Competency Based Training (CBT) and assessment – An introduction for trainers

Competency

Competency refers to the ability to perform particular tasks and duties to the standard of performance expected in the workplace.

Competency requires the application of specified knowledge, skills and attitudes relevant to effective participation, consistently over time and in the workplace environment.

The essential skills and knowledge are either identified separately or combined.

Knowledge identifies what a person needs to know to perform the work in an informed and effective manner.

Skills describe the application of knowledge to situations where understanding is converted into a workplace outcome.

Attitude describes the founding reasons behind the need for certain knowledge or why skills are performed in a specified manner.

Competency covers all aspects of workplace performance and involves:

- Performing individual tasks
- Managing a range of different tasks
- Responding to contingencies or breakdowns
- Dealing with the responsibilities of the workplace
- Working with others.

Unit of competency

Like with any training qualification or program, a range of subject topics are identified that focus on the ability in a certain work area, responsibility or function.

Each manual focuses on a specific unit of competency that applies in the hospitality workplace.

In this manual a unit of competency is identified as a 'unit'.

Each unit of competency identifies a discrete workplace requirement and includes:

- Knowledge and skills that underpin competency
- Language, literacy and numeracy
- Occupational safety and health requirements.

Each unit of competency must be adhered to in training and assessment to ensure consistency of outcomes.

Element of competency

An element of competency describes the essential outcomes within a unit of competency.

The elements of competency are the basic building blocks of the unit of competency. They describe in terms of outcomes the significant functions and tasks that make up the competency.

In this manual elements of competency are identified as an 'element'.

Performance criteria

Performance criteria indicate the standard of performance that is required to demonstrate achievement within an element of competency. The standards reflect identified industry skill needs.

Performance criteria will be made up of certain specified skills, knowledge and attitudes.

Learning

For the purpose of this manual learning incorporates two key activities:

- Training
- Assessment.

Both of these activities will be discussed in detail in this introduction.

Today training and assessment can be delivered in a variety of ways. It may be provided to participants:

- On-the-job – in the workplace
- Off-the-job – at an educational institution or dedicated training environment
- As a combination of these two options.

No longer is it necessary for learners to be absent from the workplace for long periods of time in order to obtain recognised and accredited qualifications.

Learning approaches

This manual will identify two avenues to facilitate learning:

Competency Based Training (CBT)

This is the strategy of developing a participant's competency.

Educational institutions utilise a range of training strategies to ensure that participants are able to gain the knowledge and skills required for successful:

- Completion of the training program or qualification
- Implementation in the workplace.

The strategies selected should be chosen based on suitability and the learning styles of participants.

Competency Based Assessment (CBA)

This is the strategy of assessing competency of a participant.

Educational institutions utilise a range of assessment strategies to ensure that participants are assessed in a manner that demonstrates validity, fairness, reliability, flexibility and fairness of assessment processes.

Flexibility in learning

It is important to note that flexibility in training and assessment strategies is required to meet the needs of participants who may have learning difficulties. The strategies used will vary, taking into account the needs of individual participants with learning difficulties. However they will be applied in a manner which does not discriminate against the participant or the participant body as a whole.

Catering for participant diversity

Participants have diverse backgrounds, needs and interests. When planning training and assessment activities to cater for individual differences, trainers and assessors should:

- Consider individuals' experiences, learning styles and interests
- Develop questions and activities that are aimed at different levels of ability
- Modify the expectations for some participants
- Provide opportunities for a variety of forms of participation, such as individual, pair and small group activities
- Assess participants based on individual progress and outcomes.

The diversity among participants also provides a good reason for building up a learning community in which participants support each other's learning.

Participant centred learning

This involves taking into account structuring training and assessment that:

- *Builds on strengths* – Training environments need to demonstrate the many positive features of local participants (such as the attribution of academic success to effort, and the social nature of achievement motivation) and of their trainers (such as a strong emphasis on subject disciplines and moral responsibility). These strengths and uniqueness of local participants and trainers should be acknowledged and treasured
- *Acknowledges prior knowledge and experience* – The learning activities should be planned with participants' prior knowledge and experience in mind
- *Understands learning objectives* – Each learning activity should have clear learning objectives and participants should be informed of them at the outset. Trainers should also be clear about the purpose of assignments and explain their significance to participants
- *Teaches for understanding* – The pedagogies chosen should aim at enabling participants to act and think flexibly with what they know
- *Teaches for independent learning* – Generic skills and reflection should be nurtured through learning activities in appropriate contexts of the curriculum. Participants should be encouraged to take responsibility for their own learning

- *Enhances motivation* – Learning is most effective when participants are motivated. Various strategies should be used to arouse the interest of participants
- *Makes effective use of resources* – A variety of teaching resources can be employed as tools for learning
- *Maximises engagement* – In conducting learning activities, it is important for the minds of participants to be actively engaged
- *Aligns assessment with learning and teaching* – Feedback and assessment should be an integral part of learning and teaching
- *Caters for learner diversity* – Trainers should be aware that participants have different characteristics and strengths and try to nurture these rather than impose a standard set of expectations.

Active learning

The goal of nurturing independent learning in participants does not imply that they always have to work in isolation or solely in a classroom. On the contrary, the construction of knowledge in tourism and hospitality studies can often best be carried out in collaboration with others in the field. Sharing experiences, insights and views on issues of common concern, and working together to collect information through conducting investigative studies in the field (active learning) can contribute a lot to their eventual success.

Active learning has an important part to play in fostering a sense of community in the class. First, to operate successfully, a learning community requires an ethos of acceptance and a sense of trust among participants, and between them and their trainers. Trainers can help to foster acceptance and trust through encouragement and personal example, and by allowing participants to take risks as they explore and articulate their views, however immature these may appear to be. Participants also come to realise that their classmates (and their trainers) are partners in learning and solving.

Trainers can also encourage cooperative learning by designing appropriate group learning tasks, which include, for example, collecting background information, conducting small-scale surveys, or producing media presentations on certain issues and themes. Participants need to be reminded that, while they should work towards successful completion of the field tasks, developing positive peer relationships in the process is an important objective of all group work.

Competency Based Training (CBT)

Principle of Competency Based Training

Competency based training is aimed at developing the knowledge, skills and attitudes of participants, through a variety of training tools.

Training strategies

The aims of this curriculum are to enable participants to:

- Undertake a variety of subject courses that are relevant to industry in the current environment
- Learn current industry skills, information and trends relevant to industry
- Learn through a range of practical and theoretical approaches
- Be able to identify, explore and solve issues in a productive manner

- Be able to become confident, equipped and flexible managers of the future
- Be 'job ready' and a valuable employee in the industry upon graduation of any qualification level.

To ensure participants are able to gain the knowledge and skills required to meet competency in each unit of competency in the qualification, a range of training delivery modes are used.

Types of training

In choosing learning and teaching strategies, trainers should take into account the practical, complex and multi-disciplinary nature of the subject area, as well as their participant's prior knowledge, learning styles and abilities.

Training outcomes can be attained by utilising one or more delivery methods:

Lecture/tutorial

This is a common method of training involving transfer of information from the trainer to the participants. It is an effective approach to introduce new concepts or information to the learners and also to build upon the existing knowledge. The listener is expected to reflect on the subject and seek clarifications on the doubts.

Demonstration

Demonstration is a very effective training method that involves a trainer showing a participant how to perform a task or activity. Through a visual demonstration, trainers may also explain reasoning behind certain actions or provide supplementary information to help facilitate understanding.

Group discussions

Brainstorming in which all the members in a group express their ideas, views and opinions on a given topic. It is a free flow and exchange of knowledge among the participants and the trainer. The discussion is carried out by the group on the basis of their own experience, perceptions and values. This will facilitate acquiring new knowledge. When everybody is expected to participate in the group discussion, even the introverted persons will also get stimulated and try to articulate their feelings.

The ideas that emerge in the discussions should be noted down and presentations are to be made by the groups. Sometimes consensus needs to be arrived at on a given topic. Group discussions are to be held under the moderation of a leader guided by the trainer. Group discussion technique triggers thinking process, encourages interactions and enhances communication skills.

Role play

This is a common and very effective method of bringing into the classroom real life situations, which may not otherwise be possible. Participants are made to enact a particular role so as to give a real feel of the roles they may be called upon to play. This enables participants to understand the behaviour of others as well as their own emotions and feelings. The instructor must brief the role players on what is expected of them. The role player may either be given a ready-made script, which they can memorize and enact, or they may be required to develop their own scripts around a given situation. This technique is extremely useful in understanding creative selling techniques and human relations. It can be entertaining and energizing and it helps the reserved and less literate to express their feelings.

Simulation games

When trainees need to become aware of something that they have not been conscious of, simulations can be a useful mechanism. Simulation games are a method based on "here and now" experience shared by all the participants. The games focus on the participation of the trainees and their willingness to share their ideas with others. A "near real life" situation is created providing an opportunity to which they apply themselves by adopting certain behaviour. They then experience the impact of their behaviour on the situation. It is carried out to generate responses and reactions based on the real feelings of the participants, which are subsequently analysed by the trainer.

While use of simulation games can result in very effective learning, it needs considerable trainer competence to analyse the situations.

Individual /group exercises

Exercises are often introduced to find out how much the participant has assimilated. This method involves imparting instructions to participants on a particular subject through use of written exercises. In the group exercises, the entire class is divided into small groups, and members are asked to collaborate to arrive at a consensus or solution to a problem.

Case study

This is a training method that enables the trainer and the participant to experience a real life situation. It may be on account of events in the past or situations in the present, in which there may be one or more problems to be solved and decisions to be taken. The basic objective of a case study is to help participants diagnose, analyse and/or solve a particular problem and to make them internalize the critical inputs delivered in the training. Questions are generally given at the end of the case study to direct the participants and to stimulate their thinking towards possible solutions. Studies may be presented in written or verbal form.

Field visit

This involves a carefully planned visit or tour to a place of learning or interest. The idea is to give first-hand knowledge by personal observation of field situations, and to relate theory with practice. The emphasis is on observing, exploring, asking questions and understanding. The trainer should remember to brief the participants about what they should observe and about the customs and norms that need to be respected.

Group presentation

The participants are asked to work in groups and produce the results and findings of their group work to the members of another sub-group. By this method participants get a good picture of each other's views and perceptions on the topic and they are able to compare them with their own point of view. The pooling and sharing of findings enriches the discussion and learning process.

Practice sessions

This method is of paramount importance for skills training. Participants are provided with an opportunity to practice in a controlled situation what they have learnt. It could be real life or through a make-believe situation.

Games

This is a group process and includes those methods that involve usually fun-based activity, aimed at conveying feelings and experiences, which are everyday in nature, and applying them within the game being played. A game has set rules and regulations, and may or may not include a competitive element. After the game is played, it is essential that the participants be debriefed and their lessons and experiences consolidated by the trainer.

Research

Trainers may require learners to undertake research activities, including online research, to gather information or further understanding about a specific subject area.

Competency Based Assessment (CBA)

Principle of Competency Based Assessment

Competency based assessment is aimed at compiling a list of evidence that shows that a person is competent in a particular unit of competency.

Competencies are gained through a multitude of ways including:

- Training and development programs
- Formal education
- Life experience
- Apprenticeships
- On-the-job experience
- Self-help programs.

All of these together contribute to job competence in a person. Ultimately, assessors and participants work together, through the 'collection of evidence' in determining overall competence.

This evidence can be collected:

- Using different formats
- Using different people
- Collected over a period of time.

The assessor who is ideally someone with considerable experience in the area being assessed, reviews the evidence and verifies the person as being competent or not.

Flexibility in assessment

Whilst allocated assessment tools have been identified for this subject, all attempts are made to determine competency and suitable alternate assessment tools may be used, according to the requirements of the participant.

The assessment needs to be equitable for all participants, taking into account their cultural and linguistic needs.

Competency must be proven regardless of:

- Language
- Delivery Method
- Assessment Method.

Assessment objectives

The assessment tools used for subjects are designed to determine competency against the 'elements of competency' and their associated 'performance criteria'.

The assessment tools are used to identify sufficient:

- a) Knowledge, including underpinning knowledge
- b) Skills
- c) Attitudes

Assessment tools are activities that trainees are required to undertake to prove participant competency in this subject.

All assessments must be completed satisfactorily for participants to obtain competence in this subject. There are no exceptions to this requirement, however, it is possible that in some cases several assessment items may be combined and assessed together.

Types of assessment

Allocated Assessment Tools

There are a number of assessment tools that are used to determine competency in this subject:

- Work projects
- Written questions
- Oral questions
- Third Party Report
- Observation Checklist.

Instructions on how assessors should conduct these assessment methods are explained in the Assessment Manuals.

Alternative assessment tools

Whilst this subject has identified assessment tools, as indicated above, this does not restrict the assessor from using different assessment methods to measure the competency of a participant.

Evidence is simply proof that the assessor gathers to show participants can actually do what they are required to do.

Whilst there is a distinct requirement for participants to demonstrate competency, there are many and diverse sources of evidence available to the assessor.

Ongoing performance at work, as verified by a supervisor or physical evidence, can count towards assessment. Additionally, the assessor can talk to customers or work colleagues to gather evidence about performance.

A range of assessment methods to assess competency include:

- Practical demonstrations
- Practical demonstrations in simulated work conditions
- Problem solving
- Portfolios of evidence
- Critical incident reports
- Journals
- Oral presentations
- Interviews
- Videos
- Visuals: slides, audio tapes
- Case studies
- Log books
- Projects
- Role plays
- Group projects
- Group discussions
- Examinations.

Recognition of Prior Learning

Recognition of Prior Learning is the process that gives current industry professionals who do not have a formal qualification, the opportunity to benchmark their extensive skills and experience against the standards set out in each unit of competency/subject.

Also known as a Skills Recognition Audit (SRA), this process is a learning and assessment pathway which encompasses:

- Recognition of Current Competencies (RCC)
- Skills auditing
- Gap analysis and training
- Credit transfer.

Assessing competency

As mentioned, assessment is the process of identifying a participant's current knowledge, skills and attitudes sets against all elements of competency within a unit of competency. Traditionally in education, grades or marks were given to participants, dependent on how many questions the participant successfully answered in an assessment tool.

Competency based assessment does not award grades, but simply identifies if the participant has the knowledge, skills and attitudes to undertake the required task to the specified standard.

Therefore, when assessing competency, an assessor has two possible results that can be awarded:

- Pass Competent (PC)
- Not Yet Competent (NYC).

Pass Competent (PC)

If the participant is able to successfully answer or demonstrate what is required, to the expected standards of the performance criteria, they will be deemed as 'Pass Competent' (PC).

The assessor will award a 'Pass Competent' (PC) if they feel the participant has the necessary knowledge, skills and attitudes in all assessment tasks for a unit.

Not Yet Competent' (NYC)

If the participant is unable to answer or demonstrate competency to the desired standard, they will be deemed to be 'Not Yet Competent' (NYC).

This does not mean the participant will need to complete all the assessment tasks again. The focus will be on the specific assessment tasks that were not performed to the expected standards.

The participant may be required to:

- a) Undertake further training or instruction
- b) Undertake the assessment task again until they are deemed to be 'Pass Competent'.

Competency standard

UNIT TITLE: PLAN, TRIAL AND IMPLEMENT MINIMAL IMPACT OPERATIONS		NOMINAL HOURS: 80
UNIT NUMBER: D2.TTG.CL3.15		
UNIT DESCRIPTOR: This unit deals with skills and knowledge required to plan and conduct tourism activities that will have a minimal negative impact on the environment and the society in which it is conducted so as to optimise the concept of sustainable tourism		
ELEMENTS AND PERFORMANCE CRITERIA	UNIT VARIABLE AND ASSESSMENT GUIDE	
Element 1: Plan minimal impact operations 1.1 Identify the <i>proposed activity/operation</i> to be conducted 1.2 Identify the <i>location</i> in which the identified activity/operation is proposed to be conducted 1.3 Research the <i>factors that may be impacted by the proposed activity</i> 1.4 Research the <i>compliance requirements</i> that apply to the proposed activity/operation and location 1.5 Develop a <i>plan that details the experiences and activities to be implemented</i> Element 2: Trial minimal impact operations 2.1 <i>Organise for the trial</i> to be conducted 2.2 Conduct the trial operation as planned 2.3 <i>Monitor the impacts</i> of the trial	Unit Variables The Unit Variables provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. It relates to the unit as a whole and facilitates holistic assessment. This unit applies to all industry sectors within the labour divisions of the hotel and travel industries and may include: Travel Agencies Tour Operation Proposed activity/operation may be related to: • Constructing facilities • Introducing tours • Introducing interpretive activities • Establishing camps • Interaction with wildlife.	

2.4 <i>Evaluate the information</i> generated by the trial 2.5 Utilise the information from the trial to <i>modify previous plans</i> so as to minimise negative effects and maximise positive impacts Element 3: Implement minimal impact operations 3.1 <i>Apply revised plans</i> to the practical application of minimal impact tourism activities/operations 3.2 <i>Conduct the activity/operation in such a way that encourages others to engage in minimal impact actions</i> 3.3 Implement ongoing monitoring protocols Element 4: Evaluate minimal impact operations 4.1 <i>Collect objective environmental data</i> 4.2 <i>Solicit feedback</i> from the local community and staff 4.3 Collaborate with local authorities to manage local environmental and social issues caused by, or related to, the minimal impact activity/operation 4.4 Modify previous plans on the basis of valid data obtained	<i>Location</i> refers to: • The immediate geographic vicinity in which the activity/operation is proposed • Other geographic locations that may be impacted by the activity/operation, including consideration of routes that will enable access. <i>Factors</i> that may be impacted by the proposed activity can be either positive or negative and may include: • Environmental, including the natural and built environment • Social, including social dislocation and changes to existing social interactions within the local community • Ecological, addressing the impact on animals and their habitat, plants and other organisms • Economic, including employment, investment, inflation, impact on local income, effects of partial reliance on tourism-related income and contribution to regional development • Cultural, including art, dance, music, storytelling, tools, implements, foods, artefacts, symbols, symbolic actions, rituals, rites, ceremonies, celebrations, heroes, significant figures, individuals, beliefs, assumptions, values, attitudes, language, religion, education, social institutions and cultural sites. Compliance requirements relate to: • Local rules, regulations and by-laws • National legislation of the host country • Codes of practice • Requirements imposed by existing businesses and operations. Plan that details the experiences and activities to be implemented should address: • How the proposal meets identified local needs and addresses identified concerns, including action to minimise negative effects and maximise positive impacts • Extent and type of activities and operations proposed, including specification of the site/location to be used and the nature of the activities/operations to be conducted • Timing details, including development time, commencement dates, duration of the activity/operation and specification of daily hours of operation
---	---

	• Evidence of gaining appropriate approvals, permissions, authorities, licenses and registrations from local communities and authorities • Behaviour stipulations for tour group members who visit • Details of the trial process that will be followed prior to full implementation of the proposal • Explanation of how objectors can register their objection to the proposal and explanation of the process that will be followed when an objection is received • Consultation that will occur with relevant communities and individuals prior to the final implementation decision being made • Monitoring protocols that will be used to assess the impact of the proposal on the local environment and communities. Organise for the trial may include: • Notifying key stakeholders and gaining their approval and cooperation • Establishing the infrastructure to support the initiative • Putting identified monitoring equipment and systems in place • Detailing the parameters of the trial and the criteria by which it will be evaluated • Committing to transparency in the implementation of the trial and the release of the data gathered during the monitoring process • Establishing initial benchmarks against which comparisons will be made following the trial. <i>Monitor the impacts</i> may include the use of: • Completing logbooks • Filling in sighting forms • Making personal observations • Taking basic measurements, including temperature, weather conditions, estimations of percentage cover, water flow, water volumes and customer traffic counts • Photography
--	--

	• Gathering anecdotal evidence • Liaising with key stakeholders. <i>Evaluate the information</i> should include consideration, quantification and analysis of positive and negative impacts which can include: • Environmental – positive: ▪ Opportunities for conservation and protection of buildings and facilities ▪ Opportunities for conservation and protection of the natural environment ▪ Education of visitors relating to local environmental issues ▪ Potential to improve sites that have been de-graded prior to the initiative • Environmental – negative: ▪ Physical damage to building, facilities and the natural environment, including erosion ▪ Pollution ▪ Waste, energy and consumable demands on the local area ▪ Adverse visual impacts • Social – positive: ▪ Improved facilities and infrastructure ▪ Improved understanding regarding local issues ▪ Improved relationships between the local community and other communities ▪ More things to do and increased opportunities to interact with others • Social – negative: ▪ Social dislocation ▪ Potential for increase in criminal activities ▪ Reduced focus on and potential interruptions to traditional social interactions and activities
--	--

	• Ecological – positive: ▪ Increased awareness of ecological issues ▪ Potential for investment to create additional habitat to encourage the growth and development in numbers and species of flora and fauna • Ecological – negative: ▪ Disturbance to flora and fauna ▪ Introduction of feral/exotic species • Economic – positive: ▪ Increased employment opportunities for local population ▪ Increased investment ▪ Increased local revenue, foreign exchange earnings and spending potential • Economic – negative: ▪ Potential for unacceptable levels of inflation ▪ Obligations that can result from reliance on tourism income • Cultural – positive: ▪ Sharing of culture with the wider community ▪ Better understanding of culture amongst other communities • Cultural – negative: ▪ Trivialisation of the culture ▪ Potential for established culture to be altered against the will of and despite the activities of the local community. Modify previous plans may include: • Cancelling the proposed activity/operation • Revising aspects of the plan that were highlighted as negative, including the types and nature of activities, the physical location and size of the proposal, timing considerations and amount of investment • Expanding plans for those aspects of the plan that received a positive trial result
--	---

	• Gaining necessary approvals and authorisations from key stakeholders for the revised plans • Organising, conducting, monitoring and evaluating a supplementary trial, where required and appropriate. Apply revised plans should include: • Implementing the plans as proposed • Using minimal impact techniques and procedures, including education on appropriate behavioural patterns, site hardening, technological solutions, restricting or limiting access and staged authenticity, as appropriate • Liaising with key stakeholders to ensure ongoing support and positive relationships. Conduct the activity/operation in such a way that encourages others to engage in minimal impact actions may include: • Acting as a role model • Sharing lessons learned with others seeking to apply minimal impact operations • Promoting the benefits that have flowed from running a minimal impact operation. Collect objective environmental data will include: • Implementing the planned data gathering procedures • Analysing and evaluating the collected data • Sharing the data and analysis with key stakeholders • Demonstrating transparency in data collection and analysis. Solicit feedback may include: • Verbal and written feedback • Maintaining a feedback database/file • Proactively seeking feedback • Conducting consultation and feedback meetings • Sharing the feedback with key stakeholders
--	---

- Thanking contributors who provide feedback
- Requiring staff to provide feedback.

Assessment Guide

The following skills and knowledge must be assessed as part of this unit:

- The enterprise's policies and procedures in regard to planning, trialling and implementing minimal impact operations
- Knowledge of legislation, regulations, codes of practice and requirements of the host country where the tourism operation is proposed
- Principles of communication and negotiation with communities and authorities
- Knowledge of global environmental issues and measures to address them
- Ability to use techniques and technologies that will minimise the impact of tourism activity/operation
- Ability to capture data on the impact of tourism operations
- Ability to use planning, negotiation, organisational monitoring and management skills.

Linkages To Other Units

- Develop and update tourism industry knowledge
- Coordinate and operate a day-tour or short excursions
- Manage and facilitate an extended tour experience
- Plan, develop and evaluate interpretive activities
- Develop interpretive content for eco-tourism activities
- Conduct interpretive activities in the field
- Develop and coordinate appropriate cultural tourism activity
- Research and share information on indigenous cultures
- Develop and implement operational plans
- Manage operational risk

	• Monitor tourism operations • Assess and plan tourism opportunities for local communities • Develop and monitor culturally appropriate tourism activity • Develop/monitor ecologically sustainable tourism operations. Critical Aspects of Assessment Evidence of the following is essential: • Understanding of host enterprise policies and procedures in regard to planning, trialling and implementing minimal impact operations • Demonstrated ability to research, develop and present a viable written plan to support the trial of a small-scale minimal impact activity/operation, chosen by the candidate, in a nominated location • Demonstrated ability to put into practice a nominated prepared plan to trial the implementation of a small-scale minimal impact activity/operation, and record and evaluate the results of the trial in such a way that they can be used to prepare a revised plan • Demonstrated ability to prepare a revised plan to enable the implementation of a nominated small-scale minimal impact activity/operation in a nominated location that reflects the information gained as a result of a trial of the activity/operation • Demonstrated ability to collect relevant data and feedback in relation to the implementation of a nominated small-scale minimal impact activity/operation and demonstrate how this information may be used to modify the original plan on which the activity/operation was based. Context of Assessment Assessment must ensure: • Actual or simulated office environment for the planning phase and an actual location and activity/operation for the demonstration of practical trialling, implementation and evaluation skills.
--	--

	Resource Implications Training and assessment must include the use of a real location, real communities and stakeholders and a real or simulated activity/operation; and access to workplace standards, procedures, policies, guidelines, tools and equipment. Note: all practical assessment requirements may relate to the one location and the same activity/operation and the assessments may flow from each other.		
	Assessment Methods The following methods may be used to assess competency for this unit: • Observation of practical candidate performance • Portfolio of documentation, including plans, permissions and feedback sheets • Feedback from local communities • Role plays • Oral and written questions • Third party reports completed by a supervisor • Project and assignment work.		
	Key Competencies in this Unit Level 1 = competence to undertake tasks effectively Level 2 = competence to manage tasks Level 3 = competence to use concepts for evaluating		
	Key Competencies	Level	Examples
	Collecting, organising and analysing information	2	Research initial information for the preparation of plans; monitor data, evaluate and draw conclusions

Communicating ideas and information	2	Explain the potential impact of the proposed activity/operation to key stakeholders
Planning and organising activities	2	Develop and revise plans

	Working with others and in teams	2	Liaise with local communities and key stakeholders
	Using mathematical ideas and techniques	1	Calculate data gathered from monitoring equipment; calculating costs
	Solving problems	2	Address negative impacts to achieve a positive result
	Using technology	1	Use the internet to research material; use monitoring equipment to capture data

PLAN, TRIAL AND IMPLEMENT MINIMAL IMPACT OPERATIONS

D2.TTG.CL3.15

Slide 1

Slide No	Trainer Notes
1.	Trainer welcomes students to class.

Slide

Plan, trial and implement minimal impact operations

This Unit comprises four Elements:

1. Plan minimal impact operations
2. Trial minimal impact operations
3. Implement minimal impact operations
4. Evaluate minimal impact operations

Slide 2

Slide No	Trainer Notes
2.	Trainer advises trainees this Unit comprises four Elements, as listed on the slide explaining: • Each Element comprises a number of Performance Criteria which will be identified throughout the class and explained in detail • Trainees can obtain more detail from their Trainee Manual • At times the course presents advice and information about various protocols but where their workplace requirements differ to what is presented, the workplace practices and standards, as well as policies and procedures must be observed.

Slide

Assessment

Assessment for this unit may include:

- Oral questions
- Written questions
- Work projects
- Workplace observation of practical skills
- Practical exercises
- Formal report from employer/supervisor

Slide 3

Slide No	Trainer Notes
3.	Trainer advises trainees that assessment for this Unit may take several forms, all of which are aimed at verifying they have achieved competency for the Unit as required. Trainer indicates to trainees the methods of assessment that will be applied to them for this Unit.

Slide

Element 1 – Plan minimal impact operations

Performance Criteria for this Element are:

- Identify the proposed activity/operation to be conducted
- Identify the location in which the identified activity/operation is proposed to be conducted
- Research the factors that may be impacted by the proposed activity
- Research the compliance requirements that apply to the proposed activity/operation and location
- Develop a plan that details the experiences and activities to be implemented

Slide 4

Slide No	Trainer Notes
4.	Trainer identifies for trainees the Performance Criteria for this Element, as listed on the slide. Class Activity – General Discussion Trainer leads a general class discussion by asking questions such as: • What is meant by minimal impact operations? • Why is it important to consider/learn about this? • What are some examples of it? • What are the possible problems associated with not implementing minimal impact tourism operations?

Slide

Identify the proposed activity/operation to be conducted

'Minimal impact tourism' =
'Sustainable tourism' – also
known as:

- Green tourism
- Responsible tourism
- Eco-tourism
- Environmental tourism
- Ethical tourism

Slide 5

Slide No	Trainer Notes
5.	Trainer explains: • There is no single, universally-agreed definition of minimal impact tourism • In practice, it is known more commonly as 'sustainable tourism' • It may also be referred to by other terms such as: ▪ Green tourism ▪ Responsible tourism ▪ Eco-tourism ▪ Environmental tourism ▪ Ethical tourism. Classroom Activity – Internet Research Trainer facilitates research and discussion of: http://www.tourism.australia.com/industry-advice/what-is-sustainability.aspx – regarding consideration of definition and social responsibility.

Slide

Identify the proposed activity/operation to be conducted

Critical aspects include the need for Tourism Operators to:

- Avoid damage to the area visited
- Minimise impact on the area visited
- Repair previous damage

Slide 6

Slide No	Trainer Notes
6.	Trainer highlights critical in the notion are Tourism Operators taking action to: • Avoid damage to the area visited • Minimise impact on the area visited • Repair previous damage. Classroom Activity – Internet Research Trainer facilitates research and discussion of: http://www.iztg.hr/en/odrzivi_razvoj/sustainable_tourism/ - What is sustainable tourism http://www.unesco.org/education/tlsf/mods/theme_c/mod16.html - Sustainable tourism http://www.sustainabletourism.net/ - Sustaining tourism.

Slide

Identify the proposed activity/operation to be conducted

ASEAN:

- Is committed to sustainable tourism
- Records this commitment in its ATSP

Slide 7

Slide No	Trainer Notes
7.	Trainer emphasises ASEAN is committed to sustainable, with reference to The ASEAN Tourism Strategic Plan (ATSP) 2011- 2015. “By 2015, ASEAN will provide an increasing number of visitors to the region with authentic and diverse products, enhanced connectivity, a safe and secure environment, increased quality of services, while at the same time ensuring an increased quality of life and opportunities for residents through responsible and sustainable tourism development by working effectively with a wide range of stakeholders” emphasising: “All strategic directions and actions in the ATSP are guided by responsible and sustainable tourism principles recognizing the significant role that tourism plays in poverty reduction, climate change, gender and minority issues, capacity building, cultural preservation and natural conservation.” Classroom Activity – Internet Research Trainer facilitates research and discussion of: http://www.businesseventsthailand.com/fileadmin/user_upload/documents/mice-publications/Asean_Travel_Tourism.pdf http://www.asean.org/resources/publications/asean-publications/item/asean-tourism-marketing-strategy-2012-2015-2 - ASEAN Tourism Marketing Strategy 2012 – 2015 (can be downloaded via link from this site)

Slide

Identify the proposed activity/operation to be conducted

'The industry' is also committed to the concept as can be seen from APEC/PATA Code for Sustainable Tourism whose stance is:

- “... to encourage and assist in the development of travel industries throughout Pacific-Asia in a manner which recognises the urgent importance to practice an environmental ethic that supports responsible conservation and restoration of Pacific Asia's unique combination of natural, social and cultural resources”

Slide 8

Slide No	Trainer Notes
8.	Trainer highlights the industry is also committed to sustainable tourism with reference to APEC/PATA Code for Sustainable Tourism which states in part its stance is: “... to encourage and assist in the development of travel industries throughout Pacific-Asia in a manner which recognises the urgent importance to practice an environmental ethic that supports responsible conservation and restoration of Pacific Asia's unique combination of natural, social and cultural resources”.

Slide

Identify the proposed activity/operation to be conducted

Tour Operators can demonstrate their commitment by: 1

- Planning and trialling tourism operations for minimal impact before implementation

Slide 9

Slide No	Trainer Notes
9.	Trainer explains within the construct of minimal impact/sustainable tourism (as described) individual Tourism Operators can demonstrate responsible practice by planning and trialling tourism operations for minimal impact before implementing them as standard practice in their business. The first step in this process is the need to identify proposed activities or operations to be conducted so they can be: • Properly described and quantified • Geographically located • Researched to determine the factors that may be impacted by the proposed activity • Analysed to identify relevant compliance requirements that need to be met • Properly planned with reference to a suitable and detailed, written proposal and plan of action. Classroom Activity – Guest Speaker Trainer arranges for local Tour Operator to attend and: • Discuss their orientation to sustainable tourism • Explain how they demonstrate their commitment • Identify Codes and other arrangements/agreements they comply with as part of their commitment • Detail a sustainable tourism initiative they have introduced/been involved with.

Slide

Identify the proposed activity/operation to be conducted

Activities which may need to be planned in this context can include:

- Constructing facilities
- Introducing tours
- Increasing tourist footprint

(Continued)

Slide 10

Slide No	Trainer Notes
10.	Trainer identifies activities which may need to be planned as part of sustainable tourism/minimal impact tourism: • Constructing facilities – such as: ▪ Access roads ▪ Buildings ▪ Infrastructure • Introducing tours – into areas where there was previously no tours • Increasing the tourist footprint – in terms of, for example: ▪ Bringing in more visitors ▪ Increasing the number of tours to the area ▪ Increasing the duration of tours.

Slide

Identify the proposed activity/operation to be conducted

- Introducing interpretive activities
- Establishing camps
- Interacting with wildlife

Slide 11

Slide No	Trainer Notes
11.	Trainer continues to identify activities which may need to be planned as part of sustainable tourism/minimal impact tourism: ● Introducing interpretive activities – which may require: ▪ Access to new/different areas ▪ Use of local resources ▪ Involvement of local communities ● Establishing camps – for over-night and/or longer stays where there will be a demand for: ▪ Toilet and washing facilities ▪ Cooking and eating facilities ● Interacting with wildlife – as: ▪ Part of a tour ▪ Caused by tourist intrusion (camps; travel through regions) into their natural habitat.

Classroom Activity – Guest Speaker

Trainer arranges for local Tour Guide to attend and:

- Discuss their orientation to sustainable tourism
- Describe how they operate to comply with the principle of sustainable tourism

Indicate what they see as issues to consider when planning and introducing a sustainable tourism initiative.

Slide

Identify location in which the identified activity/operation is proposed to be conducted

Step 1 in planning is to identify the location for the initiative – this refers to:

- Describing the immediate geographic vicinity in which the activity/operation itself is proposed
- Stating associated geographic locations that may be impacted by the activity/operation

Slide 12

Slide No	Trainer Notes
12.	Trainer indicates an important first step in planning a sustainable tourism initiative is the need to identify the location of the tourism activity or operation highlighting this refers to: ● Describing the immediate geographic vicinity in which the activity/operation itself is proposed – which may occur with reference to: ▪ Specific latitudinal and longitudinal points ▪ Name of country/countries ▪ Local (recognised or generally accepted and understood) names –for towns, villages, communities, areas, regions, locales and/or points of interest ▪ Geographic features – such as mountains, rivers, lakes, coastlines, islands and other prominent landforms ● Stating associated geographic locations that may be impacted by the activity/operation – which may require specification of: ▪ Camp sites not intrinsic to the proposed tour activity ▪ Position of supporting facilities – such as parking and loading/unloading areas, airfields/landing areas, storage space for permanent plant and equipment, infrastructure, ▪ Routes that will enable access (ingress and egress) to the activity/operation – including details of land, water and air travel.

Slide

Identify location in which the identified activity/operation is proposed to be conducted

Exact location is necessary to:

- Demonstrate transparency and openness
- Ensure those potentially impacted can be made aware of the proposal
- Make sure correct/necessary people are involved
- Begin process of researching funding which may be available

(Continued)

Slide 13

Slide No	Trainer Notes
13.	Trainer explains the exact location/s for proposed tourism activities and operations need to be correctly and specifically determined in order to: • Demonstrate transparency and openness in the proposal – which is an essential pre-requisite for generating genuine support and positive commitment to the initiative from all stakeholders • Ensure all those potentially impacted can be made aware of the proposal – and make whatever input or comment they believe is appropriate and relevant • Make sure the correct/necessary people (communities, locals, government agencies) are involved – and can be involved in the planning and subsequent stages • Begin the process of researching government funding which may be available for the area – to support sustainable/minimal impact tourism initiatives.

Slide

Identify location in which the identified activity/operation is proposed to be conducted

- Research standard factors that may be impacted
- Identify the country/countries involved
- Start process of identifying other Tourism Operators who may be operating in the area
- Enable identification of other non-legislated requirements which apply
- Provide a real-world context for the written plan

Slide 14

Slide No	Trainer Notes
14.	Trainer continues to explain need to identify location for initiative/s – in order to: ● Research standard factors that may be impacted by the proposed activity – more later but standard classification of these factors include: ▪ Environmental ▪ Socio-cultural ▪ Economic ● Identify the country/countries involved – as this will have significant importance regarding legislation and local requirements which need to be accommodated: more later ● Start the process of identifying other Tourism Operators who may be operating in the area – to help determine the <i>cumulative</i> impact/total of all tours and tourists to the area ● Enable identification of other non-legislated requirements which apply – in terms of (for example) existing industry Codes of Practice (COP), government plans, commercial agreements negotiated with local communities (more later) ● Provide a real-world context for the written plan which will be prepared – more later on preparing plan.

Slide

Identify location in which the identified activity/operation is proposed to be conducted

Ways to identify location of an initiative:

- Visit the site/area
- Talk to locals
- Speak to industry bodies
- Liaise with government agencies
- Use suitably detailed maps

Slide 15

Slide No	Trainer Notes
15.	Trainer identifies ways to define the location of a proposed activity/operation: • Visit the site/area – ensuring: ▪ Notes are taken to describe required and/or preferred locations ▪ GPS technology is used to record points • Talk to locals – to: ▪ Identify local names ▪ Initiate contact and relationship building ▪ Find out other tours/activities already being conducted • Speak to industry bodies – to: ▪ Obtain applicable Codes ▪ Obtain relevant reports and/or research on the area • Liaise with government agencies – to: ▪ Obtain information they have on the proposal/site ▪ Determine their orientation to the proposed activity ▪ Obtain copies of applicable legislation

- Use suitably detailed maps – commonly a combination of:
 - General reference maps
 - Topographic maps.

Classroom Activity – Individual Exercise

Trainer asks students to identify a sustainable tourism initiative and provides them with necessary resources and advice to enable them to clearly and accurately define/describe the geographic location for where the initiative is proposed.

Slide

Research the factors that may be impacted by the proposed activity

It is important to understand:

- All tourism initiatives have some impact
- Impacts type and extent vary between initiatives
- Previous initiatives may indicate impacts of other similar ones

(Continued)

Slide 16

Slide No	Trainer Notes
16.	Trainer states it is essential to understand: • It is one of the fundamental tenets underpinning acceptance of minimal impact tourism that all tourism activity has <i>some</i> impact – no initiative in this regard is ever <i>totally</i> free of impact • The number and extent of the impact can and will vary between initiatives – meaning each proposed initiative needs to be researched on a case-by-case basis • Previous, like initiatives can provide an indication of impacts of other similar initiatives – but the link is not necessarily a direct one.

Slide

Research the factors that may be impacted by the proposed activity

- Impacts can be positive or negative
- Often lack of clarity/consensus about projected impacts will be
- Tourism Operators who subscribe to industry Code are commonly required to research impact on these factors
- There is often a mandatory external requirement for research of this type to be undertaken

Slide 17

Slide No	Trainer Notes
17.	Trainer continues giving context for this noting: ● Impacts can be positive or negative – a positive impact in one area/set of factors can also result in a negative impact in one or more other areas/sets of factors: the impact is not <i>always</i> unilaterally positive or negative for any given initiative ● There is often a lack of clarity and/or consensus about what the projected impacts of a minimal impact tourism initiative will be – despite consultation, debate and discussion there can be quite heated disagreement about the way research was done, assumptions which were made, stakeholders who were involved and the amount and type of consultation entered into ● Tourism Operators who subscribe to an industry Code relating to sustainable/minimal impact tourism development/operation are commonly required by that Code to research impact on these factors – as standard practice ● There is often a mandatory <i>external</i> requirement for research of this type to be undertaken – before a proposal can be approved by local communities, government agencies or industry bodies (and/or for funding).

Classroom Activity – Guest Speaker

Trainer arranges for Officer/representative from local government tourism agency to attend and:

- Detail their orientation to sustainable tourism
- Explain support available to industry for sustainable tourism initiatives
- Describe compliance requirements for local tourism initiatives.

Slide

Research the factors that may be impacted by the proposed activity

It is generally understood tourism initiatives have the potential to have impacts on:

- The environment
- Society and culture
- The economy

Slide 18

Slide No	Trainer Notes
18.	Trainer indicates it is accepted tourism generally impacts: • The environment • Society and culture • The economy. Classroom Activity – Internet Research Trainer facilitates research and discussion of: http://www.unep.org/resourceefficiency/Business/SectoralActivities/Tourism/FactsandFiguresaboutTourism/ImpactsofTourism/tabid/78774/Default.aspx - Impacts of tourism

Slide

Research the factors that may be impacted by the proposed activity

There is also a need to look at 'carrying capacity' with reference to:

- Ecological carrying capacity
- Social carrying capacity
- Psychological carrying capacity
- Economic carrying capacity

Slide 19

Slide No	Trainer Notes
19.	Trainer also mentions there is a need to consider the carrying capacity of the location, with reference to: ● Ecological carrying capacity relates to the maximum use of a tourist resource without causing any harm to the environment ● Social carrying capacity relates to the reaction of the local people to the tourist development of the place, which should never be negative ● Psychological carrying capacity relates to the quality of visitors' satisfaction with a certain tourist destination, which is not to be decreased ● Economic carrying capacity relates to the level of acceptable dependence between the local economy and the level of the tourist development of a place, which should never become too heavy. Classroom Activity – Internet Research Trainer facilitates research and discussion of: http://www.slideshare.net/tofujay/carrying-capacity-16284835 - Carrying capacity http://www.biodiversity.ru/coastlearn/tourism-eng/con_capacity.html - Sustainable Tourism

http://www.google.com/url?sa=t&rct=j&q=&esrc=s&source=web&cd=3&ved=0CDcQFjAC&url=http%3A%2F%2Fwww.danubecc.org%2Fupl%2FE-learning%2520Modules%2FModule%25205%2520-%2520Tourism%2520carrying%2520capacity.doc&ei=fHVrVbLyLZD98QWf-4OgAw&usg=AFQjCNHcxtceGSLuL43c7uLhc3MsiCptOQ&sig2=XNjpn4KWDS3PsUfn10Eobw&bvm=bv.94455598,d.dGc – Module 5: Tourism carrying capacity

Slide

Research the factors that may be impacted by the proposed activity

Possible environmental factors impacted by a tourism initiative can be related to:

- The natural environment
- The built environment
- The ecology

Slide 20

Slide No	Trainer Notes
20.	Trainer explains possible environmental factors impacted by a tourism initiative can be related to: ● The natural environment – which may include: ▪ Possible air pollution – caused by vehicles and camp fires ▪ Contamination of fresh water, sea water and drinking water – through litter and sewage ▪ Degradation of land/landscape – as a result of vehicles, presence of tourists, tourism activities on-site, camping ▪ Increased use of scarce local resources – such as fuel, drinking water, ▪ Greater levels of noise – caused by the extra vehicles, activities and people ▪ Aesthetic pollution – simply caused by presence of vehicles, people and man-made items in a natural environment ▪ Increase in waste (litter and rubbish) generated by tourists and their presence/activities ● The built environment – in relation to the impact of extra people/tourists in relation to: ▪ How their presence will affect the existing infrastructure – such as impact of tourists coaches and vehicles on local roads; impact of extra people at monument sites and buildings (museums, public toilets, hospitals, transport hubs)

- Need to build/provide new infrastructure/buildings – to cater for proposed traffic (vehicular and pedestrian/foot)
- The ecology – and the impact of tourism on:
 - Animals and their habitat; Plants; Other organisms.

Classroom Activity – Internet Research

Trainer facilitates research and discussion of:

<http://www.unep.org/resourceefficiency/Home/Business/SectoralActivities/Tourism/WhyTourism/ImpactsofTourism/EnvironmentalImpacts/tabid/78775/Default.aspx> – Environmental impacts.

Slide

Research the factors that may be impacted by the proposed activity

Possible socio-cultural factors impacted by a tourism initiative can be related to:

- Commodification of a community/society
- Standardisation
- Loss of authenticity
- Adaptation to tourist demands

(Continued)

Slide 21

Slide No	Trainer Notes
21.	Trainer explains possible socio-cultural factors impacted by a tourism initiative can be related to: ● Commodification of a community/society – where their rituals and culture are converted into a ‘product’ to be sold, creating what they call a ‘reconstructed ethnicity’ which is altered for commercial purposes ● Standardisation – meaning the unique nature of a culture/society is standardised to meet the expectations of (some) tourists ● Loss of authenticity – as the people adapt to accommodate the actual or perceived needs of the tourists, producing sometimes what the UN refers to as ‘staged authenticity’ ● Adaptation to tourist demands – as local communities focus of producing artefacts and items suited to the demands of tourists rather than their own needs. Classroom Activity – Internet Research Trainer facilitates research and discussion of: http://www.unep.org/resourceefficiency/Home/Business/SectoralActivities/Tourism/WhyTourism/ImpactsofTourism/SocioCulturalImpacts/tabid/78780/Default.aspx – Socio-cultural impacts.

Slide

Research the factors that may be impacted by the proposed activity

- Cultural clashes
- Increase in crime rates
- Child labour
- Prostitution and sex tourism

Slide 22

Slide No	Trainer Notes
22.	Trainer continues to explain possible socio-cultural factors impacted by a tourism initiative can be related to: ● Cultural clashes – where people from different cultures do not mix, perhaps based on: ▪ Economic inequality between cultures/peoples ▪ Irritation regarding the behaviour displayed by tourists while at the location ▪ Job level friction – in that local people are often employed in lower level/lower paying jobs than other workers employed by the Tourism Operator ● Increase in crime rates – caused when locals steal from tourists ● Child labour ● Prostitution and sex tourism. Classroom Activity – Internet Research Trainer facilitates research and discussion of: http://www.unep.org/resourceefficiency/Business/SectoralActivities/Tourism/FactsandFiguresaboutTourism/ImpactsofTourism/Socio-CulturalImpacts/NegativeSocio-CulturalImpactsFromTourism/tabid/78781/Default.aspx – Negative socio-cultural impacts from tourism.

Slide

Research the factors that may be impacted by the proposed activity

Possible economic factors impacted by a tourism initiative can be related to:

- Employment
- Investment
- Inflation

(Continued)

Slide 23

Slide No	Trainer Notes
23.	Trainer explains possible economic factors impacted by a tourism initiative can be related to: • Employment – and: ▪ The number of jobs created – and the status of these jobs as measured by indicators (such as) number of hours per week, number of full-time jobs, number of part-time jobs, number of casual jobs or hours ▪ The level of these jobs – in terms of whether they are permanently low-level positions or whether they allow for genuine career development ▪ Conditions of employment provided by employers for the workers • Investment – in terms of issues such as: ▪ Infrastructure ▪ Buildings ▪ Training and development ▪ Repairing damage to the environment • Inflation – and how this affects: ▪ Price of land and houses for locals – when Tourism operators purchase land and buildings: there may be a need to protect the interests of locals by limiting the amount, location or type of purchases which can be made by Tourism organisations

- | | |
|--|--|
| | <ul style="list-style-type: none">▪ Cost of limited resources/raw materials – as these are bought for tourism purposes, they commonly become more expensive for locals so there may be a need to limit what can be purchased or to require Tourism Operators to carry in all the resources they want to use. |
|--|--|

Slide

Research the factors that may be impacted by the proposed activity

- Local income
- Opportunity cost
- Extent of reliance on tourism

Slide 24

Slide No	Trainer Notes
24.	Trainer continues to explain possible economic factors impacted by a tourism initiative can be related to: • Local income – and how this: ▪ Enables tangible benefits for the recipients – as defined by the relevant community (which may be in terms of housing acquisition; standard of living indicators; access to food, medical, education and/or other services) ▪ Circulates throughout the local economy – known as the ‘multiplier effect’, economists believe money earned by one person in a community can circulate throughout the economy up to four times (as people spend that money within their community) bringing an economic benefit for four people not just the original one person • Opportunity cost – meaning the money spent on tourism cannot be spent on something else which may have brought a larger benefit to the area/people • The extent of reliance on tourism-related income and contribution made by tourism to regional development – in general: ▪ Total dependence on tourism is seen as a bad thing – subject to seasonal influences, global trends, and rapid changes caused by external events ▪ Partial reliance on tourism is regarded as a positive element of a wider economic plan.

Classroom Activity – Internet Research

Trainer facilitates research and discussion of:

http://www.unep.org/10yfp/Portals/50150/downloads/Asia_Pacific_10YFP_Roadmap_2014_2015_FINAL.pdf - The 10 Year Framework of Programmes on Sustainable Consumption and Production (10YFP): Roadmap for the 10YFP implementation in Asia and the Pacific 2014 – 2015 with particular attention to Section C.1.D 'Sustainable tourism including eco-tourism'

http://www.eucentre.sg/wp-content/uploads/2013/12/EUCResearchBrief_TourismEU27ASEAN.pdf - Tourism as a driver of economic growth and development in the EU-27 and ASEAN regions

Slide

Research the factors that may be impacted by the proposed activity

- Leakage
- Enclave tourism
- Infrastructure costs

Slide 25

Slide No	Trainer Notes
25.	Trainer continues to explain possible economic factors impacted by a tourism initiative can be related to: • Leakage – which refers to the amount of money lost to a local community after all expenses to governments (taxes, levies, fees, charges) are paid, and after all payments to <i>external</i> organisations (the businesses who own the tour companies, hotels, transport companies, catering outlets) are made • Enclave tourism – where tourists visit an area but spend most of their money in the one location (a hotel, cruise ship, resort) rather than spreading it around among local community people or smaller local businesses • Infrastructure costs – where local governments are forced to pay the cost of building roads and providing support services (police, medical, tax relief for tourists) to enable tourism to function. Classroom Activity – Internet Research Trainer facilitates research and discussion of: http://www.unep.org/resourceefficiency/Business/SectoralActivities/Tourism/FactsandFiguresaboutTourism/ImpactsofTourism/EconomicImpactsofTourism/NegativeEconomicImpactsofTourism/tabid/78784/Default.aspx - Negative economic impacts of tourism http://www.slideshare.net/reymarieoohlala/overview-of-tourism-impacts - Overview of tourism impacts.

Slide

Research the factors that may be impacted by the proposed activity

Ways to research factors:

- Talk to those who have conducted similar programs
- Read reports on initiatives which have already been conducted
- Speak with local communities
- Communicate with those expected to be impacted
- Establish baseline data/benchmarks
- Visit the area

Slide 26

Slide No	Trainer Notes
26.	Trainer presents strategies for researching the factors likely to be impacted by a tourism initiative noting a blend of options is the most effective approach to use: • Talk to those who have conducted similar operations in similar areas – to obtain their input • Read reports on previous similar activities – many of these exist to provide data on other tourism initiatives • Speak with local communities who have been the subject of previous activities • Communicate with those expected to be impacted by the proposed activity • Establish baseline data/benchmarks – to use as reference points for future monitoring and evaluation • Visit the area – to gain first-hand experience of the location and meet face-to-face with the community and those who will/may be impacted. Classroom Activity – Internet Research Trainer facilitates research and discussion of: http://crctourism.com.au/wms/upload/resources/bookshop/3-3_socialimpacts_v01_web.pdf – Social impact of tourism on the Gold Coast http://ijbssnet.com/journals/Vol_4_No_3_March_2013/2.pdf – Understanding the economic impact of tourism in the Asia Pacific region using the Tourism Satellite Account http://cdn.intechopen.com/pdfs-wm/35710.pdf – A model for assessing the level of tourism impacts and sustainability of coastal cities.

Slide

Research compliance requirements that apply to proposed activity/operation and location

Sources of information on compliance requirements may be:

- Legislation
- By-laws
- Voluntary Codes of Practice/Conduct
- Mandatory Codes
- Local agreements with communities

Slide 27

Slide No	Trainer Notes
27.	Trainer identifies possible sources of compliance requirements: ● Legislation – these are the laws (the Acts) which need to be complied with ▪ There may be a need to comply with the laws of individual countries in which tourism activities are being conducted and/or relevant aspects of laws which may emerge on the establishment of the ASEAN Community (AC) ● By-laws – these are mandatory rules and regulations imposed by various ‘bodies’ such as: ▪ Government agencies; Local Councils; Local communities ● Voluntary Codes of Practice – which may be: ▪ Generated by an industry body – in consultation with membership to set industry-wide standards for its members ▪ Imposed by a government agency – who develop them to support attainment of strategic plans they have made ▪ Developed by individual Tourism Operators – as a public statement they make about themselves to customers to advertise and demonstrate their orientation and practices in regard to responsible tourism. Operators may seek to create an individual COP that provides a ‘point of difference’ for them when compared with their competitors

- Mandatory Codes of Practice – which are written by government agencies and are legally-binding requirements
 - These COPs are created under the authority of nominated pieces of legislation and are written to show organisations how they can/must operate in order to fulfil their legal obligations. In effect. If the business follows the COP, they are complying with the law
- Agreements which are already in place with local communities – as they have been negotiated with other Tourism Operators for previous tourism activities
- Arrangements already agreed to by the Tourism Operator – which may be imposed by virtue of:
 - Formal, written contracts with suppliers and/or clients
 - Verbal agreements and ‘promises made’ with partners, businesses and stakeholders.

Classroom Activity – Handouts

Trainer distributes and discusses sample legislation, COPs and other documentation as identified on the slide.

Slide

Research compliance requirements that apply to proposed activity/operation and location

Compliance requirements may be seen as:

- Drives for change
- Obstacles to development

Slide 28

Slide No	Trainer Notes
28.	Trainer stresses there is always a need to read documentation relevant to individual proposals to gain a proper understanding of what is necessary emphasising in practical terms, compliance requirements may be: • Drivers for action – in that laws may provide tax concessions for investment in tourism initiatives • Obstacles to development – by limiting (or prescribing) what can be done, where it can be done, when it can be done and how it can be done.

Slide

Research compliance requirements that apply to proposed activity/operation and location

Legislated compliance obligations may relate to:

- Employment
- Building and construction
- Incorporation and registration of businesses

(Continued)

Slide 29

Slide No	Trainer Notes
29.	Trainer indicates requirements which can be imposed by Acts, regulations established under those Acts and mandatory COPs may relate to: • Employment – with possible reference to selection and hiring of staff as well as employment contracts and conditions of employment • Building and construction – including zoning • Incorporation and registration of organisations and operating entities Classroom Activity – Guest Speaker Trainer arranges for local Council representative/official to attend and: • Discuss local compliance requirements for Tour Operators seeking to initiate a new tourism activity • Talk about local support for tourism initiatives • Describe local tourism activities they have been involved with and how they have supported them.

Slide

Research compliance requirements that apply to proposed activity/operation and location

- Safety, health and welfare issues
- Taxation
- Operational matters

Slide 30

Slide No	Trainer Notes
30.	Trainer continues to talk about possible legislated obligations: • Safety, health and welfare – as it applies to workers, customers/tourists and members of the public • Taxation – and registration as a business and payment of applicable rates of tax which can include import taxes, company tax, bed tax, consumption tax, service tax and others • Operational matters – such as laws governing: ▪ Sale/use of alcohol ▪ Food preparation, service and storage, vehicle registration ▪ Vehicles – in terms of vehicle registration, licensing of drivers and obeying road rules.

Slide

Research compliance requirements that apply to proposed activity/operation and location

Voluntary industry COPs may impose obligations to:

- Comply with all applicable laws
- Respect local community, people and the environment
- Leave the area as it was found

(Continued)

Slide 31

Slide No	Trainer Notes
31.	Trainer explains voluntary Codes developed by industry bodies and/or individual operators are likely to contain requirements about: • Complying with all applicable laws • Respecting the local community, people and the environment • Leaving an area, when on tour, in the same condition as when it was entered – referring to the need to ‘carry everything in and carry everything out’ (which may include carrying out not only all litter/rubbish but also human waste).

Slide

Research compliance requirements that apply to proposed activity/operation and location

- Do no harm
- Act in an ethical and responsible manner
- Provide a genuine tourism experience

Slide 32

Slide No	Trainer Notes
32.	Trainer continues to talk about possible voluntary COP obligations: • Doing no harm – to people (regarding bullying, harassment, discrimination) or physical or natural resources • Acting in an ethical and responsible manner with care, professionalism and diligence – based on sound knowledge and training • Providing a genuine tourism experience – supported by identified or relevant information, staff, information, food, accommodation, transport and activities. Classroom Activity (1) – Internet Research Trainer facilitates research and discussion of: http://www.gdrc.org/uem/eco-tour/apec_pata-code.html - The APEC/PATA Code for Sustainable Tourism. Classroom Activity (2) – Group Discussion Trainer leads class in discussion of practical examples of what constitutes “an ethical and responsible manner with care, professionalism and diligence”.

Slide

Develop a plan that details experience and activities to be implemented

Sustainable tourism initiatives must be planned and the plan must be:

- In writing
- The result of adequate consideration and consultation
- Realistic and achievable

Slide 33

Slide No	Trainer Notes
33.	Trainer reiterates need for sustainable tourism initiatives to be planned highlighting the plan must be: • In writing – so there is surety about it and the plan can be easily shared with others • The result of adequate consideration and consultation – with identified stakeholders • Realistic and achievable – within the context of the business environment for the proposer.

Slide

Develop a plan that details experience and activities to be implemented

Plan should contain:

- Explanation of how proposal meets identified local needs
- Description of the extent and type of activities and operations proposed
- Identification of timing details
- Provision of evidence proving required approvals and permissions have been approved/granted

(Continued)

Slide 34

Slide No	Trainer Notes
34.	Trainer presents standard requirements of this type of plan include: • Explanation of how the proposal meets identified local needs – while at the same time addressing identified concerns by including action to minimise negative effects and maximise positive impacts • Description of the extent and type of activities and operations proposed – including specification of the site/location to be used and the nature of the activities/operations to be conducted • Identification of timing details – including development time, commencement dates, duration of the activity/operation and specification of daily hours of operation • Provision of evidence proving required approvals, permissions, authorities, licenses and registrations have been approved/granted – by local communities and authorities.

Slide

Develop a plan that details experience and activities to be implemented

- Development of behaviour stipulations for tour group members
- Identification of process for trialling the initiative
- Explanation of how objectors can register objections
- Consultation that will occur with relevant communities and individuals
- Description of monitoring protocols

Slide 35

Slide No	Trainer Notes
35.	Trainer continues to present standard requirements of the plan: • Development of behaviour stipulations for tour group members – when they visit the site, participate in activities and/or engage with local people and communities • Identification of the process that will be followed for trialling the initiative – prior to full implementation of the proposal • Explanation of how objectors can register their objection to the proposal – together with explanation of the process that will be followed when an objection is received • Consultation that will occur with relevant communities and individuals – prior to final implementation decision being made • Description of monitoring protocols – to assess impact of proposal on local environment and communities. Classroom Activity – Internet Research Trainer facilitates research and discussion of: http://www.environment.gov.au/system/files/resources/9c8f5084-3565-4f26-8801-77da3458f497/files/steps.pdf - Steps to Sustainable Tourism: planning for a sustainable future for tourism, heritage and the environment. Attention must be paid to: • The 10 Steps: pages 7 – 55 • Ways to use the document: page 11

Slide

Develop a plan that details experience and activities to be implemented

- Details and content of the plan will vary between initiatives
- As an example, a plan to introduce a new overnight tour to an area may contain:
 - Date/s of trial
 - Time/s group will arrive
 - Tour duration
 - Number of people in each group

(Continued)

Slide 36

Slide No	Trainer Notes
36.	Trainer explains the details of the trial (or 'pilot') to be contained in the plan and the nature of the content will vary between the type of activities being planned stating for example, the plan for the trial of an initiative to conduct an overnight tour into a new location may require specification of: • Date/s of the trial tours • Time/s the tour group/s will arrive • Duration of tour/s on each date • Number of people in each tour group.

Slide

Develop a plan that details experience and activities to be implemented

- Group profile
- Itinerary
- Route/s to be used – vehicle and foot traffic
- Location and size of camp

(Continued)

Slide 37

Slide No	Trainer Notes
37.	Trainer continues identifying sample contents of pilot/trial plan: • Group profile – by relevant demographic characteristics (where appropriate for the type of activity/tour being offered – for example the Tourism Operator may be seeking to target children for school camps/excursions, or seeking to target senior citizens) • Itinerary for each tour • Route/s to be used – in relation to: ▪ Entry to the site/area and exit from it ▪ Travel within the area ▪ Foot traffic and vehicles • Location and size of camp site.

Slide

Develop a plan that details experience and activities to be implemented

- Facilities in camp
- Interpretive activities
- Estimated use of local resources and facilities
- Resources to be 'carried in'
- Details of 'prohibited items'

(Continued)

Slide 38

Slide No	Trainer Notes
38.	Trainer continues identifying sample contents of pilot/trial plan: • Facilities within the camp • Interpretive activities to be conducted • Estimated use of local resources and facilities – which might reference things such as water, wood, fuel, shops, toilet facilities, huts, cooking and dining areas and camp sites • Details of resources to be carried into the area by the Tourism Operator – and details of items which have been declared 'prohibited items.'

Slide

Develop a plan that details experience and activities to be implemented

- Role/s of local communities/personnel
- Arrangements regarding latrines and washing facilities
- Details of waste management
- Tour group 'Code of Conduct'

Slide 39

Slide No	Trainer Notes
39.	Trainer continues identifying sample contents of pilot/trial plan: ● Role of local communities in the operation of the tour – such as voluntary commitment or paid work as: ▪ Local area tour guides ▪ Participants in certain interpretive activities ▪ Labour for unpacking tour vehicles, pitching tents, setting up camps and breaking camp and packing for departure ▪ Food workers employed to prepare, cook and serve meals ● Arrangements for latrines and washing facilities ● Details of waste management – which may require 'carrying out' of waste ● 'Code of Conduct' for tourists and tour staff when in the area.

Slide

Develop a plan that details experience and activities to be implemented

- Emergency Management Plans
- Monitoring activities to be applied
- Process to be used to evaluate monitoring data

Slide 40

Slide No	Trainer Notes
40.	Trainer continues identifying sample contents of pilot/trial plan: • 'Emergency Management Plans' to address events identified by standard risk management (that is, risk identification, risk assessment/evaluation and risk control) for the area, the nature of the tour and the expected/known profile/s of the tour groups • Description of the monitoring activities to be conducted – and names of those with responsibility for undertaking them • Description of the process to be followed to analyse and evaluate the data captured during the monitoring phase.

Slide

Develop a plan that details experience and activities to be implemented

'The ASEAN Tourism Standards':

- Agreed to by ASEAN National Tourism Organizations to help ASEAN be a Quality Single Destination
- Involves a certification process
- Should be integrated into sustainable tourism initiatives

Slide 41

Slide No	Trainer Notes
41.	Trainer introduces 'The ASEAN Tourism Standards' highlighting they: • The ASEAN National Tourism Organizations have agreed on six ASEAN Tourism Standards to help ASEAN be a Quality Single Destination • This initiative uses a certification process to ensure tourism service providers adhere to require standards which will enable sustainable tourism and provide standardised products to visitors • Those preparing plans for pilot sustainable/ minimal impact tourism projects should integrate the matters identified by this initiative in their planning.

Slide

Develop a plan that details experience and activities to be implemented

The six standards are:

- Green Hotel
- Food and Beverage Services
- Public Restroom
- Home Stay
- Ecotourism
- Tourism Heritage

Shangri-La Hotel, Kuala Lumpur Receives The ASEAN Green Hotel Award For The Fourth Time Running (2014) ...

Source: eGlobal Travel Media
(www.eglobaltravelmedia.com.au)

Slide 42

Slide No	Trainer Notes
42.	Trainer identifies 'The ASEAN Tourism Standards' are: 1. Green Hotel 2. Food and Beverage Services 3. Public Restroom 4. Home Stay 5. Ecotourism 6. Tourism Heritage

Slide

Develop a plan that details experience and activities to be implemented

- Green Hotel:
 - Is a hotel which is environmentally-friendly and adopts energy conservation measures
- Food and Beverage Services:
 - Local F&B Service is a form of service where traditional and typical food and beverages are produced and/or sold by local people in food stalls, local restaurants or other similar outlets

Slide 43

Slide No	Trainer Notes
43.	Trainer provides overview of the Standards: 1. Green Hotel Green Hotel is a hotel which is environmentally-friendly and adopts energy conservation measures. 2. Food & Beverage Services Local Food and Beverage Service is a form of service where traditional and typical food and beverages are produced and / or sold by local people in food stalls, local restaurants or other similar outlets.

Slide

Develop a plan that details experience and activities to be implemented

- Public Restroom:
 - Is a room or booth shared by all people for urination and defecation consisting of at least a bowl fitted with or without a seat and connected to a waste pipe and a flushing apparatus
- Home Stay:
 - Is an alternative form of family furnished accommodation generally located in a house, providing guests opportunities to experience family/community lifestyle as well as tourist attractions

Slide 44

Slide No	Trainer Notes
44.	Trainer provides overview of the Standards: 3. Public Restroom Public Restroom is a room or booth shared by all people for urination and defecation consisting of at least a bowl fitted with or without a seat and connected to a waste pipe and a flushing apparatus. 4. Home Stay Home Stay is an alternative form of family furnished accommodation generally located in a house, providing guests opportunities to experience family/community lifestyle as well as tourist attractions.

Slide

Develop a plan that details experience and activities to be implemented

Ecotourism:

- Is responsible travel to destinations with ecological diversity that involves in activities, environmental and cultural conservation measures, and community participation providing benefits for the local people and the country

Slide 45

Slide No	Trainer Notes
45.	Trainer provides overview of the Standards: 5. Ecotourism Ecotourism is responsible travel to destinations with ecological diversity that involves in activities, environmental and cultural conservation measures, and community participation providing benefits for the local people and the country.

Slide

Develop a plan that details experience and activities to be implemented

Tourism Heritage:

- Is an outstanding cultural or heritage area of a country that is protected, conserved and managed in a sustainable manner provided with easy access and support facilities for the enjoyment of visiting tourists

Slide 46

Slide No	Trainer Notes
46.	Trainer provides overview of the Standards: 6. Tourism Heritage Tourism Heritage is an outstanding cultural or heritage area of a country that is protected, conserved and managed in a sustainable manner provided with easy access and support facilities for the enjoyment of visiting tourists - Cultural Heritage refers to outstanding monuments and groups of buildings in a country that have authentic, historical, archaeological, scientific, anthropological and ethnic value - Natural Heritage refers to outstanding physical, biological and geological formations including its habitat and species that may be threatened and endangered. Classroom Activity – Internet Research Trainer facilitates research and discussion of: www.aseantourism.travel/download/doc/doc/2488 – ASEAN Tourism Standards. Special attention must be paid to: - Major Criteria and Requirements for the six standards: pages 6 – 17.

Slide

Summary – Element 1

When planning minimal impact operations:

- Seek to create a sustainable tourism outcome
- Operate in an open, honest and transparent manner
- Undertake all planning using a consultative and collaborative approach
- Ensure there is certainty about the proposal

(Continued)

Slide 47

Slide No	Trainer Notes
47.	Trainer provides a recap of the Element asking questions to check trainee understanding and responding to questions from trainees, as required.

Slide

Summary – Element 1

- Identify the specific geographic location where the operation will occur
- Identify and actively include relevant stakeholders
- Determine environmental factors which may be impacted

(Continued)

Slide 48

Slide No	Trainer Notes
48.	Trainer provides a recap of the Element asking questions to check trainee understanding and responding to questions from trainees, as required.

Slide

Summary – Element 1

- Identify societal and cultural factors which may be impacted
- Specify ecological factors which may be impacted
- Describe economic factors which may be impacted

(Continued)

Slide 49

Slide No	Trainer Notes
----------	---------------

49.	Trainer provides a recap of the Element asking questions to check trainee understanding and responding to questions from trainees, as required.
-----	---

Slide

Summary – Element 1

- Research all factors which have been assessed as being impacted
- Become aware of all applicable mandatory and voluntary compliance requirements attaching to implementation of the initiative
- Prepare a detailed written plan to guide a pilot/trial of the proposal
- Obtain approval for the plan from stakeholders

Slide 50

Slide No	Trainer Notes
50.	Trainer provides a recap of the Element asking questions to check trainee understanding and responding to questions from trainees, as required.

Slide

Element 2 – Trial minimal impact operations

Performance Criteria for this Element are:

- Organise for the trial to be conducted
- Conduct the trial operation as planned
- Monitor the impacts of the trial
- Evaluate the information generated by the trial
- Utilise the information from the trial to modify previous plans so as to minimise negative effects and maximise positive impacts

Slide 51

Slide No	Trainer Notes
51.	Trainer identifies for trainees the Performance Criteria for this Element, as listed on the slide. Class Activity – General Discussion Trainer leads a general class discussion by asking questions such as: • What is involved in these trials? • Why are they important/necessary? • Who is involved? • What monitoring activities might be conducted? • What factors might be monitored?

Slide

Organise for the trial to be conducted

The first step is to 'Confirm the trial plans' – which may:

- Require presentation and explanation of final trial plans
- Involve explanation of details
- Necessitate responses to questions and concerns

(Continued)

Slide 52

Slide No	Trainer Notes
52.	Trainer highlights confirming the plans/details for the trial/pilot of an activity may: • Require presentation and explanation of final trial plans – in a face-to-face meeting with stakeholders/local communities • Involve explanation of details • Necessitate responses to questions and concerns.

Slide

Organise for the trial to be conducted

- Verify checks and monitoring activities which have been provided as an integral element of the trial
- Demand readiness to make last-minute changes which may be required by key stakeholders
- Result in re-formulating draft trial plans

Slide 53

Slide No	Trainer Notes
53.	Trainer continues discussing confirming trial/pilot plans • Verify checks and monitoring activities which have been provided as an integral element of the trial • Demand readiness to make last-minute changes which may be required by key stakeholders – or to address valid issues which have been overlooked • Result in re-formulating draft trial plans.

Slide

Organise for the trial to be conducted

Communication with stakeholders at this stage is vital and require:

- Sharing hard copy plans
- Verifying approval/s
- Encouraging and/or obtaining cooperation
- Negotiating final details
- Maintaining positive relationships which have been established

Slide 54

Slide No	Trainer Notes
54.	Trainer emphasises the need for communicating with stakeholders cannot be over-stated and at this stage of the process communication can require: ● Sharing hard copy plans with them – which may mean: ▪ Distributing hard and/or soft copies prior to meetings – so attendees can read them and think about them prior to meetings ▪ Providing handouts at meetings – to those who have not already received them ▪ Screening PowerPoint versions of the plan at group meetings ▪ Verbally explaining the plan ● Verifying approval/s – which have previously been promised, or provisionally given ● Encouraging and/or obtaining cooperation – with the trial process ● Negotiating final details – as/if required and/or negotiating ‘agreed amendments’ to the trial ● Maintaining positive relationships which have been established.

Slide

Organise for the trial to be conducted

Communication may feature:

- Community meetings
- Face-to-face discussions
- Telephone contact
- Distribution of hard copy materials

Slide 55

Slide No	Trainer Notes
55.	Trainer advises communication may feature: • Community meetings – on-site and/or with local communities at a place of their choosing • Face-to-face discussions with key individuals • Telephone contact • Distribution of hard copy plans – supported by verbal explanations and other explanatory documentation, as required (such as copies of legislation, COPs, reports). Classroom Activity – Guest Speaker Trainer arranges for representative of a local community to attend and: • Identify their concerns regarding tourism initiatives • Discuss their involvement with previous initiatives • Explain their requirements/preferences for communication with proponents.

Slide

Organise for the trial to be conducted

Regarding 'establishment of required infrastructure; it is important to note:

- This is not required for all initiatives
- Tourism Operators are reluctant to pay significant sums of money for trials
- Support from government agencies = likelihood they will contribute 'seeding' funding

Slide 56

Slide No	Trainer Notes
56.	Trainer discusses establishment of required infrastructure noting: • This is not required for all initiatives – as it is possible the necessary infrastructure may already exist • Tourism Operators are reluctant to pay significant sums of money for trials – because there is no guarantee the trial will translate into an ongoing activity/operation • Where there is support from government agencies there is a likelihood they will contribute some 'seeding' funding to initiate the project and demonstrate their commitment to the project.

Slide

Organise for the trial to be conducted

Establishing infrastructure may involve:

- Pegging out (or grading) of tracks to be used
- Trucking in portable facilities
- Making arrangements with local people, communities and/or businesses
- Consideration of transport, social, environmental and collaborative infrastructure

Slide 57

Slide No	Trainer Notes
57.	Trainer observes the definition of infrastructure in the context of a trial takes on a slightly different and 'reduced' meaning – in that it often refers to the building of smaller buildings than normal and the creation of temporary facilities rather than permanent ones highlighting it might involve: ● Pegging out (or grading) of tracks to be used – as opposed to the actual building of roads or boardwalks ● Trucking in portable facilities – rather than building them on-site ● Making arrangements with local people, communities and/or businesses to supply the identified needs for the initiative – as distinct to creating/establishing them from scratch, or transporting all goods into the area ● Consideration of transport, social, environmental and collaborative infrastructure. Classroom Activity – Internet Research Trainer facilitates research and discussion of: http://www.infrastructureaustralia.gov.au/policy-publications/submissions/published/files/259_tourismandtransportforum_SUB.pdf – with attention to page 1 http://www.asean.org/communities/asean-economic-community/item/plan-of-action-on-asean-cooperation-in-tourism – with attention to Strategy 5.

Slide

Organise for the trial to be conducted

'Monitoring requirements' to be organised may/will be:

- Contained in the plan for the trial
- Imposed by government agencies
- Insisted on by local communities
- Suggested by consultants
- Responsive to identified concerns
- Based on other effective trials/pilots

Slide 58

Slide No	Trainer Notes
58.	Trainer notes the monitoring resources for the trial will have been identified in the plan for the trial and requirements traditionally are: • Presented by the proponent as the strategies to use • Compulsorily required by government agencies • Insisted on by local communities • Suggested by paid/third party consultants • Responsive to particular identified concerns for the area and/or the type of initiative being trialled – these concerns may be (for example) about the impact on local people, the effect on the environment, and/or the use of local resources • Based on effective techniques used in other similar trials. Examples of monitoring equipment and systems can range from basic resources to high-technology equipment – see later slides for data/information gathering options.

Slide

Organise for the trial to be conducted

'Evaluation criteria and parameters' will:

- Be set for the trial before it starts as part of the plan – in consultation with stakeholders
- Address interests of concern relevant to the initiative
- Describe what will determine whether or not the trial is 'acceptable' or not

Slide 59

Slide No	Trainer Notes
59.	Trainer explains most trials will set criteria by which the trial will be evaluated and some will not. Standard practice is to pre-determine how the trial will be assessed <i>before</i> the trial commences with reference to: • Topics of interest or concern ('criteria') for local communities or other stakeholders – such as (for example): ▪ Quality of local water or a designated water source ▪ Noise levels generated by tour groups ▪ Crimes reported as a consequence of the initiative ▪ Money spent in local community by tour groups ▪ Satisfaction of tour group members with the experience (activity/project) • Parameters for determining whether or not the trial was 'acceptable' (and could therefore go ahead) or 'not acceptable' (and would need to be abandoned or amended and re-trialled), such as: ▪ 'Up to 10% use of drinking water is acceptable' ▪ 'Decrease of over 5% of XYZ flora or fauna is unacceptable' ▪ '10 complaints from the local community' ▪ 'Minimum 75% satisfaction rating from tour group members'.

Slide

Organise for the trial to be conducted

Organisation also requires public commitment to transparency in relation to:

- Conducting the trial
- Observing the monitoring process
- Allowing and facilitating stakeholder participation
- Releasing truthful, comprehensive and accurate findings

Slide 60

Slide No	Trainer Notes
60.	Trainer indicates organisation of the trial also requires the trial process is characterised by openness and honesty so a vital element of organising the trial is to publicly commit to transparency in relation to: ● Conducting the trial – and enabling stakeholders and relevant others to watch what occurs ● Observing the monitoring process – and how and when data is gathered ● Allowing and facilitating stakeholder participation in the monitoring process – to demonstrate inclusivity ● Releasing truthful, comprehensive and accurate findings of the trial – based on actual evidence gathered ● Facilitating stakeholder engagement with process – by providing venues and facilities for meetings to discuss the initiative and the evaluation. The commitment to transparency should be made at the outset when first contact is made with stakeholders and other interested parties.

Slide

Organise for the trial to be conducted

Benchmarks will need to be developed to use when evaluating the trial and those chosen:

- May be decided on by one or more of the stakeholders
- Must be relevant to the individual proposal/initiative
- Should be decided on in consultation with stakeholders
- Must address identified issues and concerns
- Will form the basis of deciding the evaluation criteria and determining their parameters

Slide 61

Slide No	Trainer Notes
61.	Trainer stresses the establishment of initial baseline data against which comparisons will be made following the trial is a critical reference point for post-trial evaluations and an important part of the organisation process. This baseline data provides details of the area (and topics of interest) at the start of the initiative before the trial commences and no trial can/should begin until these benchmarks have been identified and agreed to. The benchmarks chosen: • May be decided on by one or more of the stakeholders • Must be relevant to the individual proposal/initiative • Should be decided on in consultation with stakeholders • Must address identified issues and concerns • Will form the basis of deciding the evaluation criteria and determining their parameters.

Slide

Conduct the trial operation as planned

Requirements when implementing trial:

- Conduct the trial exactly as planned
- The publicly stated details must be adhered to
- Meet with those who have monitoring responsibilities
- Record any variations that are necessary to the planned implementation

(Continued)

Slide 62

Slide No	Trainer Notes
62.	Trainer states when implementing the trial for a proposed sustainable tourism activity or operation there is a need to: • Conduct the trial exactly as planned – so outcomes can be readily matched against planned actions as this is an essential pre-requisite for a viable evaluation of the trial • The publicly stated details of (say) a tour must be adhered to – in terms of things such as group numbers, vehicles used, duration, activities, arrival and departure dates • Meet with those who have monitoring responsibilities – to confirm: ▪ They have been trained ▪ They are ready and able to undertake their allocated duties ▪ They have the necessary resources to compete their role/s ▪ They understand what is expected of them • Record any variations that are necessary to the planned implementation – this acknowledges things rarely go exactly as planned and there is a need to adapt on-the-spot as the need to do so arises.

Slide

Conduct the trial operation as planned

- Take action to ensure implementation of trial reflects future actual tourist activity after the trial
- Monitoring data captured needs to be a real reflection of tourist impact/s
- Seek permission from stakeholders to vary agreed plan, if required and if possible
- Be prepared to delay implementation if there are significant unexpected or unforeseen issues
- Be available

Slide 63

Slide No	Trainer Notes
63.	Trainer continues to indicate requirements when implementing the trial for a proposed sustainable tourism activity or operation: ● Take action to ensure implementation of the trial reflects future actual tourist activity <i>after</i> the trial – that is, nothing must be done to influence the behaviour, impact or presence of tourists or the group <i>during</i> the trial period ● The monitoring data captured needs to be a real reflection of tourist impact/s so evaluation decisions are based on genuine information, not false or otherwise misleading information ● Seek permission from stakeholders to vary the agreed plan in advance of making any changes to previously agreed protocols – if this is possible ● Be prepared to delay implementation if there are significant unexpected or unforeseen issues arising – which common sense demands require input from, or the approval from, stakeholders ● Be available – so: ▪ Stakeholders can discuss important/urgent issues ▪ Monitoring information can be received and acknowledged ▪ Problems arising can be decided ▪ Interest in the trial can be demonstrated.

Slide

Monitor the impacts of the trial

Standard protocols when implementing monitoring:

- Train the people
- Establish one contact point for the monitoring process
- Verify required resources have been provided

(Continued)

Slide 64

Slide No	Trainer Notes
64.	Trainer identifies standard industry protocols when implementing monitoring activities are: • Train the people who are to undertake monitoring activities – so they: ▪ Know what to do in relation to their allocated role/topic ▪ Are competent in what they need to do ▪ Know how to gather sufficient, valid, reliable and objective quantitative and qualitative data • Establish one contact point for the monitoring process – so people involved in the monitoring activity have a single, known person to: ▪ Contact if they have a question, concern or problem ▪ Forward their data/information to • Verify required resources have been provided – which can include: ▪ Double-checking individuals have received their log books, sighting forms and similar ▪ Making sure equipment/technology to be used is in place, has been correctly calibrated and is operating as intended • Set dates for the return of information which has been captured – to give sufficient time for the data to be analysed and evaluated so required decisions can be made and necessary reports can be written.

Slide

Monitor the impacts of the trial

- Provide easy-to-use channels to facilitate the return of information
- Oversee and manage the monitoring process
- Make public the raw data as it is obtained

Slide 65

Slide No	Trainer Notes
65.	Trainer continues to identify standard industry protocols when implementing monitoring activities: ● Provide easy-to-use channels to facilitate the return of information – such as: ▪ One telephone number; A website or email address; A postal address; People who will travel to the data collectors to collect the data from them ● Oversee and manage the monitoring process – by, for example: ▪ Being proactive in communicating with those who are monitoring the trial to determine if they have issues or need assistance; Ensuring identified monitoring practices are being undertaken as planned/promised; Following up with people when expected data is not submitted by the due time/date; ▪ Arranging for extra or different personnel to perform monitoring activities as the need to do so emerges ● Make public the raw data as it is obtained – to demonstrate the commitment to transparency, honesty and openness. This may be done by: ▪ Posting data on a nominated website; Issuing press releases showing the information captured; Making public statements regarding the data gathered.

Classroom Activity – Guest Speaker

Trainer arranges for experienced Tourism Operator to attend and:

- Discuss sustainable tourism initiatives they have trialled
- Describe implementation practices for pilots
- Give advice for planning, trialling and implementing minimal impact tourism initiatives.

Slide

Monitor the impacts of the trial

Data gathering options may include:

- Completing hand-written/electronic documents:
- Logs
- Sighting forms
- Notebooks

(Continued)

Slide 66

Slide No	Trainer Notes
66.	Trainer advises data gathering for the purposes of monitoring the impacts of a sustainable tourism project may involve: • Completing hand-written (or computer/lap-top/tablet-based) documents such as: ▪ Logs – these will record what happened and when it happened and will be used to record dates, times, numbers, times, statistics, observations, names of groups, points of interest or concern ▪ Sighting forms – these can be targeted to record observations in relation to nominated topics which might relate to: – Movement or sighting of animals/wildlife – Identification of introduced threats, risks, dangers or hazards to the area – Observed actions/behaviour of tour groups – Observed impacts of the tourism initiative on local communities ▪ Notebooks – which can be used to allow designated persons to record their generic observations, thoughts and feelings about the initiative as it unfolds. Classroom Activity – Handouts Trainer distributes and discusses the use of sample data gathering tools as identified on the slide.

Slide

Monitor the impacts of the trial

- Obtaining photographic evidence
- Using technology/scientific equipment
- Gathering anecdotal evidence
- Liaising with key stakeholders

Slide 67

Slide No	Trainer Notes
67.	Trainer continues to present data gathering options: ● Obtaining photographic evidence – may require distribution of still and movie cameras to allow: ▪ Capture proof of 'before and after' scenarios and the actual operation of the trial (such as the conduct of interpretive activities; the camp site used; the way tour groups interact with the community and landscape) ▪ Gather visual data to support, supplement and/or explain other observations as contained (for example) in logs, notebooks, personal observations and anecdotal evidence ● Using technology and equipment to take basic measurements – such as: ▪ Taking temperature/s; Noting weather conditions ; Calculating estimations of percentage cover of flora in an area ▪ Determining fauna movement/s; Recording water flow; Measuring water volumes; Monitoring air quality ▪ Counting customer traffic ● Gathering anecdotal evidence – through being proactive and: ▪ Talking to tour group members about their experience ▪ Discussing initiative one-on-one or in a group setting with local communities and encouraging them to discuss their observations, feelings and concerns

	▪ Listening and noting what people (members of the public, stakeholders, those with monitoring responsibilities) say 'by the way' when they submit formal data or make contact for any reason in relation to the trial • Liaising with key stakeholders – which can include: ▪ Asking tour leaders/project managers to complete feedback forms/reports ▪ Holding meetings to facilitate exchanges and contributions ▪ Recording details of what is said and who says them.
--	---

Slide

Evaluate the information generated by the trial

When evaluating information generated by trial:

- Base decisions on facts and evidence
- Reference evaluations to criteria and parameters established
- Consider quantitative data and qualitative information
- Align relevant data to identified topics

(Continued)

Slide 68

Slide No	Trainer Notes
68.	Trainer explains when evaluating the information generated by the trial it is important to: • Base decisions on facts and evidence – all findings must be able to be supported by proof, and defended or be able to be validated if challenged • Reference evaluations to the criteria and parameters established for the trial – as these are the keys for determining the final outcome/s for the trial • Consider quantitative data and qualitative information – as both of these have a role ('two sides of the same coin') in the total evaluation of any trial, providing factual evidence as well as descriptive references • Align relevant data to identified topics – so there is a direct link between criteria established for the trial and the data which was captured.

Slide

Evaluate the information generated by the trial

- Analyse positive and negative impacts
- Highlight any difficulties, problems or issues which occurred
- Involve stakeholders in the process
- Generate additional data if required

(Continued)

Slide 69

Slide No	Trainer Notes
69.	Trainer continues to identify important points when evaluating trial data: ● Analyse positive and negative impacts – in theory, every tourism trial holds the potential to generate positive and negative outcomes so the evaluation needs to be alert to identifying, describing and quantifying both potential results in order to achieve balanced and unbiased findings ● Highlight any difficulties, problems or issues which occurred during the trial period – and which may have (or actually <i>did</i>) impact on the trial ad data which was collected ● Involve the stakeholders in the process to demonstrate transparency – and to avoid conducting the evaluation behind closed doors and generating results and recommendations ('findings' of the trial) in private ● Generate additional data if required – this may occur when: ▪ Where insufficient data exists on which to base decisions ▪ When the data is deemed not to be reliable or valid ▪ An issue has arisen necessitating more or different data to be gathered ▪ An error in data collection has been identified ▪ Significant disagreement exists among stakeholders about the legitimacy of the data being relied on.

Slide

Evaluate the information generated by the trial

- Explain methodology used to undertake the evaluation
- Generate a set of clear and distinct findings as a result
- Communicate outcomes of the trial

Slide 70

Slide No	Trainer Notes
70.	Trainer continues to identify important points when evaluating trial data: ● Explain the methodology used to undertake the evaluation – so those reading the findings can understand: ▪ How the data was collected and analysed ▪ How the decisions made as a result of the trial were arrived at ● Generate a set of clear and distinct findings as a result of the evaluation – which will be presented as the basis for moving the sustainable tourism project forward ● Communicate the outcomes of the trial – by sharing, publishing or otherwise widely communicating the findings.

Slide

Evaluate the information generated by the trial

Possible positive environmental impacts:

- Opportunities for conservation and protection of buildings and facilities
- Opportunities for conservation and protection of the natural environment
- Education of visitors relating to local environmental issues
- Potential to improve sites that have been de-graded prior to the initiative

Slide 71

Slide No	Trainer Notes
71.	Trainer discusses possible positive environmental impacts: ● Opportunities for conservation and protection of buildings and facilities – as a consequence of Tourism Operators wanting to preserve these things and/or enhance them for the benefit of tourists ● Opportunities for conservation and protection of the natural environment – where the Tourism Operator is prepared to take action to protect the landscape against threats in order to preserve it for tour groups to experience and enjoy ● Education of visitors relating to local environmental issues – meaning the message about local problems and challenges can be spread around the world and awareness of the problem/s might stimulate action to mitigate problems ● Potential to improve sites that have been de-graded prior to the initiative – in that Tourism Operators are often prepared to pay for the repair and/or upkeep of buildings and the natural environment.

Slide

Evaluate the information generated by the trial

Possible negative environmental impacts:

- Physical damage to building and facilities
- Damage to the natural environment
- Pollution
- Presence of waste
- Use of local limited energy resources
- Adverse visual impacts on the site/area

Slide 72

Slide No	Trainer Notes
72.	Trainer discusses possible negative environmental impacts: • Physical damage to building and facilities – caused by pedestrian traffic, vehicles, use/extra use (normal ‘wear and tear’) as well as accidental and deliberate damage • Damage to the natural environment – including soil/land erosion, compacting of soil, use of land for buildings, car parks, camp sites • Pollution – which may involve air (smoke) pollution, water pollution, noise pollution • Presence of waste – or additional litter/rubbish and human waste • Use of local limited energy resources (water and wood) • Adverse visual impacts on the site/area – as the initiative negatively affects the beauty of the area or interrupts or interferes with the ‘look and feel’ of the location.

Slide

Evaluate the information generated by the trial

Possible positive social impacts:

- Improved facilities and infrastructure
- Improved understanding regarding local issues
- Improved relationships between the local community and other communities
- More things for local communities to do

Slide 73

Slide No	Trainer Notes
73.	Trainer discusses possible positive social environmental impacts: ● Improved facilities and infrastructure – which can be used by local communities and/or which provide enhanced experiences (such as comfort and safety) for tourists ● Improved understanding regarding local issues – so there is wider awareness, and appreciation of these problems which can lead to a better understanding of the communities and <i>may</i> trigger external assistance for problems ● Improved relationships between the local community and other communities – based on the knowledge which flows when there is interaction between the two ● More things for local communities to do – and increased opportunities for them to interact with others and expands their horizons to become more aware of other cultures, countries and communities.

Slide

Evaluate the information generated by the trial

Possible negative social impacts:

- Social dislocation
- Potential for increase in criminal activities
- Reduced focus on (and potential interruptions to) traditional social interactions and activities between people in the local communities

Slide 74

Slide No	Trainer Notes
74.	Trainer discusses possible negative social impacts: • Social dislocation – which disrupts the established pattern of communities and may cause changes to ‘regular’ things such as where people live, how they work and changes to traditional lifestyles and values • Potential for increase in criminal activities – caused commonly by tourists stealing from local communities, or by local communities stealing from tourists ▪ The potential for assaults, prostitution and child sex may also be an issue • Reduced focus on (and potential interruptions to) traditional social interactions and activities between people in the local communities – caused by: ▪ The physical presence of tourists ▪ Competing pressures on time ▪ Stress caused by the need to accommodate tourist-related needs/demands.

Slide

Evaluate the information generated by the trial

Possible positive ecological impacts:

- Increased awareness of ecological issues
- Potential for investment in the area

Slide 75

Slide No	Trainer Notes
75.	Trainer discusses possible positive ecological environmental impacts: ● Increased awareness of ecological issues – these will vary between locations but it is generally accepted raising awareness of ecological problems that exist in an area is a good thing in that it: ▪ Can encourage action to stop or reduce activity that is causing the problem ▪ Attract external assistance to mitigate the rate of degradation which is occurring ● Potential for investment in the area – to: ▪ Create additional habitat to encourage the growth and development in numbers and species of flora and fauna ▪ Rehabilitate damaged land ▪ Protect existing areas from damage.

Slide

Evaluate the information generated by the trial

Possible negative ecological impacts:

- Damage to flora
- Disturbance to fauna

Slide 76

Slide No	Trainer Notes
76.	Trainer discusses possible negative ecological environmental impacts: • Damage to flora – which may be: ▪ Trampled by foot and vehicle traffic ▪ Illegally picked/removed ▪ Overcome by introduced plant-life • Disturbance to fauna – which may entail them: ▪ Being scared away from the area by the tourist activity ▪ Being hunted by tourists ▪ Being preyed on by feral/exotic species. Classroom Activity – Internet Research Trainer facilitates research and discussion of: http://crctourism.com.au/wms/upload/resources/bookshop/Ham_ToolEvalInterp.pdf - Development of a Research-Based Tool for Evaluating Interpretation http://www.nzcycletrail.com/sites/default/files/uploads/NZCT%20Final%20Report%20-%20Angus%20and%20Angus.pdf – Final Report: New Zealand Cycle Trail Evaluation – Train Case Studies.

Slide

Evaluate the information generated by the trial

Possible positive economic impacts:

- Increased employment opportunities for local population
- Increased investment in the local area
- Increased local revenue

Slide 77

Slide No	Trainer Notes
77.	Trainer discusses possible positive economic impacts: ● Increased employment opportunities for local population – giving: ▪ Higher levels of disposable income ▪ Improved standards of living from a material perspective ● Increased investment in the local area – which: ▪ Generates all the benefits of the multiplier effect ▪ Tends to be self-perpetuating in that one lot of investment often attracts more investment from other parties ● Increased local revenue – which has flow-on effects on: ▪ Foreign exchange earnings ▪ Taxation ▪ Local spending potential on local facilities.

Slide

Evaluate the information generated by the trial

Possible negative economic impacts:

- Potential for unacceptable levels of inflation
- Diversion of a country's limited funds from other necessary projects towards tourism activities
- Problems resulting from 'too much' reliance on tourism income when there is tourism down-turn

Slide 78

Slide No	Trainer Notes
78.	Trainer discusses possible negative economic environmental impacts: ● Potential for unacceptable levels of inflation – as prices of local commodities (food, housing, land, resources) increase as a result of the standard economic 'supply and demand' principle ● Diversion of a country's limited funds from other necessary projects towards tourism activities – thereby causing increased hardship on locals ● Problems resulting from 'too much' reliance on tourism income when there is an unexpected and dramatic downturn in tourist numbers/spending.

Slide

Evaluate the information generated by the trial

Possible positive cultural impacts:

- Sharing of culture with the wider community
- Better understanding of culture amongst other communities

Slide 79

Slide No	Trainer Notes
79.	Trainer discusses possible positive cultural impacts: • Sharing of culture with the wider community – which can bring greater recognition to communities regarding their rites, celebrations and their unique nature which serves to generate greater interest in the area and attract more tourists, • Better understanding of culture amongst other communities.

Slide

Evaluate the information generated by the trial

Possible negative cultural impacts:

- Trivialisation of the culture
- Offence (often unintended) given to locals by the comments, dress and behaviour of visitors
- 'Westernisation' of culture

Slide 80

Slide No	Trainer Notes
80.	Trainer discusses possible negative cultural environmental impacts: • Trivialisation of the culture – and exploitation of it for commercial gain and to satisfy the interests of outsiders • Offence (often unintended) given to locals by the comments, dress and behaviour of visitors • Potential for established culture to be altered against the will of and despite the activities of the local community – such as the so-called 'Westernisation' of communities and a diminution on the importance of family. Classroom Activity – Internet Research Trainer facilitates research and discussion of: http://unesdoc.unesco.org/images/0018/001826/182646e.pdf - The effects of tourism on culture and the environment in Asia and the Pacific http://www.slideshare.net/ejaysamson/sociocultural-impacts-of-tourism - Socio-cultural impacts of tourism.

Slide

Utilise information from trial to modify plans to optimise impacts

Following evaluation of a trial it is important to understand:

- Findings of evaluation must be used to guide future action
- Involvement of stakeholders must continue
- There can be a need to run a supplementary trial

Slide 81

Slide No	Trainer Notes
81.	Trainer highlights following the evaluation of a trial it is important to understand: • The findings of the evaluation must be used to guide future action – these finding cannot be ignored and must not be manipulated to make them fit/accommodate pre-determined ends or objectives • Involvement of stakeholders must continue – their inclusion in the project needs to be of an ongoing and remain characterised by transparency and honesty • There can be a need to run a supplementary trial – where the evidence and/or evaluation proved to be: ▪ Lacking the detail required in relation to the identified criteria and parameters ▪ Insufficient to allow decisions to be made ▪ Significantly controversial ▪ Obviously flawed.

Slide

Utilise information from trial to modify plans to optimise impacts

Based on findings of the trial there can be a need to:

- Cancel the proposed activity/operation
- Revise aspects of the plan that were highlighted as negative as a consequence of the trial

(Continued)

Slide 82

Slide No	Trainer Notes
82.	Trainer indicates it is possible, based on the finding of the evaluation of the trial there can be a need to: • Cancel the proposed activity/operation – Tourism Operators must be prepared to do this if the data from the trial indicates the initiative: ▪ Will have significant/unacceptable impacts on the area and/or local community ▪ Does not have necessary support • Revise aspects of the plan that were highlighted as negative as a consequence of the trial – this can necessitate: ▪ Altering the types and nature of tour activities ▪ Shifting the physical location of routes, sites used and/or interpretive activities ▪ Varying the size or scope of the proposal ▪ Changing timing considerations ▪ Increasing the amount of investment ▪ Using different personnel.

Slide

Utilise information from trial to modify plans to optimise impacts

- Constrain the impact of the plans
- Expand plans for those aspects of the plan that received a positive trial result
- Gain necessary approvals and authorisations from stakeholders for revised plans to be developed

Slide 83

Slide No	Trainer Notes
83.	Trainer continues to identify possible action required following trial: ● Constrain the impact of the plans – by: ▪ Reducing the area/s visited or involved in the initiative ▪ Lowering numbers in tour groups ▪ Visiting the area on a less frequent basis ▪ Conducting fewer interpretive activities ▪ Restricting vehicle access ● Expand plans for those aspects of the plan that received a positive trial result – which may mean: ▪ Increasing the duration of tours ▪ Extending the initiative into other areas ▪ Raising tour group numbers ▪ Including extra interpretive activities ▪ Creating additional sustainable initiatives to be trialled in the same location ● Gain necessary approvals and authorisations from key stakeholders for any revised plans which are to be developed – following the same consultative process which has been used to-date.

Slide

Summary – Element 2

When trialling minimal impact operations:

- Verify plan for the pilot has been approved
- Implement the trial strictly in accordance with the plan
- Provide necessary information, training, resources and infrastructure to enable the trial

(Continued)

Slide 84

Slide No	Trainer Notes
84.	Trainer provides a recap of the Element asking questions to check trainee understanding and responding to questions from trainees, as required.

Slide

Summary – Element 2

- Provide necessary monitoring training and resources
- Communicate the plan for the trial to those who have responsibilities for action under the plan
- Involve stakeholders

(Continued)

Slide 85

Slide No	Trainer Notes
85.	Trainer provides a recap of the Element asking questions to check trainee understanding and responding to questions from trainees, as required.

Slide

Summary – Element 2

- Establish initial benchmarks
- Gather monitoring data/information to address identified evaluation criteria and parameters
- Follow-up as required to ensure sufficient, reliable and valid data is captured

(Continued)

Slide 86

Slide No	Trainer Notes
86.	Trainer provides a recap of the Element asking questions to check trainee understanding and responding to questions from trainees, as required.

Slide

Summary – Element 2

- Evaluate evidence obtained as a result of the approved monitoring activities
- Modify trial plans on the basis of data gathered and decisions made following analysis the data
- Seek to optimise positive impacts and reduce/eliminate negative impacts

Slide 87

Slide No	Trainer Notes
87.	Trainer provides a recap of the Element asking questions to check trainee understanding and responding to questions from trainees, as required.

Slide

Element 3 – Implement minimal impact operations

Performance Criteria for this Element are:

- Apply revised plans to the practical application of minimal impact tourism activities/operations
- Conduct the activity/operation in such a way that encourages others to engage in minimal impact actions
- Implement ongoing monitoring protocols

Slide 88

Slide No	Trainer Notes
88.	Trainer identifies for trainees the Performance Criteria for this Element, as listed on the slide. Class Activity – General Discussion Trainer leads a general class discussion by asking questions such as: • What might be important considerations involved in implementing minimal impact tourism operations? • What do you think would be keys in the process? • What pre-requisites should preceded this stage? • Who would be involved?

Slide

Apply revised plans to practical application of minimal impact tourism activities/operations

When applying the revised plans for the sustainable tourism initiative it is vital to:

- Confirm the plan has been revised and approved for implementation by relevant stakeholders
- Share the revised plans
- Implement the plans as revised

(Continued)

Slide 89

Slide No	Trainer Notes
89.	Trainer notes when applying the revised plans for the sustainable tourism initiative it is vital to: ● Confirm the plan has been revised and approved for implementation by relevant stakeholders – this can mean: ▪ Sighting an appropriately signed document ▪ Attending a stakeholder meeting and obtaining permission/vote to proceed with the revised plan ● Share the revised plans – which can require: ▪ Involving the media by advising them of progress ▪ Inviting media to participate in a reviewed activity ▪ Going into local communities to talk to them and distribute copies of new plans ▪ Communicating revised plans to general public – by (for example) posting on organisational website, and advertising in the media ● Implement the plans as revised – which means: ▪ Adhering strictly to the requirements of the revised plan ▪ Not straying off track and ‘inadvertently’ returning to actions and activities in the draft/pilot plan

	▪ Resourcing activities as necessary to ensure the plan for the initiative can be applied as intended ▪ Using nominated personnel, communities, locations, activities, access routes, dates and times.
--	--

Slide

Apply revised plans to practical application of minimal impact tourism activities/operations

- Use minimal impact techniques
- Align with the six ASEAN Tourism Standards
- Liaise frequently with key stakeholders

Slide 90

Slide No	Trainer Notes
90.	Trainer continues to identify requirements when implementing revised plans: ● Use minimal impact techniques – these will depend on the individual initiative but can involve or provide opportunity for: ▪ Providing suitable education on appropriate behaviour for tour leaders/staff and tour group members ▪ Undertaking necessary site hardening to enable sites to cater for the known or expected visitor numbers – this may involve construction of buildings, putting hard surfaces on tracks to protect against erosion, or surfacing of roads, ▪ Applying technological solutions to identified problems – as appropriate to each type of challenge/difficulty identified: which may involve for example: – Use of solar energy to provide power – Use of ICT and mobile technologies to disseminate/provide visitor information – instead of paper-based materials/handouts ▪ Restricting or limiting access to sites and areas ▪ Staged authenticity – where events and activities are re-created in a managed/controlled way and presented as an ‘authentic’ representation of the real/actual event/s thus: – Protecting the privacy of local communities – Enabling issues relating to unwanted intrusion to be dealt with – Allowing more people/‘everyone’ to see or experience the event/s

	▪ Align with the six ASEAN Tourism Standards – as described previously ▪ Liaise with key stakeholders by communicating frequently with them via meetings and other identified/preferred methods of contact – to: – Ensure ongoing support and positive relationships – Solicit stakeholders feedback and input – Share problems and issues – Obtain help from stakeholders to resolve problems – Communicate progress reports – Respond appropriately to problems and comments.
--	--

Slide

Conduct operation in a way that encourages others to engage in minimal impact actions

Reasons to conduct sustainable tourism initiatives in a way that encourages others to do the same:

- Demonstrate the professionalism of the organisation
- Show genuine commitment to 'sustainability'
- Demonstrate transparency

(Continued)

Slide 91

Slide No	Trainer Notes
91.	Trainer explains there is a need to conduct sustainable tourism initiatives in a way that encourages others to do the same in order to: • Demonstrate the professionalism of the organisation – to the wider community • Show genuine commitment to 'sustainability' – by doing 'a little bit extra' than the minimum that is required • Demonstrate transparency – in the entire implementation process by proving the organisation is prepared to let other see what they are doing.

Slide

Conduct operation in a way that encourages others to engage in minimal impact actions

- Prove organisational interest in 'sustainability' is ongoing
- Attract public attention to areas/issues of concern
- Promote 'Six ASEAN Tourism Standards'
- Provide basis for making positive public statements about the organisation and its 'sustainable' credentials

Slide 92

Slide No	Trainer Notes
92.	Trainer continues to explain reasons to conduct sustainable tourism initiatives in a way that encourages others to do the same: • Prove organisational interest in 'sustainability' is ongoing – and not just focussed on <i>this</i> initiative • Attract public attention to the areas/issues of concern – and highlight how these are being effectively addressed • Promote the 'Six ASEAN Tourism Standards' – and related policies • Provide a truthful basis for making positive public statements about the organisation and its 'sustainable' credentials – in advertisements and on the website.

Slide

Conduct operation in a way that encourages others to engage in minimal impact actions

Strategies to encourage others to engage with 'sustainability':

- Acting as a role model for action
- Sharing lessons learned
- Becoming an advocate for sustainability
- Using the media to spread the word

Slide 93

Slide No	Trainer Notes
93.	Trainer presents strategies to encourage others to engage with 'sustainability': ● Acting as a role model for action – by, for example: ▪ Taking responsible decisions; Putting the planet before profit; Involving stakeholders and local communities ▪ Listening to stakeholders and local communities; Responding to stakeholders and local communities by altering plans – and, where necessary, abandoning project/s ● Sharing lessons learned with industry, government agencies and other Tourism Operators – which may involve: ▪ Posting information on a public website; Distributing reports, evaluations and findings; Actively helping others who wish to commence a sustainable tourism project ● Becoming an advocate for sustainability – and, perhaps: ▪ Speaking on behalf of 'sustainability' at public meetings and industry events ▪ Talking about the benefits which have flowed from having taken a 'sustainable' approach to tourism projects ● Using the media to spread the word about sustainable tourism – in the form of: ▪ Writing articles for local newspapers or magazines on sustainable tourism and how it may be achieved

- Writing articles on the benefits to operators of engaging with sustainable tourism
- Doing radio and television interviews on a range of 'sustainable tourism' topics
- Involving media in initiative and inviting them to participate 'free of charge' in exchange for some media exposure
- Developing press releases on a different 'sustainability' topics and the progress of the initiative/s.

Classroom Activity – Guest Speaker

Trainer arranges for local media representative to attend and:

- Discuss how the media can help/become involved with sustainability
- Describe the relationship which could/should exist between a Tourism Operator and the media explaining how this can be established
- Illustrate how the media can help the tourism industry and how the industry can help the media
- Identify requirements/arrangements for obtaining media coverage of an event or initiative.

Slide

Implement ongoing monitoring protocols

Keys to implementing monitoring protocols:

- Check necessary training has been delivered
- Verify all required resources have been supplied as promised
- Ensure technologies used and confirmed in the pilot are used

(Continued)

Slide 94

Slide No	Trainer Notes
94.	Trainer presents keys to implementing monitoring protocols: ● Check necessary training has been delivered – to all allocated responsibilities for monitoring activities and data gathering ● Verify all required resources have been supplied as promised – to enable identified monitoring to occur and be recorded as planned ● Ensure technologies used and confirmed in the pilot are used – or varied as required on basis of evaluation. This may require: ▪ Using different technology/systems to gather data ▪ Gathering data at different/more frequent times ▪ Obtaining different data.

Slide

Implement ongoing monitoring protocols

- Take action to make sure agreed 'other' monitoring activities are being undertaken as planned
- Follow-up with those who have responsibility for monitoring activities – as required
- Be actively, personally involved to show there is real engagement with the project, genuine desire to monitor impacts and hands-on management

Slide 95

Slide No	Trainer Notes
95.	Trainer continues to present keys to implementing monitoring protocols: ● Take action to make sure the agreed 'other' monitoring activities are being undertaken as planned – by the people who have been designated and with the required frequency. This relates to the activities such as personal observations, entries in log books/note books, taking of still and moving images, surveying of land used and similar ● Follow-up with those who have responsibility for monitoring activities – as required. This may be a common requirement because many of the data collectors are often unpaid volunteers. Follow-up may be required: ▪ If no monitoring information/data is being received ▪ Where there are requests for help ▪ If problems arise ▪ Where there is significant variation in the data received from what is normally obtained, or from what is expected ● Be actively and personally involved to show those involved (and others) there is real organisational engagement with the project, genuine desire to monitor the impacts and hands-on management of the project – this may be achieved by: ▪ Helping personnel with their data gathering/monitoring activities ▪ Showing people how to optimise their information gathering

	▪ Providing a visible on-site presence ▪ Actually doing some data gathering.
--	--

Slide

Summary – Element 3

When implementing minimal impact operations:

- Apply the approved and revised plans to the implementation of the initiative – follow the plan
- Confirm extra/different resources and training have been provided
- Align with ASEAN Tourism Standards
- Be a role model for minimal impact tourism operations

(Continued)

Slide 96

Slide No	Trainer Notes
96.	Trainer provides a recap of the Element asking questions to check trainee understanding and responding to questions from trainees, as required.

Slide

Summary – Element 3

- Share lessons learned with relevant others
- Advocate for sustainable tourism
- Gather required monitoring data as an integral part of implementation
- Actively seek and then record feedback on the initiative

Slide 97

Slide No	Trainer Notes
97.	Trainer provides a recap of the Element asking questions to check trainee understanding and responding to questions from trainees, as required.

Slide

Element 4 – Evaluate minimal impact operations

Performance Criteria for this Element are:

- Collect objective environmental data
- Solicit feedback from the local community and staff
- Collaborate with local authorities to manage local environmental and social issues caused by, or related to, the minimal impact activity/operation
- Modify previous plans on the basis of valid data obtained

Slide 98

Slide No	Trainer Notes
98.	Trainer identifies for trainees the Performance Criteria for this Element, as listed on the slide. Class Activity – General Discussion Trainer leads a general class discussion by asking questions such as: • Why is there a need to evaluate the sustainability initiatives? • Who is involved in the process? • When and where does the evaluation occur? • What are the possible outcomes? • How binding are the findings of the evaluation?

Slide

Collect objective environmental data

Collecting data must occur as planned – if it does not:

- Opponents of the initiative may seize on this as 'evidence' the organisation has something to hide
- The validity of the entire project starts to be questioned
- The credibility of the organisation suffers as people start thinking 'they only said they were going to do it in order to get approval to proceed'

Slide 99

Slide No	Trainer Notes
99.	Trainer explains the necessity of implementing the planned data gathering procedures exactly as planned and agreed to by stakeholders cannot be stressed too highly emphasising whatever was presented as being planned data gathering procedures must be undertaken. As soon as a proponent starts to deviate from the planned data gathering procedures: ● The opponents of the initiative may seize on this as 'evidence' of the organisation having something to hide ● The validity of the entire project starts to be questioned – if <i>this</i> needs changing, what else might also be wrong/need changing or is going to be changed? ● The credibility of the organisation suffers as people start thinking 'they only said they were going to do it in order to get approval to proceed: not why have gained their approval they are not going to do what they promised'.

Slide

Collect objective environmental data

If there is a need to vary original arrangements:

- Communicate promptly with stakeholders
- Explain in detail the need for variation
- Provide evidence of need for change
- Present and explain proposed amendments

(Continued)

Slide 100

Slide No	Trainer Notes
100.	Trainer indicates if it ever emerges there is a legitimate need to vary the planned data gathering procedures the procedure for achieving this should involve: • Prompt communication with stakeholders • Detailed description of the need for the change • Provision of supporting data/evidence of the need for change • Presentation of changes intended explaining why and how they will achieve the objective/s described in the 'need for change.'

Slide

Collect objective environmental data

- Request approval for change
- Allocate new responsibilities for implementing revised protocols
- Provide required resources and training
- Integrate new requirements into remaining original plan

Slide 101

Slide No	Trainer Notes
101.	Trainer continues to explain action to take if there is a need to change agreed monitoring arrangements: • Request for approval for the identified changes to be implemented • Allocation of responsibilities for new data gathering procedures • Provision of necessary training and resources • Integration of new strategies into established other monitoring activities.

Slide

Collect objective environmental data

When monitoring, collect:

- Qualitative and quantitative data
- Objective data – quantifiable and fact-based
- Subjective data – about personal feelings, thoughts and perceptions

Slide 102

Slide No	Trainer Notes
102.	Trainer highlights there is always a need to collect qualitative and quantitative data as a part of the monitoring for any sustainable tourism initiatives. The collection of quantitative data includes the gathering of objective environmental data. ‘Objective’ data is data is fact-based data free of personal bias, influence, opinion or thought – it is information gained as a result of some form of testing. It refers to data which is measurable and observable. By contrast, ‘subjective’ data is personal opinion, thoughts, perceptions and feelings.

Slide

Collect objective environmental data

Objective data may be gathered through:

- Doing personal observation/s
- Conducting tests
- Undertaking physical examinations

(Continued)

Slide 103

Slide No	Trainer Notes
103.	Trainer notes objective data may be captured as a result of: ● Personal observation – of visible and measurable actions such as (for example): ▪ Number of people who visit a site or use a facility ▪ Length of time people spend at a location ▪ Number of vehicles that use a road or enter an area ● Conducting tests – which may seek to track statistical evidence of what happens when (for example): ▪ There is a change in routes taken by tour groups ▪ Interpretive activities provided to a group are altered ▪ The arrival and departure times of a tour/group are varied ● Undertaking a physical examination of land or an area or other nominated site or object – such as: ▪ Counting the number of a species in a designated area ▪ Monitoring re-generation activities ▪ Measuring waste.

Slide

Collect objective environmental data

Reading meters/equipment, such as:

- Water quality meters and air monitors
- Dust monitors and soil samplers
- Sound level meters and vibration monitors
- Thermometers
 - Water depth and flow gauges
 - Traffic meters and pedestrian turnstiles

Slide 104

Slide No	Trainer Notes
104.	Trainer continues to indicate ways to capture objective data: • Reading the meters or print-outs of technical equipment/technology which has been bought or rented for the purpose of the project – such as: ▪ Hand-held water quality meters ▪ Air monitors ▪ Dust monitors ▪ Soil samplers ▪ Sound level meters ▪ Vibration monitors ▪ Thermometers ▪ Water depth and flow gauges ▪ Traffic (road count) meters ▪ Turnstiles. Classroom Activity – Guest Speaker Trainer arranges for representative from commercial monitoring organisation to attend and: • Identify equipment and services they can provide in relation to a tourism initiative • Present and demonstrate use of equipment, monitors and meters • Provide advice on monitoring tourism initiatives and collecting data.

Slide

Collect objective environmental data

Considerations when collecting data:

- Try to involve stakeholders/local communities
- Supplement use of local communities and stakeholders with recognised professional, external consultant/s
- Verify testing and monitoring equipment has been correctly calibrated
- Follow-up as required

(Continued)

Slide 105

Slide No	Trainer Notes
105.	Trainer presents considerations when collecting data: • Try to involve stakeholders/local communities – in order to: ▪ Give them a sense of ownership in the initiative ▪ Demonstrate inclusivity and collaboration ▪ Prove openness and transparency of the project • Supplement use of local communities and stakeholders with the use of a recognised professional, external consultant – who has experience with tourism initiatives and environmental monitoring, so they: ▪ Can provide important third party reports for the project ▪ Assist volunteers in their monitoring activities ▪ Identify the need for 'other' monitoring activities to be introduced to the operation as the initiative unfolds ▪ Advise of concerning issues at the earliest possible time • Verify the testing and monitoring equipment has been correctly calibrated – which may require: ▪ Getting all hand-held monitors used by volunteers or project staff are tested/calibrated and certified prior to use so their readings can be deemed 'reliable and accurate'

	▪ Obtaining written proof (such as a Certificate of Confirmation) from third party consultants that their equipment has been appropriately verified and certified for use as intended • Follow-up as required – that is, communicating with those who have been allocated data collection responsibilities if: ▪ Have a query or a problem and need assistance ▪ Their data is not received as and when expected ▪ Data provided by them is incorrect or insufficient for the intended purpose, as explained to them during their training.
--	--

Slide

Collect objective environmental data

- Physically collect the data
- Collate the data
- Manipulate the data
- Share the data and the findings

Slide 106

Slide No	Trainer Notes
106.	Trainer continues to present considerations when collecting data: ● Physically collect the data – which may require: ▪ Travelling to sites to read meters and equipment ▪ Obtaining hard copy sheets of data from on-site collectors ▪ Using telemetry connected to metering devices to obtain readings remotely ▪ Liaising with consultants to capture their information ▪ Retrieving data sent electronically (or otherwise) to a designated site/location – such as by email, posting to a site, text, any digital platform or mail ● Collate the data – by: ▪ Assessing it to determine exactly what the data is about/what it represents or refers to ▪ Entering the information provided into prescribed 'fields' in a paper-based or electronic database ● Manipulate the data – which traditionally involves: ▪ Performing addition, subtraction, multiplication, division to generate relevant totals, percentages, and ratios ▪ Identifying trends which emerge from the data ▪ Drawing distinctions and comparisons between 'before' and 'after' data ▪ Generating findings from the data based on statistical/fact-based evidence ● Share the data and the findings – through a blend of approaches appropriate to the

	project, which may include: ▪ Stakeholder meetings and public meetings ▪ Press releases and interviews with the media ▪ Electronic and/or paper based distribution of information ▪ Posting information on a nominated website ▪ Encouraging comment and feedback.
--	---

Slide

Solicit feedback from the local community and staff

Feedback may be:

- Provided verbally or in writing
- Positive and/or negative
- Offered voluntarily and/or need to be sought out
- Given by an individual or a group
- A mandatory requirement from some stakeholders

Slide 107

Slide No	Trainer Notes
107.	Trainer gives context by noting feedback may be: ● Provided verbally or in written form – the organisation must be prepared to record oral feedback and capture it in written or electronic form ● Positive or negative – the organisation cannot choose to only believe the positive/good feedback it receives because many valid and important points are raised as a result of negative feedback ● Offered willingly without having to be requested or sought out – or it may need to be asked for ● Given by a person or a group – some individuals prefer the anonymity of contributing feedback by being part of a larger cohort of people ● 'Compulsory' – while communities may make input based on their inherent involvement in the initiative and the way it is likely to impact them, others (staff, consultants, paid members of the local community) may be 'required' to submit feedback as part of the arrangement that is made with them.

Slide

Solicit feedback from the local community and staff

Ways to encourage feedback:

- Make people aware from the outset that feedback is being sought
- Maintain a feedback database/file
- Proactively seek feedback

(Continued)

Slide 108

Slide No	Trainer Notes
108.	Trainer present ways to encourage feedback: • Make people aware from the outset that feedback is being sought – and that the organisation: ▪ Welcomes it ▪ Provides mechanisms for people to provide it ▪ Values it ▪ Will take notice of it • Maintain a feedback database/file – so all feedback provided and/or captured is recorded and can be classified and used: ▪ To guide ongoing actions to achieve a minimal impact result ▪ As part of the evaluation process • Proactively seek feedback – the organisation must not only signal their initial desire for feedback but they must also: ▪ Ask for it at all meetings ▪ Supply forms for people to complete to record their contributions ▪ Apply questionnaires and surveys ▪ Hold focus groups with tour group members, local communities and other involved parties ▪ Conduct consultation and feedback meetings.

Slide

Solicit feedback from the local community and staff

- Thank people for contributions
- De-brief with staff who have been involved
- Meet on-site with other parties which may be done by integrating them into a standard tour group or holding a dedicated tour/activity just for them
- Sharing the feedback

Slide 109

Slide No	Trainer Notes
109.	Trainer continues to present ways to encourage feedback: • Thank people for making contributions – because this: ▪ Is polite and respectful ▪ Generates moiré feedback ▪ Demonstrates the positive orientation of the organisation to feedback <i>even if it is negative comment</i> • De-brief with staff who have been involved with the activity – which can occur: ▪ Face-to-face at the conclusion of tours or activities ▪ At staff meetings and briefings ▪ Through the completion of mandatory Reports to be compiled at the end of each tour or activity • Meet on-site with other parties which may be done by integrating them into a standard tour group or holding a dedicated tour/activity just for them – to: ▪ Enable them to experience the initiative first-hand – as opposed to them thinking they know what the activity/operation is all about ▪ Seek and record their impressions as they experience the initiative, and at the conclusion of the activity

- | | |
|--|---|
| | <ul style="list-style-type: none">• Sharing the feedback – with key stakeholders:<ul style="list-style-type: none">▪ Verbally▪ Electronically▪ Using hard copy information. |
|--|---|

Slide

Collaborate with local authorities to manage issues caused by, or related to, the activity

Things to note/be aware of:

- Tourism Operators have a commercial imperative
- Impacts can be positive or negative – for all classifications of stakeholders

(Continued)

Slide 110

Slide No	Trainer Notes
110.	Trainer provides context observing: ● The Tourism Operator has a commercial objective – that is, they want to make money and obtain a satisfactory ROI from the project ▪ This is just a simple fact of business life but it often runs contrary to the aims of other stakeholders ● Impacts can be positive or negative – not all outcomes will be advantages to a community but nor will they necessarily all be bad.

Slide

Collaborate with local authorities to manage issues caused by, or related to, the activity

- Different people have different perspectives and priorities
- Issues and impacts vary over time and between different projects
- An organisation that is genuine in its orientation to minimal impact tourism operations must be prepared to walk away from an initiative when it is obvious the impacts of the proposal are just too severe

Slide 111

Slide No	Trainer Notes
111.	Trainer continues to provide context noting: ● Different people have different perspectives and priorities – what is important for one person/group is not necessarily what is important for another person/group ▪ The key is often to find a consensus outcome (which often needs to be negotiated – that is, there needs to be ‘give and take’ between the parties) which satisfies all those who are interested or impacted ● Issues and impacts vary over time and between different projects – based on factors which are relevant to the project and/or that apply ‘at the time’ ▪ In practice, no two minimal impact tourism initiatives are the same even though they may appear similar and even though <i>some</i> lessons learned from one operation can be successfully transferred/applied to another project ● An organisation that is genuine in its orientation to minimal impact tourism operations must be prepared to walk away from an initiative when it is obvious the impacts of the proposal are just too severe – this is the only sensible and responsible thing that can be done ▪ Abandoning/cancelling a project for this reason may be costly to the organisation but it has benefits in terms of its industry reputation and the credibility such a decision will create with customers, government agencies and local communities generally ▪ Such a decision also tends to make future minimal impact tourism initiatives much easier to plan, trial and implement.

Slide

Collaborate with local authorities to manage issues caused by, or related to, the activity

Four basic options at this stage:

- Abandon the project – walk away/close it down
- Do nothing – maintain the same protocols

(Continued)

Slide 112

Slide No	Trainer Notes
112.	Trainer identifies the four basic options at this stage: ● Abandon the project – which may require: ▪ Removing structures and/or infrastructure built in the location on a permanent/temporary basis for the initiative (or these may remain as a donation/gift by the Tourism Operator to the local community, if agreeable to both parties) ▪ Re-generating damaged or impacted land ▪ Replenishing depleted resources ▪ Paying compensation to the local community ● Do nothing – which means, for example: ▪ Continue running tours as previously done ▪ Employ the same people ▪ Visit/conduct activities in the same location with the same frequency ▪ Maintain visitor/tour/activity numbers.

Slide

Collaborate with local authorities to manage issues caused by, or related to, the activity

- Capitalise on positive outcomes
- Reduce or eliminate the impact of negative outcomes

Slide 113

Slide No	Trainer Notes
113.	Trainer continues to discuss basic options at this stage: ● Capitalise on any positive outcomes – which may involve, for example: ▪ Building extra buildings or roads ▪ Employing more people ▪ Conducting more tours or activities ▪ Expanding the area used by the pilot program and subsequent activities ▪ Increasing the duration of tours/activities ▪ Transferring the initiative to another site/community ● Reduce/eliminate all negative outcomes – which may require action such as: ▪ Re-locating elements of tour/activity to different geographic site – to preserve sites which are getting damaged ▪ Lowering interaction between tour groups and aspects of the site/local community’ – so there is less social impact ▪ Reducing frequency and/or the number of tourists in each group – to lower the likelihood of negative outcomes ▪ Restricting tour/activity site – by limiting activities and routes to more confined areas which will again protect delicate areas and reduce the potential for negative social impacts

	▪ Altering inclusions – so environmental concerns are addressed by removing interaction with (for example) a threatened geographical feature or a natural feature which has shown adverse readings in the monitoring process ▪ Changing Code of Behaviour for tourists who engage with the local community as part of the tour/activity – so the revised requirements address issues which are causing damage or offence to the social structure of the community ▪ Negotiating a trade-off with the local community – whereby they may be paid for things which have had a harmful impact on them, or be given (for example) assistance in terms of medical help, food, clothing, buildings, fuel or other goods and services deemed by them to be necessary and appropriate.
--	--

Slide

Collaborate with local authorities to manage issues caused by, or related to, the activity

Activities in the collaboration process:

- Attend all meetings convened by local authorities
- Provide requested all information/data to local authorities
- Fund the management process
- Honour promises made about what the organisation would do if monitoring revealed a certain outcome

(Continued)

Slide 114

Slide No	Trainer Notes
114.	Trainer identifies activities in the collaboration process: • Attend all meetings convened by the local authorities – to demonstrate engagement and willingness with this stage of the process • Provide requested all information/data to the local authorities – as, how and when requested • Fund the management process – which may entail: ▪ Pay for required changes to be paid ▪ Pay nominated persons to attend/participate in the management process ▪ Supply food and beverages and other support resources for the conduct of meetings and related other actions • Adhere to and honour any previous promises made about what the organisation would do if the monitoring process revealed a certain outcome – the Tourist Operator must remain 'true to their word.'

Slide

Collaborate with local authorities to manage issues caused by, or related to, the activity

- Listen to what those who disagree have to say
- Be open and transparent when discussing issues
- Be hard but be fair

(Continued)

Slide 115

Slide No	Trainer Notes
115.	Trainer identifies activities in the collaboration process: • Listen to what those who disagree have to say – because it may be the case they have a valid point which needs to be addressed • Be open and transparent when discussing issues – this can mean: ▪ Showing actual evidence gathered ▪ Making all information/data available – which may mean releasing information which may be regarded as damaging to the Tourist Operator • Be hard but be fair – the management process is not one where the Tourist Operator just accepts what everyone else says and does what everyone else wants, but is one where: ▪ They are entitled to have their say and argue their point ▪ They should present evidence to support their case/their side of the argument ▪ They are free to contest ill-informed or incorrect points which are raised by opponents of the initiative.

Slide

Collaborate with local authorities to manage issues caused by, or related to, the activity

- Conduct additional research and/or monitoring
- Record discussions and findings
- Share deliberations, discussions and decisions
- Make suggestions for action

Slide 116

Slide No	Trainer Notes
116.	Trainer continues to identify activities in the collaboration process: ● Conduct additional research and/or monitoring – as/if required to obtain more or different data to enable an informed decision to be made about a topic which is proving to be challenging or difficult to reconcile ● Record the discussions and findings – for future reference so there is a true and accurate record of: ▪ When meetings were conducted, where they occurred and who attended ▪ What was said and discussed ▪ Who said what ▪ Votes that were taken and the results of the votes ● Share the deliberations, discussions and decisions – so: ▪ All stakeholders are aware of the process and know what took place ▪ Transparency of decision making can be maintained ● Make suggestions for action – this must be done to accommodate the identified issues and concerns raised by the initiative but also needs to be done in a way that: ▪ Meets the commercial imperatives of the Tourist Operator ▪ Demonstrates the professionalism and industry knowledge and expertise of the Operator ▪ Optimises the potential for future minimal impact tourism to be well received.

Slide

Modify previous plans on the basis of valid data obtained

Changes made to plans:

- Must address identified need
- Must be in writing
- Must be integrated into the rest of the original plan

(Continued)

Slide 117

Slide No	Trainer Notes
117.	Trainer gives context for this step observing the changes which are made to the plans: • Must address identified need • Must be put in writing • Must be integrated into the existing plan.

Slide

Modify previous plans on the basis of valid data obtained

- Must be evidence-based
- Must be approved by management team
- Must be communicated to stakeholders

Slide 118

Slide No	Trainer Notes
118.	Trainer continues to give context for this stage observing changes: • Must be based on actual/factual evidence • Must be approved by those in the project management team • Must be communicated with relevant stakeholders and with those who have responsibility allocated to them under the revised plan.

Slide

Modify previous plans on the basis of valid data obtained

Changes may include:

- Changing the type/nature of the operation, project, activity or initiative
- Changing the interpretive activities included
- Changing the physical/geographic location of the initiative

(Continued)

Slide 119

Slide No	Trainer Notes
119.	Trainer identifies changes to plans may include: ● Changing the type/nature of the operation, project, activity or initiative – which may mean: ▪ Giving the initiative a different focus ▪ Targeting a different market ▪ Promoting in a different way ● Changing the interpretive activities included – so activities which are causing problems are replaced by ones: ▪ Likely to cause less of an impact ▪ More acceptable to local communities ● Changing the physical/geographic location of the initiative – such that an acceptable tour/activity is re-located to an area which causes less unacceptable impact/s.

Slide

Modify previous plans on the basis of valid data obtained

- Changing inclusions
- Using different tour staff and volunteer workers/local community people
- Altering timing of tours/activities
- Adjusting size and/or composition of group

(Continued)

Slide 120

Slide No	Trainer Notes
120.	Trainer continues to identify changes to plans may include: ● Changing inclusions – so that inclusions causing problems are removed and (perhaps) replaced by a more acceptable alternative, for example: ▪ Replacing a 5-day camp with an overnight stay ▪ Replacing the distribution of pre-prepared F&B to tour group members with freshly-cooked food prepared by locals (for which they are paid) ▪ Adding a local artifact as a ‘free gift’ from the Tourist Operator as part of the package (which is purchased from local artisans) ● Using different tour staff and volunteer workers/local community people – where there appears a need for: ▪ A different blend of workers ▪ People with new/different skills and expertise ▪ More people to help control visitors and monitor impacts ● Altering timing of tours/activities – in terms of: ▪ Seasons and/or dates for tours/activities ▪ Frequencies of tours/activities ▪ Arrival and departure times ▪ Start and finish times for activities

	▪ Keeping the same activities but varying the sequence of things • Adjusting the size and/or composition of tourists and visitors – such that, for example: ▪ Group numbers/participant numbers are reduced ▪ Babies/young people are prohibited ▪ Local sensitivities regarding age and gender are respected.
--	---

Slide

Modify previous plans on the basis of valid data obtained

- Limiting locations tourists can enter
- Reducing or increasing participation of local community and roles they play
- Revising visitor 'Code of Conduct'

(Continued)

Slide 121

Slide No	Trainer Notes
121.	Trainer continues to identify changes to plans may include: ● Limiting the locations tourists can enter – when they are physically in the local community, so that, perhaps: ▪ Certain houses or buildings are 'off limits' ▪ Prescribed walking routes must be adhered to ▪ Time limits are applied to the length of time to be spent in nominated locations ▪ Nominated activities are banned in prescribed areas ● Reducing or increasing participation of the local community and the roles they play within activities – which can mean: ▪ Local people may be employed as part of the crew/team for a tour in positions such as food preparation and cooking, food and beverage service, entertainment, local guides, presenters of interpretive activities ▪ External workers are brought in to replace positions previously filled by local people ● Revising required Code of Conduct that will be communicated to visitors prior to their engagement with the local community – with common changes being made to topics addressing: ▪ Dress ▪ Behaviour

	▪ Respect for communities ▪ Language used ▪ Local customs to be observed.
--	---

Slide

Modify previous plans on the basis of valid data obtained

- Increasing amount and/or type of resources allocated
- Changing supporting/underpinning infrastructure
- Changing monitoring protocols for nominated issues/topics
- Changing delivery method for information

Slide 122

Slide No	Trainer Notes
122.	Trainer continues to identify changes to plans may include: ● Increasing the amount and/or type of resources allocated to the operation – there is commonly never a need to <i>reduce</i> the amount or type of resources committed to an initiative, but there can be a need to: ▪ Employ more staff ▪ Use different staff – and/or provide nominated training to staff ▪ Pay local communities more money ▪ Acquire and use more physical items ● Changing the supporting/underpinning infrastructure – in that there can be a need to: ▪ Create more tracks roads ▪ Upgrade, grade or seal tracks ▪ Erect more buildings ▪ Construct additional landing areas for water craft and aircraft ▪ Build toilets, camp sites, kitchen and dining facilities, accommodation and other support structures ● Changing the monitoring protocols for nominated issues/topics – which can involve:

	▪ Adding new technologies/metering to monitor new topics/environmental concerns ▪ Taking readings at more frequent intervals ▪ Obtaining readings/monitoring data from different sites • Changing the delivery method for information – and, as necessary: ▪ Using a more technology-reliant option rather than, say, a human to provide a commentary/information ▪ Allowing (for example) self-discovery to replace lectures, displays and presentations.
--	---

Slide

Summary – Element 4

When evaluating minimal impact operations:

- Make sure the data identified as being gathered is in fact captured and recorded
- Involve stakeholders
- Use objective and subjective as required to evaluate the initiative

(Continued)

Slide 123

Slide No	Trainer Notes
123.	Trainer provides a recap of the Element asking questions to check trainee understanding and responding to questions from trainees, as required.

Slide

Summary – Element 4

- Solicit feedback from those involved – staff, tourists, local communities, other stakeholders
- Conduct evaluations and manipulate data with reference to established criteria and parameters
- Use external consultants/professionals where necessary

(Continued)

Slide 124

Slide No	Trainer Notes
124.	Trainer provides a recap of the Element asking questions to check trainee understanding and responding to questions from trainees, as required.

Slide

Summary – Element 4

- Make decisions based on actual data
- Share and/or publish the data and findings
- Work cooperatively with local communities to address their concerns
- Adjust plans to reflect the findings of the evaluation

Slide 125

Slide No	Trainer Notes
125.	Trainer provides a recap of the Element asking questions to check trainee understanding and responding to questions from trainees, as required. Trainer thanks trainees for their attention and encourages them to apply course content as required in their workplace activities.

Recommended training equipment

Current and past ASEAN Tourism Strategic Plans

Copy of ASEAN Traveller's Code

Sample industry Codes of Practice, government plans, and commercial agreements negotiated with local communities relating to tourism and sustainable tourism

Advertisements from Tourism Operators promoting sustainable tourism/tours/packages

APEC/PATA Code for Sustainable Tourism

Tourism agency/government department research information/reports (historical and benchmark data) on areas of interest for destinations of proposed activities

Computers with internet connection

GPS unit

Local/relevant maps – topographic and general reference

Samples of plans for proposals of sustainable tourism initiatives

Access to examples of technology to assist with environmental monitoring activities – which may include:

- Hand-held water quality meters
- Air monitors
- Dust monitors
- Soil samplers
- Sound level meters
- Vibration monitors
- Thermometers
- Water depth and flow gauges
- Traffic (road count) meters
- Turnstiles.

Instructions for Trainers for using PowerPoint – Presenter View

Connect your laptop or computer to your projector equipment as per manufacturers' instructions.

In PowerPoint, on the **Slide Show** menu, click **Setup Show**.

Under Multiple monitors, select the Show Presenter View check box.

In the **Display slide show** on list, click the monitor you want the slide show presentation to appear on.

Source: <http://office.microsoft.com>

Note:

In Presenter View:

You see your notes and have full control of the presentation

Your trainees only see the slide projected on to the screen

More Information

You can obtain more information on how to use PowerPoint from the Microsoft Online Help Centre, available at:

<http://office.microsoft.com/training/training.aspx?AssetID=RC011298761033>

Note Regarding Currency of URLs

Please note that where references have been made to URLs in these training resources trainers will need to verify that the resource or document referred to is still current on the internet. Trainers should endeavour, where possible, to source similar alternative examples of material where it is found that either the website or the document in question is no longer available online.
