# Competency Based Training (CBT) and assessment an introduction for trainers

## Competency

Competency refers to the ability to perform particular tasks and duties to the standard of performance expected in the workplace.

Competency requires the application of specified knowledge, skills and attitudes relevant to effective participation, consistently over time and in the workplace environment.

The essential skills and knowledge are either identified separately or combined.

*Knowledge* identifies what a person needs to know to perform the work in an informed and effective manner.

*Skills* describe the application of knowledge to situations where understanding is converted into a workplace outcome.

*Attitude* describes the founding reasons behind the need for certain knowledge or why skills are performed in a specified manner.

Competency covers all aspects of workplace performance and involves:

- Performing individual tasks
- Managing a range of different tasks
- Responding to contingencies or breakdowns
- Dealing with the responsibilities of the workplace
- Working with others.

## Unit of Competency

Like with any training qualification or program, a range of subject topics are identified that focus on the ability in a certain work area, responsibility or function.

Each manual focuses on a specific unit of competency that applies in the hospitality workplace.

In this manual a unit of competency is identified as a 'unit'.

Each unit of competency identifies a discrete workplace requirement and includes:

- Knowledge and skills that underpin competency
- Language, literacy and numeracy
- Occupational safety and health requirements.

Each unit of competency must be adhered to in training and assessment to ensure consistency of outcomes.

## Element of Competency

An element of competency describes the essential outcomes within a unit of competency.

The elements of competency are the basic building blocks of the unit of competency. They describe in terms of outcomes the significant functions and tasks that make up the competency.

In this manual elements of competency are identified as an 'element'.

## Performance criteria

Performance criteria indicate the standard of performance that is required to demonstrate achievement within an element of competency. The standards reflect identified industry skill needs.

Performance criteria will be made up of certain specified skills, knowledge and attitudes.

## Learning

For the purpose of this manual learning incorporates two key activities:

- Training
- Assessment.

Both of these activities will be discussed in detail in this introduction.

Today training and assessment can be delivered in a variety of ways. It may be provided to participants:

- On-the-job – in the workplace
- Off-the-job – at an educational institution or dedicated training environment
- As a combination of these two options.

No longer is it necessary for learners to be absent from the workplace for long periods of time in order to obtain recognised and accredited qualifications.

## Learning Approaches

This manual will identify two avenues to facilitate learning:

### Competency Based Training (CBT)

This is the strategy of developing a participant's competency.

Educational institutions utilise a range of training strategies to ensure that participants are able to gain the knowledge and skills required for successful:

- Completion of the training program or qualification
- Implementation in the workplace.

The strategies selected should be chosen based on suitability and the learning styles of participants.

## Competency Based Assessment (CBA)

This is the strategy of assessing competency of a participant.

Educational institutions utilise a range of assessment strategies to ensure that participants are assessed in a manner that demonstrates validity, fairness, reliability, flexibility and fairness of assessment processes.

## Flexibility in Learning

It is important to note that flexibility in training and assessment strategies is required to meet the needs of participants who may have learning difficulties. The strategies used will vary, taking into account the needs of individual participants with learning difficulties. However they will be applied in a manner which does not discriminate against the participant or the participant body as a whole.

## Catering for Participant Diversity

Participants have diverse backgrounds, needs and interests. When planning training and assessment activities to cater for individual differences, trainers and assessors should:

- Consider individuals' experiences, learning styles and interests
- Develop questions and activities that are aimed at different levels of ability
- Modify the expectations for some participants
- Provide opportunities for a variety of forms of participation, such as individual, pair and small group activities
- Assess participants based on individual progress and outcomes.

The diversity among participants also provides a good reason for building up a learning community in which participants support each other's learning.

## Participant Centred Learning

This involves taking into account structuring training and assessment that:

- *Builds on strengths* – Training environments need to demonstrate the many positive features of local participants (such as the attribution of academic success to effort, and the social nature of achievement motivation) and of their trainers (such as a strong emphasis on subject disciplines and moral responsibility). These strengths and uniqueness of local participants and trainers should be acknowledged and treasured
- *Acknowledges prior knowledge and experience* – The learning activities should be planned with participants' prior knowledge and experience in mind
- *Understands learning objectives* – Each learning activity should have clear learning objectives and participants should be informed of them at the outset. Trainers should also be clear about the purpose of assignments and explain their significance to participants
- *Teaches for understanding* – The pedagogies chosen should aim at enabling participants to act and think flexibly with what they know
- *Teaches for independent learning* – Generic skills and reflection should be nurtured through learning activities in appropriate contexts of the curriculum. Participants should be encouraged to take responsibility for their own learning
- *Enhances motivation* – Learning is most effective when participants are motivated. Various strategies should be used to arouse the interest of participants

- *Makes effective use of resources* – A variety of teaching resources can be employed as tools for learning
- *Maximises engagement* – In conducting learning activities, it is important for the minds of participants to be actively engaged
- *Aligns assessment with learning and teaching* – Feedback and assessment should be an integral part of learning and teaching
- *Caters for learner diversity* – Trainers should be aware that participants have different characteristics and strengths and try to nurture these rather than impose a standard set of expectations.

### **Active Learning**

The goal of nurturing independent learning in participants does not imply that they always have to work in isolation or solely in a classroom. On the contrary, the construction of knowledge in tourism and hospitality studies can often best be carried out in collaboration with others in the field. Sharing experiences, insights and views on issues of common concern, and working together to collect information through conducting investigative studies in the field (active learning) can contribute a lot to their eventual success.

Active learning has an important part to play in fostering a sense of community in the class. First, to operate successfully, a learning community requires an ethos of acceptance and a sense of trust among participants, and between them and their trainers. Trainers can help to foster acceptance and trust through encouragement and personal example, and by allowing participants to take risks as they explore and articulate their views, however immature these may appear to be. Participants also come to realise that their classmates (and their trainers) are partners in learning and solving.

Trainers can also encourage cooperative learning by designing appropriate group learning tasks, which include, for example, collecting background information, conducting small-scale surveys, or producing media presentations on certain issues and themes. Participants need to be reminded that, while they should work towards successful completion of the field tasks, developing positive peer relationships in the process is an important objective of all group work.

## **Competency Based Training (CBT)**

### **Principle of Competency Based Training**

Competency based training is aimed at developing the knowledge, skills and attitudes of participants, through a variety of training tools.

### **Training Strategies**

The aims of this curriculum are to enable participants to:

- Undertake a variety of subject courses that are relevant to industry in the current environment
- Learn current industry skills, information and trends relevant to industry
- Learn through a range of practical and theoretical approaches
- Be able to identify, explore and solve issues in a productive manner

- Be able to become confident, equipped and flexible managers of the future
- Be 'job ready' and a valuable employee in the industry upon graduation of any qualification level.

To ensure participants are able to gain the knowledge and skills required to meet competency in each unit of competency in the qualification, a range of training delivery modes are used.

### **Types of Training**

In choosing learning and teaching strategies, trainers should take into account the practical, complex and multi-disciplinary nature of the subject area, as well as their participant's prior knowledge, learning styles and abilities.

Training outcomes can be attained by utilising one or more delivery methods:

#### ***Lecture/Tutorial***

This is a common method of training involving transfer of information from the trainer to the participants. It is an effective approach to introduce new concepts or information to the learners and also to build upon the existing knowledge. The listener is expected to reflect on the subject and seek clarifications on the doubts.

#### ***Demonstration***

Demonstration is a very effective training method that involves a trainer showing a participant how to perform a task or activity. Through a visual demonstration, trainers may also explain reasoning behind certain actions or provide supplementary information to help facilitate understanding.

#### ***Group Discussions***

Brainstorming in which all the members in a group express their ideas, views and opinions on a given topic, is a free flow and exchange of knowledge among the participants and the trainer. The discussion is carried out by the group on the basis of their own experience, perceptions and values. This will facilitate acquiring new knowledge. When everybody is expected to participate in the group discussion, even the introverted persons will also get stimulated and try to articulate their feelings.

The ideas that emerge in the discussions should be noted down and presentations are to be made by the groups. Sometimes consensus needs to be arrived at on a given topic. Group discussions are to be held under the moderation of a leader guided by the trainer. Group discussion technique triggers thinking process, encourages interactions and enhances communication skills.

#### ***Role Play***

This is a common and very effective method of bringing into the classroom real life situations, which may not otherwise be possible. Participants are made to enact a particular role so as to give a real feel of the roles they may be called upon to play. This enables participants to understand the behaviour of others as well as their own emotions and feelings. The instructor must brief the role players on what is expected of them. The role player may either be given a ready-made script, which they can memorise and enact, or they may be required to develop their own scripts around a given situation. This technique is extremely useful in understanding creative selling techniques and human relations. It can be entertaining and energising and it helps the reserved and less literate to express their feelings.

### ***Simulation Games***

When trainees need to become aware of something that they have not been conscious of, simulations can be a useful mechanism. Simulation games are a method based on "here and now" experience shared by all the participants. The games focus on the participation of the trainees and their willingness to share their ideas with others. A "near real life" situation is created providing an opportunity to which they apply themselves by adopting certain behaviour. They then experience the impact of their behaviour on the situation. It is carried out to generate responses and reactions based on the real feelings of the participants, which are subsequently analysed by the trainer.

While use of simulation games can result in very effective learning, it needs considerable trainer competence to analyse the situations.

### ***Individual /Group Exercises***

Exercises are often introduced to find out how much the participant has assimilated. This method involves imparting instructions to participants on a particular subject through use of written exercises. In the group exercises, the entire class is divided into small groups, and members are asked to collaborate to arrive at a consensus or solution to a problem.

### ***Case Study***

This is a training method that enables the trainer and the participant to experience a real life situation. It may be on account of events in the past or situations in the present, in which there may be one or more problems to be solved and decisions to be taken. The basic objective of a case study is to help participants diagnose, analyse and/or solve a particular problem and to make them internalise the critical inputs delivered in the training. Questions are generally given at the end of the case study to direct the participants and to stimulate their thinking towards possible solutions. Studies may be presented in written or verbal form.

### ***Field Visit***

This involves a carefully planned visit or tour to a place of learning or interest. The idea is to give first-hand knowledge by personal observation of field situations, and to relate theory with practice. The emphasis is on observing, exploring, asking questions and understanding. The trainer should remember to brief the participants about what they should observe and about the customs and norms that need to be respected.

### ***Group Presentation***

The participants are asked to work in groups and produce the results and findings of their group work to the members of another sub-group. By this method participants get a good picture of each other's views and perceptions on the topic and they are able to compare them with their own point of view. The pooling and sharing of findings enriches the discussion and learning process.

### ***Practice Sessions***

This method is of paramount importance for skills training. Participants are provided with an opportunity to practice in a controlled situation what they have learnt. It could be real life or through a make-believe situation.

## **Games**

This is a group process and includes those methods that involve usually fun-based activity, aimed at conveying feelings and experiences, which are everyday in nature, and applying them within the game being played. A game has set rules and regulations, and may or may not include a competitive element. After the game is played, it is essential that the participants be debriefed and their lessons and experiences consolidated by the trainer.

## **Research**

Trainers may require learners to undertake research activities, including online research, to gather information or further understanding about a specific subject area.

## **Competency Based Assessment (CBA)**

### **Principle of Competency Based Assessment**

Competency based assessment is aimed at compiling a list of evidence that shows that a person is competent in a particular unit of competency.

Competencies are gained through a multitude of ways including:

- Training and development programs
- Formal education
- Life experience
- Apprenticeships
- On-the-job experience
- Self-help programs.

All of these together contribute to job competence in a person. Ultimately, assessors and participants work together, through the 'collection of evidence' in determining overall competence.

This evidence can be collected:

- Using different formats
- Using different people
- Collected over a period of time.

The assessor, who is ideally someone with considerable experience in the area being assessed, reviews the evidence and verifies the person as being competent or not.

### **Flexibility in Assessment**

Whilst allocated assessment tools have been identified for this subject, all attempts are made to determine competency and suitable alternate assessment tools may be used, according to the requirements of the participant.

The assessment needs to be equitable for all participants, taking into account their cultural and linguistic needs.

Competency must be proven regardless of:

- Language
- Delivery Method
- Assessment Method.

### **Assessment Objectives**

The assessment tools used for subjects are designed to determine competency against the 'elements of competency' and their associated 'performance criteria'.

The assessment tools are used to identify sufficient:

- a) Knowledge, including underpinning knowledge
- b) Skills
- c) Attitudes

Assessment tools are activities that trainees are required to undertake to prove participant competency in this subject.

All assessments must be completed satisfactorily for participants to obtain competence in this subject. There are no exceptions to this requirement, however, it is possible that in some cases several assessment items may be combined and assessed together.

### **Types of Assessment**

#### *Allocated Assessment Tools*

There are a number of assessment tools that are used to determine competency in this subject:

- Work projects
- Written questions
- Oral questions
- Third Party Report
- Observation Checklist.

Instructions on how assessors should conduct these assessment methods are explained in the Assessment Manuals.

#### *Alternative Assessment Tools*

Whilst this subject has identified assessment tools, as indicated above, this does not restrict the assessor from using different assessment methods to measure the competency of a participant.

Evidence is simply proof that the assessor gathers to show participants can actually do what they are required to do.

Whilst there is a distinct requirement for participants to demonstrate competency, there are many and diverse sources of evidence available to the assessor.

Ongoing performance at work, as verified by a supervisor or physical evidence, can count towards assessment. Additionally, the assessor can talk to customers or work colleagues to gather evidence about performance.

A range of assessment methods to assess competency include:

- Practical demonstrations
- Practical demonstrations in simulated work conditions
- Problem solving
- Portfolios of evidence
- Critical incident reports
- Journals
- Oral presentations
- Interviews
- Videos
- Visuals: slides, audio tapes
- Case studies
- Log books
- Projects
- Role plays
- Group projects
- Group discussions
- Examinations.

### **Recognition of Prior Learning**

Recognition of Prior Learning is the process that gives current industry professionals who do not have a formal qualification, the opportunity to benchmark their extensive skills and experience against the standards set out in each unit of competency/subject.

Also known as a Skills Recognition Audit (SRA), this process is a learning and assessment pathway which encompasses:

- Recognition of Current Competencies (RCC)
- Skills auditing
- Gap analysis and training
- Credit transfer.

### **Assessing competency**

As mentioned, assessment is the process of identifying a participant's current knowledge, skills and attitudes sets against all elements of competency within a unit of competency. Traditionally in education, grades or marks were given to participants, dependent on how many questions the participant successfully answered in an assessment tool.

Competency based assessment does not award grades, but simply identifies if the participant has the knowledge, skills and attitudes to undertake the required task to the specified standard.

Therefore, when assessing competency, an assessor has two possible results that can be awarded:

- Pass Competent (PC)
- Not Yet Competent (NYC).

*Pass Competent (PC)*

If the participant is able to successfully answer or demonstrate what is required, to the expected standards of the performance criteria, they will be deemed as 'Pass Competent' (PC).

The assessor will award a 'Pass Competent' (PC) if they feel the participant has the necessary knowledge, skills and attitudes in all assessment tasks for a unit.

*Not Yet Competent' (NYC)*

If the participant is unable to answer or demonstrate competency to the desired standard, they will be deemed to be 'Not Yet Competent' (NYC).

This does not mean the participant will need to complete all the assessment tasks again. The focus will be on the specific assessment tasks that were not performed to the expected standards.

The participant may be required to:

- a) Undertake further training or instruction
- b) Undertake the assessment task again until they are deemed to be 'Pass Competent'.

## Competency standard

| <b>UNIT TITLE:</b> CLEAN AND PREPARE ROOMS FOR INCOMING GUESTS                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |  | <b>NOMINAL HOURS:</b> 30                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

Replenish stock items may include:

- Cleaning agents and chemicals
- Guest supplies
- Cleaning items and equipment
- Promotional material
- General-purpose requirements, such as batteries, light globes, cutlery, and glasses.

Clean housekeeping equipment may include:

- Vacuum cleaners
- Mops, buckets, brushes, pans.

#### **Assessment Guide**

The following skills and knowledge must be assessed as part of this unit:

- The enterprise's policies and procedures in regard to delivery of housekeeping services
- Principles of cleaning and chemical use
- Principles of safe manual handling, including bending and lifting
- Ability to use a variety of cleaning items and techniques
- Appropriate verbal and non-verbal communication, interpersonal and guest contact skills.

#### **Linkages To Other Units**

- Develop and update local knowledge
- Maintain hospitality industry knowledge
- Receive and resolve customer complaints
- Provide housekeeping services to guests
- Implement occupational safety and health procedures.

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

## CLEAN AND PREPARE ROOMS FOR INCOMING GUESTS

D1.HHK.CL3.03

Slide 1

Slide No

Trainer Notes

1.

Trainer welcomes trainees to class.

## Slide

## Subject Elements

This unit comprises seven Elements:

- Identify the role of room attendants
- Prepare for cleaning duties
- Make beds
- Clean bathroom
- Clean room
- Provide additional housekeeping services
- Prepare for next shift.

Slide 2

| Slide No | Trainer Notes                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|----------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 2.       | <p>Trainer advises this Unit comprises seven Elements, as listed on this slide explaining:</p> <ul style="list-style-type: none"> <li>• Each Element comprises a number of Performance Criteria which will be identified throughout the class and explained in detail</li> <li>• Trainees can obtain more detail from their Trainee Manual</li> <li>• At times the course presents advice and information about various protocols but where their workplace requirements differ to what is presented, the workplace practices and standards, as well as policies and procedures must be observed.</li> </ul> |

## Slide

## Assessment

Assessment for this unit may include:

- Oral questions
- Written questions
- Work projects
- Workplace observation of practical skills
- Practical exercises
- Formal report from supervisor.

Slide 3

| Slide No | Trainer Notes                                                                                                                                                                                                                                                          |
|----------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 3.       | <p>Trainer advises that assessment for this Unit may take several forms all of which are aimed at verifying they have achieved competency for the Unit as required.</p> <p>Trainer indicates the methods of assessment that will be applied to them for this Unit.</p> |

## Element 1:

### *Identify the role of room attendants*

Slide 4

| Slide No | Trainer Notes                                                                                                                                                                                                                                                |
|----------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 4.       | <p>Introduce topic.</p> <p><b>Class Activity – General Discussion</b></p> <p>Ask general questions:</p> <ul style="list-style-type: none"><li>• What does a room attendant do?</li><li>• Why is the role of a room attendant important in a hotel?</li></ul> |

## Slide

## Identify the role of room attendants

Performance Criteria for this Element are:

- Describe the services delivered by a room attendant
- Locate the position of room attendants within the enterprise
- Identify the personal characteristics required of a room attendant.

Slide 5

| Slide No | Trainer Notes                                                                         |
|----------|---------------------------------------------------------------------------------------|
| 5.       | Trainer identifies the Performance Criteria for this Element, as listed on the slide. |

## Slide

## Identify the role of room attendants

Performance Criteria for this Element are:

- Describe grooming and personal presentation standards for a room attendant
- Interpret enterprise policies and procedures for the provision of housekeeping services
- Identify and explain the role of communication in the provision of housekeeping services.

Slide 6

| Slide No | Trainer Notes                                                                         |
|----------|---------------------------------------------------------------------------------------|
| 6.       | Trainer identifies the Performance Criteria for this Element, as listed on the slide. |

## Slide

## Room attendant

Room attendants are located in any tourism and hospitality business that provides accommodation to their guests.

In many hotels and resorts, more people are employed as room attendants than any other front line position.

Slide 7

| Slide No | Trainer Notes                                                                                                                                                                    |
|----------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 7.       | <b>Class Activity – General Discussion</b> <ul style="list-style-type: none"> <li>Why are there more room attendants employed than in other positions within a hotel?</li> </ul> |

## Slide

## Room attendant

Their role is to facilitate the comfort of guests ensuring their 'home away from home' is clean, safe and presented in an appealing manner.

- How can you make a room appealing?

Slide 8

| Slide No | Trainer Notes                                                                                                                   |
|----------|---------------------------------------------------------------------------------------------------------------------------------|
| 8.       | <b>Class Activity – General Discussion</b> <ul style="list-style-type: none"><li>• How can you make a room appealing?</li></ul> |

## Slide

## Room attendant

Whilst their primary function is to clean they must also be friendly, informative, discreet and handle any requests or problems relating to the guest room.

## Slide

## Grooming & personal presentation

In all aspects of grooming, room attendants should reflect expectations of the guest and the property.

Most organisations will have strict grooming standards to:

- Ensure consistency
- Build confidence and pride of staff
- Uphold a professional image.

Slide 32

| Slide No | Trainer Notes                                                                                                                                                                                                                                                                                                                           |

## Policies and procedures

Each organisation will have its own policies and procedures.

Their main provision is to ensure the health, safety, security and privacy of the organisation, staff and customers.

- Policy – rule or code of conduct
- Procedure – step by step instruction.

Slide 35

| Slide No | Trainer Notes                                                                                                                                                                                                                                                    |

## Policies and procedures

### Who creates policies and procedures

Policies and procedures may be created by:

- Individual housekeeping department – for specific use in that location
- Head office – for use throughout the chain
- Manufacturers – to identify the correct methods for use and maintenance.

Slide 38

| Slide No | Trainer Notes                                                                                                                                                                                                         |

| 42.      | <b>Class Activity – General Discussion</b> <ul style="list-style-type: none"> <li>• What types of information are communicated by room attendants?</li> <li>• Who do they communicate with?</li> </ul> |

## Slide

## Communication

Room attendants usually communicate with:

- Receptionists
- House Attendants
- Maintenance
- Mini Bar
- Room Service
- Security.

Slide 42

| Slide No | Trainer Notes                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
|----------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

- Linen – bed sheets, pillow cases, blankets, bath towels, floor mats, hand towels and face cloths
- Room supplies – including shampoo, conditioners, stationery, matches, soaps etc
- Fresh produce – milk and biscuits for tea and coffee facilities
- Removal of dirty items – soiled bedding and rubbish
- Collection of return of laundry or dry cleaning
- As a room attendant will normally be stationed on a selected floor, they will communicate with house attendants if items need to be replenished.

#### **Maintenance**

Room attendants will often call maintenance to fix or replace light bulbs and any faulty furnishings or equipment. In most cases any calls will be made relating to faulty televisions and air conditions.

#### **Mini Bar**

In some organisations, the room attendant may be responsible for replenishing mini bar items and charging them to the guest rooms themselves or may contact mini bar for this service to be performed.

#### **Room Service**

When cleaning rooms, room attendants will remove used room service trays which must be placed out of guest sight and placed in the appropriate storage area on each guest floor. They will communicate with room service for the trays to be collected from the storage areas.

#### **Security**

With room attendants spending the majority of their shift working on guest floors, it is their responsibility to observe activities that take place around them. They must constantly listen and watch to ensure guest activities are conducted in a safe and secure manner. If there are any issues which they cannot resolve, security must be contacted quickly.

Slide

## Element 2: *Prepare for cleaning duties*

Slide 44

| Slide No | Trainer Notes                                                                                                                                                                                                                                                                  |

## Slide

## Preparing for cleaning duties

Performance Criteria for this Element are:

- Replenish linen room supplies
- Load housekeeping trolley with supplies for service
- Check housekeeping trolley prior to use
- Identify rooms to be cleaned for the shift
- Access and enter guest room appropriately.

Slide 44

| Slide No | Trainer Notes                                                                         |
|----------|---------------------------------------------------------------------------------------|
| 45.      | Trainer identifies the Performance Criteria for this Element, as listed on the slide. |

## Slide

## Replenish supplies

Before guest rooms are serviced, there is a need to prepare the linen room supplies and trolley that will be used to cart the cleaning materials and the room supplies to those rooms.

Slide 45

| Slide No | Trainer Notes                                                                                                                                                                                                          |

| 51.      | <p><b>Class Activity – Group work</b></p> <p>The trainer arranges the trainees into small groups.</p> <p>Allocate one of the topics in this slide to each group.</p> <p>Get them to identify all the supplies that would be allocated to each section.</p> <p>Get the trainees to discuss or list on board.</p> |

## Slide

## Ordering and receiving supplies

When requesting supplies you may be required to complete a requisition form.

The requisition form is an internal stock ordering form that you fill in and give to the Head Housekeeper identifying:

- Person requesting the items
- Type of items needed
- Quantity
- Date.

Slide 51

| Slide No | Trainer Notes                                                                                                                                              |

## Loading housekeeping trolley

- Health and safety issues need to be addressed when loading housekeeping trolleys
- Manual handling activities are the main cause of injuries in the workplace and the housekeeping department traditionally gives rise to the majority of OHS injuries.

Slide 52

| Slide No | Trainer Notes                                                                                                                                                                                                                           |

## Slide

## Loading housekeeping trolley

### Manual Handling

Manual handling activities include:

- Lifting – of stock, cartons and boxes
- Carrying – items from storage areas to trolleys, moving stock from place-to-place
- Pulling – boxes and cartons forward in storage areas
- Pushing trolleys.

Slide 53

| Slide No | Trainer Notes                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

## Slide

## Loading housekeeping trolley

Key points to remember when stocking or handling trolleys:

- Report any damage or faults with the trolley.
- Push the trolley, don't pull it
- Always stock items in their designated place on the trolley
- Never lift anything on your own that weighs over 16 kg
- Be prepared to ask for help when needed.

Slide 54

| Slide No | Trainer Notes                                                                                                                                              |

| 56.      | <b>Class Activity – General Discussion</b> <ul style="list-style-type: none"> <li>• Discuss the points in the slide and why they are important</li> <li>• These are not considered as supplies, but are vital.</li> </ul> |

## Slide

## Security of housekeeping trolley

It is important to maintain security of trolleys in hallways as:

- They contain many valuable items
- Staff work out of sight of trolleys
- Contains information of guests.

**Lock trolleys where possible.**

Slide 56

| Slide No | Trainer Notes                                                                                                                                                                                                                                                            |
|----------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 57.      | <p><b>Class Activity – General Discussion</b></p> <ul style="list-style-type: none"> <li>• Why is it easy for guests to steal from trolleys? If you were a guest how could you do it?</li> <li>• What would you steal?</li> <li>• How can staff prevent this?</li> </ul> |

## Slide

## Position of housekeeping trolley

Always position the trolley near the wall and out of the guest's way.

Don't leave them in the middle of the corridor as:

- It makes it harder for movement of people in the corridor
- It makes it more appealing for theft
- It helps avoid injuries
- Ensures a clear path in the event of an emergency.

Slide 57

| Slide No | Trainer Notes                                                                                                                                                                                                                                         |
|----------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 58.      | <p><b>Class Activity – General Discussion</b></p> <p>Most organisations require trolleys to be placed in front of the open door to the room they are cleaning.</p> <ul style="list-style-type: none"> <li>• What are the reasons for this?</li> </ul> |

## Slide

## Identify rooms to be cleaned

In order to service rooms in a timely fashion and to control labour costs, every property will allocate specific rooms to individual staff for room preparation duties.

The primary role of a room attendant is to clean rooms.

## Identify rooms to be cleaned

### Housekeeping briefing session

- Verify staff working
- Discuss up-coming information
- Discuss VIP's requirements
- Address room servicing problems
- Address complaints received by guests
- Identify up-coming training sessions
- Allocate rooms to individual staff for the shift.

Slide 59

## Identify rooms to be cleaned

Most room attendants are required to clean approximately 12-20 rooms a day depending on:

- Organisation standards
- Types of rooms
- Status of the room
- Other considerations.

Slide 60

| Slide No | Trainer Notes                                                                                                                                            |

## Identify rooms to be cleaned

### Types of rooms

Generally it is 'guest rooms' that will need to be prepared.

These rooms can include:

- Single rooms
- Doubles
- Twins
- Suites.

Slide 61

| Slide No | Trainer Notes                                                                                                                                                                                                                                                             |

## Slide

## Access and enter guest room

All guest rooms must only be accessed after following the house procedures that apply.

These procedures relate to service delivery and security.

They also function to help avoid embarrassment to both guests and staff.

Slide 65

| Slide No | Trainer Notes                                                                                                                                                                                   |

## Slide

## Access and enter guest room

### Standard procedure to access rooms

- Knock on door (quite loudly) – use knuckles not keys or any other item as it could mark the door and call out, “Housekeeping!”
- Count to five
- If no answer, knock again, and then use your key to enter
- Take one step into the room and announce out “Good morning/afternoon, Housekeeping to service your room.”
- If the guest is still in bed, undressed or distressed, quickly and quietly leave the room.

Slide 66

| Slide No | Trainer Notes                                                                                                                                                                         |

## Slide

## Access and enter guest room

### Standard procedure to access rooms

- If the guest is awake and up, say “Housekeeping, would you like your room serviced?”
- Comply with their request – you may be invited to service the room, just do a quick tidy, replace the towels, soap and leave, or asked to come back at a later time
- Once you have gained access to the room, the door should be left wide open – to provide notice to a returning guest that someone is in their room.

Slide 67

| Slide No | Trainer Notes                                                                                                                                                                         |

## Slide

## Strip and make a bed

### Damaged or soiled bed items

When damaged items are found they must be replaced or forwarded for repair or disposal.

Types of stains:

- Urine and faeces
- Blood
- Beverage – tea, soft drinks, alcohol
- Shoe polish
- Food
- Mud, dirt, grease and oil.

Slide 75

| Slide No | Trainer Notes                                                                                                                       |

## Slide

## Strip and make a bed

### Remaking bed with fresh linen

- Making the bed 'properly' is an extremely important part of servicing any room because the bed is often the focal point of the room and one of the first things in the room that the guest looks at
- The final appearance of the made bed must therefore make the right impression – neat, tidy, balanced, crisp, clean, attractive and inviting.

Slide 76

| Slide No | Trainer Notes                                                                                                                    |

## Slide

## Strip and make a bed

### What do you do differently when making a bed using existing linen instead of fresh linen?

Remember guest preferences:

- If they have removed the blanket or duvet, you may wish to place this in the cupboard or folded back at the end of the bed
- If they have more pillows, make the bed and position the pillows accordingly
- If items such as books, magazines, glasses, clothes or other personal items were found on the bed, place them back on the bed in a similar position and in a neat state.

Slide 81

| Slide No | Trainer Notes                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

## Preparing a bathroom for cleaning

### Handling syringes

1. Don't panic
2. Don't touch the needle with bare hands and do not attempt to recap it
3. Find a sturdy plastic container
4. Ease the syringe into the container without making skin contact with it – where applicable, use a brush and shovel to sweep syringe up
5. Tightly seal the container
6. Immediately wash your hands
7. Immediately alert the appropriate person for correct disposal of syringe.

Slide 85

| Slide No | Trainer Notes                                                                                                                                                                                                      |

## Slide

## Cleaning the bathroom floor

1. Remove everything that may be on the bathroom floor such as mats, trash cans, and small pieces of furniture
2. Sweep the floor to remove dirt, hair, dust, and other debris
3. Dissolve detergent into warm water using the manufacturer's instructions for the correct water to detergent ratio
4. Pour the solution over the entire floor so that the solution can fill into the grout lines
5. Allow the solution to remain on the floor for 15 to 20 minutes
6. Scrub the grout with a small medium-bristled brush

Slide 93

| Slide No | Trainer Notes                                                                                                                                                                                          |

## Slide

## Protocol for cleaning a room

### Protocols when cleaning an occupied room

- Never throw out any items like magazines and newspapers belonging to the guest
- If business papers are out on the desk or table and obviously being used, avoid cleaning or tidying that area
- Respect the guest's privacy and don't be nosy
- Take special care with all guest's items
- Hang guest's clothing up appropriately
- All cloths used in cleaning should be housekeeping issued – room towels and linen should never be used for cleaning.

Slide 102

| Slide No | Trainer Notes                                                                                                                                                                  |

## Cleaning furniture, fixtures and fittings

All rooms will have furniture, fixtures and fittings to some extent.

- **Furniture** commonly refers to items in the room that are movable including beds, couches, desks, television, clock radios etc
- **Fixtures** refer to items that are attached that are used by the guest including air conditioners, light controls
- **Fittings** refers to taps, pipes and electrical aspects of the room.

Slide 103

| Slide No | Trainer Notes                                                                                                                                                                                                                                                                                       |

## Slide

## Dusting and polishing

The main purpose of dusting and polishing is to:

- Collect small particles of dust
- Clean the item and leave a shiny, reflecting finish.

When polishing an item, make sure to:

- Spray the cleaning agent onto the cloth - not onto the surface to be cleaned
- Buff the surface after cleaning to remove any streaks

Slide 104

| Slide No | Trainer Notes                                                                                                                                                                                      |

## Slide

## Cleaning bins

Waste bins should be properly cleaned by:

- Tying the bin liner around the rubbish or emptying the bin directly into your waste bag on the trolley. Remove larger and non-dangerous by hand to facilitate this process where applicable
- Spraying bin with appropriate multi-purpose cleaner, inside and out
- Cleaning with the appropriate cloth
- Fitting a new bin liner.

| 109.     | <b>Class Activity – General Discussion</b> <ul style="list-style-type: none"><li>• What is the purpose of vacuuming?</li></ul> |

## Slide

## Vacuum floors

Vacuuming tips:

- Try to vacuum the room starting at the furthest corner from the door and work back toward the exit
- Ensure you vacuum around and under *all* furniture, and under the bed
- Particular attention should be placed on the corners of the room, including the skirting boards
- bend your knees when cleaning under items
- Try to avoid 'bending over' the machine.

## Cleaning the stove

### For a gas stove:

- Remove burner caps, grates, and control knobs
- Put them in your sink filled with very hot water and dish soap
- As these soak, dip a scrubbing sponge into the sink water and wring
- Go over the stovetop, paying extra attention to any stains around the burners
- Rinse with clean water; let dry
- Head to the sink and wipe down each item with your sponge
- Rinse and dry the parts; reassemble the cooktop.

Slide 112

| Slide No | Trainer Notes                                                                                                                                                                                   |

## Cleaning the stove

### For an electric stove:

- For a coil electric stovetop, do this soaking method with the drip pans and knobs but not the burners, which shouldn't be submerged
- For a smooth electric stovetop, clean the surface with a nonabrasive scrubbing pad and a liquid cooktop cleaner
- Dip a sponge in hot soapy water, wring well, and wipe the controls
- Rinse and let dry.

Slide 113

## Cleaning the oven

### Inside oven

- Cooked food stuck on the bottom, sides or glass of ovens can give off odours and smoke
- Try to remove large or deep stuck food items with a metal spatula and gently chip off any loose pieces
- Spray a cleaning agent on all sides on the inside or an oven
- Wipe away
- For hard to remove stains, use baking soda with a few drops of white vinegar. Let it bubble for a minute or two, then whisk away the grime with a scrub sponge
- Rinse with a clean, wet, regular sponge.

Slide 114

| Slide No | Trainer Notes                                                                                                                                                                               |

## Slide

## Cleaning the dryer

When cleaning dryers, ensure:

- It is empty
- If items are found, process them as lost property if the guest has departed, or neatly fold for an existing guest
- Clear away lint from catchment areas.

Slide 118

| Slide No | Trainer Notes                                                                                                                                                                               |

## Slide

## Cleaning other items

Once the major pieces of equipment have been cleaned there are other tasks to perform.

These may include:

- Washing and drying pots, pans, crockery and cutlery
- Placing clean items in cupboards
- Cleaning inside cupboards and doors
- Refilling ice trays
- Cleaning kettles.

Slide 119

| Slide No | Trainer Notes                                                                                                                                                                                   |

## Slide

## Replenish guest supplies

Depending on the establishment, there can be a number of items that will qualify as guest supplies.

The simplest definition is 'any small item that can be used, and in some cases taken, by a guest is a guest supply'.

Slide 121

## Slide No

## Trainer Notes

122.

### Class Activity – General Discussion

- What guest supplies are there?
- Which ones do we allow guests to take?
- Which ones do we charge for?

## Slide

## Replenish guest supplies

### Guest supplies include:

- Pens
- Paper
- Stationery
- Envelopes
- Fax or e-mail forms
- Promotional material
- Room service menus
- Sewing and shoe polishing kits
- Guest dry-cleaning bag.

## Report and remedy room defects

- Regardless of how well a room is maintained, general wear and tear will happen, equipment will break down and other problems will occur
- When servicing a guest room is to check the room for any defects in equipment, appliances, furniture or fittings.

### What are defects, what is damage?

- Defects or damage can result from normal wear-and-tear, accidental damage or deliberate and malicious action by guests.

Slide 125

| Slide No | Trainer Notes                                                                                                                                                                                                                               |

## Slide

## Report and remedy room defects

### What do you do?

The course of action chosen will depend on the seriousness of the damage and whether or not someone could be harmed because of the problem.

The two possible courses of action are:

- The item must be taken out of service immediately and replaced if possible
- The item is reported on a maintenance report and submitted to the appropriate person for.

**'If in doubt, have it checked out.'**

Slide 128

## Report and remedy room defects

### Identifying damaged items

You can become aware that an item is damaged through:

- Personal observation
- Look for damaged items
- Listen for equipment that doesn't sounds right
- Be alert to smells that indicate problems
- Advice from guests.

Slide 129

| Slide No | Trainer Notes                                                                                                                                                                                                                                        |

| 132.     | <b>Class Activity – General Discussion</b> <ul style="list-style-type: none"> <li>• What are common pests and how do you eliminate their presence?</li> </ul> |

## Slide

## Preventing pests

Do whatever you can to keep the pests out in the first place :

- Keeping doors and windows to guest rooms closed
- Making sure fly wire screens are fitted and in good condition
- Making sure that anything provided to a guest room is free from pests
- Control any pests you see – using aerosol sprays, baits, traps, fogging, commercial spraying.

Slide 132

| Slide No | Trainer Notes                                                                                                                        |
|----------|--------------------------------------------------------------------------------------------------------------------------------------|
| 133.     | <b>Class Activity – General Discussion</b> <ul style="list-style-type: none"> <li>• What is the best way to prevent them?</li> </ul> |

## Slide

## Preventing pests

Apply good housekeeping techniques to deny food and drink to pests and maintain hygienic conditions includes:

- Never leaving food out on benches or tables
- Checking to ensure food scraps are not lying on the floor anywhere in the room – in the kitchen under the stove; under the bed
- Keeping bins clean and in good repair
- Cleaning premises thoroughly and disinfecting when necessary
- Removing all rubbish on a regular basis.

Slide 133

| Slide No | Trainer Notes                                                                                                                                      |

## Slide

## Handling guest property left in departed room

All such items should be taken to the housekeeping department and recorded in the 'Lost and Found' log book.

Information that needs to be recorded about the item includes:

- Date found
- Room number or other location
- Exact location
- Description of item
- Name of person who found the item
- Date item was returned to the owner.

## Slide

## Provide additional housekeeping services

Performance Criteria for this Element are:

- Provide turn-down service
- Carry out rotational cleaning duties
- Lend equipment to guests, as requested in accordance with house policies.

Slide 144

| Slide No | Trainer Notes                                                                         |
|----------|---------------------------------------------------------------------------------------|
| 145.     | Trainer identifies the Performance Criteria for this Element, as listed on the slide. |

## Slide

## Provide turn-down service

- Turn down service is service commonly found in four or five star hotels
- It is a service that prepares the room at the end of the day for the comfort of the guest
- It is designed to make the room soothing and inviting for rest and relaxation.

Slide 145

| Slide No | Trainer Notes                                                                                                                                                                                                               |
|----------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

## Steps of turn-down service

### Do Not Disturb (DND) Rooms

A number of rooms may have their DND signs out. In this case you must not knock on the door or enter the room:

- Record the time
- Go back after you have completed other rooms to check if the room is ready for service
- If the DND sign is still there, slip an appropriate card under the door, requesting the guest to call housekeeping if they require turn-down at an appropriate time.

Slide 151

| Slide No | Trainer Notes                                                                                                                        |

## Slide

## Lending equipment to guests

- It is impossible for a hotel to provide all items the guest could possibly need in all rooms
- Firstly the cost would be substantial, the room would become more cluttered and the opportunity for theft would greatly increase
- Therefore most hotels will have items available for loan to guests, upon request.

Slide 160

| Slide No | Trainer Notes                                                                                                                                                                                                              |

## Slide

## Prepare for the next shift

Performance Criteria for this Element are:

- Complete required records and notifications
- Dispose of rubbish
- Clean and store trolleys
- Replenish stock items as necessary
- Clean housekeeping equipment prior to storage.

Slide 165

| Slide No | Trainer Notes                                                                         |
|----------|---------------------------------------------------------------------------------------|
| 166.     | Trainer identifies the Performance Criteria for this Element, as listed on the slide. |

## Slide

## Complete records and notifications

- Recording status of rooms
- Lost property reports
- Ordering of supplies
- Handover reports – information required for the next shift, including turn-down rooms to complete and incidents that occurred that day
- Records of items that were loaned to guests
- Maintenance requests
- Time sheets.

Slide 166

| Slide No | Trainer Notes                                                                                                                                                                                                                                                                                        |

## Slide

## Dispose of rubbish

- Housekeeping is all about cleanliness and tidiness and this should not stop at the end of the day
- The general cleanliness and hygiene of a hospitality business is vital to the health of all stakeholders including staff, guests, owners and the community in general.

Slide 167

| Slide No | Trainer Notes                                                                                                                                                                                                                                                                               |

| 168.     | <b>Class Activity – General Discussion</b> <ul style="list-style-type: none"> <li>What is considered to be rubbish?</li> <li>Where is rubbish kept during a shift, considering a room attendant works on a guest floor?</li> <li>What is the procedure for disposing of rubbish?</li> </ul> |

## Slide

## Dispose of rubbish

Handling and disposing of rubbish is vital for a number of reasons including:

- Maintains a clean environment and ensures it is aesthetically pleasing
- Reduces accidents caused by people tripping and falling over
- Reduces the chance of contamination
- Reduces bad odours
- Attracts fewer insects and rodents
- Reduces likelihood of contamination.

Slide 168

| Slide No | Trainer Notes                                                                                                                                                                                                                                                               |

## Slide

## Types of rubbish

### General Rubbish

This is similar to household rubbish and is the type of rubbish most found in hospitality organisations and guest rooms. It includes:

- Paper and boxes
- Bottles
- Plastic containers
- Food and beverage related trash.

Slide 170

| Slide No | Trainer Notes                                                                                                                |

## Slide

## Types of rubbish

### Hazardous Rubbish

This rubbish that can be harmful and should be treated carefully. It includes:

- Chemicals
- Broken glass
- Cleaning products
- Disinfectants
- Unknown bottles and liquids.

Slide 171

| Slide No | Trainer Notes                                                                                                                  |
|----------|--------------------------------------------------------------------------------------------------------------------------------|
| 172.     | <b>Class Activity – General Discussion</b> <ul style="list-style-type: none"> <li>• How do you handle this rubbish?</li> </ul> |

## Slide

## Handling rubbish

It is always advisable to:

- Wear gloves when handling rubbish
- Not overloading rubbish bags or bins
- Using safe manual handling techniques
- Using a trolley to move rubbish where necessary
- Disposing of rubbish in a timely manner
- Moving rubbish to disposal areas during quiet times or on quiet routes
- Placing rubbish in the suitable disposal area – this includes the separation of paper, glass and plastic based products.

Slide 172

| Slide No | Trainer Notes                                                                                                                                      |

## Slide

## Reorder stock and supplies

- The aim of maintaining stock and supplies in a housekeeping store is that you never run out of anything but you don't over-stock
- Housekeeping trolleys can be stocked at the beginning or end of each shift.
- When supplies run low during a shift, further supplies may be accessed from the housekeeping store room
- When supplies in the floor housekeeping store room run low, further supplies can be brought up from the housekeeping department.

Slide 176

| Slide No | Trainer Notes                                                                                                                                                                                                                                |
|----------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

## Slide

## Reorder stock and supplies

When requesting supplies you may be required to complete a requisition form.

The requisition form is an internal stock ordering form that you fill in and give to the Head Housekeeper.

It will identify:

- Person requesting the items
- Type of items needed
- Quantity
- Date.

Slide 177

## Slide

## Clean housekeeping equipment prior to storage

### Dusters

Cleaning of dusters involves:

- Shaking clean regularly in an appropriate outside location
- Washing in accordance with the manufacturer's instructions – the laundry will be responsible for this: you will be required to leave all used dusters and cleaning cloths in a nominated location for the laundry porter to pick up.

Slide 180

| Slide No | Trainer Notes                                                                                                                                                                                 |

## Clean housekeeping equipment prior to storage

### Vacuum cleaners

- All vacuum cleaners must be cleaned out at the end of the shift and the bag replaced if required
- The machine and its attachments must be wiped clean using a damp cloth
- The power cord should be wrapped correctly and safely
- All cleaning of vacuum cleaners must be done in accordance with manufacturer's instructions.

## Slide

## Storing housekeeping equipment

### Large items

- Vacuum cleaners, brooms & buckets
- Normally go on the floor.

### Smaller items

- Guest supplies
- Go on shelves – shelves often have labels to show what goes where.

Slide 185

## Storing housekeeping equipment

### Final checks when storing equipment

- All minor or major faults and repair needs have been identified and acted on
- All equipment has been cleaned – and where appropriate, dry
- Electrical cords are rolled up and positioned safely and securely
- Every piece of equipment and every cleaning item is stored safely and in the appropriate location
- The door to the storeroom is locked when you leave.

## Finish

Go to the Head Housekeeper's office and:

- Advise that you have finished and about to go
- Notify the office of any problems you have identified or any suspicions etc you have. This includes submitting any requisitions, requests, reports, forms etc
- Hand back and sign in your room keys/cards
- Complete your time sheet
- Once you have completed this task you have successfully completed your shift.

Guest room supplies – various including shampoo, conditioner, moisturisers, hand lotions, tissues, sewing kit, shoe mitt, laundry bags

Housekeeping trolley

In-room compendium

Job descriptions

Kitchenette including fridge, microwave, oven, stove, pots, pans, utensils, crockery and cutlery

Note pads and pens

Organisational Chart

Policies and procedures for organisation, housekeeping and room attendant position

Posters

Safety Signs

Standard Operating Procedures (SOPs)

Telephone system

Towels – various including bath mats, hand towels, face washers and bath towels.

# Instructions for Trainers for using PowerPoint – Presenter View

Connect your laptop or computer to your projector equipment as per manufacturers' instructions.

In PowerPoint, on the **Slide Show** menu, click **Set up Show**.

Under Multiple monitors, select the Show Presenter View check box.

In the **Display slide show** on list, click the monitor you want the slide show presentation to appear on.

Source: <http://office.microsoft.com>

## Note:

In Presenter View:

You see your notes and have full control of the presentation

Your trainees only see the slide projected on to the screen.

## More Information

You can obtain more information on how to use PowerPoint from the Microsoft Online Help Centre, available at:

<http://office.microsoft.com/training/training.aspx?AssetID=RC011298761033>.

## Note Regarding Currency of URLs

Please note that where references have been made to URLs in these training resources trainers will need to verify that the resource or document referred to is still current on the internet. Trainers should endeavour, where possible, to source similar alternative examples of material where it is found that either the website or the document in question is no longer available online.
