Competency Based Assessment (CBA) – An Introduction for Assessors

Assessment is the process of identifying a participant's current knowledge, skills and attitudes sets against all elements of competency within a unit of competency.

Suggested Assessment Methods

For each unit of competency a number of assessment tools have been identified including:

- Work Projects
- Oral Questions
- Written Questions
- Third Party Statements
- Observation Checklists.

Instructions and Evidence Recording Sheets have been identified in this Assessment Manual for use by Assessors.

Alternative Assessment Methods

Whilst the above mentioned assessment methods are suggested assessment methods, the assessor may use an alternate method of assessment taking into account:

- a) The nature of the unit
- b) The strengths of participants
- c) The number of participants in the class
- d) Time required to complete assessments
- e) Time dedicated to assessment
- f) Equipment and resources required.

Alternate assessment methods include:

- Practical demonstrations
- Practical demonstrations in simulated work conditions
- Problem solving
- Portfolios of evidence
- Critical incident reports
- Journals
- Oral presentations
- Interviews
- Videos
- Visuals/slides/audiotapes

- Case studies
- Log books
- Projects and Role plays
- Group projects
- Recognition of Prior Learning.

Whilst there is no specific instruction or evidence collection documents for all the alternative assessment methods, assessors can record competency in the 'Other' section within the 'Competency Recording Sheet'.

Selection of Assessment Methods

Each assessor will determine the combination of Assessment Methods to be used to determine Competency for each Competency Unit on a student by student basis.

'Sufficient' evidence to support the 'Pass Competent'/'Not Yet Competent' decision must be captured.

In practice this means a minimum of 2 – 3 Assessment Methods for each candidate for each Competency Element is suggested.

At least one method should provide evidence of practical demonstration of competence.

The following assessment methods deemed to provide evidence of practical demonstration of competence include:

- Practical Work Projects
- Third Party Statement
- Observation Checklist.

Assessing Competency

Competency based assessment does not award grades, but simply identifies if the participant has the knowledge, skills and attitudes to undertake the required task to the specified standard.

Therefore, when assessing competency, an assessor has two possible results that can be awarded:

- 'Pass Competent' (PC)
- 'Not Yet Competent' (NYC).

Pass Competent (PC)

If the participant is able to successfully answer or demonstrate what is required, to the expected standards of the performance criteria, they will be deemed as 'Pass Competent' (PC).

The assessor will award a 'Pass Competent' (PC) if they feel the participant has the necessary knowledge, skills and attitudes in all assessment tasks for a unit.

Not Yet Competent' (NYC)

If the participant is unable to answer or demonstrate competency to the desired standard, they will be deemed to be 'Not Yet Competent' (NYC).

This does not mean the participant will need to complete all the assessment tasks again. The focus will be on the specific assessment tasks that were not performed to the expected standards.

The participant may be required to:

- a) Undertake further training or instruction
- b) Undertake the assessment task again until they are deemed to be 'Pass Competent'.

Regional Qualifications Framework and Skills Recognition System

The 'Regional Qualifications Framework and Skills Recognition System', also known as the 'RQFSRS' is the overriding educational framework for the ASEAN region.

The purpose of this framework is to provide:

- A standardised teaching and assessment framework
- Mutual recognition of participant achievement across the ASEAN region. This includes achievement in individual Units of Competency or qualifications as a whole.

The role of the 'RQFSRS' is to provide, ensure and maintain 'quality assurance' across all countries and educational providers across the ASEAN region.

Recognition of Prior Learning (RPL)

Recognition of Prior Learning is the process that gives current industry professionals who do not have a formal qualification, the opportunity to benchmark their extensive skills and experience against the standards set out in each unit of competency/subject.

This process is a learning and assessment pathway which encompasses:

- Recognition of Current Competencies (RCC)
- Skills auditing
- Gap analysis and training
- Credit transfer.

Code of Practice for Assessors

This Code of Practice provides:

- Assessors with direction on the standard of practice expected of them
- Candidates with assurance of the standards of practice expected of assessors
- Employers with assurance of the standards maintained in the conduct of assessment.

The Code detailed below is based on the International Code of Ethics and Practice (The National Council for Measurement in Education [NCME]):

- The differing needs and requirements of the person being assessed, the local enterprise and/or industry are identified and handled with sensitivity
- Potential forms of conflict of interest in the assessment process and/or outcomes are identified and appropriate referrals are made, if necessary
- All forms of harassment are avoided throughout the planning, conducting, reviewing and reporting of the assessment outcomes

- The rights of the candidate are protected during and after the assessment
- Personal and interpersonal factors that are not relevant to the assessment of competency must not influence the assessment outcomes
- The candidate is made aware of rights and process of appeal
- Evidence that is gathered during the assessment is verified for validity, reliability, authenticity, sufficiency and currency
- Assessment decisions are based on available evidence that can be produced and verified by another assessor
- Assessments are conducted within the boundaries of the assessment system policies and procedures
- Formal agreement is obtained from both the candidate and the assessor that the assessment was carried out in accordance with agreed procedures
- The candidate is informed of all assessment reporting processes prior to the assessment
- The candidate is informed of all known potential consequences of decisions arising from an assessment, prior to the assessment
- Confidentiality is maintained regarding assessment results
- The assessment results are used consistently with the purposes explained to the candidate
- Opportunities are created for technical assistance in planning, conducting and reviewing assessment procedures and outcomes.

Instructions and Checklist for Assessors

Instructions

General instructions for the assessment:

- Assessment should be conducted at a scheduled time that has been notified to the candidate
- Facilitators must ensure participants are made aware of the need to complete assessments and attend assessment sessions
- If a participant is unable to attend a scheduled session, they must make arrangements with the Assessor to undertake the assessment at an alternative time
- At the end of the assessment the Assessor must give feedback and advise the participant on their PC/NYC status
- Complete the relevant documentation and submit to the appropriate department.

Preparation

- Gain familiarity with the Unit of Competency, Elements of Competency and the Performance Criteria expected
- Study details assessment documentation and requirements
- Brief candidate regarding all assessment criteria and requirements.

Briefing Checklist

- Begin the assessment by implementing the following checklist and then invite the candidate to proceed with assessment.

Checklist for Assessors

Prior to the assessment I have:	Tick (✓)	Remarks
Ensured the candidate is informed about the venue and schedule of assessment.		
Received current copies of the performance criteria to be assessed, assessment plan, evidence gathering plan, assessment checklist, appeal form and the company's standard operating procedures (SOP).		
Reviewed the performance criteria and evidence plan to ensure I clearly understood the instructions and the requirements of the assessment process.		
Identified and accommodated any special needs of the candidate.		
Checked the set-up and resources for the assessment.		
During the assessment I have:		
Introduced myself and confirmed identities of candidates.		
Put candidates at ease by being friendly and helpful.		
Explained to candidates the purpose, context and benefits of the assessment.		
Ensured candidates understood the assessment process and all attendant procedures.		
Provided candidates with an overview of performance criteria to be assessed.		
Explained the results reporting procedure.		
Encouraged candidates to seek clarifications if in doubt.		
Asked candidates for feedback on the assessment.		
Explained legal, safety and ethical issues, if applicable.		
After the assessment I have:		
Ensured candidate is given constructive feedback.		
Completed and signed the assessment record.		
Thanked candidate for participating in the assessment.		

Instructions for Recording Competency

Specifications for Recording Competency

The following specifications apply to the preparation of Evidence Gathering Plans:

- A Competency Recording Sheet must be prepared for each candidate to ensure and demonstrate all Performance Criteria and Competency Elements are appropriately assessed. This Sheet indicates how the Assessor will gather evidence during their assessment of each candidate
- This Competency Recording Sheet is located at the end of the Assessment Plan
- It is the overriding document to record competency
- The Assessor may vary the Competency Recording Sheet to accommodate practical and individual candidate and/or workplace needs
- Assessor must place a tick (✓) in the 'Assessment Method' columns to identify the methods of assessment to be used for each candidate
- Multiple Competency Elements/Performance Criteria may be assessed at the one time, where appropriate
- The assessor and participant should sign and date the Competency Recording Sheet, when all forms of evidence and assessment have been completed
- The assessor may provide and feedback or clarify questions which the participant may have in regards to the assessment grade or findings
- All documents used to capture evidence must be retained, and attached to the Competency Recording Sheet for each candidate for each Competency Unit.

Instructions for Different Assessment Methods

Specifications for Work Project Assessment

These guidelines concern the use of work projects.

The work projects identified in the Training Manuals involve a range of tasks, to be performed at the discretion of the Assessor.

Work project tasks can be completed through any form of assessment as identified in the Trainer and Trainee Manuals and stated at the start of this section.

Assessors should follow these guidelines:

- Review the Work Projects at the end of each 'Element of Competency' in the Trainee Manual to ensure you understand the content and what is expected
- Prepare sufficient resources for the completion of work activities including:
 - Time – whether in scheduled delivery hours or suggested time participants to spend outside of class hours
 - Resources – this may involve technical equipment, computer, internet access, stationery and other supplementary materials and documents
- Prepare assessment location (if done in class) making it conducive to assessment
- Explain Work Projects assessment to candidate, at the start of each Element of Competency. This ensures that participants are aware of what is expected and can collate information as delivery takes place

- Assessors can use the following phrase as a guide (where an 'X' is identified, please input appropriate information):
 "At the end of each Element of Competency there are Work Projects which must be completed. These projects require different tasks that must be completed.
 These work projects are part of the formal assessment for the unit of competency titled X:
- You are required to complete these activities:
 - Using the 'X' method of assessment*
 - At 'X' location*
 - You will have 'X time period' for this assessment*
 - You are required to compile information in a format that you feel is appropriate to the assessment
 - Do you have any questions about this assessment?"
- Commence Work Project assessment:
 - The assessor may give time for participants to review the questions at this time to ensure they understand the nature of the questions. The assessor may need to clarify questions
 - Participants complete work projects in the most appropriate format
 - Participants must submit Work Project evidence to the assessor before the scheduled due date
- Assessor must assess the participant's evidence against the competency standards specified in each Element of Competency and their own understanding. The assessor can determine if the participant has provided evidence to a 'competent' standard
- Transcribe results/details to Competency Recording Sheet
- Forward/file assessment record.

Specifications for Oral Question Assessment

These guidelines concern the use of oral questioning.

Assessors should follow these guidelines.

- Prepare Assessment Record for Oral Questioning. One record for each candidate:
 - Enter Student name
 - Enter Assessor name
 - Enter Location
- Familiarise self with Questions to be asked
- Prepare assessment location (table and chairs) making it conducive to assessment
- Explain Oral Questioning assessment to candidate, using the following phrase as a guide (where a 'X' is identified, please input appropriate information):
"These oral questions are part of the formal assessment for the unit of competency titled X.

There are X questions and you are required to answer all of them to the best of your ability and I will record whether or not you have answered correctly.

We have 60 minutes for this assessment.

- I will give you feedback at the end of the assessment
- Do you have any questions about this assessment?”
- Commence Oral Questioning assessment:
 - Complete Assessment Record for the Oral Questioning by:
 - a) Ticking PC or NYC, as appropriate
 - b) Entering ‘Remarks’ as required
 - c) Completing Oral Questioning within 60 minutes
- Complete Oral Questioning and provide feedback to candidate
- Transcribe results/details to Competency Recording Sheet
- Forward/file assessment record.

Specifications for Written Question Assessment

These guidelines concern the use of written questioning.

Assessors should follow these guidelines:

- Familiarise self with Questions and Answers provided
- Print and distribute copies of ‘Written Questions’ for participants. Ideally this should take place with adequate time for participants to answer all questions before the expected due date
- Explain Written Questioning assessment to candidate, using the following phrase as a guide (where a ‘X’ is identified, please input appropriate information):

“These written questions are part of the formal assessment for the unit of competency titled X.

There are X questions and you are required to answer all of them to the best of your ability.

You may refer to your subject materials, however where possible try to utilise your existing knowledge when answering questions.

Where you are unsure of questions, please ask the Assessor for further instruction. This may be answering the question orally or asking the assessor to redefine the question.

We have X time for this assessment:

- The due date for completion of this assessment is X
- On this date you must forward the completed questions to the assessor by X time on the date of X
- Do you have any questions about this assessment?”
- The assessor may give time for participants to review the questions at this time to ensure they understand the nature of the questions. The assessor may need to clarify questions
- Participants may record written answers (where possible)
- Participants must submit the written answers to the assessor before the scheduled due date

- Assessor must assess the participant's written answers against the model answers provided as a guide, or their own understanding. The assessor can determine if the participant has answered the questions to a 'competent' standard
- Transcribe results/details to Competency Recording Sheet
- Forward/file assessment record.

Specifications for Observation Checklist

These specifications apply to the use of the Observation Checklist in determining competency for candidates.

Only an approved assessor is authorised to complete the Observation Checklist.

The assessor is required to observe the participant, ideally in a simulated environment or their practical workplace setting and record their performance (or otherwise) of the competencies listed on the Observation Checklist for the Competency Unit.

To complete the Observation Checklist the Assessor must:

- Insert name of candidate
- Insert assessor name
- Insert identify of location where observations are being undertaken
- Insert date/s of observations – may be single date or multiple dates
- Place a tick in either the 'Yes' or 'No' box for each listed Performance Criteria to indicate the candidate has demonstrated/not demonstrated that skill
- Provide written (and verbal) feedback to candidate – as/if appropriate
- Sign and date the form
- Present form to candidate for them to sign and date
- Transcribe results/details to Competency Recording Sheet for candidate
- Forward/file Observation Checklist.

This source of evidence combines with other forms of assessment to assist in determining the 'Pass Competent' or 'Not Yet Competent' decision for the participant.

Specifications for Third Party Statement

These specifications relate to the use of a relevant workplace person to assist in determining competency for candidates.

The Third Party Statement is to be supplied by the assessor to a person in the workplace who supervises and/or works closely with the participant.

This may be their Supervisor, the venue manager, the Department Manager or similar.

The Third Party Statement asks the Supervisor to record what they believe to be the competencies of the participant based on their workplace experience of the participant. This experience may be gained through observation of their workplace performance, feedback from others, inspection of candidate's work etc.

A meeting must take place between the Assessor and the Third Party to explain and demonstrate the use of the Third Party Statement.

To complete the Third Party Verification Statement the Assessor must:

- Insert candidate name
- Insert name and contact details of the Third Party
- Tick the box to indicate the relationship of the Third Party to the candidate
- Present the partially completed form to the Third Party for them to finalise
- Collect the completed form from the Third Party
- Transcribe results/details to Competency Recording Sheet for candidate
- Forward/file Third Party Statement.

The Third Party must:

- Record their belief regarding candidate ability/competency as either:
 - Pass Competent = Yes
 - Not Yet Competent = No
 - Unsure about whether candidate is competent or not = Not Sure
- Meet briefly with the assessor to discuss and/or clarify the form.

This source of evidence combines with other forms of assessment to assist in determining the 'Pass Competent' or 'Not Yet Competent' decision for the candidate.

A separate Third Party Statement is required for each Competency Unit undertaken by the candidate.

Competency standard

UNIT TITLE: SOURCE AND PRESENT INFORMATION		NOMINAL HOURS: 25
UNIT NUMBER: D2.TGA.CL6.12		
UNIT DESCRIPTOR: This unit deals with skills and knowledge required to undertake basic research and present the captured information in response to identified need.		
ELEMENTS AND PERFORMANCE CRITERIA		UNIT VARIABLE AND ASSESSMENT GUIDE
Element 1: Define the context for information 1.1 Describe the <i>identified need</i> for the <i>information</i> 1.2 Determine the <i>type of information required</i> 1.3 List the potential <i>sources of information</i> for <i>products and services</i> 1.4 Determine <i>presentation requirements</i> for the required information 1.5 Identify the <i>timelines for the information required</i> 1.6 Identify <i>budget</i> for sourcing and presenting the information 1.7 Define the <i>scopes of authority</i> relating to research and information related activities Element 2: Research the identified information requirements 2.1 Determine sources of information relevant to the identified information need		Unit Variables The Unit Variables provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. It relates to the unit as a whole and facilitates holistic assessment. This unit applies to all industry sectors that have a need to identify and share product and/or service information within the labour divisions of the hotel and travel industries and may include: 1. Travel Agencies 2. Tour Operation <i>Identified need</i> may be related to: • Providing information regarding products and services to customers and agents • Comparing information offered from different suppliers • Evaluating products and services, including suppliers, providers, destinations, offers and carriers • Updating databases and information inventories and files • Reviewing customer information on identified target markets or target

2.2 <i>Arrange to receive information</i> identified as necessary 2.3 <i>Search the identified sources</i> for information 2.4 <i>Identify relevant information</i> 2.5 <i>Seek external assistance</i>, as required Element 3: Capture the identified information 3.1 Establish <i>files</i> and folders to record identified information 3.2 <i>Download electronic files</i> from the internet 3.3 <i>File hard copy material</i> received 3.4 <i>Visit identified sources</i> 3.5 Extract data from <i>internal information</i> sources 3.6 <i>Request additional information</i> as circumstances determine 3.7 <i>Undertake market research</i> activities Element 4: Prepare the captured information 4.1 <i>Review the captured information</i> 4.2 <i>Analyse the captured information</i> 4.3 <i>Manipulate the captured information</i> to meet identified needs 4.4 Produce required information in a <i>draft format</i> suitable to meet identified presentation requirements 4.5 <i>Present draft material for feedback</i>	demographics • Maintaining currency with industry offerings, trends and initiatives • Complying with relevant legislation, industry codes of practice, industry benchmarks and best practice standards • Developing new or revised products and services • Identifying, evaluating and determining costs, prices, schedules, commissions, discounts, rebates, bonuses and other industry/supplier issues. <i>Information may relate to:</i> • Products and/or services, including products and services provided by, and/or sold by, the enterprise • Internal use, including information for use by individual persons, nominated department or specified operations • External use, including information for business partners, joint venture partners, sub-agencies, head office and customers • Periodicals, newsletters, updates and bulletins received by the enterprise, whether solicited or unsolicited, from public and private sector organisations • Information required by the enterprise for operational purposes, general industry background and contextual information, specific industry-sector information and information from other sectors with the potential to impact on the enterprise and/or the industry. <i>Type of information required may be related to:</i> • Text-based information, including manuals, media articles, reports, summaries, brochures, marketing materials and books • Statistics • Testimonials
--	---

4.6 <i>Revise draft material</i> on the basis of feedback received 4.7 <i>Prepare sufficient supplies</i> of information to meet identified requirements Element 5: Present the information 5.1 <i>Make a verbal presentation</i> of the material 5.2 <i>Distribute hard copy materials</i> to identified users 5.3 <i>Post electronic material</i> as required	• Specifications • Quotations • Image-based material, including photographs, and recordings • Personal observations, including record of interviews, and first-hand meetings. <i>Sources of information</i> may relate to: • Internal business sources, including databases and reservation systems either manual or computerised • Direct contact with: ▪ Travel suppliers and carriers, including airlines, cruise operators, railway operators, bus lines, car rental businesses, limousine hire, taxis ▪ Suppliers and providers of support and ancillary services, including travel insurance providers, finance providers, currency exchange, conference and similar venues, interpreters ▪ Tour operators and wholesalers ▪ Travel agencies and associations ▪ Peak travel bodies ▪ Government and industry tourism bodies and authorities, including domestic and international bodies • Literature, including reference books, general media and trade publications, brochures and marketing materials • Websites, including individual companies, directories, news sites, surveys and research sites • Personal network of contacts including those within the host enterprise, such as colleagues, other personnel, management and those external to the business, such as customers.
---	---

	<i>Products and services</i> may relate to: • Travel, including air, cruise, train, bus, car • Destinations, including statistical information and details relating to climate, currency, maps, travel guides, events, languages, history, safety, government information, time zones, culture and communications • Tourist activities and attractions, including natural and man-made • Tours, trips, sight-seeing and excursions • Accommodation facilities ranging from 5-star to back-packer venues • Services, including medical, personal, entertainment, sporting, shopping • Travel requirements, including requirements relating to entry, passport, visas, warnings and advisory bulletins, customs information • Finance • Travel insurance. <i>Presentation requirements</i> may include: • Verbal presentation on material, including verbal presentation to nominated individuals and/or groups both within the enterprise and external to the business • Hard-copy presentation of material which may include the specified need for statistical manipulation and presentation, including tables, charts, graphs and the alignment of data and information with enterprise requirements in terms of format and layout for reports and research findings • Electronic presentation • Confidential treatment of material, including restricted access and distribution of information and materials.
--	---

	<i>Timelines for the information required may include:</i> • Immediate, including all tasks prioritised as urgent • As soon as possible • Within a designated timeframe, which specifies a number of hours, days, weeks or months, including tasks to be completed before the set deadline Regular cyclical events in accordance with designated enterprise policies which, for example, may include: ▪ The need to review supplier wholesale prices every month ▪ The need to update customer data every three months ▪ The need to gather destination, supplier and carrier information for new or revised packages every season. <i>Budget may include:</i> • Time allocation to undertake research • Staff to undertake research and/or assist in the analysis, preparation and presentation of the material captured • Funds to obtain secondary research data • Funds to enable the undertaking of primary market research • Materials, registrations, subscriptions and other activities necessary to register to receive or to purchase identified information. <i>Scopes of authority may include:</i> • Defining authorities and abilities to second staff and delegate tasks • Granting of authorities to make purchases on behalf of the enterprise and to make commitments on behalf of the organisation • Establishing access protocols to internal information and databases • Determining responsibilities and channels of communication related to the identified position.
--	---

	<i>Arrange to receive information</i> may include: • Registering to receive material • Paying to receive material • Asking organisations to forward information • Asking internal colleagues to provide existing information • Requesting colleagues to manipulate existing data in order to generate new data. <i>Search the identified sources</i> may include: • Reading material • Interrogating databases • Asking questions • Exploring options • Conducting web based searches, including the use of search engines and bookmarked sites relevant to the industry and enterprise. <i>Identify relevant information</i> may include: • Book marking websites • Recording sources in a project-specific index. <i>Seek external assistance</i> may include: • Employing professional external third party information providers • Employing researchers • Networking. <i>Files</i> may include: • Paper-based files • Electronic files.
--	---

	<i>Download electronic files</i> may include: • Saving files to established folders • Printing hard copy material • Saving the location of source material. <i>File hard copy material</i> may include: • Using established paper-based files • Organising material in relevant classifications • Filing material by date and/or alpha order • Applying version controls to track currency of material • Recording source and date of all material filed. <i>Visit identified sources</i> may include: • Talking with personnel to obtain, clarify, update and identify supplementary relevant information • Obtaining hard copy material • Reviewing additional information available at the source • Viewing operations and making personal observations • Recording interviews and taking photographs or other recorded images. <i>Internal information</i> may be obtained from a number of different sources depending on the scope, nature and technological capabilities of the host enterprise and may include: • Customer databases • Sales figures • Internal reports • Accounting and operational statistics
--	--

	• Data from sub-agencies and head office • Customer feedback information • Automated information systems • Computerised reservation systems • Products and services inventories. <i>Request additional information</i> may include: • Asking for more current data • Asking for data interpretation • Asking for supplementary material • Asking for material referred to in existing material. <i>Undertake market research</i> may include: • Defining the market research objectives • Initiating research on qualitative and quantitative data • Initiating primary and secondary data research • Identifying market research techniques to be applied • Determining the market research population • Trialling and applying the identified market research techniques. <i>Review the captured information</i> may include: • Confirming the applicability and utility of material researched and provided • Determining if additional information, material or data is required to meet identified needs • Verifying the accuracy, relevance and sources of the data • Ensuring that no obvious sources of information have been overlooked
--	--

	• Meeting with the information user to check that the material gathered is appropriate for their needs • Meeting with researchers to clarify points of ambiguity, as appropriate. <i>Analyse the captured information may include:</i> • Evaluating The Information • Classifying the information • Determining trends, patterns and undertaking an identified statistical examination • Comparing information to identified benchmarks, businesses, industries, timeframes, countries, carriers and others as required • Preparing reports reflecting the analysis that has been undertaken • Preparing summaries with supporting evidence of the results of the data analysis. <i>Manipulate the captured information may include:</i> • Maintaining the integrity of the data at all costs • Eliminating superfluous material • Using identified information and statistics to generate fresh results • Using statistical data in new calculations to produce fresh figures • Over-laying data from one set of circumstances in comparison with a similar occurrence • Generating averages, trends, patterns, ratios, percentages and other statistical data as required. <i>Draft format may include:</i> • Complying with host enterprise format and layout • Aligning with required structure • Ensuring content matches identified need.
--	---

	<i>Present draft material for feedback</i> may include: • Distributing drafts in accordance with identified internal end-user need • Recording details of draft distribution • Identifying timelines and procedures for feedback • Ensuring the draft is identified as a draft copy • Protecting the confidentiality of materials • Obtaining confirmation that drafts have been received. <i>Revise draft material</i> may include: • Deleting material • Accepting or rejecting feedback • Including additional material • Revising conclusions, suggestions and summaries • Providing new inclusions • Revising format and presentation. <i>Prepare sufficient supplies</i> may include: • Preparing photocopies of the material • Using internal capabilities to compile, assemble, bind and/or otherwise display information • Engaging the services of an external business to produce materials as required. <i>Make a verbal presentation</i> may include: • Presenting to nominated individuals and/or groups both within the enterprise and external to the business, including formal and informal presentations • Explaining the research methodology adopted in obtaining the information
--	--

- Explaining underpinning information regarding the information
- Responding to questions
- Following-up on questions arising.

Distribute hard copy materials may include:

- Making information available in-house to colleagues, including hand delivery, distribution through internal mail systems and handing material out at meetings
- Making information available in-house to customers, including posters, flyers, brochures and marketing materials
- Including material in scheduled communications and *ad hoc* mail-outs
- Using postal and courier services to disseminate materials
- Hand delivery.

Post electronic material may include:

- Making material available on the organisational intranet
- Making material available on the organisational website
- Providing electronic copies for customers and colleagues in accordance with established requirements.

Assessment Guide

The following skills and knowledge must be assessed as part of this unit:

- Enterprise policies and procedures in regard to the sourcing, validating and presentation of text-based information and statistical data, including the dissemination of such material
- Ability to use basic principles of research and information/data validation techniques
- Ability to determine information required from scenarios and/or problems presented

	• Ability to apply basic interview, communication, questioning and data interrogation skills • Ability to record identified information for archiving, manipulation and/or later reference • Ability to sort, process, analyse and classify information and statistical data. Linkages To Other Units • Access and retrieve computer-based data • Gather and present product information • Access and interpret product information • Maintain product information inventory • Operate an automated information system • Source and package tourism products and services • Source and provide destination information and advice • Research and share information on indigenous cultures • Prepare and present tour commentaries • Design, prepare and present various types of reports • Prepare business documents • Use common business tools and technology • Develop and update local knowledge • Maintain hospitality industry knowledge • Develop and maintain food and beverage product knowledge • Develop and update tourism industry knowledge • Promote products and services to customers.
--	--

	Critical Aspects of Assessment Evidence of the following is essential: • Understanding of host enterprise policies and procedures in regard to the sourcing, validating and presentation of text-based information and statistical data including the dissemination of such material • Demonstrated ability to establish the context for a nominated topic of research and produce hard copy material to meet the stated needs for such research • Demonstrated ability to validate information provided on a nominated research topic • Demonstrated ability to prepare prescribed hard copy and electronic versions of materials suitable for use in the delivery of a nominated presentation topic to a defined target group • Demonstrated ability to deliver a verbal presentation on the findings of a nominated research topic to a defined target group. Context of Assessment This unit may be assessed on or off the job • Assessment should include practical demonstration either in the workplace or through a simulation activity, supported by a range of methods to assess underpinning knowledge • Assessment must relate to the individual's work area or area of responsibility. Resource Implications Training and assessment to include access to a real or simulated workplace; and access to workplace standards, procedures, policies, guidelines, tools and equipment.
--	---

Assessment Methods

The following methods may be used to assess competency for this unit:

- Observation of practical candidate performance
- Analysis of portfolio of evidence compiled by the candidate including research material, draft material and final presentation and associated materials
- Project work
- Oral and written questions
- Third party reports completed by a supervisor
- Project and assignment work
- Oral presentations.

Key Competencies in this Unit

Level 1 = competence to undertake tasks effectively

Level 2 = competence to manage tasks

Level 3 = competence to use concepts for evaluating

Key Competencies	Level	Examples
Collecting, organising and analysing information	2	Capturing required information to meet identified need
Communicating ideas and information	2	Explaining information requirements to colleagues, customers and other third parties
Planning and organising activities	1	Scheduling research, evaluation and information preparation and presentation activities

	Working with others and in teams	1	Liaising with colleagues and relevant external providers to identify and obtain required information
	Using mathematical ideas and techniques	2	Analysing research data; calculating statistics related to identified research information
	Solving problems	1	Identifying sources for research information
	Using technology	2	Using the internet to undertake research and disseminate information

Oral questions

Student name	
Assessor name	
Location/venue	
Unit of competency	Source and present information D2.TGA.CL6.12
Instructions	1. Ask student questions from the attached list to confirm knowledge, as necessary 2. Place tick in boxes to reflect student achievement (Pass Competent 'PC' or Not Yet Competent 'NYC') 3. Write short-form student answer in the space provided for each question.

Questions	Response	
	PC	NYC
1. How can you identify what information you need for an organisation?	☐	☐
2. What are examples of statistics that are 'tourism specific' or 'specific to a business'?	☐	☐

Questions	Response	
	PC	NYC
3. What are examples of 'sources of information' in the accommodation sector?	☐	☐
4. What are examples of information that may be sought from 'travel services' businesses? Choose one travel service business only. E.g. air travel.	☐	☐
5. What needs to be considered when determining which presentation method to use when passing on information?	☐	☐

Questions	Response	
	PC	NYC
6. When should information be passed on to stakeholders? Provide an example.	☐	☐
7. Why is it important to establish a budget when researching and sourcing information?	☐	☐
8. Why is it important to identify a 'scope of authority' when conducting research activities?	☐	☐

Questions	Response	
	PC	NYC
9. What is the purpose of a quotation? What information is contained within a quotation?	☐	☐
10. How can you gather information from external sources?	☐	☐
11. Why is it important to use different methods to collect information from identified sources?	☐	☐

Questions	Response	
	PC	NYC
12. Why is it important to identify information after you have collected it?	☐	☐
13. What are examples of external assistance that can be sought when collecting or understanding information already collected?	☐	☐
14. What are considerations when determining how to establish an information system?	☐	☐

Questions	Response	
	PC	NYC
15. What are activities conducted to store information after you have downloaded electronic information?	☐	☐
16. What are factors to consider when filing hard copy materials?	☐	☐
17. When would you visit identified sources of information?	☐	☐

Questions	Response	
	PC	NYC
18. Why is it beneficial to gather information from internal sources before exploring external sources?	☐	☐
19. What types of requests can be made when asking for additional information from sources?	☐	☐
20. What is the difference between 'primary' and 'secondary' data?	☐	☐

Questions	Response	
	PC	NYC
21. Why is it important to review information after it has been collected?	☐	☐
22. What is the difference between 'reviewing' and 'analysing' information?	☐	☐
23. What does it mean to 'manipulate' information for business purposes?	☐	☐

Questions	Response	
	PC	NYC
24. Why is it important to prepare a 'draft version' of documentation?	☐	☐
25. Why is it important to present a 'draft version' of documentation to stakeholders before completing the 'final version'?	☐	☐
26. What are examples of feedback that can be sought from stakeholders after you have given them a draft version of documents?	☐	☐

Questions	Response	
	PC	NYC
27. Why is planning important when preparing to make a presentation?	☐	☐
28. What needs to be planned before making a verbal presentation?	☐	☐
29. What are activities associated with distributing hard copy materials to stakeholders?	☐	☐

Questions	Response	
	PC	NYC
30. What are activities associated with distributing electronic materials to stakeholders?	☐	☐

Written questions

Source and present information – D2.TGA.CL6.12

Student Name: _____

Answer all the following questions and submit to your Trainer.

1. Why is it important for a tourism organisation to collect and use information?

2. What are examples of text-based information?

3. What are examples of image-based materials?

4. What are examples of 'destination information' you may gather?

5. What are the three formats of presentations that can be made?

6. What are considerations when identifying timelines for passing on information to others?

7. What are considerations when establishing a budget to research and source information?

8. What does 'scope of authority' mean?

9. What are examples of information you can gather from personal observations?

10. How can you gather information from customers?

11. What are methods used to search identified sources for information?

12. How can you identify information after you have collected it?

13. What are reasons to seek external assistance when collecting or understanding information that has been collected?

14. What are options that can be used for storing information you have collected?

15. What are sources of online information?

16. What storage methods can be used for the storage of hard copy materials?

17. What are the benefits of visiting identified sources of information?

18. What are examples of internal sources of information?

19. What are reasons for the need to request additional information?

20. What is the difference between ' qualitative' and ' quantitative' research?

21. What are possible objectives when reviewing captured information?

22. What is the purpose of interpreting information?

23. What are activities associated with manipulating captured information?

24. What information is included in a draft report?

25. What are activities associated with presenting material for stakeholder feedback?

26. What revisions can be made to 'draft versions' of information based on the feedback from stakeholders?

27. What needs to be planned when preparing copies of information for a presentation?

28. What are types of verbal presentations that can be made?

29. What are the benefits of distributing hard copy materials?

30. What are the benefits of distributing electronic materials?

Answers to written questions

Source and present information – D2.TGA.CL6.12

The following are model answers only – Trainers/Assessors must use discretion when determining whether or not an answer provided by a Student is acceptable or not.

1. Why is it important for a tourism organisation to collect and use information?

- To demonstrate professionalism
- To answer routine questions
- Providing information to customers
- Provide specific product advice
- Selling tourism products to the customer
- Quote specific individual tourism product prices
- Booking and coordinating a supplier service for the customer
- Comparing information offered from different suppliers
- Evaluating products and services, including suppliers, providers, destinations, offers and carriers
- Updating databases and information inventories and files
- Reviewing customer information on identified target markets or target demographics.

2. What are examples of text-based information?

- Brochures, flyers and pamphlets
- Product manuals
- Supplier information and sales kits
- Confidential and general industry tariffs
- Preferred contracts or agreements
- Clue cards
- Fare sheets
- Industry publications, advices and notices
- Media articles
- Travel literature
- Travel guides
- Newspapers and magazines
- Timetables
- Reports
- Summaries
- Marketing materials and books.

3. What are examples of image-based materials?

- Photographs
- Recordings
- Videos
- Posters
- Atlases and maps.

4. What are examples of 'destination information' you may gather?

- General destination information
- Statistical information
- Currency
- Maps
- Travel guides
- Events
- Languages
- Safety
- Government information
- Time zones
- Communications.

5. What are the three formats of presentations that can be made?

- Verbal presentation
- Hard-copy presentation
- Electronic presentation.

6. What are considerations when identifying timelines for passing on information to others?

- Resources required to source and present information
- When to conduct research and collect information
- When to analyse and review the information
- Who needs the information
- What is the best way to pass on information on to other stakeholders at one time
- Informs stakeholders of the key aspects of the information
- Provide advice how this information can be used to the benefit of the organisation and potential or existing customers.

7. What are considerations when establishing a budget to research and source information?

- Time allocation to undertake research
- Staff to undertake research or assist in the analysis, preparation and presentation of the material captured
- Funds to obtain secondary research data
- Funds to enable the undertaking of primary market research
- Materials, registrations, subscriptions and other activities necessary to register to receive or to purchase identified information.

8. What does 'scope of authority' mean?

- Defining authorities and abilities to second staff and delegate tasks
- Granting of authorities to make purchases on behalf of the enterprise and to make commitments on behalf of the organisation
- Establishing access protocols to internal information and databases
- Determining responsibilities and channels of communication related to the identified position
- Defining lines of authority.

9. What are examples of information you can gather from personal observations?

- Personal notes
- Report and findings
- Log books
- Records of interviews
- Notes of first-hand meetings.

10. How can you gather information from customers?

- Customer comment cards
- Interviews and follow up calls
- General discussion
- Observations.

11. What are methods used to search identified sources for information?

- Subscribing to publications
- Reading newspapers
- Getting on Internet e-mail lists
- Joining your local union or industry association
- Reading articles on the industry sector
- Getting out and having a look around
- Interrogating databases
- Asking
- Conducting web based searches
- Exploring options.

12. How can you identify information after you have collected it?

- Book marking websites
- Recording sources in a project-specific index
- Copy and pasting key points into separate files
- Highlighting key information
- Filing documents in a logical order.

13. What are reasons to seek external assistance when collecting or understanding information that has been collected?

- To gather further information
- For acquisition of specialised information
- To interpret existing information gathered
- Provide findings and recommendations
- To clarify information
- To answer any questions.

14. What are options that can be used for storing information you have collected?

- Manual filing systems
- Computerised systems
- Combination of the above.

15. What are sources of online information?

- Electronic communication
- Internet websites
- Computerised Reservation System (CRS)
- Global Distribution Systems (GDS).

16. What storage methods can be used for the storage of hard copy materials?

- Filing cabinets
- Suspension files
- Public area displays
- Back of house storage areas
- Personal information manual.

17. What are the benefits of visiting identified sources of information?

- Meet key personnel
- Talking with personnel to obtain, clarify, update and identify supplementary relevant information
- Gain an understanding of the operation
- Viewing operations and making personal observations
- Clarify and explain your request for information
- Receive electronic and hard copy files in a user friendly manner
- Reviewing additional information available at the source
- Get any questions answered
- Identify the potential of informational sources that can be utilised at a later date
- Recording interviews and taking photographs or other recorded images.

18. What are examples of internal sources of information?

- Customer databases
- Sales figures
- Internal reports
- Accounting and operational statistics
- Data from sub-agencies and head office
- Customer feedback information
- Automated information systems
- Computerised reservation systems
- Products and services inventories.

19. What are reasons for the need to request additional information?

- Request by management
- Direct questions from potential customers or staff
- Questions from potential customers or management
- Points raised by staff requiring clarification
- Additional information regarding a topic which is not detailed in existing materials
- New trends, regulations or industry issues.

20. What is the difference between ' qualitative' and ' quantitative' research?

Qualitative research: Qualitative research does not look at numbers but tries to find out the reasoning behind certain actions, procedures, activities or ways of thought.

Quantitative research: Quantitative research is market research, based on structured, closed-ended questionnaires, which aims to gather responses that can be summarised in numbers.

21. What are possible objectives when reviewing captured information?

- Confirming the applicability and utility of material researched and provided
- Determining degree of usefulness of the information
- Determining if additional information, material or data is required to meet identified needs
- Verifying the accuracy, relevance and sources of the data
- Ensuring that no obvious sources of information have been overlooked
- Meeting with the information user to check that the material gathered is appropriate for their needs
- Meeting with researchers to clarify points of ambiguity, as appropriate.

22. What is the purpose of interpreting information?

- Gaining further understanding of the information
- Identifying any questions you may have
- Identify the key points in which you may convey to stakeholders, colleagues or clients.

23. What are activities associated with manipulating captured information?

- Maintaining the integrity of the data at all costs
- Eliminating superfluous material
- Using identified information and statistics to generate fresh results
- Using statistical data in new calculations to produce fresh figures
- Over-laying data from one set of circumstances in comparison with a similar occurrence
- Generating statistical data.

24. What information is included in a draft report?

- Title Page
- Table of Contents
- Executive Summary
- Purpose of the Report
- Background Information
- Overall Evaluation Goals
- Methodology
- Interpretations and Conclusions
- Recommendations
- Appendices.

25. What are activities associated with presenting material for stakeholder feedback?

- Distributing drafts in accordance with identified internal end-user need
- Recording details of draft distribution
- Identifying timelines and procedures for feedback
- Ensuring the draft is identified as a draft copy
- Protecting the confidentiality of materials
- Obtaining confirmation that drafts have been received.

26. What revisions can be made to 'draft versions' of information based on the feedback from stakeholders?

- Deleting material
- Accepting or rejecting feedback
- Including additional material
- Revising conclusions, suggestions and summaries
- Providing new inclusions
- Revising format and presentation.

27. What needs to be planned when preparing copies of information for a presentation?

- Identifying the budget for production of final reports and presentations
- Identifying list of recipients
- Ensuring correct details of recipients
- Arranging personnel and resources to prepare materials
- Preparing original versions of material
- Using internal capabilities to compile, assemble, bind or otherwise display information
- Engaging the services of an external business to produce materials as required.
- Preparing support materials.

28. What are types of verbal presentations that can be made?

- One to one presentations
- Formal presentations
- Informal meetings
- Staff briefings
- Video conferencing
- Skype / Lync.

29. What are the benefits of distributing hard copy materials?

- Utilises an additional learning method
- Provides comprehensive information
- Provides appealing images
- Provides information in its intended message
- Enables the audience to review information at their own time and at their own pace
- Enables information to be reviewed on multiple purposes
- Enables the audience to show other people information as well
- Enables audience to become familiar with content.

30. What are the benefits of distributing electronic materials?

- It can be distributed to people around the world, regardless of location
 - It is a cost effective method of distributing information
 - It reduces storage space required for hard copy documents
 - it can be stored in shared 'cloud' systems for access by many people
 - Information stored in electronic systems can be updated easily.

Observation checklist

Student name	
Assessor name	
Location/venue	
Unit of competency	Source and present information D2.TGA.CL6.12
Dates of observation	
Instructions	- Over a period of time observe the student completing each of the following tasks: - Define the context for information - Research the identified information requirements - Capture the identified information - Prepare the captured information - Present the information - Enter the date on which the tasks were undertaken - Place a tick in the box to show they completed each aspect of the task to the standard expected in the enterprise - Complete the feedback sections of the form, if required.

Did the candidate	Yes	No
Element 1: Define the context for information		
Describe the identified need for the information	☐	☐
Determine the type of information required	☐	☐
List the potential sources of information for products and services	☐	☐
Determine presentation requirements for the required information	☐	☐
Identify the timelines for the information required	☐	☐
Identify budget for sourcing and presenting the information	☐	☐
Define the scopes of authority relating to research and information related activities	☐	☐

Did the candidate	Yes	No
Element 2: Research the identified information requirements		
Determine sources of information relevant to the identified information need	☐	☐
Arrange to receive information identified as necessary	☐	☐
Search the identified sources for information	☐	☐
Identify relevant information	☐	☐
Seek external assistance, as required	☐	☐
Element 3: Capture the identified information		
Establish files and folders to record identified information	☐	☐
Download electronic files from the internet	☐	☐
File hard copy material received	☐	☐
Visit identified sources	☐	☐
Extract data from internal information sources	☐	☐
Request additional information as circumstances determine	☐	☐
Undertake market research activities	☐	☐

Did the candidate	Yes	No
Element 4: Prepare the captured information		
Review the captured information	☐	☐
Analyse the captured information	☐	☐
Manipulate the captured information to meet identified needs	☐	☐
Produce required information in a draft format suitable to meet identified presentation requirements	☐	☐
Present draft material for feedback	☐	☐
Revise draft material on the basis of feedback received	☐	☐
Prepare sufficient supplies of information to meet identified requirements	☐	☐
Element 5: Present the information		
Make a verbal presentation of the material	☐	☐
Distribute hard copy materials to identified users	☐	☐
Post electronic material as required	☐	☐
Did the student's overall performance meet the standard?	☐	☐
