism project or program is considered a separate entity to the rest of the tourism operations and hence will cease once the initial objectives have been achieved.

- What happens when the project comes to a conclusion?
- What are the steps involved in finalising and 'winding up' a project?

Slide 134

Slide No	Trainer Notes
134.	Discussion • Discuss the questions in the slide.

Slide

Administer winding up activities

Types of project/program finalisation activities

- Inspection of the program/project deliverables
- Testing operational capacity of the program/project deliverables
- Evaluating the program/project deliverables against set criteria
- Obtaining sign off on nominated aspects of the program/project
- Collecting feedback from stakeholders

Slide 135

Slide No	Trainer Notes
135.	Discussion • What tasks are associated with each of these finalising project activities? • Refer to TM Pages 113-116.

Slide

Administer winding up activities

Types of project/program finalisation activities

- Finalising revenues promised to support the program/project
- Finalising payments related to program/project expenditure
- Re-allocation of project team staff
- Finalise accounting documentation

Slide 136

Slide No	Trainer Notes
136.	Discussion • What tasks are associated with each of these finalising project activities? • Refer to TM Pages 113-116.

Slide

Administer winding up activities

Types of project/program finalisation activities

- Undertaking internal and/or external auditing
- Undertaking formal reporting procedures
- Promotion of project
- Dismantling of project offices

COMPLETE ACTIVITY 25

Slide 137

Slide No	Trainer Notes
137.	Discussion & Activity • What tasks are associated with each of these finalising project activities? • Refer to TM Pages 113-116 • Complete Activity 25.

Slide

Review program/project administration

Review questions

- Are we on track?
- Have we achieved what we planned?
- Are any variations acceptable, or do they require action?
- Were the original objectives realistic and achievable?
- Have we improved our strategic planning ability through these actions?

Slide 138

Slide No	Trainer Notes
138.	Discussion • What other questions would be the focus of a project review?

Slide

Review program/project administration

Review objectives

- Identify strengths
- Identify problems
- Help resolve problems
- Provide guidance

Slide 139

Slide No	Trainer Notes
139.	Discussion What other objectives would you have?

Slide

Review program/project administration

Activities associated with reviewing project/program administration

Review program/project administration may include:

- Reviewing the documentation that was used
- Reviewing the systems and procedures developed
- Reviewing the command, control and communication structure
- Reviewing the input, contribution, cooperation and collaboration received from joint partners and contracted service providers

Slide 140

Slide No	Trainer Notes
----------	---------------

140.	Discussion • What other activities would you undertake?
------	--

Slide

Review program/project administration

Timing of project/program reviews

- Quarterly reviews
- At the end of key activities
- Scheduled project milestones
- Performance reports
- Major events triggering a review
- At the conclusion of a project / program

COMPLETE ACTIVITY 26

Slide 141

Slide No	Trainer Notes
141.	Discussion & Activity • What information would you like to gather at each scheduled review period? • Complete Activity 26.

Slide

Evaluate the program/project

Importance of evaluation

Once the review of the project or program has taken place, it is important to evaluate the success of the project or program.

- How can this be done?
- What is the focus of evaluation?

Slide 142

Slide No	Trainer Notes
142.	Discussion Discuss the questions in the slide.

Slide

Evaluate the program/project

Difference between reviewing and evaluating success of project / program

In the previous section we looked at the process of 'reviewing' a project or program, whilst in this section we are focusing on 'evaluating' a project or program.

- What is the difference between these two activities?
- What is the focus of each of these activities?

COMPLETE ACTIVITY 27

Slide 143

Slide No	Trainer Notes
143.	Discussion & Activity • Discuss the questions in the slide • Complete Activity 27.

Slide

Evaluate the program/project

Aims of evaluating success of project / program

Aims of evaluating success of a project or program includes:

- Identify the actual progress against original project objectives
- Identify the overall success of the project or program
- Identifying areas which are being done well and rewarding accordingly

Slide 144

Slide No	Trainer Notes
----------	---------------

144.

Discussion

- Discuss these aims.

Slide

Evaluate the program/project

Aims of evaluating success of project / program

- Identifying where areas where the project or future projects can be improved through
- Identify the need for the project to continue, it is current or varied form
- Identify the impact and value the project or program has provided

Slide 145

Slide No	Trainer Notes
145.	Discussion • Discuss these aims.

Slide

Evaluate the program/project

Evaluation activities

- Assessing performance against the attainment of established indicators, including objectives, use of resources, timelines, execution of allocated responsibilities and budgets
- Evaluating the outcomes of the program/project
- Evaluating the contribution made by sub-systems that supported the development and implementation phases

Slide 146

Slide No	Trainer Notes
146.	Discussion Discuss these evaluation activities.

Slide

Evaluate the program/project

Evaluation activities

- Identifying lessons for inclusion in subsequent management and monitoring activities relating to innovative tourism programs/projects
- Evaluating the potential for additional/follow-on innovative tourism programs/projects
- Seeking opinions from relevant stakeholders
- Validating conclusions reached in relation to strategy performance

ACTIVITY 28

Slide 147

Slide No	Trainer Notes
147.	Discussion & Activity • Discuss these evaluation activities • Complete Activity 28.

Slide

Report project/program results

Explaining project performance related information

- Explaining if your project strategy and effort work
- Identifying the reasons why they work or not work
- Significant variations and the factors associated with the changes
- Unusual results and determine their causes

Slide 148

Slide No	Trainer Notes
148.	Class Activity – Discussion General discussion: • Discuss the importance of these points.

Slide

Report project/program results

Explaining performance related information

- Strengths and marketing opportunities
- Weaknesses and potential areas of improvement
- Impact / implications of the results and conclusions on performance

Slide 149

Slide No	Trainer Notes
149.	Class Activity – Discussion General discussion: • Discuss the importance of these points.

Slide

Report project/program results

Present recommendations for variation to project plans

- What are possible reasons for recommendations?
- What information needs to be included in a recommendation
- What are types of recommendations?

Slide 150

Slide No	Trainer Notes
150.	Class Activity – Discussion & Activity General discussion: • Discuss the questions in the slide.

Slide

Report project/program results

Steps associated with making recommendations

- Targeting recommendations to evidence-based outcomes
- Reviewing internal and external business environment factors
- Revising organisational policies and procedures
- Revising goals, objectives and targets
- Recommending changes in strategic directions for the organisation

Slide 151

Slide No	Trainer Notes
151.	Class Activity – Discussion General discussion: • Discuss the importance of these steps.

Slide

Make recommendations

Identify types of recommendations

- Leverage on identified strengths
- Address identified weaknesses
- Identified opportunities and threats
- Capitalising on golden opportunities
- Introducing, modifying or removing actions
- Changing the organisational structure
- Enable greater compliance
- Address future activity in relation to areas

Slide 152

Slide No	Trainer Notes
152.	Class Activity – Discussion General discussion: • What are examples under each of these points? • Refer to TM Pages 123-125 for examples.

Slide

Make recommendations

Inclusions in a recommendation

Now that we have identified a wide variety of recommendations that can be made, it is now time to put them into the appropriate format for presentation to appropriate stakeholders.

- What information should be included in a recommendation?

Slide 153

Slide No	Trainer Notes
153.	Class Activity – Questions Discuss question in the slide.

Instructions for Trainers for using PowerPoint – Presenter View

Connect your laptop or computer to your projector equipment as per manufacturers' instructions.

In PowerPoint, on the **Slide Show** menu, click **Set up Show**.

Under Multiple monitors, select the Show Presenter View check box.

In the **Display slide show** on list, click the monitor you want the slide show presentation to appear on.

Source: <http://office.microsoft.com>

Note:

In Presenter View:

You see your notes and have full control of the presentation

Your trainees only see the slide projected on to the screen

More Information

You can obtain more information on how to use PowerPoint from the Microsoft Online Help Centre, available at:

<http://office.microsoft.com/training/training.aspx?AssetID=RC011298761033>

Note Regarding Currency of URLs

Please note that where references have been made to URLs in these training resources trainers will need to verify that the resource or document referred to is still current on the internet. Trainers should endeavour, where possible, to source similar alternative examples of material where it is found that either the website or the document in question is no longer available online.
